FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register.**

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5162 of March 17, 1984

National Energy Education Day, 1984

By the President of the United States of America

A Proclamation

America's vast energy resources are among its greatest assets. Intelligent use of our existing energy supplies together with prudent conservation measures and development of alternative sources of supply will allow this country to maintain its position of world leadership and help ensure a higher standard of living and greater prosperity for all our people.

The shift in Government policy away from artificial controls to an emphasis on free market forces has produced adequate supplies of energy at affordable prices. The impact of this policy shift was clearly demonstrated by deregulation of petroleum prices, which resulted in greater production of energy, more efficient use of energy, and lower energy costs for consumers. We anticipate a similar experience with the move toward a freer market in natural gas.

Fundamental changes in the energy future of the United States and moves toward even greater energy security require that all grade levels of the American educational system prepare our youth for the new demands and challenges that lie ahead. In recognition of this fact and to bring together students, teachers, school officials, and community officials to focus on the need for a greater understanding of energy issues, Congress has, by Senate Joint Resolution 146, requested the President to proclaim March 23, 1984, as "National Energy Education Day."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim March 23, 1984, as National Energy Education Day. I call upon educational institutions, Federal agencies, and all Americans to participate in appropriate ceremonies and activities on that day.

IN WITNESS WHEREOF, I have hereunto set my hand this seventeenth day of March, in the year of our Lord nineteen hundred and eighty-four, and of the Independence of the United States of America the two hundred and eighth.

Ronald Reagan

Proclamation 5163 of March 17, 1984

National Organ Donation Awareness Week, 1984

By the President of the United States of America

A Proclamation

One of the most meaningful gifts that one human being can bestow upon another is the precious gift of life. It can be given simply by making arrangements to donate our organs or those of our loved ones after death. Donation of our corneas would give others the gift of sight; donation of our kidneys, hearts, lungs, livers, and pancreata could save the lives of many people who might otherwise die.

On several occasions during the last year, I have asked the American people to be aware of the opportunities to donate their organs, and I have made special pleas for small children in need of liver transplants. The response proved to be overwhelming. Tragically, however, many desperately ill persons, including small children, have died while awaiting a suitable organ.

Ironically, recent surveys indicate that about 93 percent of all Americans have heard about organ transplants, but the need for organs far surpasses the number donated each year. Our organ procurement system is being managed effectively by the private sector but can be improved to meet a larger portion of the need. For these reasons, I supported the establishment of the American Council on Transplantation. The primary goal of this national umbrella organization is to increase the availability of organs for transplantation.

It is appropriate that we as a Nation encourage organ donation and increase public awareness of the need for such donations. By filling out a uniform donor card and carrying it, and by making our wishes of donation known to our families, we may give the gift of life to people who so desperately need solid organs for transplantation, an exceedingly scarce resource.

Americans are a caring and giving people. I have heard from many Americans who have lost their loved ones in tragic accidents, but who have found sblace in knowing that through their loss other lives were saved.

The Congress, by House Joint Resolution 229, has authorized and requested the President to issue a proclamation designating the week beginning April 22, 1984, as "National Organ Donation Awareness Week."

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby designate the week of April 22 through April 28, 1984, as National Organ Donation Awareness Week. I urge all citizens, health care professionals, educators, the media, and the public and private organizations concerned with organ donation and transplantation to join me in supporting this humanitarian action.

IN WITNESS WHEREOF, I have hereunto set my hand this seventeenth day of March, in the year of our Lord nineteen hundred and eighty-four, and of the Independence of the United States of America the two hundred and eighth.

Proclamation 5164 of March 19, 1984

Import Fees on Certain Sugars, Sirups and Molasses

By the President of the United States of America

A Proclamation

By Proclamation 4887 of December 23, 1981, and Proclamation 4940 of May 5, 1982, I imposed, on an emergency basis, import fees on certain sugars, sirups and molasses. These fees were to be effective pending my further action after receipt of the report of findings and recommendations of the United States International Trade Commission after its investigation with respect to this matter pursuant to section 22 of the Agricultural Adjustment Act of 1933, as amended (7 U.S.C. 624). The Commission has made its investigation and reported its findings and recommendations to me.

On the basis of the information submitted to me, I find and declare that:

(a) Sugars classified under items 155.20 and 155.30 of the Tariff Schedules of the United States (TSUS) (19 U.S.C. 1202) are being or are practically certain to be imported into the United States under such conditions and in such quantities as to render or tend to render ineffective, or materially interfere with, the price support operations being conducted by the Department of Agriculture for sugar cane and sugar beets.

(b) The imposition of the import fees hereinafter proclaimed is necessary in order that the entry, or withdrawal from warehouse for consumption, of such sugars will not render or tend to render ineffective, or materially interfere with, the price support operations being conducted by the Department of Agriculture for sugar beets and sugar cane.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by the authority vested in me by section 22 of the Agricultural Adjustment Act of 1933, as amended, and the statutes of the United States, including section 301 of Title 3 of the United States Code, do hereby proclaim until otherwise superseded by law:

A. Headnote 4 of part 3 of the Appendix to the TSUS is continued in effect and amended, effective 12:01 a.m. Eastern Standard Time of the day following the date of the signing of this proclamation, by changing paragraph (c) to read as follows:

(c)(i) The quarterly adjusted fee provided for in items 956.05 and 957.15 shall be the amount of the fee for item 956.15 plus one cent per pound.

(ii) The quarterly adjusted fee provided for in item 956.15 shall be the amount by which the average of the adjusted daily spot (domestic) price quotations for raw sugar for the 20 consecutive market days immediately preceding the 20th day of the month preceding the calendar quarter during which the fee shall be applicable (as reported by the New York Coffee, Sugar and Cocoa Exchange) expressed in United States cents per pound, in bulk, is less than the applicable market stabilization price: *Provided*, That whenever the average of the daily spot (domestic) price quotations for 10 consecutive market days within any calendar quarter (1) exceeds the market stabilization price by more than one cent, the fee then in effect shall be decreased by one cent per pound, or (2) is less than the market stabilization price by more than one cent, the fee then in effect shall be increased by one cent per pound. The adjusted daily spot (domestic) price quotation for any market day shall be the daily spot (domestic) price quotation for such market day less the amount of the fee for item 956.15 that is in effect on that day. For any market day for which the New York Coffee, Sugar and Cocoa Exchange does not report a daily spot (domestic) price for raw sugar, then the Secretary of Agriculture (the Secretary) shall use such other price as he determines appropriate.

(iii) The market stabilization price that shall be applicable to each fiscal year (October 1–September 30) shall be determined and announced by the Secretary in accordance with this headnote no later than 30 days prior to the beginning of the fiscal year for which such market stabilization price shall be applicable. The market stabilization price shall be equal to the sum of: (1) the price support level for the applicable fiscal year, expressed in cents per pound of raw cane sugar; (2) adjusted average transportation costs; (3) interest costs, if applicable; and (4) 0.2 cent. The adjusted average transportation costs shall be the weighted average cost of handling and transporting domestically produced raw cane sugar from Hawaii to Gulf and Atlantic Coast ports, as determined by the Secretary. Interest costs shall be the amount of interest, as determined or estimated by the Secretary, that would be required to be paid by a recipient of a price support loan for raw cane sugar upon repayment of the loan at full maturity. Interest costs shall only be applicable if a price support loan recipient is not required to pay interest upon forfeiture of the loan collateral.

(iv) Notwithstanding the provisions of paragraph (iii) hereof, if the Secretary determines that there is a significant change in any one or more of the elements comprising the market stabilization price during the fiscal year, the Secretary shall adjust the market stabilization price within the fiscal year to reflect such change. The Secretary shall announce any such adjusted market stabilization price and file notice thereof with the **Federal Register**. This adjusted market stabilization price will become effective the first calendar quarter following its announcement or, if the Secretary announced it less than 30 days before the beginning of a new calendar quarter, then it will become effective the second calendar quarter following its announcement. Any adjusted market stabilization price, once effective, shall remain in effect through the remainder of the fiscal year unless it is adjusted further in accordance with this paragraph.

(v) The Secretary shall determine the amount of the quarterly fees in accordance with this headnote and shall announce such fees not later than the 25th day of the month preceding the calendar quarter during which the fees shall be applicable. The Secretary shall certify the amount of such fees to the Commissioner of Customs and file notice thereof with the **Federal Register** prior to the beginning of the calendar quarter during which the fees shall be applicable. The Secretary shall determine and announce any adjustment in the fees made within a calendar quarter in accordance with the proviso of paragraph (ii) hereof, shall certify such adjusted fees to the Commissioner of Customs, and shall file notice thereof with the **Federal Register** within 3 market days of the fulfillment of that proviso.

(vi) If an adjustment is made in the fee in accordance with the proviso of paragraph (ii) hereof, any subsequent adjustment made within that quarter shall only be made on the basis of the average spot price for any 10 consecutive market day period following the effective date of the immediately preceding fee adjustment. No adjustment shall be made in any fee in accordance with the proviso of paragraph (ii) hereof during the last fifteen market days of a calendar quarter.

(vii) Any adjustment made in a fee during a quarter in accordance with the proviso of paragraph (ii) hereof shall be effective only with respect to sugar entered or withdrawn from warehouse for consumption after 12:01 a.m. (local time at point of entry) on the day following the filing of notice thereof with the **Federal Register**: *Provided*, That such adjustment in the fee shall not apply to sugar exported (as defined by Customs in accordance with 19 CFR 152.1) on a through bill of lading to the United States from the country of origin before such time. The exemption contained in the preceding proviso shall apply regardless of whether the adjustment in the fee is upward or downward.

B. Items 956.05, 956.15 and 957.15 of part 3 of the Appendix to the TSUS are continued in effect and the "Rates of Duty (Section 22 Fees)" are amended to read as follows:

Item	Articles	Rates of Duty (Section 22 Fees)
	Sugars, sirups and molasses derived from sugar cane or sugar beets, except those entered pursuant to a license issued by the Secretary of Agriculture in accordance with headnote 4(a):	
	Principally of crystalline structure or in dry amorphous form, provided for in item 155.20, part 10A, schedule 1:	
956.05	Not to be further refined or improved in quality	An amount determined and adjusted in accordance with headnote 4(c), but not in excess of 50% ad val.
956.15	To be further refined or improved in quality	An amount determined and adjusted in accordance with headnote 4(c), but not in excess of 50% ad val.

Item	Articles	Rates of Duty (Section 22 Fees)
957.15	Not principally of crystalline structure and not in dry amorphous form, containing soluble non-sugar solids (excluding any foreign substance that may have been added or developed in the product) equal to 6% or less by weight of the total soluble solids, provided for in item 155.30, part 10A, schedule 1.	An amount determined and adjusted in accordance with headnote 4(c) per pound of total sugars, but not in excess of 50% ad val.

C. The Secretary of Agriculture, in consultation with other appropriate agencies, shall review the fee system established by this Proclamation on a quarterly basis and shall submit to me any recommendations for any changes determined to be necessary or appropriate.

D. The provisions of this proclamation shall terminate upon the filing of a notice in the **Federal Register** by the Secretary of Agriculture that the Department of Agriculture is no longer conducting a price support program for sugar beets and sugar cane.

E. The provisions of Proclamation 4940 of May 5, 1982, are hereby terminated, except that the import fees on items 956.15, 956.05 and 957.15 presently in effect and the market stabilization price determined and announced by the Secretary of Agriculture for fiscal year 1984 (October 1, 1983–September 30, 1984) shall remain in effect, unless adjusted by the Secretary of Agriculture in accordance with paragraph (c) of Headnote 4 of part 3 of the Appendix to the TSUS, as modified herein.

F. This proclamation shall be effective as of 12:01 a.m. Eastern Standard Time on the day following the date of its signing, and shall apply to articles entered, or withdrawn from warehouse for consumption, on or after such effective date.

IN WITNESS WHEREOF, I have hereunto set my hand this 19th day of March, in the year of our Lord nineteen hundred and eighty-four, and of the Independence of the United States of America the two hundred and eighth.

Rules and Regulations

Federal Register
Vol. 49, No. 56
Wednesday, March 21, 1984

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

7 CFR Part 2

Revision of Delegations of Authority

AGENCY: Department of Agriculture.

ACTION: Final rule.

SUMMARY: This document amends the delegations of authority from the Secretary of Agriculture and general officers of the Department to revise the title of the Director, Office of Grants and Programs Systems to the Administrator, Office of Grants and Program Systems, to delegate to the Assistant Secretary for Science and Education and the Administrator, Office of Grants and Program Systems responsibilities under the Small Business Innovation Development Act of 1982, and to clarify the authority of the Administrator to administer the competitive grants program.

EFFECTIVE DATE: March 21, 1984.

FOR FURTHER INFORMATION CONTACT: Robert Siegler, Acting Assistant General Counsel, Office of the General Counsel, U.S. Department of Agriculture, Washington, D.C., (202) 447–6035.

SUPPLEMENTARY INFORMATION: The delegations of authority of the Department of Agriculture are revised to reflect the change in the title of the Director, Office of Grants and Programs Systems to the Administrator, Office of Grants and Program Systems. Although the correct title of the Office is the Office of Grants and Program Systems, the delegations to the Director inadvertently used the word "Programs." Also, it has been determined that the head of that Office should be an Administrator rather than a Director. This document makes those changes. In addition, the delegations of authority to the Assistant Secretary for Science and Education and the Administrator, Office of Grants and Program Systems are revised to reflect the assignment of responsibility to administer the Small Business Innovation Development Act of 1982. In addition, the Administrator, Office of Grants and Program Systems is delegated the authority to enter into grants pursuant to 7 U.S.C. 3318 to carry out the Department's Small Business Innovation Research Program. Further, the delegations of authority to the Administrators, Office of Grants and Program Systems and Cooperative State Research Service are revised to clarify the authority of the Administrator, Office of Grants and Program Systems to administer the competitive grants program authorized under 7 U.S.C. 450i.

This rule relates to internal management. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect thereto are impractical and contrary to the public interest and good cause is found for making this rule effective less than 30 days after publication in the **Federal Register.** Further, since this rule relates to internal agency management, it is exempt from the provisions of Executive Order 12291. Finally, this action is not a rule as defined by the Regulatory Flexibility Act, and thus is exempt from the provisions of that Act.

List of Subjects in 7 CFR Part 2

Authority delegations (Government agencies).

PART 2—DELEGATIONS OF AUTHORITY BY THE SECRETARY OF AGRICULTURE AND GENERAL OFFICERS OF THE DEPARTMENT

Accordingly, Part 2, Subtitle A, Title 7, Code of Federal Regulations is amended as follows:

1. The authority citation for Part 2 reads as follows:

Authority: 5 U.S.C. 301 and Reorganization Plan No. 2 of 1953, except as otherwise stated.

Subpart C—Delegations of Authority to the Deputy Secretary, the Under Secretary for International Affairs and Commodity Programs, the Under Secretary for Small Community and Rural Development, and Assistant Secretaries

2. Section 2.30 is amended by adding a new paragraph (a)(77) to read as follows:

§ 2.30 Delegations of authority to the Assistant Secretary for Science and Education.

* * * * *

(a) * * *

(77) Administer the Small Business Innovation Development Act of 1982 for the Department of Agriculture (15 U.S.C. 638 (e)–(k)).

* * * * *

Subpart N—Delegations of Authority by the Assistant Secretary for Science and Education

3. Section 2.107 is amended by revising paragraph (a) (3) to read as follows:

§ 2.107 Administrator, Cooperative State Research Service.

(a) * * *

(3) Administer a program of special grants (1) to carry out research to facilitate or expand promising breakthroughs in areas of food and agricultural sciences, and (2) to facilitate or expand ongoing State-Federal food and agricultural research programs; and administer a program of facilities grants to renovate and refurbish research spaces (7 U.S.C. 450i(c), (d)).

* * * * *

Section 2.110 is amended by revising the heading, the introductory paragraph, and paragraph (a)(1), by redesignating paragraphs (a)(4) and (a)(5) as (a)(6) and (a)(7) respectively, and by adding new paragraphs (a(4) and (a)(5) to read as follows:

§ 2.110 Delegations of authority to the Administrator, Office of Grants and Program Systems.

(a) *Delegations.* Pursuant to § 2.30(a), subject to reservations in § 2.30a, the following delegations of authority are made by the Assistant Secretary for Science and Education to the

Administrator, Office of Grants and Program Systems:

(1) Administer a program of competitive grants to State agricultural experiment stations, colleges and universities, other research institutions and organizations, Federal agencies, private organizations or corporations and individuals for research to further the programs of the Department of Agriculture (7 U.S.C. 450i(b)).

* * * * *

(4) Administer the Small Business Innovation Development Act of 1982 for the Department of Agriculture (15 U.S.C. 638(e)(k)).

(5) Enter into grants for the purpose of carrying out the Department's Small Business Innovation Research Program (7 U.S.C. 3318).

* * * * *

For Subpart C:

John R. Block,

Secretary of Agriculture.

For Subpart N.

Orville G. Bentley,

Assistant Secretary for Science and Education.

March 15, 1984.

BILLING CODE 3410-01-M

Agricultural Marketing Service

7 CFR Parts 56, 59, and 70

Increase in Fees and Charges; Poultry, Rabbit, and Egg Grading and Egg Products Inspection; Interim Rule Made Final

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: The interim rule with request for comments published January 19, 1984 (49 FR 2223) which increased fees and charges for poultry, rabbit, and egg grading and egg products inspection is made final. These changes are necessary to cover increased costs associated with the programs. This document finalizes charges for the Federal voluntary egg, poultry, and rabbit grading; and the overtime rate for Federal mandatory egg products inspection as revised in the interim final rule.

EFFECTIVE DATE: March 21, 1984.

FOR FURTHER INFORMATION CONTACT: D. M. Holbrook, (202) 447-3506.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures established in accordance with Executive Order 12291, and has been classified "nonmajor" as it does not meet the criteria contained therein for major regulatory actions. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has determined that this action will not have a significant economic impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), because: (i) The fees and charges merely reflect, on a cost-per-unit-graded/inspected basis, a minimal increase in the costs currently borne by those entities utilizing the services; and (ii) competitive effects are offset under the major voluntary programs (resident shell egg and poultry grading) through administrative charges based on the volume of product handled; i.e. the cost to users increases in proportion to increased volume.

The Agricultural Marketing Act of 1946, as amended, provides for the collection of fees approximately equal to the cost of providing Federal voluntary egg, poultry, and rabbit grading. The Egg Products Inspection Act requires that the cost for overtime inspection be borne by the user of the service. The fees for these services are determined by the grader's or inspector's salary and fringe, cost of supervision, travel, and other overhead and administrative costs.

Last year's fee increase was based primarily on a 4.0-percent salary increase and a loss in appropriated funding used to offset a portion of overhead costs. Since then, program costs have continued to rise.

Federal employees received in January 1984 a 3.5-percent increase in conformity with the Federal Pay Comparability Act of 1970. Likewise, payments for workmen's compensation and medicare have increased 0.5 percent and approximately 0.1 percent, respectively.

Costs of supervision and other overhead and administrative costs have also increased for the same reasons. They are covered by an administrative service charge assessed on each case of shell eggs and each pound of poultry handled in plants using resident grading service. In 1982, these rates were established at $0.024 per case of shell eggs and $0.00024 per pound of poultry. Through the interim rule, these rates have been changed to $0.025 per case of shell eggs and $0.00025 per pound of poultry. Also, these charges were set at a minimum of $120 and a maximum of $1,200 per billing period for each official plant in 1982. These figures have been changed to $125 and $1,250, respectively.

Due to the situtations described above, the hourly rate for mandatory overtime egg products inspection service has been increased from $16.56 to $17.20. Administrative charges for the resident voluntary rabbit grading and nonresident voluntary continuous poultry and egg grading programs will continue to be based on 25 percent of the grader's total salary costs. The minimum charge per billing period for these programs has been increased from $120 to $125 per official plant.

Overall, fees and charges have been increased about 3.5 percent.

Because increased revenues were needed to cover costs of services, an interim final rule published January 19, 1984, with an effective date of February 1, 1984, was necessary. The interim rule invited comments until February 15, 1984. However, no comments were received during the comment period. And, since this document does not alter the regulations which have been in effect since February 1, 1984, there is no reason to postpone its effective date for 30 days. Thus, good cause is found to make this document effective upon publication.

Information Collection Requirements and Recordkeeping

Information collection requirements and recordkeeping provisions contained in 7 CFR Parts 56, 59, and 70 have been approved by the Office of Management and Budget (OMB) under the provisions of 44 U.S.C. Chapter 35. As a result, 7 CFR Part 56 has been assigned OMB No. 0581-0128; 7 CFR Part 59 has been assigned OMB Nos. 0581-0113 and 0581-0114; and 7 CFR Part 70 has been assigned OMB No. 0581-0127.

List of Subjects

7 CFR Part 56

Shell eggs, Voluntary grading service.

7 CFR Part 59

Shell eggs, Egg products, Mandatory inspection service.

7 CFR Part 70

Poultry, Poultry products, Rabbits products, Voluntary grading service.

Accordingly, for reasons and purposes stated above and in the interim final rule published January 19, 1984 (49 FR 2223), the amendments made to §§ 56.52 and 56.54 of Part 56; § 59.126 of Part 59; and §§ 70.76 and 70.77 of Part 70; Title 7, Code of Federal Regulations, by the said interim rule are hereby made final, without any change.

(Agricultural Marketing Act of 1946, as amended (7 U.S.C. 1621 *et seq.*); Egg Products Inspection Act (21 U.S.C. 1031-1056))

Done at Washington, D.C. on March 14, 1984.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

BILLING CODE 3410-02-M

Federal Crop Insurance Corporation

7 CFR Part 432

Corn Crop Insurance Regulations

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: This action makes final a revision and reissuance of the Corn Crop Insurance Regulations (7 CFR Part 432), effective for the 1983 and succeeding crop years. The revision and reissuance of these regulations was implemented by the Federal Crop Insurance Corporation (FCIC) on an interim basis to provide insureds with sufficient time to consider changes being made in the policy for insuring corn and to comply with the regulations with respect to placing these changes on file in a timely manner.

EFFECTIVE DATE: March 21, 1984.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, D.C., 20250, telephone (202) 447-3325.

SUPPLEMENTARY INFORMATION: On December 21, 1982, FCIC published an interim rule in the **Federal Register** at 47 FR 56827, revising and reissuing the Corn Crop Insurance Regulations (7 CFR Part 432), effective for the 1983 and succeeding crop years to: (1) Include a provision to require the insured to file a notice of probable loss when the crop is damaged to the extent that a loss is probable and to leave intact a representative sample of the unharvested crop; (2) prescribe the interest rate to be charged on any unpaid premium balances; (3) add a provision to provide a replanting payment limited to the actual cost of replanting such payment to be considered as an indemnity payment deducted from any additional loss; (4) define FCIC's liability in cases of loss due to fire when the insured has other insurance against fire; (5) delete a section of the regulations requiring posting of indemnities paid within a county; (6) eliminate the provision providing reduction in guarantee for any unharvested acreage; (7) eliminate the provision for substitute crops; (8) provide improved coverage in cases where the producer elects not to have FCIC fire and hail coverage and buys an equal amount of such coverage from private companies; (9) provide a policy that is written in clearer, easier to understand language; and (10) include a revised multi-crop application form to replace the former single-crop application. The intended effect of this rule was to revise the system of reporting damage or loss to an insured crop, improve the debt management practices of FCIC, rewrite the policy in clearer language, remove certain restrictions in the policy, and, reduce the time and paperwork demands on the applicant, in addition to the review of these regulations in compliance with the provisions of Secretary's Memorandum No. 1512-1 (June 11, 1981) now Departmental Regulation 1512-1 (December 15, 1983).

In accordance with the provisions of these regulations for insuring corn, any amendments to these regulations must have been placed on file 15 days prior to the cancellation date in order to provide sufficient time for the policyholder to consider the changes being made. There would not have been sufficient time for notice and public comment prior to the implementation of this rule and still comply with the regulations with respect to placing this rule on file in the required time to be effective for the 1983 crop year.

Merritt W. Sprague, Manager, FCIC, has determined that (1) this action is not a major rule as defined by Executive Order No. 12291 (February 17, 1981), (2) this action will not increase the Federal paperwork burden for individuals, small businesses, and other persons, and (3) this action conforms to the Federal Crop Insurance Act, as amended (7 U.S.C. 1501 *et seq.*), and other applicable law.

The title and number of the Federal Assistance Program to which these regulations apply are: Title—Crop Insurance; Number 10.450.

As set forth in the final rule related notice to 7 CFR Part 3051, Subpart V (48 FR 29116, June 24, 1983), the Federal Crop Insurance Corporation's program and activities, requiring intergovernmental consultation with State and local officials, are excluded from the provisions of Executive Order No. 12372.

It has been determined that this action is exempt from the provisions of the Regulatory Flexibility Act; therefore, no Regulatory Impact Statement was prepared.

It has also been determined that this action constitutes a review as to the need, currency, clarity, and effectiveness of these regulations under the provisions of Departmental Regulation 1512-1. The sunset review date established for these regulations is December 1, 1987.

List of Subjects in 7 CFR Part 432

Crop Insurance, Corn.

Final rule

Accordingly, the Interim Rule, published in the **Federal Register** of December 21, 1982, on page 56827, is hereby adopted as final.

Done in Washington, D.C., on January 25, 1984.

Peter F. Cole,

Secretary, Federal Crop Insurance Corporation.

Approved by:

Edward Hews,

Acting Manager.

March 13, 1984.

BILLING CODE 3410-08-M

Agricultural Marketing Service

7 CFR Part 910

[Lemon Reg. 454, Amdt. 2]

Lemons Grown in California and Arizona; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action increases the quantity of fresh California-Arizona lemons that may be shipped to the fresh market to 295,000 cartons during the period March 11-17, 1984. Such action is needed to provide for orderly marketing of fresh lemons for the period specified due to the marketing situation confronting the lemon industry.

EFFECTIVE DATES: March 11-17, 1984.

FOR FURTHER INFORMATION CONTACT: William J. Doyle, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202-447-5975.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under Secretary's Memorandum 1512-1 and Executive Order 12291 and has been designated a "non-major" rule. William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

This final rule is issued under Marketing Order No. 910, as amended (7 CFR Part 910) regulating the handling of

lemons grown in California and Arizona. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Lemon Administrative Committee and upon other available information. It is hereby found that this action will tend to effectuate the declared policy of the Act.

This action is consistent with the marketing policy currently in effect. The committee met by telephone on March 14, 1984, to consider the current and prospective conditions of supply and demand and recommended and increase in the quantity of lemons deemed advisable to be handled during the specified week. The committee reports the demand for lemons is strong.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the Federal Register (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this amendment is based and the effective date necessary to effectuate the declared policy of the Act, and it relieves restrictions on the handling of lemons. It is necessary to effectuate the declared purposes of the Act to make this regulatory provision effective as specified, and handlers have been apprised of such provision and the effective time.

List of Subjects in 7 CFR Part 910

Marketing agreements and orders, California, Arizona, Lemons.

PART 910—[AMENDED]

1. Section 910.754 Lemon Regulation 454 is revised to read as follows:

§ 910.754 Lemon Regulation 454.

The quantity of lemons grown in California and Arizona which may be handled during the period March 11, 1984, through March 17, 1984 is established at 295,000 cartons.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 16, 1984.

Russell L. Hawes,

Acting Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 84-7585 Filed 3-20-84; 8:45 am]

BILLING CODE 3410-02-M

VETERANS ADMINISTRATION

38 CFR Part 17

Treatment of Veterans in Noncontiguous States, Territories and Possessions

AGENCY: Veterans Administration.

ACTION: Final regulations.

SUMMARY: The Veterans Administration is amending its medical regulations (38 CFR Part 17) to extend the authority for treating veterans at VA expense in non-VA facilities outside of the United States as authorized by Public Law 98–105. This amendment will permit continuation of a benefit already available to eligible veterans.

EFFECTIVE DATE: March 14, 1984.

FOR FURTHER INFORMATION CONTACT: Joseph F. Fleckenstein, Chief, Policies and Procedures Division (136F), Department of Medicine and Surgery, Veterans Administration, 810 Vermont Avenue, NW., Washington, D.C. 20420, (202) 389–3785.

SUPPLEMENTARY INFORMATION: Public Law 98–105 extended from September 30, 1983, to September 30, 1984, the authority for treating veterans in Puerto Rico, the Virgin Islands and other Territories and Possessions through contract services in non-VA facilities.

The Administrator has determined that this amendment to VA regulations is considered nonmajor under the criteria of Executive Order 12291, Federal Regulation. It will not have an annual effect on the economy of $100 million or more; it will not result in major increases in costs for consumers, individual industries, Federal, State or local government agencies, or geographic regions, nor will it have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The VA finds that advance publication for public notice and comments is unnecessary and not required. These changes are primarily date changes reflecting a one-year statutory extension to an already existing benefit. The regulation changes will not have independent effect. Therefore, the changes come within exceptions to the general VA policy of prior publication for public notice and comment, contained in 38 CFR 1.12. Accordingly, the changes are now published as final regulations.

Since a proposed rule will not be published, these amendments do not come within the term "rule" as defined in the Regulatory Flexibility Act, 5 U.S.C. 601(2). Therefore, these changes are not subject to that act. In any case, the changes will not have a significant economic impact on a substantial number of small entities because they concern the entitlement of individual veterans and their beneficiaries, and do not have independent effect.

(Catalog of Federal Domestic Assistance Numbers: 64.009 and 64.011)

List of Subjects in 38 CFR Part 17

Alcoholism, Claims, Dental health, Drug abuse, Foreign relations, Government contracts, Grants programs—health, Health care, Health facilities, Health professions, Medical devices, Medical research, Mental health programs, Nursing homes, Philippines, Veterans.

Approved: March 14, 1984.

By direction of the Administrator.

Everett Alvarez, Jr.,

Deputy Administrator.

PART 17—[AMENDED]

§ 17.506 [Amended]

In 38 CFR Part 17, Medical, § 17.50b, paragraph (e) is amended by changing the year on the date in the last sentence of the paragraph to "1984"; and by adding to the end of the public laws listed in the cite following the paragraph the public law "Pub. L. 98–105".

BILLING CODE 8320-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-1 FRL 2549-6]

Approval and Promulgation of Implementation Plans; Connecticut; 1982 Ozone and Carbon Monoxide Attainment Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA is approving the State Implementation Plan revisions submitted by the State of Connecticut. These revisions will reduce emissions from stationary and mobile sources. The intended effect of these actions is to control emissions of volatile organic compounds, oxides of nitrogen and carbon monoxide in order to attain the National Ambient Air Quality Standards

for ozone and carbon monoxide as required under Part D of the Clean Air Act.

EFFECTIVE DATE: April 20, 1984.

ADDRESSES: Copies of the submittal are available for public inspection at Room 2313, JFK Federal Building, Boston, MA 02203; Public Information Reference Unit, EPA Library, 401 M Street, SW, Washington, D.C. 20460; Office of the Federal Register, 1100 L Street, NW, Room 8401, Washington, D.C. 20408; and the Connecticut Department of Environmental Protection (DEP), Air Compliance Unit, 165 Capitol Avenue, Hartford, CT 06115.

FOR FURTHER INFORMATION CONTACT: Susan S. Hager, (617) 223–4873.

SUPPLEMENTARY INFORMATION: On February 3, 1983 (48 FR 5054) EPA published a Notice of Proposed Rulemaking (NPR) for the Connecticut 1982 Ozone and Carbon Monoxide State Implementation Plan (SIP) revisions. The NPR proposed to disapprove certain elements of the revisions. Based on commitments outlined in a letter dated January 7, 1983 from Stanley Pac, Commissioner of the DEP, EPA reconsidered its disapproval and on April 12, 1983 (48 FR 15658) published a second NPR which proposed full approval of the Connecticut 1982 SIP revisions. In response to EPA testimony presented to DEP during the State's public comment period and to EPA comments in the NPRs, Connecticut submitted on December 10, 1982, January 7 and 21, 1983, May 19, 1983, June 15, 1983, September 19, 1983, and December 15, 1983 final SIP revisions that, with minor exceptions described in this notice, correct deficiencies cited by EPA. Sections of the final 1982 SIP revisions which were changed from the proposal are explained in detail in this Notice. The rationale for EPA's actions on revisions which were not changed was explained in the NPRs and will not be restated here.

EPA received comments on the NPRs from four government agencies. A summary of each comment and EPA's response appears in the section of this Notice to which the comment applies. In addition to comments on specific sections of this Notice, the Connecticut Department of Transportation submitted a general comment critical of the first NPR's proposed disapproval. The publication of the second NPR proposing approval resolved this comment. After reviewing the final Connecticut 1982 SIP revisions and considering all comments received, EPA is approving the following:

1. The mobile, point, and area source emissions inventories for volatile organic compounds and oxides of nitrogen.

2. The hydrocarbon emissions growth margin.

3. The data base and attainment demonstration for ozone.

4. A schedule to adopt controls for gasoline tank trucks with a final compliance date of June 1985.

5. A schedule to adopt controls for external floating roof tanks with a final compliance date of November 1984.

6. Regulation 22a–174–20(ee) which limits emissions from major nonCTG sources of VOCs and the supporting narrative which commits to submitting each RACT determination to EPA for approval as a SIP revision.

7. The Connecticut Inspection and Maintenance Program and Regulations 22a–174–27 and 14–164c.

8. The transportation plan review portions of the SIP revisions and emission reduction goals for transportation measures.

9. The Reasonable Further Progress line for VOC emissions.

10. The carbon monoxide air quality data base.

11. The carbon monoxide attainment demonstration and Reasonable Further Progress line.

12. The resource commitments to implement the Connecticut 1982 SIP revisions.

13. The public participation and intergovernmental consultation portions of the plan revisions.

In the April 12, 1983 NPR, EPA also proposed approval of Regulation 19–508–20(*1*) limiting emissions from solvent metal cleaners and supporting narrative describing an educational program for automobile repair facilities. Final action on these revisions was published on February 1, 1984 at 49 FR 3988 and allowed EPA to rescind the moratorium on construction and modification of major VOC sources. These revisions were separated from other elements of the 1982 SIP revisions in order to expedite final action and rescind the moratorium as quickly as possible.

EPA's actions on the State submittals are discussed according to the following outline:

I. Ozone
A. Emissions Inventories
B. Air Quality Data
C. Attainment Demonstration
D. Stationary Source Controls
E. Inspection and Maintenance
F. Transportation Control Measures
G. Reasonable Further Progress

II. Carbon Monoxide
A. Air Quality Data
B. Attainment Demonstration and Reasonable Further Progress
C. Transportation Control Measures

III. Additional Requirements
A. Resources
B. Public Participation and Intergovernmental Consultation Documentation

IV. Final Action

I. Ozone

Connecticut is divided into four Air Quality Control Regions, but uses its State boundaries to define the analysis area for ozone. The final Connecticut 1982 State Implementation Plan revisions (Connecticut 1982 SIP revisions) combine a mix of strategies—stationary and mobile source—to achieve the necesary reductions. The Connecticut SIP is an "accommodative" SIP, which means that it provides for a VOC reduction greater than that needed to achieve ozone standards by 1987. This planned margin for growth will allow new sources to construct or existing sources to expand without being required to "offset" the new emissions by reducing emissions from an existing source. Offsets are required under New Source Review regulations in nonattainment areas where emission reductions provided for by the SIP are just adequate to attain standards.

A. Emissions Inventories

The NPR stated that the mobile source inventory was consistent with EPA guidance but noted deficiencies related to the point and area stationary source inventories. The proposed submittal had not provided documentation on how emissions data for point sources were derived. Connecticut has now added sample calculations to its stationary point source VOC inventory. Although some of the formulas were not from the most recent EPA emission inventory guidance, the difference between total emissions using the older factors as compared with current emission factors is not considered significant.

A second issue raised by the NPR was whether Connecticut underestimated emissions of area sources in several source categories. For two categories, cold cleaner degreasers and leaks from gasoline tank trucks, the State revised its emission estimates to account for sources omitted from the original inventory. In the third category, gasoline marketing, EPA has accepted the State's original estimates. Our acceptance is based on information from DEP that all sources were considered in the gasoline sales projection, the critical parameter used to predict emissions from this source category. The NPR proposed

approval of the emissions growth margin contingent upon DEP resolving questions on the area source inventory.

Changes to Connecticut's area source inventory do result in a slight increase in the growth margin, however, a more significant increase results from Connecticut's revised attainment demonstration. As discussed in Section I.C., Connecticut's new demonstration shows that a smaller VOC reduction is needed than was estimated by the analysis done as part of the 1979 SIP revisions. This smaller reduction target provides a larger margin for emissions growth than was presented in the proposal.

The New York Department of Environmental Conservation submitted comments on this section of the NPR. Its concern was that Connecticut had used 1976 and 1979 base years rather than a 1980 base year as required by EPA policy. In the proposal Connecticut used 1975 through 1977 ambient air quality data from its 1979 plan revisions to make an attainment demonstration and a 1980 base year for the emissions inventory. To reconcile these different base years, Connecticut used the current 1980 emissions data, but adjusted back to 1976 by adding and subtracting emissions to account for growth, business closings, and other new information. In the final submission Connecticut uses 1980–1982 ambient data, thus no adjustments to the 1980 emissions inventory were necessary. The New York DEC's comment is, therefore, resolved.

Final Action: EPA is approving the:

(1) Mobile source inventory
(2) Point source inventory
(3) Area source inventory
(4) Emissions growth margin

B. Air Quality Data

As was discussed in the NPR, Connecticut met the requirement to present current ozone-related data. No changes were made in the final, and no comments were received on this portion of the Connecticut 1982 SIP revisions.

Final Action: EPA is approving the ozone-related air quality data base.

C. Attainment Demonstration

The attainment demonstration prepared by the Connecticut DEP is a statewide analysis, using the worst case design value to determine a percentage VOC emission reduction to be applied in both urban and nonurban areas of the State. While a portion of Connecticut is part of the New York-New Jersey-Connecticut Interstate Air Quality Control Region (AQCR), Connecticut does not consider this area part of the New York metropolitan area for ozone planning purposes.

Consistent with EPA criteria for Approval of 1979 State Implementation Plan Revisions (43 FR 21673), EPA concurs with this position. EPA recommends that the urban area and all fringe areas of development be used for ozone control strategy planning and no part of Connecticut is within the New York urban area as defined by the U.S. Bureau of the Census. Further, we do not believe that the Southwestern portion of Connecticut can be considered a fringe development area because the population and VOC emission densities are significantly lower than those in the New York area, and emission source characteristics are also quite different. Additional information on this subject is in the Technical Support Document.

The NPR proposed approval of Connecticut's attainment demonstration contingent upon the submittal of additional information. The proposed 1982 SIP revisions presented the Standard EKMA analysis done as part of the 1979 plan revisions. The NPR cited EPA's requirement for Connecticut to analyze the most recent three years of ambient data to determine how the more current data could affect the plan and asked that the final revisions correct this deficiency.

To address this comment, DEP chose to perform a new Standard EKMA analysis using ambient data from 1980–1982. The results of the modeling are as follows:

OZONE SUMMARY TABLE

Nonattainment area	Design Value (ppm)	Receptor Location	Percent reduction required	Attainment year
Connecticut, statewide	.140	Stratford, CT	26	1987

In preparing the analysis, DEP looked at only those days which had violations attributable to Connecticut emission sources. EPA policy requires that the fourth highest percent reduction requirement in a three year period be used for the design value, thus assuring that, on average, standards will only be exceeded once per year. However, since the Metropolitan New York area had also used the Stratford monitor to establish its design value, Connecticut has used the design value analyzed as requiring the greatest reduction requirement of all days examined. By using the highest, rather than the fourth highest value, the Stratford area can be expected to have one standard exceedence in 1987 caused by emissions from the New York area and no exceedences caused by Connecticut emissions.

Since the DEP's analysis examines only monitoring sites within Connecticut, EPA, additionally, analyzed sites in Massachusetts, downwind of Connecticut. EPA's analysis shows no concentrations which would result in a greater reduction requirement than that found at the Stratford site.

The New York State Department of Environmental Conservation (DEC) made three comments on this section of the NPR. The first was that Connecticut should use the latest available ambient data. In the final submission, Connecticut did use data from 1980 through 1982 which was the most current data available at the time the analysis was prepared.

DEC's second comment was that Connecticut should use City-Specific EKMA as required by EPA policy. DEC acknowledged that, as discussed in the NPR, Connecticut's arguments against the use of City-Specific EKMA may be valid, but felt that since all other states in the New York-New Jersey-Connecticut Interstate Air Quality Control Region (AQCR) used City-Specific EKMA, Connecticut should also. EPA is approving Connecticut's analysis because Standard EKMA gives more conservative results than does City-Specific EKMA, and therefore, Connecticut has demonstrated to EPA's satisfaction that standard attainment is assured.

DEC's third comment was that the Connecticut portion of the New York-New Jersey-Connecticut Interstate AQCR should be required to reduce emissions by 60%, which is the percent reduction determined necessary to eliminate ozone violations caused by the New York City urban area. As discussed above, this comment is not applicable to Connecticut SIP. However, the State is pursuing additional state wide VOC controls and has committed to study and adopt measures which are later determined to be reasonable. EPA is approving the attainment demonstration as submitted, and will also encourage the State to adopt new control strategies as they become reasonable to implement.

Final Action: EPA is approving the ozone attainment demonstration.

D. Stationary Source Controls

The NPR proposed action on three categories of stationary source controls: (1) Sources covered by Group I Control Techniques Guidelines (CTG); (2) sources covered by Group II CTG's; and (3) all remaining major sources of volatile organic compounds (VOC).

1. EPA proposed approval of revisions to Connecticut Regulation 19–508–20(1) controlling solvent metal cleaners despite its exemption of cold cleaners at automobile repair facilities. To compensate for this exemption Connecticut revised the narrative of the SIP to provide for an educational program at such facilities. EPA separated this portion of the NPR and took final action on February 1, 1984 (49 FR 3988) to approve Connecticut SIP revisions addressing solvent metal cleaners.

That approval also allowed EPA to rescind the moratorium on growth or modification of major stationary sources in Connecticut which had been in effect since October 1982.

2. Connecticut has EPA-approved regulations for all but two applicable categories of the Group II CTG's. For the two remaining categories, gasoline tank trucks and external floating roof tanks, Connecticut has agreed to meet the schedule approved below for submitting final regulations.

3. To fulfill the 1982 SIP policy requirement to control non-CTG sources emitting 100 tons per year (TPY) or more of VOC's Connecticut submitted Regulation 19–508–20(ee). This "generic" regulation requires that Reasonably Available Control Technology (RACT) be individually assessed and applied to each major source not covered by a CTG. Since the regulation does not establish federally enforceable limitations, Connecticut revised the narrative portion of the SIP to state that source-specific RACT determinations will be submitted to EPA for approval as SIP revisions. Emission limitations on major sources of VOC's will, therefore, be federally enforceable.

Connecticut also submitted revisions to its generic VOC bubble regulation (19–508–20(cc)) which would allow additional sources to use a bubble to come into compliance with SIP requirements. The State also revised Regulations 19–508–20(aa), (bb) and (dd). Since we did not discuss these revisions in the NPRs, and therefore the public has not had the opportunity to comment on these revisions, we intend to publish a separate NPR describing these changes before taking final action.

Final Action: 1. EPA is approving the following schedule for submitting regulations to control gasoline tank trucks and external floating roof tanks:

Action	Date
Conduct a public hearing	Mar. 1983.
Adopt regulations	May 1984.
Voluntary compliance for gasoline tank trucks	June 1984.
Final compliance for gasoline tank trucks	June 1985.
Final compliance for external floating roof tanks.	Nov. 1984.

2. EPA is approving Regulation 19–508–20(ee) controlling major nonCTG sources of VOCs based on the supporting narrative, which interprets the regulation's use of the term "RACT" as the level of technology submitted and approved as RACT by EPA for individual sources subject to the regulation.

E. Inspection and Maintenance

Although Connecticut has been successfully operating an Inspection and Maintenance (I&M) program since January 1, 1983, at the time the NPR was published EPA had not received adequate documentation for the program. With the final SIP revisions, Connecticut submitted:

1. Department of Motor Vehicle (DMV) Regulation 14–164c which prescribes inspection test procedures, fleet inspection station licensing requirements, recordkeeping and record submittal requirements, and other official rules and procedures;

2. DEP Regulation 19–508–27 which sets forth idle emission standards for each model year required to be tested;

3. DMV's Fleet Emissions Inspection Program Handbook which describes emission analyzer specifications and quality control audit and surveillance procedures as well as providing information to support the DMV's regulation;

4. The memorandum of agreement between the DMV and the DEP outlining each agency's program responsibilities, and the contract with Hamilton Test Systems specifying how the centralized I&M program will be operated.

Additionally, the final SIP revisions contained sufficient data for EPA to calculate the effectiveness of the Connecticut I&M program. For both VOCs and carbon monoxide the program will reduce emissions in 1987 by more than that required by EPA policy.

Final Action: EPA is approving the Connecticut I&M program including DEP Regulation 19–508–27 and DMV Regulation 14–164c.

F. Transportation Measures

The NPR cited four areas of the Connecticut 1982 SIP revisions which did not fully meet EPA's policy requirements for transportation measures. The first was that the SIP revisions did not show emission reductions attributable to individual "reasonably available control measures" (RACMs) or packages of RACMs. The second area is closely related to the first and concerns the lack of commitment and schedules to support individual RACM projects. The State's position is that it has committed to achieve an emissions reduction goal of 1425 kg/day in 1987 with transportation measures but needs flexibility in choosing which projects will be implemented to meet the goal. This need for flexibility stems from the alleged difficulty in predicting when projects will be ready for construction, whether funding will be available, and whether all necessary approvals will be given.

The Federal Highway Administration (FHWA) commented specifically on this issue by stating it agreed that RACM measures should be explicitly identified. FHWA also noted that the reductions from transportation measures were not a major strategy of the Connecticut 1982 SIP revisions and therefore could not be viewed as critical to achieving the overall reductions needed to attain standards.

EPA believes that the adoption of individual projects and measures is preferable to the adoption of a total emissions reduction goal, but also recognizes that reductions from transportation measures are small when compared with the total reductions adopted in the plan. (Reductions from transportation measures account for approximately 1% of the total adopted emission reduction.) Although the Connecticut 1982 SIP revisions do not fully comply with EPA policy requirements to adopt individual projects, EPA does not believe that this is a serious enough deficiency to warrant disapproval. Without the adoption of projects, it follows that the plan revisions cannot include commitments and schedules for individual RACM project. However, EPA expects the State to report progress in RACM implementation as part of the annual RFP Report.

A third area cited as deficient was the portion of the plan revisions describing how transportation projects would be monitored to determine if predicted emission reductions were being achieved. The final SIP revisions correct the deficiency by describing the

methodology used by the Connecticut Department of Transportation to assess changes in vehicle miles of travel and in emissions statewide, and by describing how the I&M and the rideshare programs will be monitored.

In the fourth area, conformity provisions, EPA asked for clarification of plan, program, and project level conformity procedures. The State complied by assuring an annual conformity statement will be made each year showing that the emission reduction targets are being met and that RACM projects are advancing toward implementation.

Comments received from FHWA were critical of the conformity provisions because "nonconformity restrictions proposed by the State go beyond those required by the federal level." Specifically FHWA feels that the Indirect Source Review, which applies only to highway projects, should not be retained. FHWA believes that the National Environmental Policy Act (NEPA) process reinforces the SIP without the need for additional regulation. While EPA agrees that the Connecticut provisions are more comprehensive than the requirements issued jointly by FHWA and the Urban Mass Transportation Administration, and endorsed in principle by EPA, EPA does not agree that the Connecticut SIP revisions should be amended. The revisions, as written, assure that transportation plans, programs, and projects will be consistent with the SIP and thus meet EPA policy requirements.

EPA takes no position on the issue of whether the Indirect Source Review should be retained. The State must have a process to determine that transportation projects will conform to the SIP, but need not use an Indirect Source Review regulation to accomplish this objective. The State has chosen this approach; it meets EPA policy requirements, and is approvable.

Despite these comments, FHWA agreed with EPA's general conclusion to accept the transportation element of the SIP. The Urban Mass Transportation Administration also expressed support of EPA approval, stating that the proposed actions were reasonable and appropriate.

Final Action: EPA is approving the transportation plan review portions of the 1982 Connecticut SIP revisions and the emission reductions goals for transportation measures.

G. Reasonable Further Progress

The proposed revisions showed that the State would attain standards by 1987 with a margin of growth for new or modified sources of VOC emissions. As explained in the NPR, EPA proposed acceptance of the Reasonable Further Progress line but questioned whether the emissions growth margin had been accurately calculated. EPA's questions were resolved (See Section I. A. "Emissions Inventory," of this Notice) and EPA can now approve the Reasonable Further Progress line including the full margin for growth.

Final Action: EPA is approving the Reasonable Further Progress demonstration line for VOC emission.

II. Carbon Monoxide

Connecticut has submitted plan revisions which demonstrate attainment of carbon monoxide standards statewide by 1987. Additionally, the Indirect Source Review provides assurance that new transportation projects will not cause future violations.

A. Air Quality Data

As discussed in the NPR, Connecticut submitted ambient air quality data for each of its nine carbon monoxide monitoring sites covering the years 1978–1980. The data shows that the highest second highest eight hour concentration was 27.5 ppm recorded at Stanford in 1978. No comments were received on this section.

Final Action: EPA is approving the carbon monoxide air quality data base.

B. Attainment Demonstration and Reasonable Further Progress

Connecticut used a screening model to evaluate the likelihood that carbon monoxide standards would be violated at intersections throughout the State. Intersections which showed the greatest potential for violations were modeled again, using a refined dispersion model, Caline 3, modified to account for emissions from motor vehicles as they idle, Mobile 2 emission factors, and the Connecticut Department of Transportation's queuing model. Based on this analysis, Connecticut has shown that standards will be attained statewide by 1987.

Further, Connecticut prepared Reasonable Further Progress (RFP) lines for each monitoring site with a recorded violation. A rollback model, one which assumes that changes in ambient levels of CO are directly proportional to changes in CO emissions, was used for those sites which had low violations or no recent violations, had demonstrable emission reductions, and for which area specific controls were not considered necessary. Caline 3 was used for locations which did not meet these criteria. All monitoring sites were demonstrated to attain CO standards by 1987.

Final Action: EPA is approving the CO attainment demonstration and Reasonable Further Progress lines.

C. Transportation Control Measures

Transportation measures adopted by Connecticut to reduce VOC emissions will also reduce CO levels at hotspots. The most significant of these measures are the Inspection and Maintenance program, traffic flow improvements, and right-turn-on-red. No additional site specific measures were found to be necessary to attain CO standards by 1987.

Final Action: EPA is approving transportation measures as discussed under Section II.F., "Transportation Measures," of this Notice, and is taking no separate action here.

III. Additional Requirements

A. Resource Commitments

In order to assure that the control strategies included in the 1982 attainment plan are implemented, EPA requested that the State show financial support which will be associated with the adopted measures. Connecticut has included estimates for the implementation costs of each strategy and has agreed to revise its section 105 Air Program Grant to reflect SIP commitments.

Final Action: EPA is approving the State's commitment of resources for the Connecticut 1982 SIP revisions.

B. Public Participation and Intergovernmental Consultation Documentation

EPA asked that this section of the proposed revisions be expanded to describe fully the Connecticut program and activities. The State complied by revising the "Public Participation" portion of the SIP. The final revisions discuss various State activities including its advisory committee, participation efforts made by regional agencies, its work program, publicity and educational efforts, and how the Department will improve its public comment mechanisms.

Final Action: EPA is approving the public participation and intergovernmental consultation portions of the Connecticut 1982 SIP revisions.

IV. Final Action

EPA is approving the Connecticut 1982 State Implementation Plan revisions for ozone and carbon monoxide.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291. Under Section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by (60 days from today). This action may not be challenged later in proceedings to enforce its requirements (see Section 307(b)(2)).

List of Subjects in 40 CFR Part 52

Air pollution control, Ozone, Sulfur oxides, Nitrogen dioxide, Lead, Particulate matter, Carbon monoxide, Hydrocarbons and intergovernmental relations, Incorporation by reference.

Authority: Sec. 110(a) and sec. 301(a) of the Clean Air Act, as amended (42 U.S.C. 7410(a) and 7601(a)).

Note.—Incorporation by reference of the State Implementation Plan for the State of Connecticut was approved by the Director of the Federal Register on July 1, 1982.

Dated: March 16, 1984.

William D. Ruckelshaus,

Administrator.

PART 52—[AMENDED]

Part 52 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

Subpart H—Connecticut

1. Section 52.370, is amended by adding paragraph (c)(32) as follows:

§ 52.370 Identification of plan.

* * * * *

(c) * * *

(32) Attainment plan revisions to meet the requirements of Part D for ozone and carbon monoxide were submitted by the Department of Environmental Protection on December 10, 1982, January 7, 1983, January 21, 1983, May 19, 1983, June 15, 1983, September 19, 1983, and December 15, 1983. The revisions control volatile organic compound (VOC) and carbon monoxide emissions through a mix of stationary and mobile source controls. EPA approval includes the following regulatory provisions:

(1) Regulation 22a–174–20(ee) limiting emissions from major nonCTG source categories, and

(2) Regulations 22a–174–27 and 14–164c describing the requirements for Connecticut's motor vehicle Inspection and Maintenance Program.

BILLING CODE 6560–50–M

40 CFR Part 180

[PP 3F2887/R652; PH–FRL 2547–5]

Tolerances and Exemptions From Tolerances for Pesticide Chemicals in or on Raw Agricultural Commodities; 1-(4-Chlorophenoxy)-3,3-Dimethyl-1-(1H-1,2,4-Triazol-1-yl)-2-Butanone

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for the combined residues of the fungicide 1-(4-chlorophenoxy)-3,3-dimethyl-1-(1*H*-1,2,4-triazol-1-yl)-2-butanone and its metabolites in or on certain raw agricultural commodities and changes the expression for the residues on all commodities for which tolerances have been established. This regulation to establish maximum permissible levels for residues of the fungicide was requested, pursuant to a petition, by Mobay Chemical Corporation.

EFFECTIVE DATE: Effective on March 21, 1984.

ADDRESS: Written objections may be submitted to the: Hearing Clerk (A–110), Environmental Protection Agency, Rm. 3708, 401 M St., SW., Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: By mail: Henry Jacoby, Product Manager (PM) 21, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 227, CM No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, (703–557–1900).

SUPPLEMENTARY INFORMATION: EPA issued a notice, published in the Federal Register of July 13, 1983 (48 FR 32077), which announced that Mobay Chemical Corporation, P.O. Box 4913, Kansas City, MO 64120, had submitted pesticide petition 3F2887 to EPA proposing to amend 40 CFR 180.410 by establishing tolerances for the combined residues of the fungicide 1-(4-chlorophenoxy)-3,3-dimethyl-1-(1*H*-1,2,4-triazol-1-yl)-2-butanone and its metabolite beta-(4-chlorophenoxy)-alpha-(1,1-dimethylethyl)-1*H*-1,2,4-triazole-1-ethanol in or on the raw agricultural commodities apricots, peaches, nectarines and plums (fresh prunes) at 4.0 parts per million (ppm); cucurbits at 0.3 ppm; sugar beets at 1.0 ppm and sugar beet tops at 3.0 ppm.

In the Federal Register of December 21, 1983 (48 FR 56436) EPA announced that Mobay had amended the petition by decreasing the tolerance level for sugar beets from 1.0 ppm to 0.5 ppm.

EPA issued a notice, published in the Federal Register of November 30, 1983 (48 FR 54117), which proposed to amend the tolerance expression for residues of the fungicide 1-(4-chlorophenoxy)-3,3-dimethyl-1(1*H*-1, 2, 4-triazol-1-yl)-2-butanone to include for plant derived commodities the metabolite beta-chlorophenoxyl)-alpha-(1,1-dimethylethyl)-1*H*-1,2,4-triazole-1-ethanol and for animal derived commodities to include metabolites containing chlorophenoxy and triazole moieties (expressed as the fungicide) in or on certain raw agricultural and animal derived commodities. EPA issued a final rule on January 4, 1984 (49 FR 388) amending the regulation of February 9, 1983 (48 FR 5920), establishing tolerances in or on certain raw agricultural and animal derived commodities, to include the metabolites set forth above in the tolerance expression. There were no comments received in response to these notices. Residue data have now been submitted which indicate that all tolerances for this fungicide should be expressed as the fungicide and metabolites containing chlorophenoxy and triazole moieties (expressed as the fungicide).

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of these tolerances include a rat teratology study which indicated that cleft palates are treatment-related effects (the no-observed effects level (NOEL) for fetal development and teratology is considered to be at least 50 milligrams (mg) per kilogram (kg) per day, the NOEL for maternal toxicity is considered to be 10 mg/kg/day); an inhalation study in rats which was negative for teratogenicity and embryotoxicity at a dose level of 11.3 mg/m^3; dominant lethal test which was negative for mutagenicity; a micronucleus test which was negative; an Ames test which was also negative for mutagenicity; a 2-year feeding (oncogenicity) study in rats with no oncogenic potential observed under the conditions of the study and a systemic NOEL of 50 ppm (2.5 mg/kg/day in the diet); a 2-year feeding (oncogenicity) study in mice, with no oncogenic potential observed under the conditions of the study and a systemic NOEL of 50 ppm (7.1 mg/kg/day in the diet); a 2-year feeding study in dogs with a systemic NOEL of 100 ppm; and a multigeneration reproduction study in rats with a NOEL of 50 ppm 2.5 mg/day in the diet) for reproductive effects.

Based on the NOEL of 50 ppm (2.5 mg/kg) in the 2-year feeding study in rats, and using a 100-fold safety factor, the allowable daily intake (ADI) is calculated to be 0.025 mg/kg/day and the maximum permissible intake (MPI) is 1.5 mg/day for a 60-kg person. Presently established temporary tolerances, toxicologically approved tolerances, and tolerances established by this rule result in a theoretical maximum residue contribution (TMRC) of 0.5033 mg/day for a 60-kg person, which represents 33.55 percent of the ADI. Temporary tolerances have previously been established for the combined residues of this fungicide and its metabolite in or on wheat grain, apple pomace, grape pomace, raisin waste, fresh apples, grapes, almonds and almond hulls.

Residues resulting in fat, meat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep; and in milk and eggs from use of the agricultural commodities, for which tolerances are established by this notice, as feed are adequately covered by established tolerances.

The pesticide is considered useful for the purpose for which the tolerances are sought. There are no regulatory actions pending against the continued registration of the pesticide. The metabolism of the pesticide is adequately understood, and an adequate analytical method, gas chromatography, is available for enforcement purposes.

Based on the information cited above, the Agency has determined that the establishment of the tolerances for residues of the pesticide in or on the commodities will protect the public health. Therefore, the tolerances are established as set forth below.

Any person adversely affected by this regulation may, within 30 days after publication of this notice in the **Federal Register**, file written objections with the Hearing Clerk, at the address given above. Such objections should specify the provisions of the regulation deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing and the grounds for the objections. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Pursuant to the requirements of the Regulatory Flexibility Act (Pub. L. 96-534, 94 Stat. 1164, 5 U.S.C. 601-612), the Administrator has determined that regulations establishing new tolerances or raising tolerance levels or establishing exemptions from tolerance requirements do not have a significant economic impact on a substantial number of small entities. A certification statement to this effect was published in the **Federal Register** of May 4, 1981 (46 FR 24950).

(Sec. 408(d)(2), 68 Stat. 512 (21 U.S.C. 346a(d)(2)))

Director, Office of Pesticide Programs.

PART 180—[AMENDED]

Therefore, 40 CFR 180.410 is revised to read as follows:

§ 180.410 1-(4-Chlorophenoxy)-3,3-dimethyl-1(1H-1,2,4-triazol-1-yl)-2-butanone; tolerances for residues.

Tolerances are established for the combined residues of the fungicide 1-(4-chlorophenoxy)-3,3-dimethyl-1(1*H*-1,2,4-triazol-1-yl)-2-butanone and its metabolites containing chlorophenoxy and triazole moieties (expressed as the fungicide) in or on the following raw agricultural commodities:

Commodities	Parts per million
Apples	1.0
Apricots	4.0
Barley, grain	1.0
Barley, green forage	15.0
Barley, straw	5.0
Cattle, fat	1.0
Cattle, meat	1.0
Cattle, mbyp	1.0
Chick pea, seed (dry)	1.0
Cucurbits	0.3
Eggs	0.04
Grapes	1.0
Goats, fat	1.0
Goats, meat	1.0
Goats, mbyp	1.0
Grass, forage	0.2
Grass, seed cleanings (including hulls)	145.0
Grass, seed straw (including chaff)	105.0
Hogs, fat	0.04
Hogs, meat	0.04
Hogs, mbyp	0.04
Horses, fat	1.0
Horses, meat	1.0
Horses, mbyp	1.0
Milk	0.04

40 CFR Part 180

[OPP-300078A; PH-FRL 2545-4]

Folic Acid, Nicotinamide, Pyridoxine, Cysteine, Glutamine, Methionine, Tryptophan, and Adenosine; Correction

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule on exemptions from the requirement of a tolerance that appeared at page 55569 in the **Federal Register** of December 14, 1983. This action is necessary to insert the entry for cysteine that was inadvertently omitted.

EFFECTIVE DATE: Effective on March 21, 1984.

FOR FURTHER INFORMATION CONTACT: John A. Richards, Federal Register Unit (TS-788), Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460, (202-382-3637).

SUPPLEMENTARY INFORMATION: In FR Doc. 83-32923 at page 55570 in the **Federal Register** of December 14, 1983, EPA issued a final rule that added various inert ingredients to the table in 40 CFR 180.1001(d). The entry for cysteineas noted in the heading, summary, and supplementary information of the document was inadvertently omitted from the additions to 40 CFR 180.1001(d).

(Sec. 408(e), 68 Stat. 514 (21 U.S.C 346a(e)))

Dated: March 9, 1984.

James M. Conlon,

Acting Director, Office of Pesticide Programs.

Therefore, 40 CFR 180.1001(d) is corrected by adding and alphabetically inserting the inert ingredient cysteine, to read as follows:

§ 180.1001 Exemptions from the requirement of a tolerance.

* * * * *

(d) * * *

Inert ingredients	Limits	Uses
Cysteine (CAS Reg. No. 52-90-4).	Maximum of 0.6% of formulation.	Synergist.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 69

[CC Docket No. 78-72; Phase I; FCC 84-77]

MTS and WATS Market Structure

AGENCY: Federal Communications Commission.

ACTION: Wavier of Commission orders.

SUMMARY: This action grants a waiver of the Commission's prohibition against the use of cost study based settlements for line haul and special service functions by exchange carriers that were receiving average schedule settlements for "A" and "B" functions. The action is necessary to mitigate local exchange carrier revenue dislocations during the transition to National Exchange Carrier Association ("NECA") administered distributions of access charge revenues. The action is intended to afford sufficient time to the NECA to update the cost studies which underlie the average schedules for line haul and special service functions.

DATES: Effective March 5, 1984 through June 1, 1986.

ADDRESS: Federal Communications Commission, Washington, D.C. 29554.

FOR FURTHER INFORMATION CONTACT: Kent R. Nilsson, Common Carrier Bureau, (202) 632-9342.

SUPPLEMENTARY INFORMATION: *MTS and WATS Market Structure Phase I Order,* FCC 83-386, 48 FR 42987.

Order Granting Waiver

In the matter of MIS and WATS market structure, CC Docket No. 78-72 Phase I.

Adopted: March 5, 1984.
Released: March 9, 1984.

By the Commission: Commissioner Patrick not participating.

1. By Memorandum Opinion and Order, FCC 83-509, released November 14, 1983, (*Formula Approval Order*), the Commission accepted an average schedule formula proposed by AT&T to determine access revenue distributions payable by the National Exchange Carrier Association ("NECA") to those companies that are compensated under the average schedule. The Commission found, however, that one provision of the formula was inconsistent with the *Access Charge Reconsideration Order*[1] insofar as it would have allowed companies to settle on a cost basis for certain access elements while receiving distributions based on the average schedule for others. In a letter to the Chief, Common Carrier Bureau dated December 6, 1983, NECA requested that the Commission waive its prohibition against the simultaneous use of individual cost data for "C" and "Special Services" functions with average schedule cost data for "A" and "B" functions.[2]

2. In supporting its request, NECA stated that the "C" function and the "Special Services" function average cost schedules have not been updated since 1957. This has resulted in a situation in which local exchange carriers have been compensated upon bases other than average schedule cost data for "C" and "Special Services" functions while receiving settlements on the basis of average schedule data for "A" and "B" functions. For average schedule exchange carriers, compliance with the Commission's *Formula Approval Order*[3] would require either that Schedule A & B companies revert to 1957 level average cost schedules for C and Special Service functions, with concomitant reductions in revenues, or that individual cost studies be prepared in lieu of Schedules A and B. NECA stated that a two year waiver would provide sufficient time to gather and analyze data and to revise the C and Special Service average settlement schedules.

3. Underlying the Commission's access charge plan was a recognition that the presence of average schedules for exchange carriers has facilitated the settlements process, and has enabled many small telephone companies to economize on record keeping by reducing the amount of data which would otherwise be required. The Commission's decision to permit a continuation of average schedule settlements was based upon the premise that unnecessary disruptions in the distibution of access charges revenues were not desirable, and that additional administrative burdens during the transition period should be mitigated as long as the underlying integrity of the access charge decision was not vitiated.

4. It was not apparent, however, upon reconsideration or at the time of the adoption of the *Formula Approval Order,* that local exchange carriers would encounter substantial difficulty in developing cost studies by the time access charge tariffs were likely to go into effect. Nor was it evident that requiring local exchange carriers to elect either average schedule treatment *or* cost study treatment would disrupt revenue streams to Independent telephone companies during the transition to Exchange Carrier Association administered distributions of access charges revenues.

5. Although the Commission's policy is clearly directed to requiring that local exchange carriers be compensated for local access functions either on the basis of individual cost studies or average cost schedules, it was not the intention of the Commission to introduce major dislocations during the initial transition from settlements arrangements to Exchange Carrier Association distributions of access charges revenues. As a consequence, to facilitate that transition, a waiver of the terms of the *Formula Approval Order* and the underlying provisions of the *Access Charge Reconsideration Order* is granted to permit:

(1) The use of individual company cost or other relevant studies for Schedule "C" functions by companies that are also being compensated under average schedules for "A" and "B" functions;

(2) The use of individual company cost or other relevant studies for Special Service settlements by companies that are also being compensated under average schedules for other access services.

6. Accordingly, it is ordered, that the request of the National Exchange Carriers Association for waiver effective as of the adoption date of this order and is granted through June 1, 1986.

---

[1] *MTS and WATS Market Structure Phase I,* FCC 83-386, 48 FR 42987. (released August 22, 1983), at para. 197.

[2] Currently there are three groups of average schedules: Schedules A, B, and C. These groups reflect the revenue requirements associated with the various functions performed by local exchange telephone companies in the provision of message services (MTS), 800 service, and outward wide area telecommunication service (WATS). The "A" function schedule reflects the allocated toll revenue requirements incurred in providing local exchange facilities for originating and terminating MTS and WATS messages, and buildings, central office equipment, billing, and collecting. The "B" function schedules include the revenue requirements which are associated with toll operating, automatic ticketing, automatic number identification, and intertoll dial switching equipment. The "C" function schedule has been used to calculate settlements for the provision of toll interexchange (or "Line Haul") functions. "Special Services" functions have covered private line services (e.g., point to point private line, remote metering, and data services). Source: Memorandum from W.R. Stump (Assistant Vice President, A.T.&T.) to the Chief, Common Carrier Bureau, dated June 30, 1983.

National Oceanic and Atmospheric Administration

50 CFR Part 671

[Docket No. 31230-254]

Tanner Crab off Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Director, Alaska Region, NMFS (Director), has determined that the optimum harvest levels of Tanner crab in the Eastside Section of the Kodiak District and in the South Peninsula District, both in Registration Area J, will be achieved on March 17, 1984, and March 20, 1984, respectively, and that early closure of the fishery is necessary to protect Tanner crab stocks. The Secretary of Commerce therefore issues this notice closing the Eastside Section and the South Peninsula District to fishing for Tanner crab by vessels of the United States effective March 17 and 20, 1984, respectively. The previously scheduled closing dates are April 30, 1984, for the Eastside Section and May 15, 1984, for the South Peninsula District.

DATES: This notice is effective from 12:00 noon, Alaska Standard Time (AST), March 17, 1984. It was filed for public inspection with the Office of the Federal Register on March 16, 1984. Public comments on this notice of closure are invited until April 1, 1984.

ADDRESSES: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. During the 15-day comment period, the data upon which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m.) at (1) The NMFS Kodiak Field Office, ADF&G Building, Kashevaroff and Mission Roads, Kodiak, Alaska, and (2) the NMFS Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

FOR FURTHER INFORMATION CONTACT: Raymond E. Baglin (NMFS Fishery Management Biologist), 907-486-4791.

SUPPLEMENTARY INFORMATION:

Background

The Fishery Management Plan for the Commercial Tanner Crab Fishery off the Coast of Alaska (FMP), which governs this fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act, provides for inseason adjustments, by field order, of season and area openings and closures. Implementing rules at 50 CFR 671.27(b) specify that these orders will be issued by the Secretary of Commerce under criteria set out in that section.

Section 671.26(f) established six districts within Registration Area J in order to prevent overfishing of individual Tanner crab stocks by allowing closure or partial closure of a particular district when the desired harvest level is reached. Two of the districts are the Kodiak and South Peninsula Districts. The Kodiak District is further subdivided into eight sections. The Alaska Board of Fisheries has set the desired 1984 harvest level for the Eastside Section of the Kodiak District at 4.37 million pounds and for the South Peninsula District at 2.75 million pounds. These desired harvest levels were based on pot and trawl index surveys conducted by the Alaska Department of Fish and Game (ADF&G) during 1983. The 1984 fishing season for both areas began on February 10. Reasons for the closures in these areas follow:

East Section of the Kodiak District

Approximately 100 vessels have delivered about 3.7 million pounds of crab through March 11. The catch rate has declined rapidly since February 10 from about 70 to about 15 crabs per pot. This rapid decline indicates that stocks are not sufficient to support this fishery through the scheduled April 30 closure date. The optimum harvest level of 4.37 million pounds is expected to be reached on March 17.

South Peninsula District

Fifty-seven vessels have delivered about 1.4 million pounds of crab through March 11. The catch rate has declined rapidly since February 10 from about 20 to about 10 crabs per pot. Vessels landing crab are reporting increasing proportions of "deadloss", that is, crabs in a vulnerable soft-shell condition which are discarded at sea as dead. On the basis of the rapid decline in catch rate and the increasing deadloss, the fishery is being limited to an optimum harvest level of 1.7 million pounds instead of the previously projected level of 2.75 million pounds. The optimum harvest of 1.7 million pounds is expected to be reached on March 20.

In light of this information, the Regional Director, in accordance with §671.27(b)(2), has determined that: (1) The actual condition of Tanner crab stocks in the Eastside Section and the South Peninsula District is substantially different from the condition anticipated at the beginning of the fishing year; and (2) this difference reasonably supports the need to protect those Tanner crab stocks by closing the Eastside Section of the Kodiak District and the South Peninsula District, as described in § 671.26(f)(1) (i) and (ii). The Eastside Section and the South Peninsula District are therefore closed to all fishing for Tanner crab from 12:00 noon, AST, March 17, 1984, and March 20, 1984, respectively, until 12:00 noon, ADT, April 30, 1984, and May 15, 1984, respectively, at which time the closure of these areas prescribed in § 671.26(f)(2) (i) and (ii) will begin.

These closures will become effective after this notice is filed for public inspection with the Office of the Federal Register and the closures are publicized for 48 hours through ADF&G procedures under § 671.27(a)(2). Public comments on this notice of closure may be submitted to the Regional Director at the address above. If comments are received, the necessity of these closures will be reconsidered and a subsequent notice will be published in the **Federal Register,** either confirming this field order's continued effect, modifying it, or rescinding it.

Other Matters

Tanner crab stocks in the Eastside Section and the South Peninsula District will be subject to damage by overfishing unless this order takes effect promptly. The Agency therefore finds for good cause that advance notice and public comment on this order are contrary to the public interest and that no delay should occur in its effective date.

This action is taken under the authority of § 671.27 and complies with Executive Order 12291. It is not subject to the requirements of the Regulatory Flexibility Act. It does not contain any collection of information request, as defined in the Paperwork Reduction Act.

[Docket No. 31230-254]

Tanner Crab Off Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of closure.

SUMMARY: The Director, Alaska Region, NMFS (Regional Director), has determined that the optimum harvest level of Tanner crab in the Southeast District in Registration Area A will be achieved on March 18, 1984, and that early closure of the fishery is necessary to protect Tanner crab stocks. The Secretary of Commerce therefore issues this notice closing the Southeast District to fishing for Tanner crab by vessels of the United States on that date. The previously scheduled closing date is May 1, 1984.

DATES: This notice is effective from 12:00 noon, Alaska Standard Time (AST), March 18, 1984, until 12:00 noon Alaska Daylight Time (ADT), May 1, 1984. It was filed for public inspection with the Office of the Federal Register on March 16, 1984. Public comments on this notice of closure are invited until April 2, 1984.

ADDRESSES: Comments should be sent to Robert W. McVey, Director, Alaska Region, National Marine Fisheries Service, P.O. Box 1668, Juneau, AK 99802. During the 15-day comment period, the data upon which this notice is based will be available for public inspection during business hours (8:00 a.m. to 4:30 p.m. AST weekdays) at the NMFS Alaska Regional Office, Federal Building, Room 453, 709 West Ninth Street, Juneau, Alaska.

SUPPLEMENTARY INFORMATION:

Background

The Fishery Management Plan for the Commercial Tanner Crab Fishery off the Coast of Alaska (FMP), which governs this fishery in the fishery conservation zone under the Magnuson Fishery Conservation and Management Act, provides for inseason adjustments by field order of season and area openings and closures. Implementing rules at 50 CFR 671.27(b) specify that these orders will be issued by the Secretary of Commerce under criteria set out in that section.

Section 671.26(c) established two districts within Registration Area A in order to prevent overfishing of individual Tanner crab stocks by allowing closure or partial closure of a particular district when the desired harvest level is reached. One of the districts is the Southeast District. Although the FMP specifies the optimum yield (OY) for the Southeast District to be 2.5 million pounds, the Alaska Board of Fisheries has set the desired 1984 harvest level at 1.5 million pounds. This level reflects the reduced abundance of harvestable Tanner crab in the Southeast District.

The 1984 fishing season for this district began on February 10. Approximately 99 vessels have delivered about 1.18 million pounds through March 8, a period of 28 days. When this catch rate is compared to 1983, when 85 vessels delivered 1.0 million pounds in only 15 days, it is apparent that crab stocks cannot support a fishery through the scheduled May 1 closure date. The 1984 catch rate has declined since February 10 from about 20 to about 5 crabs per pot, which also indicates that stocks are not sufficient to support this fishery without causing biological harm to the resource. The optimum harvest level of 1.5 million pounds is expected to be reached on March 18.

In light of this information, the Regional Director, in accordance with § 671.27(b)(2), has determined that: (1) The actual condition of Tanner crab stocks in the Southeast District is substantially different from the condition that was anticipated at the beginning of the fishing year; and (2) this difference reasonably supports the need to protect those Tanner crab stocks by closing the Southeast District of Registration Area A, as described in § 671.26(c)(1)(i). This district is closed, therefore, to all fishing for Tanner crab from 12:00 noon AST, March 18, 1984, until 12:00 noon ADT, May 1, 1984, at which time the previously scheduled closure of this district prescribed in § 671.26(c)(2)(i) will begin.

This closure will become effective after this notice is filed for public inspection with the Office of the Federal Register and the closure is publicized for 48 hours through ADF&G procedures, under § 671.27(a)(2). Public comments on this notice of closure may be submitted to the Regional Director at the address above. If comments are received, the necessity of this closure will be reconsidered and a subsequent notice will be published in the **Federal Register**, either confirming this field order's continued effect, modifying it, or rescinding it.

Other Matters

Tanner crab stocks in the Southeast District will be subject to damage by overfishing unless this order takes effect promptly. The Agency therefore finds for good cause that advance notice and public comments on this order are contrary to the public interest and that no delay should occur in its effective date.

This action is taken under the authority of § 671.27, and complies with Executive Order 12291. It is not subject to the requirements of the Regulatory Flexibility Act. It does not contain any collection of information request, as defined in the Paperwork Reduction Act.

Proposed Rules

Federal Register
Vol. 49, No. 56
Wednesday, March 21, 1984

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 75

[Airspace Docket No. 83-AAL-9]

Proposed Establishment of J-529—Fort Yukon, AK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish new Jet Route J-529 between Fort Yukon, AK, and Shingle Point nondirectional beacon (NDB), Yukon Territory (YT), Canada. This new jet route is proposed as part of a planned new polar route across Canada. This action would designate controlled airspace in an area where no FAA radar coverage currently exists and would improve flight planning.

DATES: Comments must be received on or before May 7, 1984.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA, Alaskan Region, Attention: Manager, Air Traffic Division, Docket No. 83-AAL-9, Federal Aviation Administration, 701 C Street, Box 14, Anchorage, AK 99513.

The official docket may be examined in the Rules Docket, weekdays, except Federal holidays, between 8:30 a.m. and 5:00 p.m. The FAA Rules Docket is located in the Office of the Chief Counsel, Room 916, 800 Independence Avenue, SW., Washington, D.C.

An informal docket may also be examined during normal business hours at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace and Air Traffic Rules Branch (AAT-230), Airspace-Rules and Aeronautical Information Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8020.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposal. Communications should identify the airspace docket and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge reciept of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 83-AAL-9." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11-2 which describes the application procedure.

The Proposal

The FAA is considering an amendment to § 75.100 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) to establish a new jet route between Fort Yukon, AK, and Shingle Point, NDB, YT, Canada. The International Airline Transportation Association (IATA) has requested a new polar route across Canada and the FAA is cooperating with the Canadian Government by proposing the initial phase of the route in the Fort Yukon area. Tentatively, the FAA has determined that suitable navigational signal coverage between Fort Yukon and Shingle Point NDB on the 018° magnetic radial at Flight Level 280 and above. Also, this action designates controlled airspace in an area where no FAA radar coverage exists and aids flight planning. Section 75.100 of Part 75 of the Federal Aviation Regulations was republished in Advisory Circular AC 70-3A dated January 3, 1983.

List of Subjects in 14 CFR Part 75

Airspace, Jet routes, Navigation (air).

The Proposed Amendment

PART 75—AMENDED

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 75.100 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as follows:

J-529 [New]

From Fort Yukon, AK, via 049°T(018°M) radial; to Shingle Point NDB, YT, Canada. The airspace within Canada is excluded.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); (49 U.S.C. 106(g) (Revised, Pub. L. 97-449, January 12, 1983)); and 14 CFR 11.65.)

Note.—The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C., on March 13, 1984.

John W. Baier,

Acting Manager, Airspace, Rules and Aeronautical Information Division.

BILLING CODE 4910-13-M

DEPARTMENT OF THE TREASURY

Bureau of Alcohol, Tobacco and Firearms

27 CFR Part 5

[Notice No. 505; Ref. Notice No. 486]

Standards of Fill for Distilled Spirits; Extension of Comment Period

AGENCY: Bureau of Alcohol, Tobacco and Firearms (ATF), Department of the Treasury.

ACTION: Extension of comment period.

SUMMARY: ATF has been requested by the Distilled Spirits council of the United States, Inc. (DISCUS) and the National Association of Beverage Importers, Inc. (NABI) to extend the comment period on Notice No. 486 (September 23, 1983, 48 FR 43346). The comment period was originally to have closed on March 23, 1984. However, in order to ensure that all pertinent data and information is made available before deciding whether the 500 ml size will remain a standard of fill for distilled spirits or be eliminated, ATF is extending the comment an additional nine months.

DATE: Comments must be received on or before January 2, 1985.

ADDRESS: Comments should be submitted to: Chief, FAA, Wine and Beer Branch, P.O. Box 385, Washington, DC 20044-0385 (Notice No. 486).

FOR FURTHER INFORMATION CONTACT: Roger Bowling, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms, 1200 Pennsylvania Avenue, NW., Washington, DC 20226, (202-566-7626).

SUPPLEMENTARY INFORMATION:

Background

On September 23, 1983, ATF published Treasury Decision ATF-146 (48 FR 43319) adopting the 100 ml size and 375 ml size as standards of fill for distilled spirits. These sizes became effective for use in interstate and foreign commerce on January 3, 1984. Concurrent with this Treasury decision, ATF published Notice No. 486 relating to the 375 ml size and 500 ml size.

A major concern with the 375 ml and 500 ml sizes is the similarity in bottle size and shape even though the volumetric difference is 125 ml, or slightly over four fluid ounces. Because of this concern, ATF issued Notice No. 486 which requested comments on whether bottlers should be allowed the option of bottling their products in either the 375 ml size or 500 ml size, but not both; or should the 500 ml size be eliminated entirely as a standard of fill for distilled spirits.

To reiterate, ATF requested specific comments on the following issues:

(a) Would retention of the 500 ml size lead to consumer confusion or deception because of its similarity to the 375 ml size?

(b) Since there is only slightly over four fluid ounces difference between the 375 ml size and 500 ml size, is there a need to have both sizes? Would the 375 ml size fulfill the market need for the 500 ml size?

(c) In the event the 500 ml size is eliminated as a standard of fill, what is a reasonable transition period to allow for a use-up of present inventories of this bottle size?

(d) Does the greater benefit to both industry and the consumer exist with both sizes in the market without qualification since it allows greater flexibility in bottling and wider size choice on purchases?

(e) Would repeat purchases negate any confusion or deception that may arise between the 375 ml size and 500 ml size? Does the option of having a purchase choice between the 375 ml size and 500 ml size outweigh any confusion or deception that may arise?

Extension Requests

In a letter dated January 17, 1984, DISCUS requested that the comment period be extended to January 2, 1985. NABI, in a letter dated March 1, 1984, requested an extension until January 1, 1985. DISCUS stated that this extension is necessary in that "The distilled spirits industry believes that extending the comment period to that date would allow consumers and all segments of the industry to have sufficient experience with the 375 ml and 500 ml sizes to file informed comments. This experience would allow all persons to have a base of experience from which to respond to the issues about which ATF has requested specific comment. Specifically, the industry needs the experience of having both the 375 ml and 500 ml sizes on the market for a substantial period of time in order to determine whether there is consumer need to have both sizes. It may be, for example, that there will be demand for both sizes for all products, or that consumers will prefer one size for certain products (such as cordials and liqueurs) and the other size for other types of products. Finally, it will take considerable time to determine whether the existence of both sizes results in consumer confusion, a concern expressed by the Bureau."

NABI stated that the relatively short period of time in which the 375 ml and 500 ml sizes have been available to consumers is inadequate to determine consumers' reaction to the two sizes. Therefore, NABI requested an extension to provide ATF and industry with information on which to base a decision on the issues posed in Notice No. 486.

Because of its desire to have all pertinent and relevant information at hand before rendering its decision on the 500 ml size, ATF is granting the extension as requested. Although a year may appear to be an excessive amount of time, ATF believes it is a reasonable period in this case. The 375 ml size was adopted on September 23, 1983, however, the size was not available for sale to consumers until January 3, 1984. The requests by DISCUS and NABI places the 375 ml size and 500 ml size in the market for one year. To be able to make an informed comment, a year may be necessary to make market surveys on consumer preferences and purchases. Therefore, ATF is extending the comment period until January 2, 1985.

Disclosure

Comments may be inspected by any person during normal business hours at: Office of Public Affairs and Disclosure, ATF Reading Room, Room 4407, Federal Building, 12th and Pennsylvania Avenue, NW, Washington, DC.

Drafting Information

The principal author of this document is Roger Bowling, FAA, Wine and Beer Branch, Bureau of Alcohol, Tobacco and Firearms.

Authority and Issuance

This notice is issued under the authority contained in section 5 of the Federal Alcohol Administration Act, 49 State. 981, as amended, 27 U.S.C. 205.

Approved: March 21, 1984.

Stephen E. Higgins,

Director.

BILLING CODE 4810-31-M

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

34 CFR Part 301

Incentive Grants

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to issue revisions to the regulations under Section 619 of Part B of the Education of the Handicapped Act to conform those regulations to recent amendments to Section 619. These proposed regulations will expand the age range of children who may receive services under the Incentive Grants program by adding children from birth to three years of age in accordance with the Education of the Handicapped Act Amendments of 1983, Public Law 98–199.

DATES: Comments must be received on or before June 19, 1984.

ADDRESSES: Comments should be addressed to: Dr. David Rostetter, Office of Special Education Programs, Department of Education, 400 Maryland Avenue, S.W. (Switzer Building, Room 3607), Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: Ms. Sheila Friedman. Telephone: (202) 472–3800.

SUPPLEMENTARY INFORMATION: The Incentive Grants program established under Section 619 of Part B of the Education of the Handicapped Act (20 U.S.C. 1419) authorizes grants to State educational agencies to provide special education and related services to handicapped children from birth through five years of age. States are entitled to payments under this program based on the number of handicapped children ages three through five that are receiving special education and related services.

Final regulations for this program were published on August 23, 1977 (42 FR 42517), and redesignated on November 21, 1980 at 45 FR 77368.

The proposed amendment is a technical change in the Incentive Grant regulations, 34 CFR Part 301, which reflects an amendment to the authority for that program, Section 619 of the EHA-B, made in Public Law 98–199. That change expanded the age range of handicapped children eligible to receive services under the Incentive Grant program from three through five to birth through five.

The report of the House Committee on Education and Labor on the Education of the Handicapped Act Amendments of 1983 states that:

> Research studies of the past decade confirm that early identification, diagnosis and treatment of handicapping condition[s] can significantly reduce the number and severity of handicaps in later life. Early efforts to reduce the limiting effects that physical and cognitive impairments have on major life functions increase the potential benefits of the educational system.

See H.R. Rep. No. 410, 98th Cong., 1st Sess. 24 (1983), *See, also,* S. Rep. No. 191, 98th Cong., 1st Sess. 14 (1983).

States may expand services to children from birth to age three at their discretion; Section 619 does not require services to this group. States which elect to serve such children will, however, need to amend their approved applications for Fiscal Years 1984–86.

Proposed changes to implement the expanded age groups are made to the following sections: § 301.1(c) and § 301.5(a) and (d). No other changes are proposed. States will continue to receive payments based on the number of handicapped children served ages three through five.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291.

They are classified as non-major because they do not meet the criteria for major regulations in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations will not have a significant economic impact on a substantial number of small entities. These amendments to the regulations for Incentive Grants merely incorporate a statutory revision that expands the age range of handicapped children eligible for special education and related services. Inclusion of additional children will be on a voluntary basis. The regulations will not have a significant economic impact on States or local educational agencies participating in the program.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79 (48 FR 29158; June 24, 1983). The objective of the Executive Order is to foster an intergovernmental partnership and a strengthened federalism by relying on State and local processes for State and local government coordination and review of proposed Federal financial assistance.

In accordance with the Order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation to comment: Interested persons are invited to submit comments and recommendations to the address given at the beginning of this document. All comments received on or before June 19, 1984 will be considered before the Secretary issues final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 3529, Switzer Building, 330 C Street, S.W., Washington, D.C., between the hours of 8:30 a.m. and 4:00 p.m., Monday through Friday of each week except Federal holidays.

Paperwork Reduction Act

The information collection requirements contained in these proposed rules will be sent to OMB for review under the provisions of Section 3504(h) of the Paperwork Reduction Act of 1980 (Pub. L. 96–511).

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, public comment is invited on whether there may be further opportunities to reduce any regulatory burdens found in these regulations.

Comments concerning information collection requirements *only* should be addressed to the Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 3208, 17th and Pennsylvania Avenue, N.W., Washington, D.C. 20503. Attention: Desk Officer for the U.S. Department of Education. All other comments regarding these proposed regulations should be sent to the Department of Education at the address given at the beginning of this preamble.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is already being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 301

Administrative practices and procedures, Education, Education of handicapped, Grant programs—education, Preschool.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these proposed regulations.

(Catalog of Federal Domestic Assistance Number 84.027, Incentive Grants)

Dated: March 15, 1984.

T. H. Bell,

Secretary of Education.

PART 301—[AMENDED]

The Secretary proposes to amend Part 301 of Title 34 of the Code of Federal Regulations as follows:

1. Section 301.1 is amended by revising paragraph (c) to read as follows:

§ 301.1 Scope; purpose.

* * * * *

(c) The State shall use funds provided under this part to give special education and related services to handicapped children in the age groups named in paragraph (b) of this section and to handicapped children from birth to three years of age.

* * * * *

2. Section 301.5 is amended by revising paragraphs (a) and (d) to read as follows:

§ 301.5 Application contents.

* * * * *

(a) A description of the State's goals and objectives for meeting the educational needs of handicapped children from birth through five years of age. These goals and objectives must be consistent with the State's full educational opportunity goal under §300.123 of this chapter.

* * * * *

(d) A description of the impact the proposed activities will have on handicapped children from birth through five years of age. This description must include evidence that the proposed activities are of sufficient size, scope, and quality to warrant the amount of the expenditure. The application must indicate the number of children to be served and the number of handicapped children who will be benefitted indirectly. If children are to be benefitted indirectly, there must be a rationale that demonstrates the benefit.

BILLING CODE 4000-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 145

[WH-FRL 2547-8]

Washington Department of Ecology; Underground Injection Control Primacy Application

AGENCY: Environmental Protection Agency.

ACTION: Notice of public comment period and of public hearing.

SUMMARY: The purpose of this notice is to announce that: (1) The Environmental Protection Agency (EPA) has received a complete application from the State of Washington requesting primary enforcement responsibility for the Underground Injection Control (UIC) Program; (2) the application is now available for inspection and copying; (3) public comments are requested; and (4) a public hearing will be held.

The proposed comment period will provide EPA the breadth of information and public opinion necessary to approve, disapprove, or approve in part and disapprove in part the Section 1422 application of the Washington Department of Ecology (WDE) to regulate Classes I, II, III, IV, and V injection wells in the State.

DATES: Requests to hold a public hearing and present oral testimony should be filed by April 23, 1984. The Public Hearing will be held on April 26, 1984, from 1:00 p.m. to 3:00 p.m. The public comment period closes May 3, 1984. If sufficient public interest in holding the hearing is not expressed by April 23, 1984, EPA reserves the right to cancel the hearing pursuant to the provisions of 40 CFR 145.31(c). If the hearing is cancelled, those persons having expressed interest in attending the hearing will be notified of the cancellation either by phone or letter. Other persons should contact EPA in Seattle at (206) 442-1846 to confirm the date and time.

ADDRESSES: Comments and requests to testify should be mailed to Harold Scott, M/S 409, Environmental Protection Agency, Region X, 1200 Sixth Avenue, Seattle, Washington 98101. Copies of the application and pertinent material are available during normal business hours at the following locations:

Environmental Protection Agency, Region X, Library, 1200 Sixth Avenue, Seattle, Washington 98101.

Department of Ecology, Headquarters, Mail Stop PV-11, Olympia, Washington 98504, PH: (206) 459-6077.

Department of Ecology, Southwest Regional Office, 7272 Clearwater Lane, Olympia, Washington 98504. PH: (206) 753-2353.

Department of Ecology, Northwest Regional Office, 4350 150th Avenue, NE., Redmond, Washington 98502, PH: (206) 885-1900.

Department of Ecology, Central Regional Office, 3601 W. Washington, Yakima, Washington 98903, PH: (509) 575-2491.

Department of Ecology, Eastern Regional Office, East 103 Indiana, Spokane, Washington 99207, PH: (509) 456-2925.

The hearing will be held at the Environmental Protection Agency, Room 12C, 12th Floor, 1200 Sixth Avenue, Seattle, Washington.

FOR FURTHER INFORMATION CONTACT: Harold Scott, M/S 409, Environmental Protection Agency, Region X, 1200 Sixth Avenue, Seattle Washington 98101, PH: (206) 442-1846 or FTS 399-1846.

SUPPLEMENTARY INFORMATION: The Underground Injection Control (UIC) program seeks to protect as "underground sources of drinking water" (USDWs) all aquifers capable of yielding a significant amount of water containing less than 10,000 mg/l of total dissolved solids. At present, the State of Washington has one Class I well, and 6000 inventoried Class V wells. Class V wells will be studied to assess whether further regulatory measures are required. In the meantime, Class V wells will be regulated under existing State procedures. The State of Washington does not intend to exempt any aquifers at this time.

Requests for a public hearing should include the following information:

(1) The name, address, and telephone number of the individual, organization, or other entity requesting a hearing;

(2) A brief statement of the requesting person's interest in the UIC program and of information that the requesting person intends to submit at such hearing; and,

(3) The signature of the individual making the request, or if the request is made on behalf of an organization or other entity, the signature of a responsible official of the organization or other entity.

The terms listed below comprise a complete listing of the thesaurus terms associated with 40 CFR Part 145, which sets forth the requirements for a State requesting the authority to operate its own permit program of which the Underground Injection Control program is a part. These terms may not all apply to this particular notice.

List of Subjects in 40 CFR Part 145

Hazardous materials, Indians—lands, Reporting and recordkeeping requirements, Waste treatment and disposal, Water pollution control, Water supply, Intergovernmental relations, Penalties, Confidential business information.

This application from the Washington Department of Ecology is for the regulation of all injection wells in the State. The application includes a description of the State Undergound Injection Control Program, copies of all applicable statutes and rules, a statement of legal authority and a proposed memorandum of agreement between the Washington Department of Ecology and Region X office of the Environmental Protection Agency.

Dated: March 14, 1984.

Jack E. Ravan,

Assistant Administrator for Water.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 2, 73, and 76

[MM Docket No. 84-168; FCC 84-50]

Authorization of the Offering of Data Transmission Services on the Vertical Blanking Interval by TV Stations

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: In this document, the Commission requests comments upon its proposal to authorize any television station to offer any data transmission services on the vertical blanking interval either on a private or common carrier basis. Data transmission services include such services as paging, raw data transmission, and computer software. Because there is unused spectrum in the vertical blanking interval and there are numerous services requiring additional spectrum, the Commission believes it is appropriate to remove any remaining restrictions on the use of this particular portion of the broadcast spectrum. The Commission intends this action to provide television stations with additional opportunities for extending and diversifying their services, to improve the efficiency of spectrum utilization, and to assist in satisfying a demonstrated public need. This action will also hopefully increase development of vertical blanking interval technology.

DATES: Comments are due by April 16, 1984 and replies by May 1, 1984.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Alan Stillwell, Broadcast Bureau, 202-632-6302.

47 CFR Part 2

Frequency allocation, Radio.

47 CFR Part 73

Television.

47 CFR Part 76

Cable television.

Notice of Proposed Rulemaking

In the matter of amendment of Parts 2, 73, and 76 to Authorize the Offering of Data Transmission Services on the Vertical Blanking Interval by TV Stations (MM Docket No. 84-168).

Adopted: February 15, 1984.
Released: March 8, 1984.

By the Commission.

1. The Commission is today initiating a proceeding to solicit comment upon a proposal to permit television stations to provide various data transmission services on the vertical blanking interval (VBI) [1] of the television signal. In BC Docket No. 81-741, we recently authorized television stations to offer teletext [2] services on the VBI.[3] We noted in that order that teletext was only one of many potential services that could be offered on the vertical blanking interval. Some of the other service possibilities include paging, raw data transmission, computer software and video game delivery, utility load management, and facsimile transmissions that would use analog signalling techniques. In fact, any data transmission service for which the VBI offers sufficient capacity could be provided.[4]

2. Authorizing television stations to provide various data transmission services is consistent with our mandate to "[s]tudy new uses for radio . . . and generally encourage the larger and more effective use of radio in the public interest." 47 U.S.C. 303(g). Broadening the number of services that may be offered on the VBI would encourage more efficient use of the broadcast spectrum. These additional uses of the spectrum will also afford the public a better opportunity to secure the communications services they desire from a variety of sources.[5] *See Authorization of Teletext, supra* at paragraph 42. Because there is a growing demand for additional data transmission services, we propose to authorize both commercial and public broadcasting television stations to offer these services on the VBI. Data transmission services will include the transmission of raw data, processed information, or any other communication in either a digital or analog mode. This authority would further be granted to both full services and low power television stations.

3. Paging services stand out as one of the more significant forms of data transmission services which television stations may want to consider offering. Because paging services offered on the VBI will be competitive with existing common carrier and private paging systems, we have taken particular care to consider whether the introduction of additional competition in this area is in the public interest. We tentatively conclude that it is.

4. Our tentative conclusion vis-a-vis paging services is supported by the definite need for such services. The Commission recently documented the need for additional paging services in General Docket No. 80-183.[6] Studies submitted by Arthur D. Little in 1975 and Frost & Sullivan in 1978, indicated that by 1985 there would be approximately three million pagers in use.[7] In response to those forecasts, the Commission decided to allocate forty additional paging channels each for private and common carrier paging systems.[8]

---

[1] The vertical blanking interval is that portion of the television signal that appears as a black bar when the picture rolls.

[2] Teletext is the transmission of textual and graphic data on the VBI of the video portion of the television signal which is intended for display on a viewing screen.

[3] *Authorization of Teletext, BC Docket No. 81-741*, FCC 83-120, mimeo 32977, released May 20, 1983, (53 RR 2d 1309 (1983)).

[4] The proposed definition would permit the transmission of raw data, processed information, or any other communication in either a digital or analog mode.

[5] These additional services do not preclude the simultaneous provision of several services, including teletext, on a particular station's vertical blanking interval.

[6] *Paging Systems-DPLMRS*, 89 FCC 2d 1337 (1982).

[7] *Notice of Proposed Rule Making* (Docket No. 80-183), 45 Fed. Reg. 32013, 32015 (May 15, 1980).

[8] Three of the common carrier and four of the private radio channels are reserved for nationwide paging. An additional one megahertz (forty 25 khz channels) is to be held in reserve for use by advanced technology paging systems. Thus, the reserve channels may not be available for alleviating the need for traditional paging services. An additional 28 low band channels have also recently been allocated to paging services. *See First Report and Order*, CC Docket No. 80-189, 49 RR 2d 1541 (1981), *recon. granted in part*, FCC 82-342, 47 FR 34561 (Aug. 10, 1982); and *Second Report and Order*, Docket No. 19327, 51 RR 2d 1532 (1982), 47 Fed. Reg. 34568 (Aug. 10, 1982).

However, both the Ad Hoc Private Paging Committee (AHPPC) and Telocator Network of America (Telocator) indicated that the Commission's proposed allocation of forty channels might be inadequate.[9] In light of these comments and the response by applicants to the Commission's lowband [10] and 900 MHz allocations (more than 5,500 applications have been filed so far),[11] it seems clear that the demand for paging services should continue to be strong. Therefore, we believe it is appropriate to remove restrictions on existing broadcast spectrum in order that it may provide an additional means of satisfying the demand for paging service. Thus, authorizing the provision of paging services, as one form of data transmission, over the VBI appears to provide a particularly suitable response. We request comments on this particular aspect of our proposal.

5. With respect to data transmissions generally, we are not proposing to classify particular VBI data transmission services as either private or comon carrier offerings. Rather, as we indicated in the *Report and Order* for BC Docket No. 81–741,[12] and also in the *First Report and Order* for BC Docket No. 82–536,[13] licensees, other than licensees in the land mobile services, should be guided by the criteria set forth by the United States Court of Appeals for the District of Columbia in *National Assocation of Regulatory Utility Commissioners v. FCC*, 525 F.2d 630 (D.C. Cir 1976), *cert. denied*, 425 U.S. 992 (1976) (NARUC I). Among the factors indicative of non-common carriage delineated by the court are the establishment of medium-to-long term contractual relationships with customers, a relatively stable clientele base, the failure to hold out facilities indifferently, and the selection of clients on a highly individualized basis. With regard to land mobile services, such as paging, the Communications Amendments Act of 1982, Section 120, establishes a demarcation between private and common carrier land mobile services, and indicates that this new test is intended to supersede the *NARUC I* standard. *See* 47 U.S.C. 332(c). The new statutory test is based on the manner in which a mulitple licensed or shared private land station is interconnected with a telephone exchange or interexchange service or facility. It will be the initial responsibility of the licensee to decide on what basis to offer its services.

6. If a licensee intends to offer data transmission services on a common carrier basis, we will require that it first obtain authorization to do so by filing an application in accordance with Parts 21 or 22, as appropriate. *See* 47 CFR Parts 21 and 22. Public Notice will be given of each such request received, and a 30-day period will be afforded to all parties wishing to file comments in connection therewith. It is our intention that, in seeking such authorizations, the television station licensee will be in the same position, entitled to the same privileges and subject to the same obligations and regulations as a traditional offeror of such services. As we noted in the *First Report and Order* in BC Docket No. 82–536, "our policy is that applications to provide common carrier services from qualified applicants will be granted unless there is some basis to believe that such a grant 'is likely to produce results that conflict with the goals of the Communications Act.'" *Authorization of FM Subcarriers, supra* at paragraph 25.[14]

7. Television station licensees seeking to provide private carrier service on the VBI will be required to notify the Licensing Division of the Private Radio Bureau at Gettysburg, Pennsylvania, 17325, by letter, prior to initiating service. Licensees must certify that their facilities will be used in this regard only for permissible services. *See* 47 CFR Parts 90 and 94. Further, when providing land mobile service, they must also certify that service will only be offered to users eligible under Part 90 of the Commission's Rules, and that any interconnection of the station with a telephone exchange or interexchange service or facility will be obtained in accordance with Section 331 of the Communications Act, 47 U.S.C. 332.[15] We do not intend such notification to give rise to a comment period, and no separate authorization will be issued by the Commission. Television station licensees offering a private service will be similarly situated, entitled to the same privileges, and subject to the same obligations and regulations, as a traditional offeror of such services.

8. Regardless of whether the television station licensee contemplates offering private or common carrier services, the licensee will not be required to seek additional approval for the technical facilities of the television station. As in the case of teletext and FM subcarriers, we also consider the use of the VBI for the transmission of data as a secondary privilege that runs with the primary television station license. Therefore, that right will only be conferred on the primary station licensee; in other words, we do not intend to entertain competing applications for that right. Of course, licensees will be permitted to lease portions of the VBI to entities that will provide either a private or common carrier service. In such instances, the lessee may be permitted to seek the appropriate authorization, but the primary licensee of the television station will be held responsible for the technical operation of the transmitting facilities.

9. In both the Teletext and FM subcarrier dockets, we recognized that there may be situations when the provision of services via the VBI could enjoy a competitive advantage vis-a-fis other carriers offering similar services by virtue of the greater service area of some television stations. This problem is particularly germane to the provision of paging services over the VBI, although it would be pertinent to any data transmission service that competes with other licensed services. We do not, however, believe that authorizing television stations to enter these markets will have any adverse public interest consequences for existing operations. It would be possible to reduce or eliminate that competitive impact through rules that would place specific restrictions on technical operations. For example, we could require television stations to limit the injection level of their VBI data service signals or, in the extreme, could limit station transmitter power to a degree that would yield coverage equal to that of paging or other competitors. Such an approach would, however, be spectrally inefficient and, in the latter case, would subvert the provision of basic broadcast

---

[9] *Paging Systems-DPLMRS, supra* at 1338.

[10] *First Report and Order, CC Docket No. 80–189*, 49 RR 2d 1541 (1981), *recon. granted in part*, FCC 82–342, 47 FR 34561 (Aug. 10, 1982).

[11] *Paging Systems-DPLMRS, supra.*

[12] *Authorization of Teletext, supra* at paragraphs 51–55.

[13] *Authorization of FM Subcarriers*, BC Docket No. 82–536, FCC 83–154, Mimeo 33147, released May 19, 1983, at paragraphs 20–27. [53 RR 2d 1519 (1983)].

[14] With regard to common carrier paging services, we note that because applicants for an initial common carrier channel are not required to demonstrate need, VBI paging applicants will not be required to demonstrate need when they are proposing an initial system in a market. *Paging Systems-DPLMRS, supra* at 1349–1354. Additionally, we request comments upon the question of whether some kind of need must be demonstrated when a television station licensee or its lessee is currently authorized to operate a common carrier paging facility within its television station service area. Finally, a financial showing will not be required. *Elimination of Financial Qualifications*, 82 FCC 2d 152 (1980).

[15] The Commission's interpretation of this test in the new legislation is contained in our reconsideration of the *Second Report and Order*, Docket No. 20846, 89 FCC 2d 741 (1982). See *Memorandum Opinion and Order*, Docket No. 20846, Mimeo 33104, FCC 83–174, released May 27, 1983.

service. Moreover, the development of new technology should not be thwarted simply to protect the status quo.[16] In any event, we doubt there will be an adverse impact upon existing services for several reasons. First, the VBI would be available for many different services and there is no evidence to suggest that the industry would focus its use of the VBI on any one particular service. Thus, it is possible that the number of stations engaged in any particular activity would be limited. Second, wide-area services are not necessarily more attractive or important to potential customers, particularly where there are differences in pricing and supplemental services.[17] Third, with respect to paging services, many existing paging systems operate wide-area systems that would be competitive with VBI systems. Accordingly, it appears that the competitive impact upon existing facilities, whether paging or otherwise, will not be critically adverse.[18]

10. With regard to the technical rules that will govern VBI data transmissions, we propose to apply the same technical rules adopted for teletext in BC Docket No. 81-741. Television stations will be able to offer data transmission services, including paging, at the same signal level as teletext and over all VBI lines authorized for teletext. Similarly, VBI signal transmitting data will not be permitted to interfere with other radio frequency services or degrade reception of the originating station's regular programs. The proposed rules will afford licensees wide latitude in designing systems, while protecting existing services.[19] We are also concerned as to whether the technical aspects of teletext operations could differ from those of some non-teletext services. Although we are not aware of any such differences, we request technical comments on signalling methods that may be appropriate for specific services or VBI operations in general but not for the more limited teletext transmissions. Interested parties are invited to comment upon the desirability of these or additional technical requirements.

11. Proposed rules that would implement a general authorization of the VBI for data services as discussed *supra* are presented in the Appendix. Inasmuch as teletext as currently authorized would qualify as a data service as defined herein, the proposed rules would replace the teletext rules on a one-for-one basis as appropriate.

12. Finally, it is likely that equipment manufacturers will develop and market devices that can receive and either display or utilize the data transmissions. We would like specific comments as to how such devices should be treated under Part 15 of our Rules. For example, such devices could be treated as either a Class I TV device under Part 15 of the Commission's Rules or they could be considered a receiver under Part 15, Subpart C.[20]

13. Pursuant to the Regulatory Flexibility Act of 1980, the Commission finds as follows:

I. Reason for Action

Authorization of data transmission services, including paging, on the vertical blanking interval will provide additional opportunities for extending and diversifying the services provided by television stations, improve the efficiency of spectrum utilization, and assist in satisfying a demonstrated public need.

II. Objective

The Commission is proposing to authorize data transmission services on the vertical blanking interval in order to encourage additional and diverse uses of this relatively underutilized spectrum. Additionally, we believe this will assist us in satisfying a demonstrated public need for paging services. Finally, this action will also hopefully increase development of vertical blanking interval technology.

III. Legal Basis

The proposed action is authorized under Section 303 of the Communications Act of 1934, as amended, which charges the Commission with the responsibility to explore new and improved uses of radio.

IV. Description, Potential Impact and Number of Small Entities Affected

Authorizing the use of the vertical blanking interval for data transmission services should have a beneficial effect on most television station licensees because it will increase the number of permissible VBI uses. We anticipate that operators of private and common carrier paging systems could be slightly adversely affected in they were to lose some customers to the television stations' paging services. Because there is a substantial unmet demand for this service which is increasing yearly, we do not, however, expect that impact, should it occur, to be significant. Moreover, any estimate of the impact at this time is highly speculative. If this proposal is ultimately adopted, paging will only be one of many services which can be offered on the vertical blanking interval. We do not know how many television station licensees will actually be interested in offering paging services and, if so, in what form. Without that information, we cannot accurately estimate the potential impact of this action upon operators of private and common carrier paging systems. Finally, manufacturers of electronic equipment could be beneficially affected because this action should produce an additional avenue for the sale of their equipment.

V. Reporting, Recordkeeping and Other Compliance Requirements

Beyond the requirements currently imposed upon various services, such as paging, no new requirements will be imposed upon television stations

VI. Federal Rules Which Overlap, Duplicate or Conflict With This Rule

None.

VII. Significant Alternatives

With respect to the authorization of services that will be competitive with other existing licnesed services, there are two possible alternatives: (1) either not authorize the provision of competitive services on the VBI or (2) authorize such services, but require that those television stations intending to offer competitive services demonstrate that there exists an unmet need for the service in their area. The first alternative could result in VBI spectrum remaining unused and a demonstrated public need remaining unmet. As we indicated above, we believe that alternative is spectrally inefficient and contrary to the public interest. The second alternative places requirements upon television licensees which are generally not placed upon private and common carrier system operators. Such requirements would be unfair and unnecessary in light of the anticipated need for additional data transmission services.

---

[16] *E.g., Cellular Communications Systems*, 86 FCC 2d 469, 485 (1981).

[17] *Id.*

[18] In the FM Subcarriers proceeding, we concluded that "[o]n balance . . . we believe that any possible inequity in technical facilities is overshadowed by the public interest benefits to be derived from innovative and spectrum-efficient subcarrier services that are possible under the decision herein." *Authorization of FM Subcarriers, supra* at paragraph 28. Nevertheless, parties are invited to comment on any technical differences between the services that might result in any existing carriers suffering a significant economic impact from the advent of the proposed services.

[19] Furthermore, we do not propose to require cable television systems to carry any data transmission services offered on the VBI. *See Authorization of Teletext, supra* at paragraph 91. However, this decision is not intended to prejudice any decision ultimately rendered in the Teletext reconsideration.

[20] *Authorization of Teletext, supra* at 84.

14. Accordingly, it is proposed to amend Part 73 of the Commission's Rules and Regulations as set forth in the attached Appendix A.

15. Authority for the action taken herein is contained in Sections 4(i) and 303 (a), (b), (c), (d), (e), (f), (g), (h), and (r) of the Communications Act of 1934, as amended.

16. Pursuant to procedures set out in §§ 1.4, 1.415 and 1.419 of the Commission's Rules and Regulations, interested parties may file comments on or before April 16, 1984, and reply comments on or before May 1, 1984. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. An original and five copies of all comments, replies, briefs and other decuments filed in this proceeing shall be furnished the Commission. Further, members of the general public who wish to participate informally in this proceeding may submit one copy of their comments. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided the fact the Commission's reliance on such information is noted in the Report and Order.

17. For purposes of this nonrestricted notice and comment rulemaking proceeding, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rulemaking until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communication (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of that presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addressing matters not fully covered in any previously-filed written comments for the proceeding must prepare a written summary of that presentation; on the day of oral presentation, that written summay must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must state on its face that the Secretary has been served, and must also state by docket number the proceeding to which it relates. See generally, § 1.1231 of the Commission's Rules, 47 CFR 1.1231. A summary of the Commission's procedures governing *ex parte* contacts in informal rulemakings is available from the Commission's Consumer Assistance Office, FCC, Washington, DC 20544, (202) 632–6990.

18. All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

19. For further information concerning this proceeding, contact Alan Stillwell, Mass Media Bureau, (202) 632–6302.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

Chapter I of Title 47 of the Code of Federal Regulations is amended as set forth below.

PART 2—[AMENDED]

1. Section 2.106 is amended by revising footnote NG142 to the Table of Allocations to read as follows:

§ 2.106 Table of frequency allocation

* * * * *

NG142 TV broadcast stations authorized to operate in the bands 54–72, 76–88, 174–216, 470–51, and 512–806 MHz may use a portion of the television vertical blanking interval for the transmission of data signals, on the condition that harmful interference will not be caused to the reception of primary services, and that such data services must accept any interference caused by primary services operating in these bands.

PART 73—[AMENDED]

2. Section 73.646 is revised to read as follows:

§ 73.646 Data Service.

(a) Data service is the transmission of raw data, processed information, or any other communication in either a digital or analog mode.

(b) Data service is of an ancillary nature and as such is an elective, subsidiary activity. No service guidelines, limitations, or performance standards are applied to it. The kinds of service that may be provided include, but are not limited to, teletext, paging, computer software and bulk data distribution, and aural messages. Such services may be provided on a broadcast (sustained, advertiser supported, or subscription), point-to-point, or point to multipoint basis.

(c) Data services that are common carrier in nature are subject to common carrier regulation. Licensees operating such services are required to apply to the Commission for the appropriate authorization and to comply with all policies and rules applicable to the particular service. Responsibility for making the initial determination of whether a particular activity is common carriage rests with the licensee. Initial determinations submitted by licensees are subject to Commission examination and may be reviewed at the Commission's discretion.

(d) Television licensees are authorized to lease their data transmission facilities to outside parties. In all arrangements entered into with outside parties affecting data service operation, the licensee or permittee must retain control over all material transmitted in a broadcast mode via the station's facilities, with the right to reject any material that it deems in appropriate or undesirable. The licensee or permittee is also responsible for all aspects of technical operation involving data services.

(e) The grant or renewal of a TV station license or permit will not be furthered or promoted by proposed or past data service operation; the licensee must establish that its broadcast operation serves the public interest wholly apart from data service activities. (Violation of rules applicable to data services would, of course, reflect on a licensee's qualifications to hold its license or permit.)

(f) TV broadcast stations are authorized to transmit data service signals during any time period, including portions of the day when normal programming is not broadcast. Such transmissions must be in accordance with the technical provisions of § 73.682.

3. Section 73.621 is amended by revising paragraph (f) to read as follows:

§ 73.621 Noncommercial educational TV stations.

* * * * *

(f) *Data service.* The provisions governing data service in § 73.646 are applicable to noncommercial educational TV stations.

4. Section 73.682 is amended by adding new paragraph (a)(24) to read as follows:

§ 73.682 Transmission standards.

(a) * * *

(24) Specific scanning lines in the vertical blanking interval may be used for the purpose of transmitting data signals, subject to certain conditions:

(i) Data signals may be transmitted on Lines 10–18 and 20, all of Field 1 and Field 2. Use of specific lines is to be in accordance with Schedule I.

(ii) No observable degradation may be caused to any portion of the visual or aural signals.

(iii) Data signals must not produce emissions outside the authorized television channel bandwidth. Digital data pulses must be shaped to limit spectral energy to the nominal video baseband.

(iv) Transmission of emergency visual messages pursuant to § 73.1250 must take precedence over, and shall be cause for interrupting, a data service transmitted on the aural channel.

(v) A reference pulse for a decoder associated adaptive equalizer filter designed to improve the decoding of data signals may be inserted on any portion of the vertical blanking interval authorized for data service, in accordance with the signal levels set forth on Schedule I.

(vi) All lines authorized for data transmissions may be used for other purposes upon prior approval by the Commission.

* * * * *

5. Section 76.64 is revised to read as follows:

§ 76.64 Carriage of subscription television broadcast programs and data services.

The provisions of §§ 76.57, 76.59, 76.61, and 76.63 do not require carriage of any subscription TV broadcast program or any data service transmitted on the vertical blanking interval.

47 CFR Part 90

[PR Docket 84-109; FCC 84-33]

Amendment of the Commission's Rules To Eliminate the Permissible Communications Restrictions in the Private Land Mobile Radio Services

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rule making.

SUMMARY: The Commission has adopted a Notice of Proposed Rule Making which proposes to amend Part 90 to eliminate the rules regarding permissible communications in the Private Land Mobile Radio Services. The proposal, which was initiated by the Commission on its own motion, would delete the present rules which require that communications in these services be essential to or necessary for the official or business activities of licensees.

DATES: Comments are due by May 11, 1984 and replies by June 11, 1984.

ADDRESS: Federal Communications Commission, 1919 M Street, NW, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Michael D. Kennedy, Private Radio Bureau, Land Mobile & Microwave Division, Rules Branch, (202) 634–2443.

List of Subjects in 47 CFR Part 90

Private land mobile radio services, Radio.

Proposed Rulemaking

In the matter of amendment of Part 90 of the Commission's rules and regulations to eliminate the permissible communications restrictions in the Private Land Mobile Radio Services (PR Docket No. 84–109).

Adopted: February 3, 1984.
Released: March 12, 1984.
By the Commission.

Introduction

1. The Commission is initiating this proceeding on its own motion to propose the elimination of restrictions regarding permissible communications in the Private Land Mobile Radio Services.[1] Under current rules, licensees in these services are required to restrict their communications to matters directly related to their official or business activities. This has caused some problems for both licensees and the Commission. Licensees may have to have dual communications systems to meet all of their communications requirements. We have been requested to decide whether or not a particular communication is in connection with an "official" activity. We believe that the communications of licensees in the Private Radio Services should be as unrestricted as possible within our statutory guidelines. Once basic eligibility has been established, licensees should have discretion to decide which communication are essential to the efficient and effective operation of their businesses. We are therefore proposing to relax our permissible communications rules.

Background

2. The Private Land Mobile Radio Services comprise the largest group of licensed radio users regulated by the Commission.[2] These services provide for the communications needs of a broad community of users, from police departments to taxicab companies. Licensees are grouped into five main services according to their business or governmental activities: Public Safety Radio Services, Special Emergency Radio Service, Industrial Radio Services, Land Transportation Radio Service, and Radiolocation Service.

3. The Public Safety Radio Services include the Local Government, Police, Fire, Highway Maintenance, and Forestry-Conservation Radio Services. State and local government entities and private organizations operating under their jurisdiction are eligible to operate radios in these services. Only communications essential to the official activities of licensees are now permitted.

4. Persons and organizations engaged in medical and safety-related activities are eligible for authorizations in the Special Emergency Radio Service. Typical licensees include hospitals, physicians, rescue squads, school bus operators, beach patrols, and entities that require radio communications during emergencies. In this service, communications are restricted, in general, to the transmission of messages related to medical care and treatment and to the transmission of emergency messages. Some licensees are permitted to transmit urgent messages related to the operation of their organization, or administrative messages on a secondary basis to messages related to medical services.

5. The Industrial Radio Services include the Power, Petroleum, Forest Products, Motion Picture, Relay Press, Special Industrial, Business, Manufacturers, and Telephone Maintenance Radio Services. Eligibility criteria range from very restrictive, as in the Motion Picture Radio Service where licensees must be engaged in the production or filming of motion pictures, to very broad, as in the Business Radio Service where licensees need only be engaged in any type of commercial activity. Communications are restricted in varying degrees in these services. For instance, in the Business Radio Service, communications necessary to the commercial activities of the licensee are permitted while in the Telephone

[1] General restrictions on the communications of stations licensed in these services are given in 47 CFR 90.405. Additional restrictions appear throughout 47 CFR Part 90. For a complete list of the proposed rule amendments, see the attached Appendix.

[2] There are presently over 600,000 licensees employing over 7 million transmitters in these services.

Maintenance Radio Service only communications directly related to the construction, repair, maintenance, or operation of facilities are allowed. In most Industrial Radio Services, however, only communications essential to the activities of the licensees are allowed.

6. The Land Transportation Radio Services include the Motor Carrier, Railroad, Taxicab, and Automobile Emergency Radio Services. Entities such as trucking companies, railroads, taxicab companies, and persons and organizations providing emergency assistance to motorists are eligible for licensing in these services. Comminications are, in general, restricted to transmissions essential to the commercial activities of the licensees. In the Automobile Emergency Radio Service, however, reports of traffic conditions are specifically permitted.

7. The Radiolocation Service accommodates the use of radio methods for determination of direction, distance, speed, or position for purposes other than navigation. This service differs substantially from the other Private Radio Services in that the eligibility criteria are very broad and the communications are not typically voice. Licensees are engaged in commercial, industrial, scientific, educational, and local government activities. Licensees are grouped together in this service because of their common desire for radiolocation information, as opposed to the other Private Radio Services where licensees are grouped according to their business or official activities.

Discussion

8. A bifurcated structure is used by the Commission in regulating land mobile radio systems. Land mobile common carriers are regulated under Part 22 of the Commission's rules. They are required to offer service indiscriminately to the public. (See 47 CFR 22.0(a).) Private radio systems are restricted to providing radio service to specific groups of "eligibles" and are regulated under Part 90 of the Commission's rules. (See 47 CFR 90.1(b).) Accordingly, applicants who seek authorization in the private services must first demonstrate eligibility to be licensed in one of the particular Private Radio Services involved. Once a license is granted, the present rules restrict the communications of these licensees to transmissions specifically related to official or business activities. This has at times placed a burden on both licensees and the Commission to resolve issues as to what is and is not "a permissible communication". After considering this matter, it appears unnecessary and inefficient to continue to restrict completely the types of communications private radio licensees may transmit over their radios. In light of these factors, we propose to relax these restrictions.

9. Historically, the permissible communications rules have been regarded as a means of curtailing spectrum use by licensees. The theory has been that if each licensee is restricted in use on the channel for which licensed, more licensees can be accommodated in this limited resource. Moreover, spectrum has been allocated to the private services based solely on the perceived demand for communications related to the "official or business activities" of the licensees. However, it is clear that restrictions on communications capabilities can result in inefficiencies. Licensees may find that the communications permitted in a particular service satisfy only part of their needs.[3] It may become necessary for licensees to employ multiple frequencies or duplicate radio systems and, in some cases, to request authorization in more than one radio service to meet their needs.[4]

10. The Commission received formal guidelines for managing the spectrum made available to the Private Land Mobile Radio Services when, on September 13, 1982, the "Communications Amendments Act of 1982" was signed into law.[5] Section 331 (47 U.S.C. 332) of the Communications Act now provides that:

(a) In taking actions to manage the spectrum to be made available for use by the private land mobile services, the Commission shall consider, consistent with section 1 of this Act, whether such actions will—

(1) Promote the safety of life and property;

(2) Improve the efficiency of spectrum use and reduce the regulatory burden upon spectrum users, based upon sound engineering principles, user operational requirements, and marketplace demands;

(3) Encourage competition and provide services to the largest feasible number of users; or

(4) Increase interservice sharing opportunities between private land mobile services and other services.

* * * * *

We believe that this proposal, which allows licencees increased flexibility in their communications, is consistent with these new statutory guidelines. The present rules regarding permissible communications appear to be an unnecessary regulatory burden on spectrum users.

11. We propose to eliminate the present restrictions regarding permissible communications in the Private Land Mobile Radio Services. Specific rule amendments are detailed in the attached Appendix. We do not intend to alter the basic nature of these services. The primary goal of these services has been and will continue to be to provide for communications related to the official and business activities of licensees. We simply propose to remove the blanket prohibitions on all other types of communications. We expect most communications in these services will continue to relate to business and official activities. We propose to allow licensees, however, the discretion to determine for themselves the proper mix of business and non-business communications because we recognize that the ability of a lincesee and its employees to send and receive messages which are not, strictly speaking, business related can have a direct impact on the efficient operation of the licensee's business.

12. Our proposal to eliminate the permissible communications restrictions from our rules does not alter the eligibility criteria set forth in the individual radio services. These criteria allow us to group together licensees with common goals and interests. This is especially important on shared radio systems where all licensees must co-exist peacefully. All communications, however, would no longer be required to be restricted solely to those essential or necessary to the activities by which licensees have established eligibility.

13. Under our proposal, it will be necessary for all licensees to exercise additional self-discipline when operating their radios. If licensees abuse the additional flexibility we are proposing, we will consider enforcement action under Section 90.173(b) of our rules. This rule requires licensees to cooperate in the use of frequencies in

---

[3] A recurrent example is the Fire Radio Service where announcements of tests or meetings are "official" communications, but announcements of funeral services or fund raising efforts are not.

[4] Many licensees in the Private Land Mobile Radio Services have inquired whether they can transmit personal communications. Because the rules regarding permissible communications forbid personal communications, these licensees must apply for authorizations in the General Mobile Radio Service, where both personal and business communications are permitted. Only eight frequency pairs are available in this service. See 47 CFR 95–1 and 95–55.

[5] "The Communications Amendments Act of 1982," Pub. L. 97–259, 96 Stat 1087, September 13, 1982.

order to make the most effective use of their facilities. We could restrict the communications of licensees on a case by case basis if necessary to ensure effective use of Private Radio Service frequencies.

14. This proposal does not alter the present prohibition on transmitting program material for use in broadcasting or rendering a communications common carrier service in the Private Radio Services.[6] The Commission has provided for these activities in spectrum dedicated to the broadcast and common carrier services and they will not be duplicated in the Private Radio Services.

15. Pursuant to the Regulatory Flexibility Act of 1980, the Commission finds as follows:

I. *Reason for Action:* This proposal would allow private radio licensees to judge for themselves which communications would contribute to the effective operation of their businesses. We believe this will allow licensees to improve their business efficiency. We also recognize that by enhancing each licensee's ability to send those communications it considers desirable for its efficient business operation, we may be increasing the amount of difficulty licensees will experience in securing a clear channel on a shared frequency. Nevertheless, we believe on a balance that adverse effect must give way to the licensees' need for greater flexibility in the use if their private radio systems.

II. *Objective:* The Commission is advancing this proposal in order to increase the flexibility of Private Radio Service licensees in the use of their communications systems, to reduce current costs to licensees in that service, and to reduce the current administrative burden upon the Commission.

III. *Legal Basis:* The proposed action is authorized under Sections 4(i), 303(r), and 331(a) of the Communications Act of 1934, as amended, which authorize the Commission to make such rules and regulations as may be necessary to carry out its function and reduce the regulatory burden upon Private Land Mobile Radio Service licensees.

IV. *Description, Potential Impact and Number of Small Entities Affected:* While it is conceivable that this proposal, if adopted, may increase congestion among licensees sharing a frequency, the cost associated with that problem is not readily quantifiable. We believe our willingness to consider licensees' abuses that result in extreme congestion on a case-by-case basis will ameliorate the potential problem. Furthermore, any adverse economic effects should be balanced against the benefits which will accrue to the licensees, both large and small entities, from these proposed changes. Beyond this we are unable to quantify the potential effects on small entities. Accordingly, we are serving a copy of this proposal on the Small Business Administration and invite specific comments on this point by interested parties.

V. *Reporting, Recordkeeping and other Compliance Requirements:* No new requirements will be imposed upon Private Land Mobile Radio Service licensees.

VI. *Federal Rules which Overlap, Duplicate or Conflict with the Rule:* None.

VII. *Significant Alternatives:* There are no significant alternatives which would accomplish our stated objective of increasing the communications flexibility afforded Private Radio Service licensees. Additionally, in our view retaining the *status quo* represents a continuing burden on those licenses.

16. For purposes of this non-restricted notice and comment rule making, members of the public are advised that *ex parte* contacts are permitted from the time the Commission adopts a notice of proposed rule making until the time a public notice is issued stating that a substantive disposition of the matter is to be considered at a forthcoming meeting or until a final order disposing of the matter is adopted by the Commission, whichever is earlier. In general, an *ex parte* presentation is any written or oral communications (other than formal written comments/pleadings and formal oral arguments) between a person outside the Commission and a Commissioner or a member of the Commission's staff which addresses the merits of the proceeding. Any person who submits a written *ex parte* presentation must serve a copy of the presentation on the Commission's Secretary for inclusion in the public file. Any person who makes an oral *ex parte* presentation addresing matters not fully covered in any previously filed written comments for the preceding must prepare a written summary of that presentation; on the day of oral presentation, that written summary must be served on the Commission's Secretary for inclusion in the public file, with a copy to the Commission official receiving the oral presentation. Each *ex parte* presentation described above must also state by docket number the proceeding to which it relates. See generally, Section 1.1231 of the Commission's Rules, 47 CFR 1.1231.

17. This action is taken pursuant to Section 4(i) and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i) and 303(r). Interested persons may file comments on this proposal on or before May 11, 1984 and reply comments on or before June 11, 1984. All relevant and timely comments filed in accordance with Sections 1.415 and 1.419 of our rules and regulations (47 CFR 1.415 and 1.419) will be considered by the Commission before final action is taken in this proceeding. In reaching its decision, the Commission may take into consideration information and ideas not contained in the comments, provided that such information is placed in the public file, and provided that the Commission's reliance on such information s noted in its final decision.

18. In accordance with the provisions of § 1.419 of the rules and regulations, 47 CFR 1.419, formal participants shall file an original and five copies of their comments and materials. Participants wishing each Commissioner to have a personal copy of their comments should file an original and eleven copies. Members of the general public who wish to express their interest by participating informally may do so by submitting one copy of their comments without regard to form (as long as the docket number is clearly stated in the heading). All documents will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

19. For further information concerning this rule making contact Michael D. Kennedy of the Rules Branch, Land Mobile and Microwave Division, Private Radio Bureau, Federal Communications Commission, Washington, D.C., (202) 634–2443.

Federal Communications Commission.

William J. Tricarico,

Secretary.

Appendix

PART 90—[AMENDED]

§ 90.405 [Removed]

A. Section 90.405 of Part 90 of the Commission's Rules and Regulations is proposed to be removed in its entirety.

B. In the following sections the references to permissible communications would be removed by specific amendments in each section:

Section 90.17 (a) and (c)(1), § 90.19(a), § 90.21(a),

Section 90.23(a), § 90.25(a), § 90.33, § 90.35(a),

Section 90.37(a), § 90.39(a), § 90.41(a), § 90.43(a),

Section 90.45(a), § 90.63, § 90.65(a), § 90.67(a),

[6] 47 CFR 90.415.

Section 90.69(a), § 90.71(a), § 90.73(a) and (b),

Section 90.75(a), § 90.79(a) and (b)(1),

Section 90.81(a) and (b), § 90.85, § 90.89(a),

Section 90.91(a), § 90.93(a), § 90.95(a) and (b), and

Section 90.101, § 90.378, § 90.401, and § 90.645.

C. Section 90.173(b) is proposed to be amended to read as follows:

§ 90.173 Policies governing the assignment of frequencies.

* * * * *

(b) All applicants and licensees shall cooperate in the selection and use of frequencies in order to reduce interference and make the most effective use of the authorized facilities. Licensees of stations suffering or causing harmful interference are expected to cooperate and resolve this problem by mutually satisfactory arrangements. If the licensees are unable to do so, the Commission may impose restrictions including specifying the transmitter power, antenna height, or area or hours of operation of the stations concerned. Further, the use of any frequency at a given geographical location may be denied when, in the judgment of the Commission, its use in that location is not in the public interest; the use of any frequency may be restricted as to specified geographical areas, maximum power, premissible communications, or such operating conditions contained in this part or in the station authorization.

BILLING CODE 3410-11-M

Soil Conservation Service

Bean Creek Watershed Protection Plan, Michigan; Finding of No Significant Impact

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Bean Creek Watershed, Hillsdale and Lenawee Counties, Michigan.

FOR FURTHER INFORMATION CONTACT: Mr. Homer R. Hilner, State Conservationist, Soil Conservation Service, 1405 South Harrison Road, East Lansing, Michigan 48823, telephone 517-337-6702.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. A contract has been made with the State Historical Preservation Officer and concludes that it will have no effect on any cultural resources either eligible for or listed on the National Register of Historic Places. The State Archaeologist will be contacted if any land disturbance associated with this project and archaeological sites, features or materials are encountered during actual construction. As a result of these findings, Mr. Homer R. Hilner, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

This project concerns a plan for the installation and treatment of practices for watershed protection. These practices will include: conservation tillage, critical area treatment, grassed waterways, erosion control structures, diversions, sediment basins, wildlife plantings and terraces. Total financial and technical assistance cost is estimated to be $1,478,100; $1,110,800 Pub. L.-566 funds, and $367,300 local funds.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Homer R. Hilner. The FONSI has been sent to various federal, state, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address.

No administrative action on implementation of the proposal will be initiated until 30 days after the date of this publication in the **Federal Register**.

(Catalog of Federal Domestic Assistance Program No. 10.901, Watershed Protection And Flood Prevention Program. Office of Management and Budget Circular A-95 regarding state and local clearinghouse review of federal and federally assisted programs and projects is available)

Dated: March 12, 1984.

Homer R. Hilner,

State Conservationist.

BILLING CODE 3410-15-M

Carroll County Road Bank Critical Area Treatment RC&D Measure, Virginia; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Carroll County Road Bank Critical Area Treatment RC&D Measure, Carroll County, Virginia.

FOR FURTHER INFORMATION CONTACT: Mr. Manly S. Wilder, State Conservationist, Soil Conservation Service, 400 North Eighth Street, Richmond, Virginia 23240, telephone 804-771-2455.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Manly S. Wilder, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

Carroll County Road Bank Critical Area Treatment RC&D Measue, Virginia

The measure concerns a plan for seeding eroding road banks in Carroll County, Virginia. The planned work will include the establishment of 73 acres of permanent vegetative cover by hydro-seeding and mulching.

The Notice of Finding of No Significant Impact (FONSI) has been forwarded to the Environmental

Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Manly S. Wilder.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

BILLING CODE 6335–01–M

DEPARTMENT OF COMMERCE

Office of the Secretary

President's Commission on Industrial Competitiveness

AGENCY: Office of Economic Affairs, Commerce.

ACTION: Notice of meeting.

SUMMARY: This notice announces the forthcoming meeting of the Committee on Capital Resources, a subcommittee of the President's Commission on Industrial Competitiveness (Commission). The Commission was established by Executive Order 12428 on June 28, 1983 and its charter was approved on August 23, 1983. The Commission shall review means of increasing the long-term competitiveness of United States industries at home and abroad, with particular emphisis on high technology, and provide appropriate advice to the President through the Cabinet Council on Commerce and Trade and the Department of Commerce.

Time and Place: Friday, April 6, 1984, 8:30 am–5:00 pm, Sheraton Carlton Hotel, Mount Vernon Room, 923 16th Street, NW., Washington, D.C. 20006

Public Participation: The meeting will be open to public attendance. A limited number of seats will be available for the public on a first-come, first-served basis.

FOR FURTHER INFORMATION CONTACT: J. Paul Royston, President's Commission on Industrial Competitiveness, 736 Jackson Place, N.W., Washington, DC 20503, telephone: 202–395–4527 on substantive issues or Marilyn McLennan, Chief, Information Management Division, 202–377–4217, on issues regarding administration of the Commission.

SUPPLEMENTARY INFORMATION: The Capital Resources Committee will discuss problems affecting cost, supply and allocation of capital. The Committee will consider a report on reactions of economists and an outline of alternative solutions to capital problems. It also will review requirements for data comparing U.S. economic performance to other countries.

Dated: March 16, 1984.

Egils Milbergs,

Executive Director, President's Commission on Industrial Competitiveness.

BILLING CODE 3510–16–M

Bureau of the Census

Census Advisory Committee of the American Economic Association; Public Meeting

Pursuant to the Federal Advisory Committee Act (Pub. L. 92–463, as amended by Pub. L. 94–409), notice is hereby given that the Census Advisory Committee of the American Economic Association will convene on April 13, 1984, at 9:15 a.m. in Room 2424, Federal Building 3 at the Bureau of the Census in Suitland, Maryland.

The Census Advisory Committee of the American Economic Association advises the Director, Bureau of the Census, on technical matters, accuracy levels, and conceptual problems concerning economic surveys and censuses; reviews major aspects of the Bureau's programs; and advises on the role of analysis within the Bureau.

The Committee is composed of 15 members of the American Economic Association.

The agenda for the meeting, which is scheduled to adjourn at 3:45 p.m., is (1) Introductory remarks by the Director, Bureau of the Census, including staff changes and major budget program developments; (2) obtaining expert advice; (3) update on the service sector; (4) new Federal Government expenditure reports; (5) update on planning the 1990 census, including pretest plans and geographic coding update; (6) update on the Survey of Income and Program Participation; (7) valuation of non-cash benefits and their effect on poverty estimates; (8) general discussion and Committee recommendations; and (9) plans and date for the next meeting.

The meeting is open to the public, and a brief period is set aside for public comment and questions. Those persons with extensive questions or statements must submit them in writing to the Committee Control Officer at least 3 days prior to the meeting.

Persons planning to attend and wishing additional information concerning this meeting or who wish to submit written statements may contact the Committee Control Officer, Mr. Barry Rappaport, Bureau of the Census, Room 3061, Federal Building 3, Suitland,

Maryland. (Mail address: Washington, D.C. 20233). Telephone (301) 763–5483.

Dated: March 15, 1984.

C. L. Kincannon,

Deputy Director, Bureau of the Census.

[FR Doc. 84–7617 Filed 3–20–84; 8:45 am]

BILLING CODE 3510-07-M

COMMISSION OF FINE ARTS

Meeting

The Commission of Fine Arts will next meet in open session on Tuesday, April 10, 1984 at 10:00 a.m. in the Commission's offices at 708 Jackson Place, NW., Washington, D.C. 20006 to discuss various projects affecting the appearance of Washington including buildings, memorials, parks, etc., also matters of design referred by other agencies of the government. Access for handicapped persons will be through the main entrance to the New Executive Office Building on 17th Street between Pennsylvania Avenue and H Street, NW.

Inquiries regarding the agenda and requests to submit written or oral statements should be addressed to Mr. Charles H. Atherton, Secretary, Commission of Fine Arts, at the above address or call 566–1066.

Dated in Washington, D.C. March 13, 1984.

Charles H. Atherton,

Secretary.

BILLING CODE 6330-01-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting to Import Levels for Certain Cotton Textiles and Textile Products Produced or Manufactured in Brazil

March 16, 1984.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 22, 1984. For further information contact Diana Bass, International Trade Specialist (202) 377–4212.

Background

The CITA directive dated March 11, 1983 (48 FR 11143), as amended, (see also 48 FR 35482), established levels of restraint for certain categories of cotton and man-made fiber textile and apparel products, including Categories 300/301, 317 and 319, produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1983. Under the terms of the Bilateral Cotton and Man-Made Fiber Textile Agreement of March 31, 1982, the United States Government is increasing the current year limits for cotton textile products in Categories 300/301 (carded and combed yarn), by the application of carryforward and in Categories 317 (twill and sateen) and 319 (carded duck) by the application of carryover. To the extent used, this carryforward will be deducted from the limits established for these categories in the agreement year which begins on April 1, 1984.

A description of the textile categories in terms of T.S.U.S.A. number was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 16, 1984

Commissioner of Customs, Department of the Treasury, Washington, D.C., 20229.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of March 11, 1983 from the Chairman, Committee for the Implementation of Textile Agreements, concerning imports into the United States of certain cotton and man-made fiber textile products, produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1983.

Effective on March 22, 1984, paragraph 1 of the directive of March 11, 1983 is hereby further amended to adjust levels of restraint established for the following categories, according to the terms of the Bilateral Cotton and Man-Made Fiber Textile Agreement of March 31, 1982, between the Governments of the United States and the Federative Republic of Brazil:[1]

Category and Adjusted Twelve-Month Level of Restraint [2]

300/301—7,834,782 pounds
317—10,808,070 square yards
319—8,313,900 square yards

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

[1] The bilateral agreement provides, among other things, that: (1) within the aggregate and group limits, specific limits may be exceeded by designated percentages; (2) specific ceilings may be increased by carryover and carryforward up to 11 percent of the applicable category limit; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

[2] The levels have not been adjusted to reflect any imports exported after March 31, 1983.

Sincerely,

Ronald I. Levin,

Acting, Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 84–7537 Filed 3–20–84; 8:45 am]

BILLING CODE 3510-DR-M

Adjusting the Import Limit for Certain Man-Made Fiber Products Produced or Manufactured in the Republic of the Philippines

March 15, 1984

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 21, 1984. For further information contact Carl Ruths, International Trade Specialist (202) 377–4212.

Background

A CITA directive dated December 16, 1983 (48 FR 56425) established limits for certain specified categories of cotton, wool, and man-made fiber textile products, including Category 648 pt. (women's trousers), produced or manufactured in the Philippines and exported during the agreement year which began on January 1, 1984.

The 1984 limit for Category 648 pt. is being increased from 57,623 dozen to 64,276 dozen to account for the application of carryforward and swing, as provided under the terms of the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of November 24, 1982 between the Governments of the United States and the Republic of the Philippines. To the extent used in 1984, the carryforward will be deducted from the limit established for this category in 1985.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 15, 1984

Commissioner of Customs, Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 16, 1983 from the Chairman of the Committee for the Implementation of Textile

Agreements, concerning imports into the United States of certain cotton, wool, and man-made fiber textile products, produced or manufactured in the Philippines and exported during 1984.[1]

Effective on March 21, 1984, paragraph 1 of the directive of December 16, 1983 is hereby amended to include an adjusted level of restraint for Category 648 pt.[2] of 64,276 dozen.[3]

The Committee for the Implementation of Textile Agreements has determined that these actions fall within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553.

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 84-7538 Filed 3-20-84; 8:45 am]

BILLING CODE 3510-DR-M

Import Restraint Limits for Certain Wool and Man-Made Fiber Apparel Products Produced or Manufactured in the Socialist Federal Republic of Yugoslavia Under a New Bilateral Agreement

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on March 22, 1984. For further information contact Gordana Slijepcevic, International Trade Specialist (202) 377-4212.

Background

On February 21 and 27, 1984, the Governments of the United States and the Socialist Federal Republic of Yugoslavia exchanged diplomatic notes extending their Bilateral Wool and Man-Made Fiber Textile Agreement for two years, dating from January 1, 1984 and extending through December 31, 1985. The extended agreement establishes a specific limit of 19,000 dozen for men's and boys' wool and man-made fiber suits in Category 643/443, produced or manufactured in Yugoslavia and exported during the agreement year which began on January 1, 1984, and a sub-limit of 8,200 dozen for Category 443 exported during the same time period.

[1] The agreement provides, in part, that: (1) specific limits may be exceeded during the agreement year by designated percentages; (2) specific limits may be adjusted for carryover and carryforward; and (3) administrative arrangements or adjustments may be made to resolve minor problems arising in the implementation of the agreement.

[2] In Category 648, all TSUSA numbers except 383.1955, 383.2250, 383.6146, and 383.9071.

[3] The level of restraint has not been adjusted to reflect any imports exported after December 31, 1983.

The letter published below directs the Commissioner of Customs to prohibit entry for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textile products in Category 643/443 in excess of the designated limits.

This letter and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 16, 1984

Commissioner of Customs, Department of the Treasury, Washington, D.C., 20229.

This directive cancels and supersedes the directive of December 22, 1983 which directed you to prohibit entry of certain specified categories of wool and man-made fiber textile products, produced or manufactured in the Socialist Federal Republic of Yugoslavia and exported during the fifteen-month period which began on January 1, 1983 and extends through March 31, 1983.

Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Wool and Man-Made Textile Agreement of February 21 and 27, 1984, between the Governments of the United States and the Socialist Federal Republic of Yugoslavia; and in accordance with the provisions in Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on March 22, 1984, entry into the United States for consumption and withdrawal from warehouse for consumption of wool and man-made fiber textile products in Categories 643/443, produced or manufactured in the Socialist Federal Republic of Yugoslavia, and exported during the twelve-month period which began on January 1, 1984, in excess of the following limits:

Category and Twelve-Month Limit [1]

643/443—19,000 dozen of which not more than 8,200 dozen shall be in Cat. 443

In carrying out this directive, entries of textile products in the foregoing categories, produced or manufactured in the Socialist Federal Republic of Yugoslavia, which have been exported to the United States on and after January 1, 1983 and extending through December 31, 1983, shall, to the extent of any unfilled balances, be charged against the following limits:

Category and Adjusted Twelve-Month Level of Restraint [2]

643/443—18,884 dozen of which not more than 9,750 dozen shall be in Cat. 443

In the event the foregoing limits have been exhausted by previous entries, such goods shall be subject to the limits established for goods exported during 1984.

Textile products in Category 643/443 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

The limits set forth above are subject to adjustment in the future according to the provisions of the bilateral agreement of February 21 and 27, 1984 between the Governments of the United States and the Socialist Federal Republic of Yugoslavia which provide, in part, that (1) within the group limit the specific limit may be exceeded by five percent in any agreement period; (swing) (2) the group limit may be exceeded for carryover and carryforward not to exceed 11 percent of the applicable limit; and (3) up to 67% of the carryover and carryforward applied to the group limit may be applied to the Category 443 limit.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924) and December 14, 1983 (48 FR 55607), and December 30, 1983 (48 FR 57584).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The actions taken with respect to the Government of the Socialist Federal Republic of Yugoslavia and with respect to imports of wool and man-made fiber textile products from Yugoslavia have been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary for the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register**.

Sincerely,

Ronald I. Levin,

Acting, Chairman Committee for the Implementation of Textile Agreements.

[FR Doc. 84-7539 Filed 3-20-84; 8:45 am]

BILLING CODE 3510-DR-M

[1] The limits have not been adjusted to reflect any imports exported after December 31, 1983.

[2] The limits have not been adjusted to reflect any imports exported after December 31, 1982.

Public Information Collection Requirement Submitted to OMB for Review

The Department of Defense has submitted to OMB for review the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C Chapter 35). Each entry contains the following information: (1) Type of Submission; (2) Title of Information Collection and Form Number if applicable; (3) Abstract statement of the need for and the uses to be made of the information collected; (4) Type of Respondent; (5) An estimate of the number of responses; (6) An estimate of the total number of hours needed to provide the information; (7) To whom comments regarding the information collection are to be forwarded; (8) The point of contact from whom a copy of the information proposal may be obtained.

Revision

Personnel Security Clearance Change Notification.

The Defense Investigative Service (DIS) administers the DOD Industrial Security Program on behalf of all DOD components and other User Agencies. In accomplishment of this mission, defense contractors are required to keep the DIS apprised of status changes of cleared personnel, i.e., employment termination, transfer, change in name, etc. DISCO Form 562 is used by participating defense contractors to report these changes.

Participating cleared defense contractors: 12,285 responses, .2 hours.

Forward comments to Edward Springer, OMB Desk, Room 3235, NEOB, Washington, DC 20503, and Daniel J. Vitiello, DOD Clearance Officer, WHS/DIOR, Room 1C535, Pentagon, Washington, DC 20301, telephone (202) 694–0187.

A copy of the information collection proposal may be obtained from Fred Schonert, DIS, HQ Administrative Services Division, 1900 Half Street, SW, Washington, DC 20324, telephone (202) 693–0881.

Dated: March 16, 1984.

Defense Nuclear Agency (DNA); Scientific Advisory Group on Effects (SAGE); Meeting

The Scientific Advisory Group on Effects (SAGE) will meet in closed session May 1 and May 2, 1984 at the National Defense University, Fort McNair, Washington, DC.

Agenda: May 1–2 (0830–1700): Presentations, Discussions and Executive Sessions on Issues Related to the Strategic Defense Initiatives. The presentations and discussions in the above cited agenda will focus on current and planned activities of the Defense Nuclear Agency (DNA) and others in support of the President's Strategic Defense Initiatives, with emphasis on the Lethality and Target Hardening Project. Executive sessions will be held for the primary purpose of advising the Director, DNA, as to the adequacy of ongoing and planned activities. All planned presentations, discussions, and executive sessions may include classified defense information; therefore, under the provisions of Sections 552b(c) (1) and (3), Title 5, U.S.C., this meeting is closed to the public. Any additional information concerning the meeting may be obtained from Lt Col Robert A. Rissell, USAF, Scientific Secretary, SAGE, Headquarters, Defense Nuclear Agency, ATTN: DDST, Washington, DC 20305.

Dated: March 15, 1984.

BILLING CODE 3810-01-M

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement for a Proposed Flood Control Project for the City of Laurel, Mississippi

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of Intent To Prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY: 1. Description of proposed action: The proposed action is to prepare a DEIS relative to flood control alternatives to reduce flood damages in Laurel, Mississippi. The study area will encompass a portion of Tallahala and Tallahoma creek drainage basins in Jones county, Mississippi.

2. Alternatives to the Proposed Action: The US Army Corps of Engineers has available four alternatives. These are: no action, non-structural solution, structural solution, or a combination of non-structural and structural measures. Specific alternatives will be identified and included in the draft report scheduled for completion in September, 1985.

3. Description of the Scoping Process: Public participation in the development of the preliminary survey report will be initiated by a public workshop meeting scheduled for August 1984. Local news media will be provided public notices and information concerning public meetings and workshops for dissemination within the study area.

The DEIS will undergo the public review process as required by the National Environmental Policy Act. Significant issues to be addressed will be possible impacts of the proposed action and alternatives to air quality, drainage, water quality, general environment, cultural resources, and human safety of the project area and outlying areas. A public hearing may be held upon completion of the DEIS, if interests indicate that a public hearing will improve the decision making on this action. A notice informing the public as to time and location will be issued at least 30 days prior to such hearing.

4. Scope Meeting: No additional scoping meetings are scheduled.

5. DEIS Preparation: It is estimated that the DEIS will be available to the public in September 1985.

ADDRESS: Questions about the proposed action and DEIS can be answered by: Mr. Tommy Lightcap, PD–ES, US Army Engineer District, Mobile, Post Office Box 2288, Mobile, AL 36628.

Dated: March 12, 1984.

Patrick J. Kelly,

Colonel, CE, District Engineer.

ENVIRONMENTAL PROTECTION AGENCY

[OPP–30000/37; PH–FRL 2543–5]

Dicofol; Special Review of Pesticide Products Containing Dicofol

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Special Review.

SUMMARY: This Notice announces that EPA is initiating a Special Review of all pesticide products containing the active ingredient dicofol [1,1-bis(chlorophenyl)-2,2,2-trichloroethanol]. EPA has determined that dicofol is contaminated with DDT and chemically related compounds and that use of pesticides containing dicofol poses a risk to nontarget wildlife, particularly bird populations. The Special Review will be conducted under EPA's regulations in 40 CFR 162.11(a). During the Special Review process, EPA will carefully examine the risks and benefits of using dicofol products and will determine whether such use should be restricted or cancelled.

DATE: Comments, evidence to rebut the conclusions in this Notice, and other relevant information must be received on or before May 7, 1984.

ADDRESS: Written comments by mail to:

Information Services Section, Program Management and Support Division (TS–757C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

In person, bring comments to: Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA.

FOR FURTHER INFORMATION CONTACT:

By mail: Bruce A. Kapner, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 711–I, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, (703–557–7400).

SUPPLEMENTARY INFORMATION: EPA has determined that a Special Review will be conducted for all products containing dicofol. The term "Special Review" is the name now being used by EPA for the process previously called the Rebuttable Presumption Against Registration (RPAR) process. This name and associated modifications in the process will be proposed in regulations in the near future. The present Special Review will adhere to RPAR procedures now in effect.

Issuance of this Notice means that potential adverse effects associated with the use of dicofol have been identified and will be examined further to determine their extent and whether or not, in light of the benefits of dicofol, such risks are unreasonable.

A document entitled "Guidance for the Reregistration of Pesticide Products Containing Dicofol as the Active Ingredient" (Guidance Document) has been issued and is available to the public from the previously mentioned contact person. The Guidance Document explains the basis of EPA's decision to start this Special Review and also contains references, background information, data requirements, and other information pertinent to the

reregistration of pesticides containing dicofol. The exclusion of indoor uses of dicofol from the Special Review by the Guidance Document was based on general criteria for testing requirements. The persistence and mobility of DDT, however, dictate against excluding indoor uses from the Special Review.

I. Initiation of a Special Review

A. General

Issued under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended (7 U.S.C. 136–136y), 40 CFR 162.11 provides that an RPAR (Special Review) shall be conducted if EPA determines that a pesticide meets or exceeds any of the risk criteria relating to acute and chronic toxic effects set forth in 40 CFR 162.11(a)(3). In making this determination, EPA is guided by section 3(c)(8) of FIFRA which directs EPA to begin an RPAR (Special Review) only if it is based on a "validated test or other significant evidence raising prudent concerns of unreasonable adverse risk to man or the environment." If such a determination is made, the registrant(s) will be notified by certified mail and afforded an opportunity to submit evidence in rebuttal to EPA's presumption. In addition, any registrant may voluntarily petition EPA to cancel the registration of its product(s).

Following the initiation of the Special Review, the pesticide use or uses of concern will enter the public discussions stage of the Special Review process. Upon request, public discussions will be held in an effort to resolve risk issues through voluntary actions by the registrants. Requests for such meetings should be made in accordance with directions described in Unit V, below.

If risk issues cannot be resolved through voluntary actions, EPA would proceed to evaluate the risks and benefits of dicofol and to propose a regulatory solution in a Position Document 2/3 (PD 2/3). After obtaining comments from the Scientific Advisory Panel, the Secretary of Agriculture, registrants, and the public on PD 2/3," EPA would issue a Position Document 4 (PD 4) containing EPA's final regulatory position. If EPA determines that the risks of use exceed the benefits, EPA would issue a notice of intent to cancel the registration of products intended for such use. The notice may identify for specific uses certain changes in the composition, packaging, and/or labeling of the product which would reduce the risks to levels that EPA would consider acceptable. Cancellation would become effective unless within 30 days of issuance of the notice, the registrant either requests a hearing to challenge the cancellation or submits an application to amend his product's registration in a manner prescribed in the notice of intent to cancel.

It is emphasized that a Notice initiating a Special Review is not a notice of intent to cancel the registration of a pesticide, and a Special Review may or may not lead to cancellation. Ordinarily, EPA issues a notice of intent to cancel only after carefully considering the risks and benefits of a pesticide and determining that the pesticide may generally cause unreasonable adverse effects on the environment. Commenters may also submit for consideration data on benefits which they believe are relevant to registration or continued registration of dicofol products.

B. Presumption

EPA has determined that registrations and applications for registration of pesticide products containing dicofol meet or exceed the risk criteria in 40 CFR 162.11(a)(3)(ii)(C). That section provides that an RPAR (Special Review) shall be conducted if the use of a pesticide "[c]an reasonably be anticipated to result in significant local, regional, or national population reductions in nontarget organisms, or fatalities to members of endangered species." On the basis of the scientific studies and information summarized in the dicofol Guidance Document, EPA has concluded that this risk criterion has been exceeded by certain registrations of pesticide products containing dicofol and has no present basis to conclude that other uses do not meet the same risk criterion.

Specifically, EPA has determined that products containing dicofol are contaminated with significant amounts of DDT and related compounds, which together are designated as DDTr. These related compounds are the o,p' and p,p'. isomers of DDT, DDD, DDE, and a compound known as "extrachlorine" DDT [o,p' and p,p' bis(chlorophenyl)tetrachloroethane]. The amount of these contaminants is in the order of 10 percent in the technical dicofol products. When dicofol products are used these DDTr contaminants are released into the environment and bioaccumulate through food chains. There is a significant body of literature which documents the movement of DDT and its metabolites and their adverse effects on fish and wildlife. The factual basis and conclusion of law in the 1972 Opinion and Order, as published in the **Federal Register** of July 7, 1972 (37 FR 13369), cancelling the registrations of DDT products remain valid in 1984. To the extent that the current review of dicofol raises the same issues, e.g., the ecological effects, oncogenicity, and persistence of DDT, EPA may rely on these findings and conclusions to support its regulatory actions.

Based on an extensive knowledge of the fate of DDTr in the environment and the levels found in current dicofol products, EPA used a model to predict the environmental transport and accumulation of these contaminants in the Arroyo Colorado river basin. This river basin was chosen because of the high level of dicofol used on citrus crops and the important aquatic bird habitats in the drainage area. EPA estimated through the model that dicofol containing 10 percent DDTr would result in accumulated levels of DDTr of 9 ppm in the bodies of fish in that river. This level would be much greater than that known to cause adverse reproductive effects in certain aquatic birds. The specific data on which this model is based, as well as the various parameters and assumptions used in this model, can be found in the Guidance Document.

A major reproductive effect is the capability of DDTr to cause eggshell thinning in certain species of birds, thus impairing their reproductive capacity. Based on the vast body of knowledge about the adverse effects of DDT and related compounds on the environment, and based on the results of the model, EPA is concerned about DDTr at levels below the minimum amounts currently known to be in technical dicofol products. Because current dicofol products contain much more DDTr than that judged to cause adverse effects from certain uses, EPA has determined that the risk criterion for chronic wildlife effects has been met for all uses, a position that is consistent with the 1972 cancellation order.

EPA is requiring registrants to indicate the level of DDTr in their current products and to provide information on their manufacturing methods. EPA may then determine the extent to which the contamination can be reduced or eliminated, conceivably resolving the Special Review for some uses.

C. Rebuttal Criteria

All registrants, applicants for registration, and other interested members of the public are invited to submit evidence either to support or to rebut the presumption (as listed in Unit I.B. of this Notice) that the use of dicofol products containing DDTr will cause adverse ecological effects such as eggshell thinning and other reproductive impairment. Under 40 CFR

162.11(a)(4)(ii) the presumption triggering a Special Review must be rebutted by sustaining the burden of proving, in the case of the chronic wildlife toxicity criteria, "that when considered with proposed restrictions on use and widespread and commonly recognized practices of use, the pesticide will not concentrate, persist or accrue to levels in man or the environment likely to result in any significant chronic adverse effects."

D. Benefits Information

An estimated 2 to 3 million pounds of dicofol active ingredient are used annually as an acaricide in the United States. The major use sites are citrus crops and cotton, which accounted for an estimated two-thirds of the dicofol usage during the 1980–1981 period. Other use sites include fruits, vegetables, seed crops, ornamentals (indoor and greenhouse), lawn and turf grasses, around building foundations, and indoors for such uses as treating house plants.

EPA has done an initial review of the use of dicofol usage on citrus crops and cotton. The farm level value of the U.S. orange, grapefruit, and lemon production was approximately $1.8 billon for the 1980–1981 citrus season. Dicofol is used throughout the citrus-growing regions for control of mites. Uncontrolled mite populations reduce yield and quality of citrus and increase the average cost of citrus producton. Although alternative acaricides to dicofol are available, dicofol's widespread use suggests that alternatives are considered to be less cost effective than, or less preferable to dicofol for control of mite populations under specific circumstances.

The farm level value of U.S. cotton production is approximately $4 billion annually. Dicofol is used for mite control primarily in the State of California, which produces approximately $1 billion worth of cotton annually. Uncontrolled damage due to spider mites would increase the average unit cost of cotton. As in the case of citrus, although alternative acaricides to dicofol are available, dicofol's use, particularly in the San Joaquin valley of California, suggests that alternatives are considered to be less cost effective than, or less preferable to dicofol for control of mite populations under specific circumstances.

In addition to submitting evidence to rebut the presumptions of risk in the Special Review, 40 CFR 162.11(a)(5)(iii) provides that a registrant or applicant "may submit evidence as to whether the economic, social and environmental benefits of the use of the pesticide subject to the presumption outweigh the risk of use." If the presumption of risk is not rebutted, the benefit evidence submitted by registrants, applicants, and other interested persons will be considered by the Administrator when determining the appropriate regulatory action.

Registrants, applicants, or other interested persons who desire to submit benefit information should consider submitting information on the following subjects along with any other relevant information they desire to submit:

1. Identification of the economically important uses of dicofol, including market studies and estimated quantities applied for those uses.

2. Identification of alternative chemical and non-chemical methods for controlling mites for uses set forth in item 1 above.

3. Determination of the change in costs to dicofol users of obtaining equivalent pest control with available substitute products or crop management techniques.

4. Assessment of the expected changes in level of pest damage (if any) associated with the use of alternative pest control measures. Changes in pest damage can be measured in terms of yield and/or quality of commodities.

5. If changes in control costs or level of pest control are significant, an assessment can be made of the impact of dicofol's cancellation on the production and price of affected commodities.

II. Additional Grounds for Review

In 1972, the Administrator's Order and Opinion cancelling the registration of most products containing DDT concluded that "DDT is a potential human carcinogen," and "DDT presents a carcinogenic risk" (37 FR 13375). EPA also is aware of some data associating dicofol with oncogenic effects. However, exposure data and the analyses currently available, relative to this effect, are not the basis for the Special Review at this time.

The potential oncogenicity of dicofol *per se* is unknown due to the unavailability of adequate studies. A study conducted by the National Cancer Institute in 1978 suggests the possibility of oncogenicity in male mice, but the study is unacceptable due to the reported decomposition of the test material during the study. Because of the limitations of the data base, EPA is requiring all registrants of dicofol products to provide additional data on human toxicity and dietary exposure. All comments, information and related analyses received with respect to this potential adverse effect may serve as a basis for a supplemental Special Review and will, in any event, be included in EPA's final decision on registering pesticides containing dicofol.

In addition, EPA is requiring, through the Guidance Document, that additional testing of the toxicological, ecological, crop residue, and environmental fate properties of dicofol be conducted.

III. Rebuttal Submission Procedures

All registrants and applicants for registration are being notified by certified mail of the Special Review being initiated on their products containing dicofol.

The registrants and applicants for registration will have 45 days from the date this Notice is sent or until May 7, 1984 to submit evidence in rebuttal to the Agency's presumption. EPA is interested in a prompt resolution of this Special Review and therefore will not grant an extension of the comment period unless a good cause is shown.

A registrant or applicant for registration may claim that part or all of the material being submitted in response to this Notice is trade secret or confidential business information. If a commenter makes such a claim, the commenter should clearly identify the information claimed to be confidential by placing on the information a cover sheet, stamped or typed legend, or other suitable form of notice employing language such as "trade secret", "proprietary", or "company confidential," or by marking allegedly confidential portions of otherwise nonconfidential documents clearly. If a confidentiality claim is asserted, the information covered by the claim will be disclosed by the Agency only to the extent and by means of the procedures issued under 40 CFR Part 2, Subpart B published in the **Federal Register** of September 1, 1976 (41 FR 36906). If the information is not accompanied by a confidentiality claim at the time it is received, the Agency will place it in the public comment file where it will be available for public inspection.

A registrant or applicant who asserts a confidentiality claim for some, but not all, of the information submitted in rebuttal should furnish two copies of the information to the Agency. The first copy should contain all of the evidence submitted in rebuttal, with information claimed to be confidential clearly identified. The second copy should be identical to the first except that all information claimed as confidential should be deleted. The second copy will be placed in the public comment file. The first copy will be treated in accordance with the procedures set out above.

IV. Duty To Submit Information on Adverse Effects

Registrants are required by law to submit to EPA any additional information regarding adverse effects on man or the environment which comes to their attention at any time, pursuant to section 6(a)(2) of FIFRA. Registrants of dicofol products must immediately submit any published or unpublished information, studies, reports, analyses, or reanalyses regarding any dicofol residues, adverse effects in animal species or humans, and claimed or verified accidents to humans, domestic animals, or wildlife which have not been previously submitted to EPA. Registrants should notify EPA of any studies currently in progress, their purpose, the protocol, the approximate completion date, and a summary of all results obseved to date.

V. Public Comments, Inspections, and Requests for Meetings

During the time allowed for submission of rebuttal evidence, specific comments on the presumptions set forth in this Notice and on the material in the Guidance Document for reregistration are solicited from the public. In particular, any documented episodes of adverse effects on humans or domestic animals, and information as to any laboratory studies in progress or completed should be submitted to the Agency as soon as possible. Specifically, information on the fate and effects of dicofol, its DDT impurities, metaolities, and degradation products is solicited. Similarly, submission of any studies or comments on the benefits from the use of dicofol is requested. All comments and information received, as well as any other relevant information and analysis thereof which comes to the attention of EPA, may serve as a basis for final determination pursuant to 40 CFR 162.11(a)(5).

All comments and should be sent to the address given above, preferably in triplicate, to facilitate the work of EPA and others interested in inspecting them. The comments and information should bear the identifying notation "OPP-30000/37." Comments received after the specified time will be considered only to the extent feasible, consistent with the time limits imposed by 40 CFR 162.11(a)(5)(ii).

During the rebuttal comment period, interested members of the public or registrants may request a public meeting to discuss the risk issues and methods of reducing risks. Requests for such meetings should be directed to the contact person listed in this Notice. Any records pertaining to such meetings, including minutes, agendas, and comments received, will be filed in Rm. 236, CM #2, 1921 Jefferson Davis Highway, Arlington, VA, under docket number OPP-30000/37.

Dated: March 4, 1984.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Certain Companies; Pesticide and Feed Additive Petitions

AGENCY: Environmental Peotection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received pesticide and feed additive petitions relating to the establishment of tolerances for residures of certain pesticide chemicals in or on certain commodities.

ADDRESS: By mail submit comments identified by the document control number [PF-371] and the petition number, attention Product Manager (PM) 25, at the following address: Information Services Section (TS-757C), Program Management and Support Division, Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

In person, bring comments to: Information Services Section (TS-757C), Environmental Protection Agency, Rm. 236, CM#2, 1921 Jefferson Davis Highway, Arlington, VA 22202.

Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information." Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR Part 2. A sanitized copy of any material containing Confidential Business Information must be provided by the submitter for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice.

Written comments filed in response to this notice will be available for public inspection in the Information Services Section office at the address above from 8:00 a.m. to 4:00 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT:

Robert Taylor, PM-25, Registration Division (TS-767C), Environmental Protection Agency, Office of Pesticide Programs, 401 M St., SW., Washington, D.C. 20460.

Office location and telephone number: Rm. 245, CM#2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703-557-1800).

SUPPLEMENTARY INFORMATION: EPA has received pesticide and feed additive petitions relating to the establishment of tolerances for residues of certain pesticide chemicals and their metabolites in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

Initial Filings

1. *PP 4F3041.* Velsicol Chemical Corp., 341 East Ohio St., Chicago, Il 60611. Proposes amending 40 CFR 180.227 by:

a. Establishing tolerances for the combined residues of the herbicide dicamba (3,6-dichloro-*o*-anisic acid) and its metabolite 3,6-dichloro-5-hydroxy-*o*-anisic acid in or on the commodities as follows:

Commodities	Parts per million (ppm)
Corn, fodder	300.0
Corn, forage	300.0
Corn, grain	2.0
Barley, grain	1.0
Barley, straw	8.5
Grass, forage	700.0
Grass, hay	500.0
Wheat, grain	1.0
Wheat, straw	8.5

b. Establishing tolerances for the combined residues of dicamba and its 3,6-dichloro 2-hydroxybenoic acid metabolite in or on the commodities as follows:

Commodities	Parts per million (ppm)
Cottonseed	4.0
Soybean	4.0
Soybean, fodder	250.0
Soybean, forage	200.0
Soybean, hay	200.0

The proposed analytical method for determining residues is gas chromatography with Ni-63 electron capture detector.

2. *FAP 4H5428.* Velsicol Chemical Corp. Proposes amending 21 CFR 561.427 by establishing a regulation permitting residues of the herbicide dicamba and its metabolite 3,6-dichloro-5-hydroxy-*o*-anisic acid in or on the commodity cottonseed meal at 8.0 ppm.

3. *PP 4F3042.* American Cyanamid Company, Agricultural Research Division, P.O. Box 400, Princeton, NJ 08540. Proposes amending 40 CFR 180.361 by establishing tolerances for the combined residues of the herbicide pendimethalin [*N*-(ethylpropyl)-3,4-

dimethyl-2,6-dinitrobenzenamine) and its metabolite [4-([1-ethylpropyl]amino)-2-methyl-3,5-dinitrobenzyl alcohol] in or on the commodity tomatoes at 0.1 ppm. The proposed analytical method for determining residues is gas chromatography with a Ni–63 electron capture detector.

4. *PP 4F3019.* Union Carbide Agricultural Products Company, Inc., P.O. Box 12014, T.W. Alexander Dr., Research Triangle Park, NC 27709. Proposes amending 40 CFR 180.324 to reflect residues of the herbicide bromoxynil resulting from the application of phenol, octanic or butyric acid esters of bromoxynil in or on sorghum fodder, forage, and grain and residues of bromoxynil in corn fodder, forage, and grain. The proposes analytical method for determining residues is gas chromatography with Ni–63 electron capture detector.

5. *PP 4F3020.* Atlantic & Pacific Research Inc., P.O. Box 14545, North Palm Beach, FL 33408. Proposes amending 40 CFR 180.1042 by establishing an exemption from the requirement of a tolerance for the plant growth regulator aqueous extract of seaweed derived from *laminaria digitata, laminaria hyperbora, Fucus serratus; ascophyllum nodosum* in or on the commodity bananas. The proposed analytical method for determining residues in bean hypocotyl test.

(Secs. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)) and 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)))

Dated: March 8, 1984.

SUPPLEMENTARY INFORMATION: EPA has received pesticide, feed, and food additive petitions relating to the establishment of tolerances for residues of certain pesticide chemicals in or on certain commodities in accordance with the Federal Food, Drug, and Cosmetic Act. The analytical method for determining residues, where required, is given in each petition.

Initial Filings

1. *FAP 4H5422.* Union Carbide Corp., T.W. Alexander Dr., Research Triangle Park, NC 27709. Proposes amending 21 CFR Part 193 by establishing a regulation, in conjunction with an experimental use permit, permitting residues of the insecticide thiodicarb (dimethyl *N,N'*-(thiobis[(methylamino)carbonyloxy)) bis (ethanimidothioate)) and its metabolite methomyl [*S*-methyl *N*-((methylcarbamoyl)oxy)thioacetimidate] in or on the commodity tomato paste at 5.0 parts per million (ppm).

2. *PP 4F3009.* FMC Corp., 2000 Market St., Philadelphia, PA 19103. Proposes amending 40 CFR Part 180 by establishing tolerances for the combined residues of the insecticide carbosulfan (2,3-dihydro-2,2-dimethyl-7-benzofuranyl [(dibutylamino) thio] methylcarbamate) and 2,3-dihydro-2,2-dimethyl-benzofuranyl-*N*-methylcarbamate (carbofuran), its carbamate metabolites 2,3-dihydro-2,2-dimethyl-3-hydroxy-7-benzofuranyl-*N*-methylcarbamate, and 2,3-dihydro-2,2-dimethyl-3-keto-7-benzofuranyl-*N*-methylcarbamate; its phenolic metabolites 2,3-dihydro-2,2-dimethyl-7-benzofuranol, 2,3-dihydro-2,2-dimethyl-3-oxo-7-benzofuranol, 2,3-dihydro-2,2-dimethyl-3,7-benzofurandiol and its metabolite di-*n*-butylamine in or on the following commodities:

a. Apples and pears: 4.3 total, of which 2.0 ppm is carbosulfan *per se*, 1.0 ppm is carbamate metabolites, 0.3 ppm phenolic metabolites, and 1.0 ppm of the dibutylamine metabolite.

b. Kidney and liver of cattle, goats, hogs, horses and sheep: 1.5 ppm total, of which no more than .02 ppm is carbosulfan and its cholinesterase inhibiting metabolites, .08 ppm is phenolic metabolites, and 1.4 ppm is the dibutylamine metabolite.

c. Milk: 1 ppm total, of which no more than .02 ppm is carbosulfan *per se* and its cholinesterase inhibiting metabolites, 0.18 ppm is its phenolic metabolites, and 0.8 ppm is the dibutylamine metabolite.

d. Meat, fat and meat byproducts (except kidney and liver) of cattle, goats, hogs, horses and sheep: 0.2 ppm total, of which no more than .02 ppm is carbosulfan and its cholinesterase inhibiting metabolites .03 ppm is phenolic metabolites, and 0.15 ppm is the dibutylamine metabolite.

The proposed analytical method for determining residues is gas chromatography.

3. *FAP 4H5420.* FMC Corp. Proposes amending 21 CFR Part 561 by establishing a regulation permitting residues of the insecticide carbosulfan in or on the following commodities:

a. Apple pomace dry: 51.0 ppm total, of which 25 ppm is carbosulfan *per se*, 11.0 ppm is carbamate metabolites, 2.0 ppm is phenolic metabolites, and 13.0 ppm is the dibutylamine metabolite.

b. Apple pomace wet: 15.5 ppm total, of which 7.0 ppm is carbosulfan *per se*, 2.5 ppm is carbamate metabolites, 1.0 ppm is phenolic metabolites, and 5.0 ppm is the dibutylamine metabolite.

(Secs. 408(e), 68 Stat. 514 (21 U.S.C. 346a(e)) and 409(c)(1), 72 Stat. 1786 (21 U.S.C. 348(c)(1)))

The Agency has agreed that each cancellation shall be effective April 20, 1984 unless within this time the registrant, or other interested person with the concurrence of the registrant, requests that the registration be continued in effect. The registrants were notified by certified mail of this action.

The Agency has determined that the sale and distribution of these products produced on or before the effective date of cancellation may legally continue in commerce until the supply is exhausted, or for one year after the effective date of cancellation, whichever is earlier; provided that the use of these products is consistent with the label and labeling registered with EPA. Furthermore, the sale and use of existing stocks have been determined to be consistent with the purposes of FIFRA as amended. Sale or distribution of any quantity of any of these products produced after the effective date of cancellation will be considered to be a violation of the Act.

Requests that the registration of these products be continued may be submitted in triplicate to the Registration Support and Emergency Response Branch, Registration Division (TS–767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, D.C. 20460.

Comments may be filed regarding this notice. Written comments should bear a notation indicating the document control number "[OPP–66107]" and the specific registration number. Any comments filed regarding this notice will be available for public inspection in Rm. 236, CM#2, at the above address from 8:00 a.m. to 4:00 p.m., Monday through Friday, excluding legal holidays.

(Sec. 6(a)(1) of FIFRA as amended, 86 Stat. 973, 89 Stat. (751, 7 U.S.C. 136))

Dated: March 9, 1984.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests in the thirteen States listed below. Also listed is a quarantine exemption granted to the U.S. Department of Agriculture.

DATES: See each specific and quarantine exemption for its effective dates.

FOR FURTHER INFORMATION CONTACT: See each specific and quarantine exemption for the name of the contact person. The following information applies to all contact people:

By mail: Registration Division (TS-767C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

Office Location and telephone number: Rm. 716, CM #2, 1921 Jefferson Davis Highway, Arlington, VA. (703-557-1191).

SUPPLEMENTARY INFORMATION: EPA has granted specific exemptions to the:

1. Arizona Commission of Agriculture and Horticulture for the use of fenamiphos on non-bearing palm trees to control reinform nematodes; January 11, 1984 to January 1, 1985. Arizona had initiated a crisis exemption for this use. (Jim Tompkins)

2. California Department of Food and Agriculture for the use of 2-[1-(ethoxyimino) butyl]-5-[2-(ethylthio) propyl]-3-hydroxy-2-cyclohenxen-1-one on sugarbeets to control grassy weeds; February 1, 1984 to June 15, 1984. (Jim Tompkins)

3. Louisiana Department of Agriculture for the use of methiocarb on rice seed to control depredating birds; January 16, 1984 to November 30, 1984. (Jack E. Housenger)

4. Michigan Department of Agriculture for the use of permethrin on asparagus to control dark-sided cutworms; January 16, 1984 to June 30, 1984. (Gene Asbury)

5. North Dakota Department of Agriculture for the use of methalaxyl on sunflower seeds to control downy mildew; January 24, 1984 to June 15, 1984. (Jack E. Housenger)

6. U.S. Department of Agriculture for the use of chlorpyrifos on ornamental sod to control the imported fire ant in Alabama, Arkansas, Georgia, Louisiana, Mississippi, North Carolina, South Carolina, and Texas; February 9, 1984 to December 31, 1984. (Jack E. Housenger)

A quarantine exemption was granted to the U.S. Department of Agriculture (APHIS) for the use of malathion and diazinon on host sites in California to eradicate the Mexican fruit fly; January 19, 1984 to January 19, 1985. The U.S. Department of Agriculture had initiated a crisis exemption for this use. (Jack E. Housenger)

(Sec. 18, as amended, 92 Stat. 819 (7 U.S.C. 136))

Dated: March 9, 1984.

Edwin L. Johnson,

Director, Office of Pesticide Programs.

BILLING CODE 6560-50-M

[FRL-2546-1]

Issuance of General Civil Penalty Policy

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: This notice announces the availability of the EPA's new General Civil Penalty Policy. The new penalty policy sets out criteria which EPA should consider in pursing penalties against violators of environmental requirements. These criteria should be considered regardless of the statute or regulation involved. This policy will probably be of significant interest to members of the regulated community and the public in general. We are therefore issuing this notice so that those interested will become aware of the policy's existence and availability.

DATE: This policy became effective February 16, 1984.

ADDRESS: Jonathan D. Libber, Acting Chief, General Policy and Review Branch (LE-130A), Office of Enforcement and Compliance Monitoring, U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460, (202/426-7503).

SUPPLEMENTARY INFORMATION: EPA's new "Policy on Civil Penalties" explains the Agency's three primary goals in civil penalty assessment. Those three are: deterring future violations, resolving existing violations quickly and promoting equity within the regulated community. The policy identifies criteria which EPA should apply in pursuing these goals sets out guidance for each program to follow in developing statute-specific penalty assessment policies which build on the general policy.

The new Civil Penalty Policy consists of two documents. The first, "Policy on Civil Penalties," presents the philosophical basis for deciding on how large a civil penalty to pursue. The second document, "A Framework for Statute-Specific Approaches to Penalty Assessments," provides detailed guidance for the development of program-specific penalty policies.

Copies of this policy are available upon request. Pursuant to 40 CFR 2.120, EPA may charge a reasonable fee for each copy it provides.

Dated: March 12, 1984.

Courtney M. Price,

Assistant Administrator for Enforcement and Compliance Monitoring.

[Docket No. ECAO-HA-78-3; ORD-FRL 2548-2]

Draft Health Assessment Document for Tetrachloroethylene (Perchloroethylene)

AGENCY: Environmental Protection Agency.

ACTION: Revision Clarifying the Carcinogenicity Conclusions of the Draft Health Assessment Document for Tetrachloroethylene (Perchloroethylene), and Reopening of Public Comment Period.

SUMMARY: The External Review Draft of the EPA document, Draft Health Assessment Document for Tetrachloroethylene (Perchloroethylene), EPA-600/8-82-005B dated December 1983 was announced on December 23, 1983 in the **Federal Register** as being available for public review and comment from January 5, 1984 through March 5, 1984. On February 3, errata for pages 1-4 and 9-45 were distributed to all parties who had requested a copy of the document from EPA and inserted in all undistributed copies.

Because of a need to further clarify the conclusion regarding the carcinogenicity findings, the Agency is issuing a revised statement of these conclusions. This statement replaces the last four lines on page 1-3 and all of page 1-4, and also replaces the Conclusion section 9.4.3 on page 9-45. The revised statement is as follows:

Tetrachloroethylene has been demonstrated to induce malignant tumors of the liver in both male and female mice of the B6C3F1 strain. This constitutes a signal that tetrachloroethylene might be a carcinogen for humans. The technical adequacy and the strong nature of the positive response in the 1977 NCI tetrachloroethylene bioassay study makes it likely that a repeat bioassay would also be positive. In fact, a recent National Toxicology Program (NTP)

study, currently under audit, showed similar positive results. This bioassay study, if validated, would strengthen the evidence for carcinogenicity of tetrachloroethylene.

It should be recognized that there is a substantial body of opinion in the scientific community to the effect that the mouse liver overreacts to chlorinated organic compounds in contrast to that of the rat, and that the induction of live cancer in the mouse represents only a promoting action for spontaneous liver tumors which normally occur with substantial incidence. Furthermore, this promoting action might be related to liver damage associated only with high liver exposures to chlorinated agents such as tetrachloroethylene. However, the evidence is inconclusive either for this restrictive position on the mouse liver carcinogenic response to chlorinated organics or to the position that the mouse liver is as good as any other mammalian indicator of carcinogenicity for these compounds.

According to a literal interpretation of the criteria of the International Agency for Reseach on Cancer (IARC), the animal data supporting the carcinogenicity to tetrachloroethylene might be classified as limited. Also, since existing human epidemiologic data for tetrachloroethylene are inconclusive, its overall IARC ranking might be classified as Group 3, meaning, according to IARC language, the perchloroethylene cannot be classified as to its human carcinogenicity.

It should be recognized that Group 3 covers a broad range of evidence: From inadequate to almost sufficient animal data. Because of the strength of the mouse liver cancer response, tetrachloroethylene is at the upper end of this range. Hence, the classification of the carcinogenicity of tetrachloroethylene under the IARC criteria for animal evidence could be limited or almost sufficient depending on the nature of the bioassay evidence as it exists today and on the differing current scientific views about the induction of liver tumors in mice by chlorinated organic compounds. Therefore, the overall IARC ranking of tetrachloroethylene is Group 3 but close to Group 2B, i.e. the more conservative scientific view would regard tetrachloroethylene as being close to a probable human carcinogen, but there is considerable scientific sentiment for regarding tetrachloroethylene as an agenct that cannot be classified as to its carcinogenicity for humans.

In consideration of the above action, the public comment period will be reopened for 30 days beginning March 23, 1984 and ending April 23, 1984. In addition to this notice, copies of this revision will be forwarded to those who have already received copies of the draft health assessment document and errata from the ORD Publications Office, Center for Environmental Research Information (CERI), in Cincinnati. During the 30-day public comment period, requesters may obtain copies of these materials, as follows:

- Single copies will be available from ORD Publication—CERI–FRN, U.S. Environmental Protection Agency, 26 West St. Clair Street, Cincinnati, Ohio 45268. Tel. (513) 684–7562.
- These documents also will be available for public inspection and copying at the EPA library at Waterside Mall, 401 M Street, SW., Washington, D.C. 20460.

Comments on the revision should be submitted in writing by close of business on April 23, 1984 to: Project Officer for Tetrachloroethylene (Perchloroethylene), Environmental Criteria and Assessment Office (MD–52), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

FOR FURTHER INFORMATION CONTACT: Ms. Diane Chappell, 919/541/3637.

Dated: March 16, 1984.

Bernard D. Goldstein,

Assistant Administrator for Research and Development.

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

[MM Docket Nos. 84–272 and 84–273; File Nos. BP–821021AF and 830502AK]

Cortland Broadcasting Co., Inc., and Geri Taczak Media, Inc.; Hearing Designation Order

In the Matter of Applications of Cortland Broadcasting Company, Inc., Cortland, Ohio, Req: 830 kHz, 1 kW, D (MM Docket No. 84–272, File No. BP–821021AF); Geri Taczak Media, Inc., WOKG, Warren, Ohio, Has: 1570 kHz, 0.5 kW, DA–D, Req: 830 kHz, 5 kW, DA–D (MM Docket No. 84–273, File No. 830502AK) For Construction Permit.

Adopted: March 5, 1984.
Released: March 15, 1984.

By the Chief, Mass Media Bureau.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications.

2. The applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding. Although the applications are for different communities, they would serve substantial areas in common. Therefore, in addition to determining pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of them would best provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will be specified.

3. Accordingly, it is ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

(1) To determine the areas and populations which would receive primary service from each proposal, and the availability of other primary aural services to such areas and populations.

(2) To determine, in light of Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient, and equitable distribution of radio service.

(3) To determine in the event it is concluded that a choice between the applicants should not be based solely on considerations relating to Section 307(b), which of the proposals would, on a comparative basis, better serve the public interest.

(4) To determine in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

4. It is further ordered, that to avail themselves of the opportunity to be heard and pursuant to § 1.221(c) of the Commission's Rules, the applicants shall within 20 days of the mailing of this Order, in person or by attorney, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

5. It is further ordered, that pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, the applicants shall give notice of the hearing within the time and in the manner prescribed in such Rules, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communciations Commission.

W. Jan Gay,

Assistant Chief, Audio Services Division, Mass Media Bureau.

[FR Doc. 84-7302 Filed 3-20-84; 8:45 am]
BILLING CODE 6712-01-M

[MM Docket Nos. 84-259 and 84-260; File Nos. BPCT-830328KJ and BPCT-830429KF]

George E. Gunter; and Midwest Television Inc.; Hearing Designation Order

In the Matter of Applications of George E. Gunter, Springfield, Illinois, (MM Docket No. 84-259, File No. BPCT-830328KJ) and Midwest Television, Inc., Springfield, Illinois, (MM Docket No. 84-260, Filed No. BPCT-830429KF) For Construction Permit.

Adopted: February 29, 1984.
Released: March 15, 1984.

By the Chief, Mass Media Bureau.

1. The Commission, by the Chief, Mass Media Bureau, acting pursuant to delegated authority, has before it: (1) The above-captioned mutually exclusive applications of George E. Gunter (Gunter) [1] and Midwest Television, Inc. (MTI) for authority to construct a new commercial television station on Channel 49, Springfield, Illinois; (2) a petition to deny filed by Springfield Independent Television Company, Inc., (SITCI), licensee of station WRSP-TV, Springfield, Illinois against Gunter; (3) a comment on petition to deny, filed by Gunter and (4) a reply to comments on petition to deny filed by SITCI.

2. SITCI claims standing as a party in interest pursuant to Section 309(d)(1) of the Communications Act of 1934, as amended, on the grounds that if Gunter's application were granted, the new station would compete for audience and revenue with SITCI's station WRSP-TV, Channel 55, Springfield, Illinois. We find that SITCI has standing, *FCC v. Sanders Brothers Radio Station*, 309 U.S. 470 (1940).

Financial Qualifications

3. Petitioner alleges that the certifications contained in Gunter's application cannot support a finding that he posseses the financial qualifications to implement each of his pending proposals. (Gunter is an applicant for six other television stations.) Petitioner states that Commission policy requires that an applicant with more than one pending proposal must be able to show his ability to finance each pending proposal, citing *Sawnee Broadcasting Co.*, 7 RR 2d (1966). This case was, of course, decided well before the Commission changed the application form to permit an applicant to certify as to its financial qualifications. It does not, therefore, stand for the proposition that an applicant with several co-pending applications may not certify that it is financially qualified.

4. The Commission has not modified its requirement that an applicant have the financial ability to construct and operate its proposed facility for three months. The revised Section III (Financial Qualifications) of FCC Form 301 allows an applicant to certify that it is financially qualified. Gunter has certified that he is financially qualified. He has, therefore, done all that is required by the Commission. Petitioner's allegations are speculative and lack specificity. Petitioner has not supplied any information or documentation to indicate that the certifications are false. Consequently, we find that the allegations do not warrant the addition of a financial issue.

Staffing Proposal

5. Petitioner further alleges that Gunter's proposal to employ less than 5 full-time persons is inherently unreasonable and is incapable of effectuation. Petitioner notes that the Commission has not hesitated in the past to insure that staffing proposals are somewhat realistic and it should not hesitate to find Gunter's proposal defective. Petitioner points out that its own station, WRSP-TV, Springfield, Illinois, has a staff of 13 full-time and 3 part-time employees.

6. The Commission has no rigid rules or standards prescribing personnel or staffing requirements; there is only a general policy that there be a reasonable likelihood that an applicant can effectuate its proposed operation with its staff. *Bisbee Broadcasting, Inc.*, 48 FCC 2d 291, 292-293 (1974). George Gunter proposes to operate the television station with less than five full-time employees. He proposes to operate 126 hours per week, of which 7 hours (5.95%) will be local programming. Based on a 7-day week, this means that the station would be in operation 18 hours per day, of which 1 hour would be local programming. An 18-hour day would appear to require at least two shifts. This would mean that the station must be operated by no more than two full-time employees per shift. The petitioner, moreover, commissioned a study of comparable stations in comparable markets to determine the staffs required. This study indicates that a station operating as many hours as proposed here (including 1 hour, 10 minutes per day of local programming) requires between 27 and 49 full-time employees. While we recognize that petitioner's study cannot be taken to mean that the applicant cannot effectuate its proposal with far fewer people than the study indicates, we believe it raises a valid question regarding Gunter's staffing proposal which warrants exploration in the hearing. Accordingly, an appropriate issue will be specified.

7. The proposed antenna for Gunter is to be mounted on the tower of AM radio station WTAX, Springfield, Illinois. Consequently, any grant of a construction permit to Gunter will be conditioned to ensure that WTAX's radiation pattern is not adversely affected by the construction of the proposed station.

8. MTI intends to operate the proposed facility as a satellite of its commonly owned station, WCIA-TV, Champaign, Illinois. Further, the Grade B contours of WCIA-TV and the proposed station will overlap over an area of 1560 sq. miles. The overlap area represents approximately 46% of the Grade B coverage area of the proposed station. George E. Gunter does not propose a satellite operation. Accordingly, an issue will be specified with respect to the need for a satellite operation.[2]

9. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed.[3] Since the applications are mutually exclusive, the Commission is unable to make the statutory finding that their grant will serve the public interest, convenience, and necessity. Therefore, the applications must be designated for hearing in a consolidated proceeding on the issues specified below.

10. Accordingly, it is ordered, that pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are

---

[1] Gunter filed an amendment on September 7, 1983, the "B" cut-off date, which was accompanied by a request for lease to amend. Since the amendment contains information required by the staff to complete its processing of Gunter application, the petition for leave to amend is granted and the amendment is accepted for filing. However, Gunter shall not receive any comparative credit as a result of the amendment.

[2] The issue to be specified as to whether circumstances exist which make the "satellite" form of operation necessary in Springfield will be a qualifying issue, for if it is resolved in the negative, the application proposing a satellite operation can not be granted.

[3] We note that MTI is the licensee of KFMB-TV, San Diego, California. There are two complaints pending before the Fair Employment Practices Commission of California and the Superior Court of California for the County of San Diego arising out of the operation of KFMB-TV. Accordingly, any grant of MTI's application will be without prejudice to such action as the Commission may deem appropriate as a result of the outcome of these proceedings.

designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place to be specified in a subsequent Order, upon the following issues:

(1) To determine, with respect to Midwest Television, Inc., whether circumstances exist which justify the operation of a satellite in Springfield, Illinois.

(2) To determine with respect to George E. Gunter:

(a) The size, composition, duties and hours of the staff proposed by the applicant.

(b) In light of the evidence adduced pursuant to the foregoing, whether there is a reasonable likelihood that the applicant can effectuate its proposal with the staff proposed.

(3) To determine which of the proposals would, on a comparative basis, better serve the public interest.

(4) To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

11. It is further ordered, that the petition to deny the application of George Gunter, filed by Springfield Independent Television Company, Inc. is granted, to the extent indicated and otherwise is denied.

12. It is further ordered, that Springfield Independent Television Company, Inc. is made respondent.

13. It is further ordered, that in the event of a grant of the application of George Gunter, the construction permit shall be conditioned as follows:

During installation of the antenna authorized herein, AM station WTAX shall determine operating power by the indirect method. Upon completion of the installation, antenna impedance measurements on the AM antenna shall be made and, prior to or simultaneous with the filing of the application for license to cover this permit, the results submitted to the Commission (along with a tower sketch of the installation) in an application for the AM station to return to the direct method of power determination.

14. It is further ordered, that to avail themselves of the opportunity to be heard, the applicant and the party respondent herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, filed with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

15. It is further ordered, that the applicant herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Roy J. Stewart,

BILLING CODE 6712–01–M

FEDERAL RESERVE SYSTEM

BKLA Bancorp; Formation of Bank Holding Co.

The company listed in this notice has applied for the Board's approval under sections 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1) to become a bank holding company by acquiring voting shares and/or assets of a bank. The factors that are considered in action on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. Interested persons may express their views in writing to the address indicated for the application. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, indentifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

A. Federal Reserve Bank of San Francisco (Harry W. Green, Vice President) 101 Market Street, San Francisco, California 94105:

1. *BKLA Bancorp,* Los Angeles California; to become a bank holding company by acquiring 100 percent of the voting shares of Bank of Los Angeles County, Los Angeles, California. Comments on this application must be received not later than April 13, 1984.

Board of Governors of the Federal Reserve System, March 16, 1984.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

GENERAL SERVICES ADMINISTRATION

[GSA Bulletin FPR 63]

Federal Procurement; Changes in Small Business Size Standards and Requirements

March 19, 1984.

1. *Purpose.* This bulletin provides interim guidance concerning revised small business size standards and determinations of the U.S. Trade Representative concerning the dollar thresholds and covered agencies under the Trade Agreements Act of 1979.

2. *Expiration date.* This bulletin expires December 31, 1984, unless revised or superseded sooner.

3. *Background.*

a. *Small business.*

(1) The Small Business Administation (SBA) has prescribed detailed definitions for small business concerns (size standards) in 13 CFR Part 121 as authorized by the Small Business Act (15 U.S.C. 632).

(2) On February 9, 1984, the SBA published revised small business size standards regulations in the **Federal Register**. The revisions made to 13 CFR Part 121 by the SBA are intended to:

(a) Deal with the effects of inflation by adjusting the size standards so as to return to the status quo of 1975 when the last inflationary adjustment was made;

(b) Provide one set of standards for both the SBA procurement and financial assistance programs; and

(c) Address longstanding problems of defining small business in certain industries.

(3) The SBA size standards and related regulations are set forth in Subpart 1–1.7 of the FPR. Section 1–1.701 states that the size standards are based on the governing regulations of SBA. Therefore, the interim guidance set forth in paragraph 4 below is provided until the details of the revised SBA regulations can be incorporated into applicable procurement regulations.

b. *Purchases under the Trade Agreement Act oif 1979.*

(1) Executive Order 12260 provides that the U.S. Trade Representative shall determine, from time to time, the dollar equivalent of 150,000 Special Drawing right units.

(2) Sections in the FPR that contain a reference to this dollar threshold include the following: 1–6.1601(b), 1–6.1601(e), 1–6.1603(b), 1–6.1603(c), 1–6.1603(d), 1–6.1605–(a), and 1–6.1609(a).

(3) Section 1–6.1613 lists agencies covered by the Agreement on Government Procurement.

4. *Agency guidance.*

a. *Small business size standards.* After the March 12, 1984, effective date of the revised SBA small business size standard regulations, and pending their incorporation into the Federal Acquisition Regulation, agencies should follow the revised provisions of 13 CFR Part 121 (see 49 FR 5023, February 9, 1984).

b. *Purchases under the Trade Agreements Act of 1979.*

(1) Effective January 1, 1984, the U.S. Trade Representative has determined that, with respect to the Agreement on Government Procurement, the dollar equivalent of 150,000 Special Drawing Right units is $161,000 (48 FR 44790).

(2) Effective December 29, 1981, the status of the Peace Corps changed from an agency within the Action agency to an independent agency by the International Security and Development Cooperation Act of 1981 (22 USC 2501–1).

Allan W. Beres,

Assistant Administrator for Acquisition Policy.

BILLING CODE 6820-61-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

Consumer Participation; Notice of Open Meeting

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing a national consumer exchange meeting, chaired by Mark Novitch, M.D., Acting Commissioner of Food and Drugs.

DATE: Wednesday, April 11, 1984, 1:15 p.m. to 3:15 p.m.

ADDRESS: Hubert Humphrey Bldg. Auditorium, 200 Independence Ave. S.W., Washington, DC 20201.

FOR FURTHER INFORMATION CONTACT: Alexander Grant, Associate Commissioner for Consumer Affairs, Food and Drug Administration, 5600 Fishers Lane, Rm. 16–85, Rockville, MD 20857, 301–443–5006; TTY (for the deaf) 301–443–1818.

SUPPLEMENTARY INFORMATION: The purpose of this meeting is for consumers and FDA officials to exchange views and to relay information on vital health and policy issues. Proposed topics of discussion at this meeting will be Sulfiting Agents in Foods and Drugs, Ethylene Dibromide (EDB), and the **Federal Register** Proposal on Irradiated Foods (49 FR 5714; February 14, 1984).

Dated: March 15, 1984.

William F. Randolph,

Acting Associate Commissioner for Regulatory Affairs.

[FR Doc. 84-7505 Filed 3-20-84; 8:45 am]

BILLING CODE 4160-01-M

Health Resources and Services Administration

Advisory Council; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made

of the following National Advisory body scheduled to meet during the month of April 1984:

Name: National Council on Health Planning and Development.

Date and Time: April 5–6, 1984, 8:30 a.m.

Place: Room 800, Hubert H. Humphrey Building, 200 Independence Avenue, S.W., Washington, D.C. 20201.

The entire meeting is open.

Purpose: The National Council on Health Planning and Development is responsible for advising and making recommendations with respect to: (1) The development of national guidelines under section 1501 of Public Law 93–641, (2) the implementation and administration of Title XV and XVI of Public Law 93–641, and (3) an evaluation of the implications of new medical technology for the organization, delivery and equitable distribution of health care services. In addition, the Council advises and assists the Secretary in the preparation of general regulations to carry out the purposes of section 1122 of the Social Security Act and on policy matters arising out of the implementation of it, including the coordination of activities under that section with those under other parts of the Social Security Act or under other Federal or federally assisted health programs. The Council considers and advises the Secretary on proposals submitted by the Secretary under the provisions of section 1122(d)(2) that health care facilities or health maintenance organizations be reimbursed for expenses related to capital expenditures notwithstanding that under section 1122(d)(1) there would otherwise be exclusion of reimbursement for such expenses.

Agenda: The Council will deliberate on a prospective payment system for capital. The Department of Health and Human Services is required to report to Congress by October 1984 on how capital should be treated under the Diagnostic Related Groups prospective payment system. This Council meeting will serve as a public forum for all the proposals that have surfaced at this time. The Council will consider these proposals and forward a recommendation to the Secretary.

On April 5, a number of presentations will be made to overview the various methods of treating capital and to summarize the resultant impact on the consumer, hospital and investment banking communities. In addition, several invited organizations will present their proposals and perspectives on the issue. On April 6, the Council will hear status reports from officials of the Health Resources and Services Administration, and conduct other Council business.

A public comment period will be provided each day. A detailed agenda may be obtained after March 20, 1984 by writing or telephoning Mrs. Diane A. McMenamin.

Anyone requiring information regarding the subject Council should contact Mrs. Diane A. McMenamin, Executive Secretary, National Council on Health Planning and Development, Room 9–A–18, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, telephone 301–443–6377.

Agenda items are subject to change as priorities dictate.

Dated: March 15, 1984.

George T. Lewis,

Acting Advisory Committee Management Officer, HRSA.

BILLING CODE 4310–40–M

Suspension of Approval of Record Title Assignments of Oil and Gas Leases

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of suspension of approval of record title assignments of oil and gas leases.

SUMMARY: The Bureau of Land Management is reviewing the policy of approving small acreage oil and gas lease record title assignments in Alaska and the lower 48 States. A recent trend has developed whereby assignments of record title interests of oil and gas leases are fragmenting larger lease acreages into parcels of smaller undevelopable size which is counter-productive to the intent of the Mineral Leasing Act of 1920 and the Fiscal Year 1981 Department of the Interior Appropriations Acts which is the timely development of reserves and production of the resources on Federal lands.

For noncompetitive nonproducing lands under lease for oil and gas, approval of record title assignments of less than 640 acres in the lower 48 States is hereby suspended until further notice. This suspension also includes competitive and noncompetitive lands under lease for oil and gas of less than 2,560 acres in Alaska. Where diligent operations on a lease are likely to occur, exceptions will be made (a) where the record title assignment is for 100 percent of the original lease size or (b) where the assignee transmits a request for approval of the assignment together with evidence of diligent development, that is, an approvable application or request for a legitimate proposal, as follows:

1. Evidence that an Application for Permit to Drill with all attachments has been filed with the proper BLM office, see 43 CFR 3160;

2. Request for approval of a Cooperative or Unit Agreement, see 43 CFR 3180;

3. Request for approval of a Communitization or Drilling agreement, see 43 CFR 3105.2;

4. Request for approval of Operating, Drilling or Development Contracts, see 43 CFR 3105.3; or

5. Justification in special unique cases not meeting the above exceptions that is submitted to the authorized officer for consideration at the same time as submittal of the request for approval of an assignment. Such a justification must demonstrate that the assignment will advance diligent development of the leased resources.

Applicants with record title assignments now pending approval may qualify under the second exception by submitting to the proper Bureau of Land Management office one of the above documents. Reference must be made on the document of the lease serial number of the assignment pending approval.

This suspension also extends to processing record title assignments of an undivided interest where the average undivided interest holding in the lease is less than 10 percent. Assignments of operating rights or royalty interests are unaffected by this suspension.

EFFECTIVE DATE: March 21, 1984.

FOR FURTHER INFORMATION CONTACT: Gloria J. Austin, Division of Fluid Mineral Leasing, Bureau of Land Management (620), 18th and C Streets, NW., Washington, D.C. 20240, telephone (202/FTS 653–2228).

Dated: March 15, 1984.

Temporary Closure Order Canceled; Waterton Canyon, Colorado

AGENCY: Bureau of Land Management, Interior.

ACTION: Temporary closure order cancelled—Waterton Canyon, Colorado.

SUMMARY: Notice of temporary closure, published in the **Federal Register** of September 7, 1979 at pages 52344 and 52345, temporarily closed the following public lands to all public use for the protection of public health and safety during the construction of the Denver Water Board's Strontia Springs reservoir, dam, conduit, tunnel and related facilities:

Sixth Principal Meridian, Colorado

T. 7 S., R. 69 W.,
Sec. 5, NE¼ and S½;
Sec. 8, E½E½;
Sec. 17, E½E½;
Sec. 20, N½NE¼, SE¼NW¼, SW¼SW¼, S½SE¼ and N½SW¼.

Project construction is now complete; the need for the closure to public use no longer exists. Accordingly, the closure order is hereby canceled, effective 10 a.m., April 21, 1984.

Dated: March 9, 1984.

H. Robert Moore,

Acting State Director.

BILLING CODE 4310–JB–M

Salt Lake District; Proposed Amendment to Randolph Management Framework Plan

AGENCY: Bureau of Land Management.

ACTION: Notice of proposed amendment of Randolph Management Framework Plan.

SUMMARY: Notice is hereby given that the Bureau of Land Management (BLM), Salt Lake District, intends to amend the

forestry portion of the Management Framework Plan (MFP) for the Randolph Planning Unit; Rich County, Utah.

Recommendations and decisions in the Randolph MFP call for managing forestry products by issuing permits for posts, poles, and firewoods to meet local needs only. The plan does not provide for commercial cutting of woodland products.

BLM is now preparing a forestry management plan for the Bear River Resource Area, including Rich County. Information in the forestry management plan has demonstrated a need for reassessment of the MFP to allow for possible commercial cutting of woodland products. The public demand for firewood has been steadily increasing due to rising heating costs and the trend toward energy efficient stoves. As a result, indiscriminate theft of all types of woodland products has increased proportionately in the Randolph Planning unit. In addition, a serious mountain pine beetle infestation has developed in the area; therefore, an increasing percentage of susceptible lodgepole pine have become infected. The U.S. Forest Service has been involved in an intensive program to control the reinfection of forest lands in adjacent areas; therefore, there has been considerable pressure on other landowners to attempt a beetle control program. Long-term, sustained-yield management, including identifying cutting areas for commercial and personal use, has been identified by BLM as a possible solution to these existing forestry management problems in the area.

An environmental assessment evaluating impacts of the proposed action and alternatives will be prepared. Up to 5,000 acres of public land in Rich County could be affected by this MFP amendment. The following issues will be considered in the amendment: wildlife habitat, livestock grazing, recreation opportunities, watershed and potential erosion, and socioeconomics.

ADDRESS AND DATES: Comments, including issues to be considered in the proposed MFP amendment, should be sent by April 22, 1984 to Wayne Richards, Area Manager, Bear River Resource Area, Bureau of Land Management, 2370 South 2300 West, Salt Lake City, Utah 84119.

Dated: March 12, 1984.

Frank W. Snell,

District Manager.

BILLING CODE 4310-84-M

Dickinson District Advisory Council Meeting

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of meeting.

SUMMARY: The citizen advisory council for the Bureau of Land Management's Dickinson District will meet April 24, 1984, in Dickinson, North Dakota. There will be three topics for the Council to consider: BLM land pattern adjustment through exchanges; BLM-Forest Service grazing fee study; and tract delineation and leasing level for the second round of leasing in the Fort Union Coal Region. In addition, the Council will be briefed on the BLM oil and gas conference to be held in Bismarck in May; temporary wild horse adoption center in West Fargo; the environmental impact statement covering grazing on BLM lands in North Dakota; status of the McKenzie-Williams and Southwest North Dakota management framework plans; and future land use planning efforts in the state.

The Council is chartered by the Secretary of the Interior to give citizen advice to the Dickinson District Manager regarding planning and management of public lands and resources.

The meeting is open to the public, and members of the public will be given the opportunity to make statements before the Council. Persons wishing to submit a written statement to the Council should send it to the Dickinson District Manager.

Location, Date, and Time

April 24, 1984, from 8:30 a.m. to approximately 4:00 p.m. Mountain Daylight Time; Community Room (Basement) of the Gate City Building, 204 Sims Street, Dickinson, North Dakota.

FOR MORE INFORMATION CONTACT: Mel Ingeroi, Public Affairs Specialist; P.O. Box 1229; Dickinson, North Dakota 58602; Telephone (701) 225-9148.

William F. Krech,

Associate District Manager.

BILLING CODE 4310-84-M

Ukiah District, California, Advisory Council Meeting

Notice is hereby given in accordance with Pub. L. 94-579 and 43 CFR Part 1780 that a meeting of the Ukiah District Advisory Council will be held on Thursday, April 19, 1984.

The meeting will begin at 10:00 a.m. in the Bureau of Land Management conference room, 555 Leslie Street, Ukiah, California.

The agenda will include the King Range and Chemise Mountain wilderness study areas. An environmental impact statement on the two WSAs will be released for public review in October 1984.

The meeting is open to the public. Interested persons may make oral statements to the council or file written statements for the council's consideration. Opportunity for public comment will be provided at 1:00 p.m., April 19, 1984.

Summary minutes of the meeting will be maintained in the District Office and will be available for public inspection and reproduction within 30 days following the meeting.

Dated: March 14, 1984.

Van W. Manning,

District Manager.

BILLING CODE 4310-84-M

Fish and Wildlife Service

Endangered Species Permits; Receipt of Applications

The following applicants have applied for permits to conduct certain activities with endangered species. This notice is provided pursuant to Section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*):

Applicant: Miami Metrozoo, Miami, FL, APP# 584467.

The applicant requests a permit to import ten radiated tortoises [*Geochelone (=Testudo) radiata*] from Jersey Wildlife Preservation Trust, Channel Islands, Great Britain for enhancement of propagation.

Applicant: Kenneth L. DeCroo, Wild Animal Training Center, Riverside, CA, APP# 153266.

The applicant requests a permit to export and re-import one captive-bred male jaguar (*Panthera onca*) for educational purposes.

Documents and other information submitted with these applications are available to the public during normal business hours in Room 601, 1000 N. Glebe Rd., Arlington, Virginia, or by writing to the U.S. Fish & Wildlife Service, WPO, P.O. Box 3654, Arlington, VA 22203.

Interested persons may comment on these applications within 30 days of the date of this publication by submitting written data, views, or arguments to the above address. Please refer to the file number when submitting comments.

Dated: March 16, 1984.

R. K. Robinson,

Chief, Branch of Permits, Federal Wildlife Permit Office.

BILLING CODE 4310-07-M

Management of Charles M. Russell National Wildlife Refuge; Availability of Draft Environmental Impact Statement

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability of DEIS and cancellation of 1980 DEIS.

SUMMARY: This notice cancels the 1980 draft environmental impact statement (DEIS) for the Charles M. Russell National Wildlife Refuge (CMR), Montana, and advises the public that the Fish and Wildlife Service's (Service) new DEIS to implement a master plan for the operation of CMR is available for review and comment. By administrative decision occasioned by litigation, the preparation of the earlier EIS was halted in June 1981. Litigation has now been completed. This notice informs the public that, due in part to the litigation and delay between draft and final EIS, a new CMR DEIS has been prepared. The new DEIS considers five alternative management options for CMR: Alternative A, No Action (continue management unchanged); Alternative B, Enhanced Wildlife Habitat Management (proposed action); Alternative C, Intensive Wildlife Management; Alternative D, Multiple Use; and Alternative E, No Grazing. Public comments and suggestions regarding this new DEIS are requested.

DATE: Comments on this DEIS must be submitted on or before (60 days from date of publication).

ADDRESS: Written comments should be sent to Galen Buterbaugh, Regional Director, U.S. Fish and Wildlife Service, Box 25486, Denver Federal Center, Denver, Colorado 80225.

FOR FURTHER INFORMATION CONTACT: Mr. Ralph Fries, Refuge Manager, Charles M. Russell National Wildlife Refuge, Post Office Box 110, Lewistown, Montana 59457, telephone: 406–538–8706. Individuals wanting copies of this DEIS for review should immediately contact either Mr. Fries or the Denver Regional Office (addresses above). Copies have been sent to all agencies and individuals who participated in the preparation of and/or commented on the earlier EIS.

SUPPLEMENTARY INFORMATION: The purpose of this notice is to advise the public that the Service has prepared a new DEIS for the management of the Charles M. Russell National Wildlife Refuge, Montana, and that it is available for review and comment. This notice also advises of the cancellation of the previous DEIS for CMR, issued in 1980.

In the **Federal Register**, dated September 27, 1979, the Service published a Notice of Intent to prepare an EIS for a proposal to implement a master plan for the operation of CMR. From the beginning of the planning effort in January 1978, a comprehensive public involvement and scoping program was initiated. During August 1980, the DEIS was distributed to interested parties for comment. Public meetings regarding the DEIS were held in Washington, D.C., and in Lewistown, Clasgow, and Missoula, Montana, during late 1980. Public comments were solicited and 396 letters were received.

Publication of the final EIS was delayed as a result of court action concerning administration of the CMR (*Schwenke, et al., v. Secretary of the Interior, et al.*). On January 14, 1982, the U.S. District Court in Billings, Montana, ruled: "We have decided that the ranchers are entitled to have grazing declared a co-equal priority with wildlife conservation * * *" and "* * * thus we must conclude that CMR must still be administered under the Taylor Grazing Act."

The district court's decision was appealed to the U.S. Ninth Circuit Court of Appeals. On October 14, 1983, the appellate court overturned the district court and ruled that:

(1) Wildlife has priority in access to the forage resources of the range up to the limits specified in Executive Order 7509;

(2) Beyond those limits, wildlife and livestock have equal priority in access to the resources of the Range;

(3) The Range is to be administered under the "Wildlife Refuge Act (sic)."

Due to the court actions and the resultant delay of over three years since publication of the original DEIS, the Service has decided to cancel the earlier DEIS. Although the five alternative management strategies in the new DEIS remain basically the same as those described in the 1980 DEIS, three major changes distinguish the new DEIS from the previous one. First, the entire economic analysis has been reevaluated, and the description of the anticipated economic effects of proposed action and its alternatives is more accurately depicited. Second, the proposed action has been clarified regarding prescription grazing by allotment. Finally, the planning process and methodology used to develop grazing recommendations are explained in great detail to facilitate understanding and review.

The DEIS considers five alternative management options for the 1,904,301-acre refuge and identifies five management elements of operation: endangered or unique species, habitat management, forage allocation, range developments, and recreation and cultural resources. Each of the five alternative management options contains various levels of probable operations in each element.

Alternative A is the "No Action" alternative, and represents unchanged management of the refuge.

Alternative B is the "Proposed Action" and is designed to reach and maintain the refuge objectives. Reintroductions of peregrine falcons, black-footed ferrets, and swift fox would be made in certain refuge areas as animals became available. In addition, bighorn sheep would be introduced at selected sites. A habitat management plan for each allotment would be prepared by 1990, identifying specific wildlife habitat programs and providing specific management actions to correct the problems. Periodic habitat evaluations would be made to determine whether wildlife objectives were being met. The most significant management actions to achieve habitat objectives would be reductions of livestock grazing, changes in seasons of livestock use, and habitat treatment practices such as prescribed burning. Cooperative farming and haying would be phased out in the bottoms along the Missouri River to restore natural river bottoms. Livestock grazing would be reduced to 40,482 federal AUMs, which represent a 33% average reduction from present federally-licensed AUMs. Prescription grazing would be employed as a management tool to provide certain habitat conditions to benefit a particular wildlife species. Range improvements would include some fencing to keep livestock numbers within authorized levels, and some new water developments would be constructed. No soil ripping would occur. There would be more opportunities for wildlife recreation due to improvement of habitat and expected increases in wildlife populations. A new boat access site would be established at Fourchette Bay. Private cabins would not be affected. Interpretive programs would be emphasized, and access to recreational areas and facilities would be improved.

Alternative C, Intensive Wildlife Management, would allocate livestock grazing only as needed for vegetative manipulation to benefit wildlife.

Intensive wildlife habitat manipulations would occur, private cabins would be removed, and inholdings would be purchased to control grazing. Approximately two-thirds of the refuge boundary would be fenced.

Alternative D, Multiple Use, would not be possible to implement unless Congress changed CMR from a national wildlife refuge to a multiple-use management area. Livestock would receive approximately one-half the allocated forage. Range improvements, such as fencing, water development, or mechanical soils treatment would be based upon allotment needs. More recreational facilities and opportunities would be provided than those outlined in the preferred alternative. Limited reintroduction of unique or endangered species would occur.

Alternative E, No Grazing, would not be in compliance with Executive Order 7509, which requires that excess forage be allocated to livestock.

The earlier scoping process and the numerous verbal and written suggestions received during preparation and review of the first DEIS were considered in the preparation of the new draft. All previous comment letters with the Service's responses are included as an appendix to the new DEIS. Comments on the new DEIS are encouraged.

The final EIS and Record of Decision are anticipated to be completed in early 1985.

Dated: March 9, 1984.

Bob Shields,

Acting Regional Director.

BILLING CODE 4310-55-M

Minerals Management Service

Oil and Gas and Sulfur Operations on the Outer Continental Shelf; Receipt of Proposed Development and Production Plan

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of receipt of a proposed development and production plan.

SUMMARY: Notice is hereby given that Shell California Production Inc. has submitted a supplemental development and production plan describing the activities it proposes to conduct as operator of the Beta Unit, offshore California. The purpose of this Notice is to inform the public that the Minerals Management Service (MMS) is considering approval of the plan and that it is available for public review and comment.

DATES: The plan may be reviewed weekdays, 8:00 a.m. to 3:00 p.m. Written comments must be received or postmarked by May 25, 1984.

ADDRESS: The plan is available for public review at the Office of the Regional Manager, Pacific OCS Region, Minerals Management Service, Room 160, 1340 West Sixth Street, Los Angeles, California 90017. Written comments may be mailed or hand-delivered to the same address.

FOR FURTHER INFORMATION CONTACT: Mr. Thomas W. Dunaway, Regional Supervisor, Field Operations Office, Pacific OCS Region, (213) 688-2083.

SUPPLEMENTARY INFORMATION: Section 25 of the Outer Continental Shelf Lands Act, 43 U.S.C. 1351, requires the MMS to make development and production plans available for public review. Regulation 30 CFR 250.34 provides for the publication of a Notice that such a plan is available for review.

William E. Grant,

Regional Manager, Pacific OCS Region.

BILLING CODE 4310-MR-M

National Park Service

George Washington Memorial Parkway, Virginia, Spout Run Parkway to Theodore Roosevelt Memorial Bridge Section; Intent To Prepare an Environmental Impact Statement and Conduct Scoping Meetings

AGENCY: National Park Service, Interior.

ACTION: Notice of intent to prepare environmental impact statement and conduct scoping meetings.

SUMMARY: The National Park Service intends to prepare an Environmental Impact Statement (EIS) concerning potential alterations to a section of the George Washington Memorial Parkway between the Theodore Roosevelt Bridge (I-66) and Spout Run Parkway, including Spout Run Parkway to its western terminus at Lee Highway (29-211). The EIS will be developed in cooperation with Federal, state and local agencies.

The George Washington Memorial Parkway is part of a large "park, parkway, and playgound" system serving the Nation's Capital. Built as a scenic memorial approach to Washington, D.C., the Parkway has become a major commuter route now carrying traffic volumes characteristic of the major Northern Virginia arterials. The morning and evening traffic volumes exceed the design capacity of the roadway, creating congestion which is further aggravated by the inadequate capacities of the Key and Roosevelt Bridges.

Due to this inadequacy, the eastbound off-ramp to Key Bridge and Rosslyn is closed during the morning rush hour period to prevent incapacitating backups onto the George Washington Memorial Parkway.

Congestion on Spout Run Parkway begins at the Lorcom Lane intersection because of the left turn demand from Lorcom Lane to eastbound Spout Run. This necessitates the closing of westbound traffic in the morning.

The peak rush hour volume at the merge of Spout Run Parkway and the George Washington Memorial Parkway eastbound greatly exceeds the capacity of the roadway and results in long backups on both parkways.

Because of high westbound traffic volumes on roadways east of the Potomac River leading to the Roosevelt Bridge, evening rush hour traffic congestion is created on the bridge, on the on-ramp to the George Washington Memorial Parkway, and on the westbound George Wshington Memorial Parkway. Severe congestion also occurs at the on-ramp from Key Bridge because of the high volume of merging and weaving traffic. The peak hour volume of 4,500 vehicles per hour between Key Bridge and Spout Run greatly exceeds roadway capacity.

The EIS will identify construction and non-construciton alternatives to reduce or eliminaate congestion in a way that protects and enhances the values for which the parkway was established. The effects and consequences of these alternatives on the environment will be analyzed and a proposed action identified.

A broad range of impact issues will be addressed during development and analysis of alternatives. These issues include:

—Effects on the human safety;
—Social and economic effects on the community;
—Effects on the visual qualities of the parkway;
—Effects on recreation activities such as pleasure driving, bicycling, scenic viewing, and sightseeing;
—Effects on historic and archeological resources;
—Effects of floodplain and wetlands; and
—Potential mitigation issues;
—Effects on environmental quality.

Public scoping workshops will be held between April 25 and May 2 in Virginia, the District of Columbia and Maryland.

Exact meeting locations, dates, and times will be published in the **Federal Register** and local newspapers at a later date. The purpose of the workshops will be to inform the public about the study and to identify, through the public's involvement, additional concerns or issues which need to be addressed in the EIS.

The public is also welcome to submit its concerns and issues in written form to the Superintendent of the George Washington Memorial Parkway.

FOR FURTHER INFORMATION CONTACT: Mr. John Byrne, Superintendent, George Washington Memorial Parkway, Turkey Run Headquarters, McLean, Virginia 22101.

Dated: March 14, 1984.

Manus J. Fish,

Regional Director, National Capital Region.

BILLING CODE 4310-70-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 701-TA-209 (Final)]

Carbon Steel Wire Rod From Spain

AGENCY: International Trade Commission.

ACTION: Institution of final countervailing duty investigation and scheduling of a hearing to be held in connection with the investigation.

EFFECTIVE DATE: February 24, 1984.

SUMMARY: As a result of an affirmative preliminary determination by the U.S. Department of Commerce that there is a reasonable basis to believe or suspect that imports from Spain of carbon steel wire rod, provided for in item 607.17 of the Tariff Schedules of the United States (TSUS), are being subsidized by the Government of Spain within the meaning of section 701 of the Tariff Act of 1930 (19 U.S.C. 1671), the United States International Trade Commission hereby gives notice of the institution of investigation No. 701-TA-209 (Final) under section 705(b) of the act (19 U.S.C. 1671d(b)) to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise.

The Department of Commerce will make its final subsidy determination in this case on or before May 1, 1984, and the Commission will make its final injury determination by June 22, 1984 (19 CFR 207.25).

FOR FURTHER INFORMATION CONTACT: Larry Reavis, (202-523-0296), Office of Investigations, U.S. International Trade Commission.

SUPPLEMENTARY INFORMATION:

Background

On January 9, 1984, the Commission determined, on the basis of the information developed during the course of its preliminary investigation, that there was a reasonable indication that an industry in the United States was materially injured by reason of imports of carbon steel wire rod from Spain. The preliminary investigation was instituted in response to a petition filed on November 23, 1983, by Atlantic Steel Co., Continential Steel Co., Georgetown Steel Corp., North Star Steel Co.-Texas, and Raritan River Steel Co.

Participation in the Investigation

Persons wishing to participate in this investigation as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11 of the Commission's Rules of Practice and Procedure (19 CFR 201.11), not later than 21 days after the publication of this notice in the **Federal Register**. Any entry of appearance filed after this date will be referred to the Chairman, who shall determine whether to accept the late entry for good cause shown by the person desiring to file the entry.

Upon the expiration of the period for filing entries of appearance, the Secretary will prepare a service list containing the names and addresses of all persons, or their representatives, who are parties to the investigation, pursuant to section 201.11(d) of the Commission's rules (19 CFR 201.11(d)). Each document filed by a party to the investigation must be served on all other parties to the investigation (as identified by the service list), and a certificate of service must accompany the document. The Secretary will not accept a document for filing without a certificate of service (19 CFR 201.16 (c)).

Staff Reprot

A public version of the staff report containing preliminary findings of fact in the investigation will be placed in the public record on April 20, 1984, pursuant to section 207.21 of the Commission's rules (19 CFR 207.21).

Hearing

The Commission will hold a public hearing in connection with this investigation beginning at 10:00 a.m. on May 7, 1984, at the U.S. International Trade Commission Building, 701 E Street NW., Washington, D.C. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission not later than the close of business (5:15 p.m.) on April 20, 1984. All persons desiring to appear at the hearing and make oral presentations should file prehearing briefs and attend a prehearing conference to be held at 10:00 a.m. on April 26, 1984, in room 117 of the U.S. International Trade Commission Building. The deadline for filing prehearing briefs is May 2, 1984.

Testimony at the public hearing is governed by section 207.23 of the Commission's rules (19 CFR 207.23). This rule requires that testimony be limited to a nonconfidential summary and analysis of material contained in prehearing briefs and to information not available at the time the prehearing brief was submitted. All legal arguments, economic analyses, and factual materials relevant to the public hearing should be included in prehearing briefs in accordance with section 207.22 (19 CFR 207.22). Posthearing briefs must conform with the provisions of section 207.24 (19 CFR 207.24) and must be submitted not later than the close of business on May 14, 1984.

Written Submissions

As mentioned, parties to this investigation may file prehearing and posthearing briefs by the dates shown above. In addition, any person who has not entered an appearance as a party to the investigation may submit a written statement of information pertinent to the subject of the investigation on or before May 14, 1984. A signed original and fourteen (14) true copies of each submission must be filed with the Secretary to the Commission in accordance with section 201.8 of the Commission's rules (19 CFR 201.8). All written submissions except for confidential business data will be avialable for public inspection during regular business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary to the Commission.

Any business information for which confidential treatment is desired shall be submitted separately. The envelope and all pages of such submissions must be clearly labeled "Confidential Business Information." Confidential submissions and requests for confidential treatment must conform with the requirements of section 201.6 of the Commission rules (19 CFR 201.6).

For further information concerning the conduct of the investigation, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 207, subparts A and C (19 CFR Part 207),

and part 201, subparts A through E (19 CFR Part 201).

This notice is published pursuant to section 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Issued: March 12, 1984.

Kenneth R. Mason,

Secretary.

[FR Doc. 84-7555 Filed 3-20-84; 8:45 am]

BILLING CODE 7020-02-M

[Investigation No. 731-TA-123 (Final)]

Certain Flat-Rolled Carbon Steel Products From Brazil

Determination

On the basis of the record [1] developed in the subject investigation, the Commission unanimously determines, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), that an industry in the United States is materially injured by reason of imports from Brazil of certain flat-rolled carbon steel products, provided for in items 607.66, 607.94, 608.07, and 608.11 of the Tariff Schedules of the United States (TSUS),[2] which are being, or are likely to be, sold in the United States at less than fair value (LTFV). In addition, pursuant to section 735(b)(4)(A) of the act (19 U.S.C. 1673d(b)(4)(A)), the Commission also determines that the material injury found in this case is by reason of massive imports of the subject products over a relatively short period to an extent that, in order to prevent such material injury from recurring, it is necessary to impose the antidumping duty retroactively on these imports.[3]

Background

The Commission instituted this investigation effective September 7, 1983, following a preliminary determination by the Department of Commerce that imports of the subject flat-rolled carbon steel products from Brazil were being, or were likely to be, sold in the United States at LTFV within the meaning of section 731 of the act (19 U.S.C. 1673). Notice of the institution of the Commission's investigation and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on September 28, 1983 (48 FR 44279).

Commerce was scheduled to make its final determinations in this case by November 14, 1983. However, Commerce extended its investigation and published its final affirmative determination in the **Federal Register** on January 25, 1984 (49 FR 3102). The Commission's hearing was held in Washington, D.C. on January 31, 1984. All persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its report on this investigation to the Secretary of Commerce on March 9, 19894. A public version of the Commission's report, Certain Flat-Rolled Carbon Steel Products from Brazil (investigation No. 731-TA-123 (Final), USITC Publication 1499, March 1984) contains the views of the Commission and information developed during the investigation.

By order of the Commission.

Issued: March 9, 1984.

Kenneth R. Mason,

Secretary.

[FR Doc. 84-7558 Filed 3-20-84; 8:45 am]

BILLING CODE 7020-02-M

[Investigations Nos. 701-TA-210 and 211 (Preliminary) and 731-TA-167 and 168 (Preliminary)]

Certain Table Wine From France and Italy

Determinations

On the basis of the record [1] developed in the subject investigations, the Commission determines,[2] pursuant to section 703(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a)), that there is no reasonable indication that an industry in the United States is materially injured, or threatened with material injury, nor is the establishment of an industry in the United States materially retarded, by reason of imports from France and Italy of certain table wine,[3] provided for in item 167.30 of the Tariff Schedules of the United States (TSUS), which are allged to be subsidized by the Governments of France (investigation No. 70-TA-210 (Preliminary)) and Italy (investigation No. 701-TA-211 (Preliminary)).

The Commission also determines, pursuant to section 733(a) of the Tariff Act of 1930 (19 U.S.C. 1673b(a), that there is no reasoanble indication that an industry in the United States is materially injured, or threatened with material injury, nor is the establishment of an industry in the United States materially retarded, by reason of imports from France (investigation No. 731-TA-167 (Preliminary)) and Italy (investigation No. 731-TA-168 (Preliminary)), of certain table wine,[3] provided for in item 167.30 of the TSUS, which are alleged to be sold in the United States at less than fair value.

Background

On January 27, 1984, petitions were filed with the United States International Trade Commission and the U.S. Department of Commerce by counsel on behalf of the American Grape Growers Alliance for Fair Trade (Alliance), alleging that imports of the subject merchandise are being subsidized, and are being sold in the United States at less than fair value. Accordingly, effective January 27, 1984, the Commission instituted preliminary countervailing and antidumping investigations under sections 703(a) and 733(a), respectively, of the Tariff Act of 1930 to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of such merchandise.

Notice of the institution of the Commission's investigations and of the public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and by publishing the notice in the **Federal Register** on February 6, 1984 (49 FR 4440). The conference was held in Washington, D.C., on February 17, 1984 , and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission transmitted its report on the investigations to the Secretary of Commerce on March 12, 1984. A public version of the Commission's reprot, Certain Table Wine from France and Italy (investigations Nos. 701-TA-210 and 211 (Preliminary) and 732-TA-167 and 168 (Preliminary), USITC Publication 1502, 1984), contains the

[Investigation No. 337-TA-162]

Certain Cardiac Pacemakers and Components Thereof; Decision Not To Review Initial Determination Designating Investigation More Complicated

AGENCY: U.S. International Trade Commission.

ACTION: The Commission has determined not to review an initial determination (ID) (Order No. 29) designating this investigation "more complicated" within the meaning of 19 U.S.C. 1337.

Authority: 19 U.S.C. 1337; 19 CFR 210.15.

SUPPLEMENTARY INFORMATION: On February 9, 1984, the Teletronics respondents filed a motion to designate this investigation "more complicated." The motion was supported by the Commission investigative attorney and opposed by complainant Medtronics Inc. On March 1, 1984, the presiding officer issued an ID granting the motion.

As a result of the "more complicated" designation, the deadline for the conduct of this investigation has been extended from September 12, 1984, to March 12, 1985.

FOR FURTHER INFORMATION CONTACT: Jack Simmons, Esq., Office of the General Counsel, telephone 202-523-0103

Issued: March 15, 1984.

[Investigation No. 337-TA-140]

Certain Personal Computers and Components Thereof; Issuance of Exclusion Order

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has determined that a violation of section 337 exists in the above-captioned investigation and has issued a general exclusion order.

Authority: U.S.C. 1337.

SUPPLEMENTARY INFORMATION: The presiding officer issued an initial determination in the above-captioned investigation on December 9, 1983, in which she determined that there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the unauthorized importation and sale of certain personal computers and components thereof. As a result of its review of that initial determination, the Commission on March 9, 1984, determined that a violation of section 337 exists in the unauthorized importation and sale of certain personal computers and components thereof which infringe U.S. Letters Patent 4,136,359, U.S. Letters Patent 4,278,972, Copyright Registration No. TX 873–203, Copyright Registration No. TX 809–449 or Copyright Registration No. TX 886–569 owned by complainant Apple Computer, Inc., the tendency of which unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

Copies of the Commission's Action and Order, its Opinion, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

FOR FURTHER INFORMATION CONTACT: Wayne Herrington, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–0480.

Issued: March 9, 1984.

Competitive Assessment of the U.S. Wood and Upholstered Household Furniture Industry

AGENCY: United States International Trade Commission.

ACTION: This notice announces the location of and change in time for the hearing in connection with the Commission's investigation on the competitive assessment of the U.S. wood and upholstered household furniture industry.

EFFECTIVE DATE: March 14, 1984.

SUPPLEMENTARY INFORMATION: Notice is hereby given that the public hearing in connection with this investigation (see FR 48, 50631, November 2, 1983) will be held at the Radisson Hotel in High Point, North Carolina, beginning at 9:00 a.m. e.s.t, on April 3, 1984, to be continued on April 4, if required. All persons shall have the right to appear by counsel or in person, to present information and to be heard. Requests to appear at the public hearing should be filed with the Secretary, United States International Trade Commission, 701 E Street NW, Washington, D.C., not later than noon, March 27, 1984.

FOR FURTHER INFORMATION CONTACT: Mr. Rhett Leverett, or Mr. Ruben Moller, General Manufactures Division, U.S. International Trade Commission, Washington, D.C., 20436, telephone 202–724–1725 or 202–724–1732, respectively.

Issued: March 16, 1984.

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Humanities.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposal for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATE: Comments on this information collection must be submitted by April 20, 1984.

ADDRESSES: Send comments to Ms. Ingrid Foreman, Management Assistant, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, D.C. 20506 (202–786–0233) or Mr. Joseph Lackey, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3208, Washington, D.C. 20503 (202–395–6880).

FOR FURTHER INFORMATION CONTACT: Ms. Ingrid Foreman, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, D.C. 20506 (202–786–0233), from whom copies of the form and supporting documents are available.

SUPPLEMENTARY INFORMATION:

Category: Revision
Title: NEH Financial Status Report
Form Number: n/a
Frequency of Collection: Occasional (at end of grant)
Respondents: All NEH Institutional Grantees, at their option
Use: Provide information on project expenditures
Estimated Number of Respondents: 3,000 maximum
Estimated Hours for Respondents to Provide Information: 1

This entry is not subject to 44 U.S.C. 3504(h).

Dated: March 16, 1984.

Victor J. Loughnan,

Director of Administration.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-249]

Commonwealth Edison Co. (Dresden Nuclear Power Station, Unit No. 3); Order Confirming Commonwealth Edison Company's Commitments Re IGSCC Inspection

I

The Commonwealth Edison Company, (CECo, the licensee) is the holder of Facility Operating License No. DPR-25, which authorizes the licensee to operate the Dresden Nuclear Power Station, Unit No. 3 (the facility) at power levels not in excess of 2527 megawatts thermal (rated power). The facility is a boiling water reactor located at the licensee's site in Grundy County, Illinois.

II

As a result of inspections conducted at 18 operating boiling water reactor (BWRs) in conformance with recent Office of Inspection and Enforcement Bulletins (IE Bulletin No. 82-03, Revision 1, "Stress Corrosion Cracking in Thick-Wall, Large-Diameter Stainless Steel Recirculation System Piping at BWR Plants," and IE Bulletin No. 83-02, "Stress Corrosion Cracking in Large-Diameter Stainless Steel Recirculation System Piping at BWR Plants"), a potential safety concern regarding intergranular stress corrosion cracking (IGSCC) in primary system piping was identified. These bulletins requested selected licensees to perform a number of actions regarding inspection and testing of pipe welds.

Results of these and other inspections pursuant to IE Bulletins 82-03 and 83-02 have revealed extensive cracking in large-diameter recirculation and residual heat removal system piping. In almost every case, where inspections were performed, IGSCC was discovered and, in many cases, repairs, analysis, and additional surveillance conditions were required. In view of the foregoing and the fact that the facility is similar in design to plants where IGSCC has occured, there was significant potential for IGSCC to exist in this facility. Therefore, inspection was required to determine the extent of IGSCC and to ascertain, if necessary, the degree of remedial action.

On August 26, 1983 an Order was issued to the licensee which required that the facility be shut down by September 30, 1983 and an IGSCC inspection be performed. The facility was shut down on September 30, 1983 pursuant to Section III.B of the Order and an IGSCC inspection was performed pursuant to Section III.C of the August 26, 1983 Order.

By letter dated December 9, 1983, the licensee provided its plan for inspection and repair of welds covered by the Order of August 26, 1983. The plan provided that, to the extent practicable, the ultransonic testing (UT) program of examination would encompass 100% of the Type 304 Stainless Steel piping welds of 4-inch and greater size in the recirculation system and the ASME Code Class 1 portions of the residual heat removal systems, core spray external to the reactor pressure vessel and the reactor water cleanup system. Specific welds which were not to be inspected were identified and explanations for their exclusion had previously been provided in the licensee's letter of October 26, 1983. On February 15, 1984, the staff met with the licensee to discuss its program and its findings, and to receive clarifying information. By letter of March 5, 1984, the licensee submitted a report on the inspection and repair of welds covered in the Order of August 26, 1983. By letter dated March 12, 1984, the licensee provided additional information on the results of the inspection.

The NRC staff has reviewed and evaluated all the above reports and information provided by the licensee. That review is documented in our Safety Evaluation dated March 15, 1984. By letter dated March 15, 1984, the NRC notified the licensee that the facility could be returned to power.

Although the calculations performed by the licensee and evaluated by the staff indicate that the cracks in the repaired and unrepaired welds will not progress to the point of leakage during the operating cycle, and wide margins are expected to be maintained over crack growth which could compromise safety, uncertainties in crack sizing and growth rate remain. Because of these uncertainties, we have determined that the following actions should be taken:

(1) The ASME Code-required system pressure tests and nondestructive examinations on overlay repaired welds should be satisfactorily completed prior to startup.

(2) The limiting conditions for operation and surveillance requirements imposed by the August 26, 1983 Order should be continued. These enhanced surveillance measures will provide adequate assurance that possible cracks in pipes will be detected before growing to a size that will compromise the safety of the plant.

The staff also has some concern regarding the long-term growth of IGSCC cracks and its effect on the long-term operation of the plant. Therefore, we have determined that plans for inspections, corrective action and/or modification including replacement of the recirculation and other reactor coolant pressure boundary piping systems during the next refueling outage must be submitted at least 90 days before the start of the next refueling outage. In addition, the staff has determined that a justification for continued operation must be submitted to NRC for review and approval prior to startup after the next refueling outage.

By letters dated March 5 and March 9, 1984, the licensee committed to the above described conditions on leakage monitoring and early submittal of inspection and/or modification plans. I have determined that the public health and safety requires that these commitments should be confirmed by an immediately effective Order.

III

Accordingly, pursuant to section 103, 161i, 161o and 182 of the Atomic Energy Act of 1954, as amended, and the Commission's regulations in 10 CFR Parts 1 and 50, it is hereby ordered effective immediately that:

A. Notwithstanding the current Technical Specifications for the facility the following compensatory measures shall be implemented:

1. The reactor coolant system leakage shall be limited to a 2 gpm increase in unidentified leakage within any 24 hour period (leakage shall be monitored and recorded once every 4 hours). Should this leakage limit be exceeded, the unit shall immediately start an orderly shutdown. The unit shall be placed in at least hot shutdown within the next 12 hours and in cold shutdown within the following 24 hours.

2. At least one Primary Containment sump collection and flow monitoring system shall be operable. With the primary containment sump collection and flow monitoring system inoperable, restore the inoperable system to operable status within 24 hours or immediately initiate an orderly shutdown and be in at least hot shutdown within the next 12 hours and in cold shutdown within the following 24 hours.

B. Plans for inspection, corrective actions, and/or modification, including replacement of the recirculation and/or coolant pressure boundary piping systems, during the next refueling outage which is currently expected to begin approximately April 1985 shall be submitted at least three months before the start of that outage.

C. At least one month prior to startup of the facility after its next refueling outage, a justification for continued operation shall be submitted for NRC review and approval.

D. The Director, Division of Licensing, may, in writing, relax or terminate any of the above provisions upon written request from the licensee, if the request is timely and provides good cause for the requested action.

IV

The licensee may request a hearing on this Order within 20 days of the date of publication of this Order in the **Federal Register**. Any request for a hearing shall be addressed to the Director, Office of Nuclear Reactor Regulation, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. A copy shall also be sent to the Executive Legal Director at the same address. A request for hearing shall not stay the immediate effectiveness of this order.

If a hearing is to be held, the Commission will issue an Order designating the time and place of any such hearing.

If a hearing is held concerning this Order, the issue to be considered at the hearing shall be whether, on the basis of the matters set forth in Section II of the Order, the licensee should comply with the requirements set forth in Section III of this Order. This Order is effective upon issuance.

Dated at Bethesda, Maryland, this 15th day of March 1984.

For the Nuclear Regulatory Commission.

Robert A. Purple,

Deputy Director, Division of Licensing, Office of Nuclear Reactor Regulation.

[FR Doc. 84-7597 Filed 3-20-84; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-295 and 50-304]

Commonwealth Edison Co.; Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 84 to Facility Operating License No. DPR-39 and Amendment No. 74 to Facility Operating License No. DPR-48, issued to commonwealth Edison Company (the licensee), which revised the Technical Sepecifications for operation of the Zion Station, Unit Nos. 1 and 2 (the facilities) located in Zion, Illinois. The amendments are effective as to the date of issuance.

The amendments will allow performing extensive preventive maintenance on the diesel generator shared between the two units. These one-time changes will extend the present seven-day period to forty-five days during which, with one unit in cold shutdown, only two diesel generators would be required to satisfy the standby AC on-site power requirements.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in these license amendments.

Notice of Consideration of Issuance of Amendments and Opportunity for Prior Hearing in connection with this action was published in the **Federal Register** on January 12, 1984 (49 FR 1595). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.1(d)(4) and environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to the action see (1) the application for amendments transmitted by letters October 14, and December 22, 1983, (2) Amendment No. 84 to License No. DPR-39 and Amendment No. 74 to License No. DPR-48, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., and at the Zion-Benton Public Library District, 2600 Emmans Avenue, Zion, Illinois 60039. A copy of items (2) and (3) may be obtained upon request addressed to U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 12th day of March 1984.

For the Nuclear Regulatory Commission.

Steven A. Varga,

Chief, Operating Reactors Branch No. 1, Division of Licensing.

[FR Doc. 84-7596 Filed 3-20-84; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-244]

Rochester Gas & Electric Corp.; Consideration of Issuance of Amendment to Provisional Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The United States Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Provisional Operating License No. DPR-18 issued to Rochester Gas and Electric Corporation (the licensee) for operation of the R.E. Ginna Nuclear Power Plant located in Wayne County, New York.

The proposed amendment to the Technical Specifications (TS) would incorporate certain provisions to permit a planned fuel design change from Exxon Nuclear Company (ENC) fuel to the Westinghouse 14×14 9-grid Optimized Fuel Assembly (OFA) fuel with core loadings ranging from approximately a 15% OFA and 85% ENC fueled core to a core fueled entirely with OFA. The proposed changes to the TS would allow (1) a positive moderator temperature coefficient (MTC) (+5 pcm/°F) up to 70% power, (2) a reduction

in shutdown margin at EOC from 1900 pcm to 1800 pcm, (3) a change in the F^N_H limits at less than 100% power, (4) a change in the core protection limits (OT T and OP T setpoint equations), and (5) a deletion of the limits on Target Axial Offset. The changes to the core physics parameters and thermal characteristics are required to account for increased enrichment and improved neutronic characteristics of the fuel and control assemblies.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The 14×14 OFA design meets the same basic requirements and criteria which were approved by the NRC for the 17×17 OFA design in May 1981. In addition there are four 14×14 7-grid demonstration assemblies that have completed two cycles of operation (establishing burnup 20,000 MWD/MTU). Post-test examination at the completion of the first cycle of irradiation indicated no abnormalities. However, one demonstration assembly at the end of the second cycle of irradiation was damaged and removed. It was concluded that the cause of the damage was an isolated event and not a generic OFA design problem (see Letter Report IT–83–222, "Failure Investigation of Point Beach Unit 2 OFA Rods," July 1983). The demonstration assemblies will have experienced approximately 35,000 MWD/MTU of burnup in 1984.

A safety analysis was prepared which used parameters which will bound those to be experienced during the transition which will apply to subsequent cycles with the OFA. The safety analysis was composed of a summary of the mechanical, thermal-hydraulic and accident analysis and detailed results of the non-LOCA and LOCA analysis. Those analyses incorporated the proposed changes to the Technical Specifications and showed that the applicable design criteria for the Exxon and OFA were satisfied.

Based on the results of evaluation/analyses and tests it was concluded that: (1) The Westinghouse OFA's are mechanically and hydraulically compatible with the ENC fuel assemblies, control rods, and reactor internals interfaces. All NRC approved design criteria for the Westinghouse OFA's are satisfied. (2) Generally changes in the nuclear characteristics because of the transition from ENC to OFA fuel will lie within the cycle-to-cycle variations observed for past fuel reload design. The moderator temperature coefficient is the most significant exception to this. Since the Hydrogen/Uranium ratio is larger for OFA, the moderator temperature coefficient is more positive than observed in past Westinghouse fueled R.E. Ginna cores. This has been accounted for in the accident evaluations. (3) Demonstration experience with Westinghouse OFAs containing Zircaloy grids provides reason to expect satisfactory operation from OFA Zircaloy grids. (4) The proposed technical specifications changes are applicable to cores containing any combination of OFA and ENC fuel and plant operating limitations will be satisfied with these proposed changes. (5) A reference was established upon which to base future cycle safety evaluations for Westinghouse OFA reload fuel.

Four mixed oxide assemblies (MOX) will remain in the core for Cycle 14. These assemblies are mechanically identical to the Westinghouse HIPAR design used as reload fuel to Ginna prior to Cycle 8. Exxon previously has performed a safety analysis and concluded on a best estimate basis that in a mixed core configuration the flow to each assembly was within one percent of the core average. Applying a DNBR penalty equivalent to a decrease in one percent of flow to the minimum DNBR for Exxon fuel calculated by Westinghouse indicates that sufficient margin to the design DNBR limit exists.

The Commission has provided guidance concerning the application of standards for making a no significant hazards consideration determination by providing certain examples (April 6, 1983, 48 FR 14870). The requested action does not fall within the scope of the examples of such actions. Thus the bases for considering that the no significant hazards consideration determination, as specified in 10 CFR 50.92, have been met are delineated below.

Moderator Temperature Coefficient (MTC)

The present Technical Specifications (TSs) require that the MTC be negative or positive at all times when the reactor is critical. The proposed TS allows a +5 pcm/°F MTC below 70% of rated power, changing to a 0 pcm/°F MTC at 70% power and above. The MTC is only a portion of the overall temperature coefficient. Other factors which contribute to the overall temperature coefficient compensate for the positive MTC at power levels below 70% thus maintaining the overall temperature coefficient negative at all times.

The MTC is incorporated as an assumption into the analysis of Design Basis Events. These events assume certain transients occur which challenge the safety systems of the plant. A change in the MTC has no effect on the probability of such event. Westinghouse has demonstrated that the results of these transients satisfy the acceptance criteria, therefore, the consequences of the accident are unchanged.

The possibility of a new accident is not created by the change in core physics parameter such at MTC.

Westinghouse analysis has shown that the limiting transients for which the assumption of positive MTC is conservative are those initiated from 100% power. However, the proposed TSs state at this condition the MTC must still be negative which is unchanged from previous analyses. Westinghouse has incorporated the positive MTC into their transient analysis and has demonstrated that appropriate margin exists between the results and the acceptance criteria. Therefore, there is no significant reduction in the margin of safety.

Reduction in EOC Shutdown Margin

The EOC shutdown margin was incorporated into the Westinghouse transient analysis. The limiting Design Basis Accident affected by the EOC shutdown margin is the Large Steam Break at 0% power. A change in this parameter has no effect on the probability of this event. Westinghouse has demonstrated that the results of this transient satisfy the acceptance criteria. Therefore, the consequences of the event are unchanged.

The change in the EOC shutdown margin is a small change in a known quantity and does not involve the possibility of a new or different kind of accident from any accident previously evaluated.

The Westinghouse transient analysis has incorporated the change in shutdown margin into the Large Steam Break. The results satisfy the acceptance criteria for Condition IV events. Therefore, there is no reduction in the margin of safety.

Change in the F^N_H Limits at Less than 100% Power

The limit of F^N_H has been increased and the equation format changed to be continuous over all power ranges. The modification of the F^N_H limit for partial power, a 0.3 multiplier in the equation, has similarly been previously reviewed and approved by the NRC for other facilities. The proposed change does not significantly increase the probability or consequences of an existing accident,

create a new accident, or significantly reduce the margin of safety.

Change in Core Protection Limits (OT T and OP T)

Westinghouse has updated the correlations for the core protection limits using current methodology. The new limits were incorporated into their analysis of Design Basis Events. The results of these analyses show that the acceptance criteria was satisfied. Therefore, the consequences of accidents previously evaluated are not increased.

The possibility of a new accident being created is not created by a change in core protection limits.

Westinghouse has incorporated these new protection limits into their transient analysis and the results satisfy the acceptance criteria. The purpose of these limits are unchanged, i.e., to protect against fuel centerline melting and Departure from Nucleate Boiling. This change does not involve a significant reduction in the margin of safety.

A Deletion in the Limits of Target Axial Offset (TAO)

Westinghouse assumes that the worst case power distributions for their transient analysis that they predict would bound any that would occur during operation. For every reload design, Westinghouse assures that the potential worst case power distribution for that reload does not exceed those assumed in the transient analysis. Therefore, a limitation on TAO is unnecessary. Based on the above aforementioned, this change has no effect on either the probability or consequences of an accident. This change does not create the possibility of a different kind of accident.

Since Westinghouse evaluates the worst case power distribution for every reload to assure it is bounded by those assumed in the transient analysis, and the transient analysis results show that the acceptance criteria is met, there is no significant reduction in the margin of safety.

For the foregoing reasons the Commission's staff proposes to determine that operating the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. Therefore, the staff proposes to determine that the proposed license amendment would involve no significant hazards considerations.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission , U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By April 20, 1984, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject provisional operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspects of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing

after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to Dennis M. Crutchfield: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Harry H. Voigt, Esquire, LeBoeuf, Lamb, Leiby and MacRae, 1333 New Hampshire Avenue NW., Suite 1100, Washington, D.C. 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., and at the Rochester Public Library, 115 South Avenue, Rochester, New York 14604.

Dated at Bethesda, Maryland, this 15th day of March 1984.

For the Nuclear Regulatory Commission.

Dennis M. Crutchfield,

Chief, Operating Reactors Branch No. 5, Division of Licensing.

[FR Doc. 84-7660 Filed 3-20-84; 8:45 am]

BILLING CODE 7590-01-M

[Docket Nos. 50-266 and 50-301]

Wisconsin Electric Power Co.; Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License Nos. DPR–24 and DPR–27, issued to Wisconsin Electric Power Company (the licensee), for operation of the Point Beach Nuclear Plant Units 1 and 2 located in the Town of Two Creeks, Manitowoc County, Wisconsin.

The amendment would revise the surveillance interval for evaluating the leakage integrity of post-accident recovery systems outside containment in accordance with the licensee's application for amendment dated December 23, 1983.

Before issuance of the proposed license amendment, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

On July 2, 1980 all pressurized water reactor licensees were sent guidance in the form of model technical specifications in order to provide reasonable assurance that facility operation would be maintained within the limits determined acceptable following implementation of the TMI–1 Lessons Learned Category "A" items. In part, these model technical specifications included the surveillance requirement for integrated leak testing of systems outside containment that would or could contain highly radioactive fluids during a serious transient or accident "at a frequency not to exceed refueling cycle intervals." The Commission's guidance took into account that several licensees' refueling cycle intervals were at 18 month intervals.

The normal refueling interval for the Point Beach Nuclear Plant Units 1 and 2 is approximately 12 months. Wisconsin Electric Power Company (licensee) proposed a yearly surveillance frequency for evaluating the integrity of post accident recovery systems outside containment. Slight deviations (±25%) from the yearly surveillance interval were allowed by previously existing technical specifications to accommodate small changes in the annual refueling outage dates. At the time the licensee's proposed technical specifications were reviewed and approved, the licensee did not anticipate conducting extended refueling outages which might exceed the normal five-week duration. Subsequent to the issuance of the technical specifications for evaluating the integrity of post-accident recovery systems outside containment, the licensee has begun an extended refueling outage (six-months duration) on Point Beach Unit 1. This also creates the need for Unit 2 to remain in a greater than 12 month operating cycle so as not to have both units shutdown simultaneously. Because of this, the licensee has requested changes to the wording of the surveillance frequency for evaluating the integrity of post-accident recovery systems to an inspection interval of "each refueling cycle." While the interval between inspections may, in unique situations (such as following an extended refueling outage), exceed the current yearly inspection interval, it is clearly within the guidelines proposed by the Commission in their July 2, 1980 letter to all licensees of pressurized water reactors. For this reason, the staff proposes to determine that the amendments do not involve a significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attn: Docketing and Service Branch.

By April 20, 1984, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the

proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Borad Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements describerd above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street NW., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to James R. Miller, Chief, Operating Reactors Branch #3, Division of Licensing: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 1800 M Street NW., Washington, D.C., 20036, attorney for the licensee.

Nontimely filings petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room 1717 H Street NW., Washington, D.C., and at the Joseph P. Mann Public Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

Dated at Bethesda, Maryland this 9th day of February 1984.

For the Nuclear Regulatory Commission.

James R. Miller,

Chief, Operating Reactors Branch #3, Division of Licensing.

[FR Doc. 84–7599 Filed 3–20–84; 8:45 am]

BILLING CODE 7590–01–M

[Docket Nos. 50–317 and 50–318]

Baltimore Gas and Electric Co.; Exemption

I

The Baltimore Gas and Electric Company (the licensee) is the holder of Facility Operating License Nos. DPR–53 and DPR–69 which authorize operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2. These licenses provide, among other things, that they are subject to all rules, regulations and Orders of the Commission now or hereafter in effect.

The facility comprises two pressurized water reactors at the licensee's site located in Calvert County, Maryland.

II

On November 19, 1980, the Commission published a revised Section 10 CFR 50.48 and a new Appendix R to 10 CFR 50 regarding fire protection features of nuclear power plants (45 FR

76602). The revised section 50.48 and Appendix R became effective on February 17, 1981. Appendix R, section III.G.2.a, requires that cables, equipment, and associated circuits of redundant systems and components important to safe shutdown be separated by 3-hour rated fire barriers.

By letter dated November 21, 1983, the licensee requested an exemption from section III.G of Appendix R to 10 CFR 50 to the extent that it requires approved fire door assemblies for the protection of personnel access openings in 3-hour rated fire boundaries. As an alternative, the licensee has proposed the use of non-rated watertight doors and water curtains in specified plant areas.

The Unit 1 and Unit 2 service water pump rooms are located on the 5 foot elevation of the auxiliary building and are separated by greater than 400 feet. The waterweight door in each pump room provides access to the adjacent penetration rooms, thus permitting a path for fire to spread from one service water pump room through the two adjacent penetration rooms to the second service water pump room.

By letter dated March 19, 1981, the licensee requested an exemption for similarly designed watertight doors. This exemption was granted on August 16, 1982 based upon our evaluation of test data which indicated that these water-tight doors would perform adequately as three-hour rated fire doors (the ASTME–119 test).

Although the doors referenced in the November 21, 1983 letter are approximately one-half the size of the doors tested per ASTM E–119, we conclude that the size difference would not appreciably affect the test results.

With regard to the water curtains, the licensee's November 21, 1983 letter proposes installation of a dedicated sprinkler head (water curtain) to provide three-hour protection for an unrated metal emergency hatch between Corridor No. 110 (Elev. 10'0" and Reactor Coolant Make-Up Pump Room No. 216A (Unit 2, Elev. 5'0") Room 216A is presently provided with sprinkler protection. This sprinkler system will supply a dedicated sprinkler head on the Room 216A side of the hatch. On the Corridor No. 110 side of the hatch, a dedicated sprinkler head will be supplied from the Room No. 116 sprinkler system.

In an Exmeption dated August 6, 1982, the staff approved the use of water curtains for specific locations at Calvert Cliffs. This approval was based upon our evaluation of ASTM E–119 test results which indicated that the proposed fire curtain designed provided an equivalent level of fire protection as the required 3-hour rated fire door assemblies, and will provide reasonable assurance that a postulated fire will not propagate to redundant trains. The hydraulic capacity of the sprinkler systems supplying the dedicated heads referenced in the licensee's November 21, 1983 letter is sufficient to ensure a water curtain denisty on both sides of the hatch consistent with that used in the ASTM E–119 tests and is therefore adequate.

Based upon the above, we conclude that the level of fire protection provided by the watertight doors and water curtains is equivalent to the level of protection required by the technical requirements of Appendix R to 10 CFR 50, and therefore, the licensee's request to be exempted from the requirement to provide 3-hour fire rated barriers for the areas described in Attachment 1, herein, should be granted.

An Exemption has also been requested from section III.G of Appendix R to the extent it requires the installation of automatic suppression throughout a protected area.

Fire Area 10 is located on the minus 10 foot elevation of the auxiliary building and includes a corridor and a charging pump room. There are four additional rooms in Fire Area 10 that contain water processing equipment. Four rooms do not contain fixed fire suppression (sprinklers). The remainder of Fire Area 10 is provided with automatic suppression and detection. The combustible loading in the area is negligible.

Fire Area 11 is on the 5 foot through 69 foot elevations of the auxiliary building. Automatic fire suppression and detection are provided on the 5 foot elevation; however, the automatic sprinkler system does not extend to the 69 foot elevation. The floor/ceiling assembly between the 45 and 69 foot elevations is a 3-hour rated barrier except for a rolling steel fire door. The door is approved as a 3-hour rated barrier when installed vertically, but as installed in the floor, its fire resistance capability is uncertain. The ceiling height in both areas is greater than 20 feet. The combustible loading is negligible. Cables for the diesel generators are located on the 45 foot elevation at the ceiling level; however, they are located greater than 20 feet above the floor and are adequately protected by automatic sprinklers.

Redundant cables are located in a corridor on the 69 foot elevation behind the spent fuel pools approximately 40 feet away. The corridor construction is unrated.

Fire Areas 10 and 11 consist of large areas containing negligible amounts of combustible materials. Sprinklers are provided in portions of the areas where minor quantities of combustibles exist. Detection systems are provided throughout the areas. If a fire occurred in a non-sprinklered portion of either area, the early warning provided would alert the fire brigade. The configuration of the areas combined with the response of the fire brigade would prevent a fire from growing to a size which would overwhelm the partial sprinkler systems. The addition of more sprinkler coverage would not significantly enhance safety.

Based on our evaluation, we conclude that the protection provided for the Fire Areas 10 and 11 provide a level of fire protection equivalent to the technical requirements of section III.G. The exemption should, therefore, be granted.

With regard to RCP oil collection, the licensee has requested an exemption from Appendix R Section III.0 to the extent that it requires an oil collection tank sized to hold the lube oil inventory of all four RCP motors.

Each Calvert Cliffs reactor coolant system has four reactor coolant pumps, with an oil collection system which drains to two vented closed collection tanks (two pumps per tank). The quantity of lubricating oil in each pump is 225 gallons. The capacity of each oil collection tank is 275 gallons. The components, except for the collection tank, have been designed so that they are capable of withstanding a safe shutdown earthquake (SSE). The collection tanks are arranged such that, if a failure of more than one RCP motor lube system occurred, the oil collection tank would overflow onto the lower containment floor. The lubricating oil used in the RCP motors has a flash point greater than 400°F. There are no ignition sources at the floor level of the lower containment.

The RCP motor lube oil system does not comply with section III.0 because the oil collection tank is not sized to contain the entire lube oil system inventory. The RCP motor lube oil system is capable of withstanding the safe shutdown earthquake. The oil collection tank is provided with sufficient capacity to hold the total lube oil inventory of one reactor coolant pump with margin and is designed so that any overflow will be drained to a safe location. This combination of features is acceptable.

Based on the above, the existing RCP motor lube oil collection system provides a level of safety equivalent to the technical requirement of section III.0 and, therefore, the exemption should be granted.

III

Accordingly, the Commission has determined that, pursuant to 10 CFR 50.12, an exemption is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest and hereby grants the following exemptions with respect to the requirements of Appendix R to 10 CFR Part 50:

• Section III.G—"Fire protection of safe shutdown capability."

(1) The licensee may utilize the proposed alternatives to the requirement for maintenance of 3-hour fire rated barriers. The proposed alternatives and locations of their use are contained in Attachment 1 hereto.

(2) The licensee need not install fixed fire suppression systems in Fire Areas 10 and 11 in addition to that described in the licensee's November 21, 1983 submittal.

• Section III.O—"Oil collection system for reactor coolant pump."

The existing oil collection tank capacity for Calvert Cliffs Units 1 and 2 is adequate.

The NRC staff has determined that the granting of this Exemption will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with this action.

Dated at Bethesda, Maryland this 15th of March 1984.

For the Nuclear Regulatory Commission.

Darrell G. Eisenhut,

Director, Division of Licensing, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

OFFICE OF PERSONNEL MANAGEMENT

Proposed Information Collections for OMB Review

AGENCY: U.S. Office of Personnel Management.

ACTION: Notice of proposed information collections submitted to OMB for clearance.

SUMMARY: In accordance with the Paperwork Reduction Act 1980 (Title 44, U.S.C. Chapter 35), this notice announces a proposal to collect information from the public. SF 2800, Application for Death Benefits, is completed by survivors of employees and annuitants to apply for survivor benefits as provided by the Civil Service Retirement System (Title 5, U.S.C. Chapter 83). SF 2803, Application to Make Deposit or Redeposit, is completed by Federal employees or former Federal employees to apply to make a deposit or redeposit of contributions to the Civil Service Retirement System (Title 5, U.S.C. Chapter 83). SF 2808, Designation of Beneficiary Under the Civil Service Retirement System, is completed by Federal employees and annuitants to designate beneficiaries under the Civil Service Retirement System (Title 5, U.S.C. Chapter 83). SF 2809 (overprint) is completed by annuitants and survivor annuitants who choose to elect, cancel or change health benefits under the Federal Employees Health Benefits Program (Title 5, U.S.C. Chapter 89). SF 2823, Designation of Beneficiary—FEGLI Program, is completed by Federal employees and annuitants to designate beneficiaries under the Federal Employees' Group Life Insurance Program (Title 5, U.S.C. Chapter 87). BRI 49–204, Financial Resources Questionnaire, is completed by debtors to the Civil Service Retirement System. OPM determines if a waiver should be granted or periodic payments should be accepted (Federal Claims Collection Act, 80 Stat., Section 309). BRI 41–167, Representative Payee Questionnaire, is completed by individuals who apply to be a fiduciary for a payee entitled to benefits under the Civil Service Retirement System (Title 5, U.S.C. Chapter 83). BRI 80–32, Request to Disability Annuitant for Information on Physical Condition and Employment, is completed by disability annuitants to determine if disability annuity should continue (Title 5, U.S.C. Chapter 83). BRI 49–263, Request for Social Security Number, is completed by annuitants and survivor annuitants when the social security number is incorrect or missing from the Civil Service Retirement System (Executive Order 9397). BRI 46–305, Survivor Annuity Information, is completed by annuitants who elect survivor benefits when a marriage occurs (Title 5, U.S.C. Chapter 83). BRI 46–305–A, Survivor Annuity Information, is completed by annuitants who elect survivor benefits when a remarriage occurs (Title 5, U.S.C. Chapter 83). BRI 49–219, Reinstatement of Disability Annuity Previously Terminated, is collected by OPM to determine if a disability annuity which was terminated because the individual was restored to earning capacity should be reinstated. For copies of these proposals, call John P. Weld, Agency Clearance Officer, on (202) 632–7720.

ADDRESSES: Send or deliver comments to:

BILLING CODE 0000–00–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 23247; 70–6930]

Consolidated Natural Gas Co., et al; Proposed Change in Introsystem Financing

In the matter of Consolidated Natural Gas Co., #100 Broadway, New York, New York, 10005, CNG Producing Co., Consolidated Gas Supply Corp., Consolidated Gas Transmission Corp., The East Ohio Gas Co.,The Peoples Natural Gas Co., West Ohio Gas Co., Notice of Proposed Change in Intrasystem Financing.

March 16, 1984.

Consolidated Natural Gas Company ("Consolidated"), a registered holding company, and its subsidiary companies listed above have filed with this Commission a post-effective amendment to the application-declaration in this proceeding pursuant to Sections 6(a), 7, 9(a), 10, and 12(b) of the Public Utility Holding Company Act of 1935 ("Act") and Rules 42(b)(2), 45, and 50(a)(3) promulgated thereunder.

By order dated January 17, 1984 (HCAR No. 23201) in File No. 70–6937, Consolidated Gas Supply Corporation ("Supply Corporation") was authorized to transfer to Consolidated Gas Transmission Corporation ("Transmission") all of its assets and related liabilities, other than its natural gas utility business in the State of West Virginia. By order dated December 28, 1983 (HCAR No. 23186) in this proceeding, the Commission authorized, during 1984, the temporary prepayment by Supply Corporation of not in excess of $50,000,000 of its long-term notes held by Consolidated as excess cash accumulates, together with the making of cash advances by Consolidated as required by Supply Corporation.

It is anticipated that the transfers of Supply Corporation's assets and related liabilities authorized in the order of January 17, 1984, in File No. 70–6937, will be completed shortly. Therefore, it is proposed that the $50,000,000 of temporary prepayments from excess cash and cash advances allowed to Supply Corporation in the order of December 28, 1983, be rescinded as to Supply Corporation and such authorization be granted in its place and stead to Transmission.

The post-effective amendment to the application-declaration and any further amendments are available for public inspection through the Commission's Office of Public Reference. Interested persons wishing to comment or request a hearing should submit their views in writing by April 12, 1984, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the applicants-declarants at the address specified above. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for a hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in this matter. After said date, the application-declaration, as now amended or as it may be further amended, may be granted and permitted to become effective.

For the Commission, by the Office of Public Utility Regulation, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 13826; 812–5720]

Dresdner Bank Aktiengesellschaft, and Dresdner U.S. Finance Inc.; Filing of Application for an Order

March 15, 1984.

Notice is hereby given that Dresdner Bank Aktiengesellschaft ("Bank") Jurgen-Ponto-Platz 1, 6000 Frankfurt/Main 11, Germany, a commercial bank organized under the laws of the Federal Republic of Germany, and Dresdner U.S. Finance Inc. ("Issuer"), 60 Broad Street, New York, New York, 10004, a Delaware corporation wholly-owned by the Bank (collectively, "Applicants"), filed an application on December 5, 1983, for an order of the Commission, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act"), exempting Applicants from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the complete text of the applicable provisions thereof.

According to the application, the Bank, the second largest bank in Germany, provides, directly or through its subsidiaries, a wide range of commercial, retail and investment banking services to individuals, businesses and governments throughout Germany and internationally which, in addition to traditional retail banking services, includes services in the areas of currency exchange, securities brokerage, portfolio administration and custodial services. In addition to an agency, two branches and two representative offices in the United States, the Bank also holds a 75% equity ownership interest in ABD Securities Corporation, a Delaware corporation, registered as a broker-dealer and investment adviser. The application states that, as of December 31, 1982, deposits with the Bank (including demand, time and savings deposits and bonds and notes) totaled approximately 92% of the Bank's total liabilities (including capital) of $35,168,151,000 (at the rate of exchange prevailing on that date) and that the aggregate principal amount of loans extended by the Bank constituted approximately 55% of the

Bank's total assets of $35,168,151,000 as of the same date.

The application indicates that the Issuer is a Delaware coporation, incorporated on October 13, 1983, all of whose outstanding capital stock is owned by the Bank and whose sole business will consist of issuing and selling the Issuer's commercial paper notes ("Commercial Paper Notes") and advancing ("Advances") the net proceeds of sale thereof to the Bank through its Grand Cayman Branch pursuant to an operating agreement ("Operating Agreement") to be entered into by the Issuer and the Bank, as well as issuing and selling the Issuer's other debt securities and advancing or loaning the net proceeds of the sale thereof to the Bank in a manner similar to the Advances. The application further states that, in the future, there will be no public offering of the Issuer's capital stock or of any other equity security of the Issuer; substantially all of the Issuer's assets will consist of the Issuer's rights to receive repayments from the Bank of the Bank's indebtedness arising from the Advances made by the Issuer from the net proceeds of sales of the Commercial Paper Notes or other debt securities.

The application states that the Bank is extensively regulated by German banking authorities, including supervision by the German Federal Banking Supervisory Authority and the German Central Bank; reports are periodically required to be made to either or both of those entities. The Bank, moreover, must be audited annually to ensure compliance with principles of valuation and the correct disclosure of assets, liabilities, income and expenses. The application further represents that the Bank's United States banking activities are subject to extensive federal supervision and regulation under the International Banking Act of 1978; the Bank's agency and branches are also subject to state regulation substantially similar to that of domestic banks.

The application indicates that the Issuer proposes to enter into an arrangement with the Bank pursuant to which the Bank may request the Issuer to make Advances: the Issuer, in order to obtain funds to make the Advances, proposes to issue and sell its short-term negotiable promissory notes which will be exempt from the registration requirements of the Securities Act of 1933 ("1933 Act") by virtue of Section 3(a)(3) thereof and will be sold in minimum denominations of $100,000, will have maturities not exceeding 270 days, and will neither be payable on demand prior to maturity nor eligible for any extension, renewal, or automatic "rollover" at the option of either the holders or the Issuer. It is estimated by Applicants that the face amount of Commercial Paper Notes outstanding in the first year of issuance will not exceed $150,000,000. The application further states that the Issuer undertakes not to market any Commercial Paper Notes prior to receiving an opinion of counsel to the effect that the proposed offering is exempt from the registration requirements of the 1933 Act by virtue of Section 3(a)(3) thereof; the Issuer does not request Commission review or approval of counsel's opinion, and the Commission expresses no opinion concerning availability of any such exemption. Applicants represent that, prior to their issuance, the Commercial Paper Notes will have received one of the three highest investment grade ratings from at least one nationally recognized statistical rating organization and that Issuer's United States counsel shall have certified that the rating was received.

Applicants represent that the Commercial Paper Notes will be offered publicly, through one or more major dealers, only to the types of sophisticated and largely institutional investors that ordinarily participate in the commercial paper market. The application also states that the Issuer undertakes to insure that each dealer in the Commercial Paper Notes will furnish to each offeree memoranda describing the businesses of the Bank and the Issuer and providing the most recent annual audited financial statements for the Bank, together with a description of the material differences between German accounting principles utilized in the preparation of the financial statements of the Bank and generally accepted accounting principles as applied in the United States. The application represents that the memoranda prepared by each dealer will be updated as promptly as practicable to reflect material adverse changes in the financial status of the Issuer or the Bank and will be at least as comprehensive as memoranda customarily used in offering commercial paper in the United States.

The application states that the Issuer will select a major commercial bank ("Depositary") to act as issuing and paying agent for the Commercial Paper Notes and that the Bank will consent to the appointment of the Depositary. The application further states that the Bank will unconditionally agree to pay to the Issuer amounts necessary to satisfy the Issuer's obligations under the Commercial Paper Notes and other liabilities of the Issuer with respect to the transaction and will expressly consent to the enforcement of those obligations directly by the holders of the Commercial Paper Notes or by the Depositary on behalf of the holders of the Commercial Paper Notes. The Applicants maintain that the obligation of the Bank will be the functional equivalent of a guarantee by the Bank of the Issuer's obligations with respect to the Commercial Paper Notes and that the Bank's obligations with respect to its liabilities to the Issuer (including its liabilities with respect to the Issuer's obligations under the Commercial Paper Notes) will rank *pari passu* and equally with all deposit liabilities and other unsecured, unsubordinated indebtedness of the Bank and superior to any subordinated indebtedness of the Bank and to claims of holders of the Bank's capital stock.

The Applicants represent that, in connection with the Operating Agreement, the Bank will submit to the jurisdiction of any State or Federal Court in The City of New York, and will authorize an agent in The City of New York to accept service of process in any action based upon its obligations to the Issuer. Applicants further represent that this consent to jurisdiction and appointment of an authorized agent to accept service of process will be irrevocable until all amounts due and to become due with respect to the Advances and all obligations of the Bank to the Issuer have been paid by the Bank.

The application indicates that the Issuer and the Bank will enter into the Operating Agreement by which the Issuer will agree to make Advances to the Bank solely from the net proceeds of the sale of the Commercial Paper Notes. Applicants represent that the Issuer will advance to the Bank all of the proceeds from sales of the Commercial Paper Notes (after deduction from the proceeds of amounts necessary to pay certain of the Issuer's liabilities in connection with the transactions contemplated by the Operating Agreement, including a commission payable to any commercial paper dealer used by the Issuer on account of its services in connection with the purchase and sale of the Commercial Paper Notes). The application states that the Bank will use the proceeds of the Advances in the ordinary course of its banking business for "current transactions" within the meaning of Section 3(a)(3) of the 1933 Act.

The Applicants state that the Bank will be obligated to repay to the Issuer on the maturity date of each Advance

the principal together with interest payable from time to time in an amount sufficient to enable the Issuer to satisfy its liabilities in connection with the transaction. Applicants further state that each Advance will have the same maturity date as that of the Commercial Paper Notes issued by the Issuer; the Bank will be unconditionally obligated to pay amounts as are necessary to satisfy the Issuer's obligations under the Commercial Paper Notes and other liabilities of the Issuer with respect to the transaction; and the Bank will consent to the enforcement of the agreement directly by the holders of the Commercial Paper Notes and by the Depositary on behalf of those holders.

Applicants may, from time to time, offer their debt securities other than the Commercial Paper Notes for sale in the United States, the proceeds of which would, in the case of debt securities of the Issuer, be loaned or advanced to the Bank in a manner similar to the Advances and, in the case of debt securities issued by the Bank, utilized directly by the Bank or one of its branches in its banking operations. The application states that the Issuer's obligations with respect to any such debt securities it issues may be supported by the Bank's guarantee or by such other unconditional obligation on the part of the Bank to pay the obligations of the Issuer in connection with those debt securities as would be the functional equivalent of a guarantee of those debt securities. Applicants undertake that, prior to their issuance, any future issue of Applicants' debt securities other than the Commercial Paper Notes will have received one of the three highest investment grade ratings from at least one nationally recognized statistical rating organization and that the Applicants' United States counsel shall have certified that the rating was received; provided, however that no rating need be obtained with respect to any such issue if, in the opinion of Applicants' United States counsel (counsel having taken into account for the purposes there of the doctrine of "integration" referred to in Rule 502 under the 1933 Act and relevant "no-action" letters made public by the Commission) an exemption from registration is available under Section 4(2) of the 1933 Act or Regulation D thereunder.

The Applicants undertake that they will not issue or sell in the future any of their debt securities in the United States unless the Applicants have received an opinion of United States counsel or a "no-action" letter issued by the Commission to the effect that the proposed offering is in compliance with, or entitled to an exemption from, the registration requirements of the 1933 Act. The Applicants also undertake that any future offering will be effected on the basis of disclosure documents at least as comprehensive in their description of the Issuer or the Bank or both, as the case may be, their businesses and their financial statements as the commercial paper dealer memoranda referred to above, and that in the case of an offering made pursuant to a registration statement under the 1933 Act, the offering will be made on the basis of disclosure documents appropriate for such registration.

The Applicants represent that the Bank will, in connection with any future offering of its debt securities in the United States and in connection with any future offering of the Issuer's debt securities in the United States, appoint an agent to accept service of process in any suit, action or proceeding brought against the Bank on its obligations under its debt securities or its obligations under its guarantee (or functionally equivalent obligation) of the debt securities of the issuer, and instituted in any State or Federal court by the holder of any debt securities and will expressly submit to the jurisdiction of any State or Federal court located in The City of New York with respect to any such suit, action or proceeding. The Applicants further represent that such appointment of an agent for service of process and consent to jurisdiction shall be irrevocable until all amounts due and to become due in respect of such issuance of debt securities have been paid.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 9, 1984, at 5:30 p.m., do so by submitting a written request setting forth the nature of his interest, the reasons for his request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the addresses stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Geoge A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13823; 812-5760]

RC Apartment Partners Limited Partnership, et al.; Application for an Order for Exemption

March 15, 1984.

Notice is hereby given that RC Apartment Partners Limited Partnership and RC Commercial Partners Limited Partnership (respectively, the "Residential Partnership" and the "Commercial Partnership," and collectively, the "Partnerships"), 225 Franklin Street, Boston, Massachusetts 02110: Maryland limited partnerships, and their managing general partner, Winthrop Financial Co., Inc. ("Winthrop Financial" or the "Managing General Partner" and, together with the Partnerships, collectively referred to hereinafter as "Applicants"), filed and application of January 30, 1984, pursuant to Section 6(c) of the Investment Company Act of 1940 ("Act") for an order exempting the Partnerships from all provisions of the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of the applicable statutory provisions.

Applicants state that the Partnerships were formed under the Maryland Revised Uniform Limited Partnership Act as vehicles for equity investment in a project including government-assisted rental housing in accordance with the policies and objectives of Title IX of the Housing and Urban Development Act of 1968 ("Title IX"). Applicants state that the Partnerships will operate as "two-tier" entities, that is, the Partnerships, as limited partners, will invest in River City Apartment Associates and River City Commercial Associates (together, the "Operating Partnerships"), which in turn, will engage in the acquisition, development, construction, ownership and operation of a project containing 446 units of housing, of which 339, or approximately 76% are for moderate income persons, and commercial space developed in connection with such housing (the "Combined Project")/ Applicants state that the Partnerships are organized as limited partnerships because that form of organization is the

only one that provides an investor with both liability limited to his capital investment and the ability to claim on his individual income tax return tax benefits as if he were a direct owner of the Combined Project in which the limited partnership invests.

Applicants state that the Residential and Commercial Partnerships will offer 160 and 80 units, respectively, of limited partnership interests ("Units") at a price of $70,465 and $76,447 per Unit, respectively, plus interest, to investors meeting certain suitability standards pursuant to Section 4(2) of the Securities Act of 1933 ("Securities Act") and Regulation D promulgated thereunder. It is estimated that the Partnerships will have as net proceeds of the offerings $7,680,125 and $4,921,331, respectively, available for investment in the Operating Partnerships after deductions for sales commissions, anticipated offering expenses, and certain fees and expenses. To become a limited partner ("Limited Partner") in either Partnership, an investors subscription for Units must be approved by Winthrop Financial, and such approval will be made conditional upon respresentations as to suitability of the investment for each subscriber.

Applicants state that the Partnerships will be controlled by the Managing General Partner, and that the Limited Partners, consistent with their limited liability status will not be entitled to participate in the control of the Partnerships. Limited Partners owning a majority of interests in a partnership will have the right to amend the partnership agreements, dissolve the Partnerships, and remove any General Partner and elect a replacement therefor. Any amendment to either partnership agreement, however, may not allow the Limited Partners to take part in the control of the respective Partnerships business, or otherwise affect the limited liability of the Limited Partners.

Applicants represent, in addition, that under the partnership agreements, each Limited Partner is entitled to review all books and records of his Partnership at any and all reasonable times. It is stated that the Combined Project will be assisted by federal and local government agencies and will contain housing for moderate income persons and commercial space developed in connection with such housing. Applicants state that the general partner of the Operating Partnerships is River City Developers, an Illinois limited partnership, the general partners of which are Daniel N. Epstein and Bertrand Goldberg. It is further stated that Mr. Epstein has had substantial experience in the construction and development of real estate projects and that Mr. Goldberg is an architect with extensive experience in the design, planning and development of both residential and commercial structures. It is stated that River City Developers will receive interests in the Operating Partnerships disproportionate to its capital contributions.

Applicants state further that the registered broker-dealers who are to sell the Units ("Placing Brokers") will receive commissions equal to 8% of the principal amount of the Units sold, and that the selling agent, an affiliate of the Managing General Partner, will receive an additional 1% as reimbursement for expenses of the offering. Offers and sales of the Units will be effected through the Placing Brokers and other members of the National Association of Securities Dealers, Inc. ("NASD") authorized by the Placing Brokers to sell Units.

Applicants represent that selling commissions based on 8% of the offering proceeds are customarily charged in securities offerings of this type and are consistent with the guidelines of the NASD.

Applicants further state that during the offering and organizational stage, the Managing General Partner will receive from the Residential and Commercial Partnerships non-recurring fees equal to .6% and 1.2%, respectively, of the offering proceeds, including interest ("Gross Proceeds") for organizational services, and non-recurring fees equal to .4% and .8%, respectively, of Gross Proceeds for costs incurred in obtaining professional tax advice for the Residential and Commercial Partnerships. Applicants further state that during this stage an affiliate of the Managing General Partner will receive from Continental Casualty Company ("CNA"), which will provide finanacial guaranty bonds insuring the payment of the Limited Partners' promissory notes, fees of up to .35% and .25% of Gross Proceeds for the Residential and Commercial Partnerships, respectively, for insurance brokerage services in arranging the CNA insurance. Applicants state that CNA may also pay a contingent fee of up to .5% and .37% of Gross Proceeds for the Residential and Commercial Partnerships, respectively, depending on the loss ratio experienced on the financial guaranty bonds.

During the Partnerships' developmental stage, Applicants state that the Managing General Partner will receive non-recurring fees equal to 13.87% and 8.7%, respectively, of Gross Proceeds for monitoring the Partnerships' investments in their respective Operating Partnerships during the period in which the capital contributions of the Limited Partners are being paid, and non-recurring fees equal to .7% and .6%, respectively, of Gross Proceeds in consideration for obtaining advances of $1,418,000 and $561,000, respectively, to the Residential and Commercial Partnerships, to enable the Partnerships to make timely payment of the first portion of the initial installment of their capital contributions to the Operating Partnerships, and arranging commercial bank loans to the Partnerships in the amounts of $7,338,509 and $3,029,730, respectively. In consideration for these services, the Managing General Partner will also receive the amount, if any, by which the interest actually paid on the commerical bank loans is less than projected to be paid, and any interest income earned on temporary investments of Limited Partners' Capital Contributions pending payment by the Partnerships of their capital contributions to their respective Operating Partnerships.

During the Partnership's operating stage, Applicants state that the Managing General Partner will receive annual management fees from each of the Partnerships in the amount $25,000 per year, and non-recurring fees equal to 2.2% and 2.3%, respectively, of Gross Proceeds in consideration for the agreement to make additional capital contributions of up to $1,300,000 and $900,000, if needed to cover certain operating deficits of the respective Operating Partnerships. Applicants state that compensation to the Managing General Partner during the liquidating stage will be in the form of distributions of the proceeds of the sale or refinancing of the Combined Project or the Partnerships' interests in the Operating Partnership, or of real or personal property of the Partnerships.

Applicants state that, in addition to the foregoing fees and interests, the Managing General Partner and affiliates that are also general partners of the Partnerships will receive in the aggregate a 1.6% interest in each Partnership's profits and losses, cash flow and, after the Limited Partners have received sale or refinancing proceeds equal to the amount of their capital contributions, 5% of the proceeds resulting from a sale or refinancing of Partnership assets.

Applicants state that the substantial fees and other forms of compensation that will be paid to the Managing General Partner and its affiliates will not have been negotiated through arm's

length negotiations. They represent, however, that terms of all such compensation will be fair and not less favorable to the Partnerships than would be the case if such terms had been negotiated with independent third parties.

Applicants state that the Limited Partners will make their capital contributions to the Residential and Commercial Partnerships in seven and eight installments over six and seven years, respectively, according to a schedule which corresponds approximately to the timing of the payments by the Partnership of its capital contributions to the Operating Partnerships.

Applicants further state that a portion of the second through seventh or eighth installments, as the case may be, will be invested for approximately two months in short-term obligations pending payment by each Partnership of its capital contributions to the appropriate Operating Partnership. Applicants state that at no time will the value of the investment from the proceeds of such installments exceed 40% of a Partnership's total assets.

Applicants state that each Partnership will distribute to Limited Partners annual audited financial statements, as well as an annual statement describing any transactions between the Partnership and any affiliate of the General Partners. Applicants state that the partnership agreements provide that the Partnerships shall indemnify any General Partner for losses sustained for any act performed within the scope of the authority granted to the General Partner by the partnership agreements if the General Partner was not guilty of fraud or gross negligence. Applicants further state, however, that insofar as indemnification for liabilities under the Securities Act may be permitted to a General Partner, the Partnerships have been advised that in the opinion of the Commission, such indemnification is contrary to public policy as expressed in the Securities Act and is therefore unenforceable.

Without conceding that the Partnerships are investment companies as defined in the Act, Applicants request that the Partnerships be exempted from the provisions of the Act pursuant to Section 6(c). Applicants assert that investment in housing projects of the nature of the Combined Project is not economically suitable for private investors without the tax and organizational advantages of the limited partnership form. It is stated that the limited partnership structure provides the only means of bringing private equity capital into government-subsidized housing, particularly because investors typically consider investment in such housing programs as involving greater risk than real estate investment generally.

It is further represented, however, that despite the advantages it affords investors in government-assisted housing, the limited partnership form of organization is incompatible with certain fundamental provisions of the Act. Thus, an exemption from these basic provisions is necessary, and, Applicants contend, it is appropriate that such exemption be granted so as not to discourage use of the two-tier limited partnership entity. To do so, Applicants assert, would frustrate the public policy established by the housing laws.

Applicants further state that, although the interests of the Managing General Partners and its affiliates, and of the general partners of the Operating Partnerships and their affiliates, may conflict in various ways with the interests of Limited Partners are adequately protected through disclosure in the selling documents prepared in connection with the offering of Units. Further protection for the interests of Limited Partners is provided, Applicants assert, by the provisions of the partnership agreements designed to prevent overreaching by the Managing General Partner and to assure fair dealing by the Managing General Partner vis-a-vis the Limited Partners, as well as by the suitability standards established by the selling documents for prospective Limited Partners and the private offering criteria of Regulation D under Section 4(2) of the Securities Act.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 9, 1984, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues, if any, of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicants at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, and order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 13825 812-5733]

Thomson McKinnon Investment Trust, One New York Plaza, New York, New York, 10004; Application for Order

March 15, 1984.

Notice is hereby given that Thomson McKinnon Investment Trust ("Applicant"), an open-end, diversified management investment company registered under the Investment Company Act of 1940 ("Act"), filed an application on December 27, 1983, pursuant to Section 6(c) of the Act, for an order of the Commission exempting Applicant from the provisions of Sections 2(a)(32), 2(a)(35), 22(c) and 22(d) of the Act and Rules 22c-1 and 22d-1 thereunder to the extent necessary to permit Applicant to assess a contingent deferred sales charge on redemptions of its initial and future series of shares, and to permit Applicant to waive the contingent deferred sales charge in certain cases. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below, and to the Act for the text of the provisions cited in the application.

Applicant states that it consists of four series and that, although it has not current intention to create any additional series, it requests that the proposed exemptive relief extend to its initial series and any future series offered on substantially the same basis. Applicant states that mutual funds sold with a sales charge have traditionally imposed a front-end load so that purchase payments are invested after the deduction of any applicable sales so that investors will have the entire amount of their purchase payments fully invested when made. However, Applicant also proposes to pay to its distributor a contingent deferred sales charge from the proceeds of certain redemptions of Applicant's shares. Applicant represents that the amount of such charges, in the aggregate, will not exceed 5% of the aggregate purchase payments made by the investor.

Applicant states that the contingent deferred sales charge would be imposed if an investor redeems an amount which causes the current value of the investor's account with Applicant to fall

below the total dollar amount of purchase payments made by the investor during the preceding five years, except that no sales charge would be imposed if the amount redeemed is derived from (1) increases in the value of the investor's account above the amount of purchase payments during the preceding five years of (2) purchase payments made more than five years prior to the redemption.

Applicant states that the imposition of the contingent defered sales charge is to be waived on the following redemptions: (1) Redemptions following the death or disability, as defined in Section 72(m)(7) of the Internal Revenue Code (the "Code"), of a shareholder (including one who owns the shares as joint tenant with his or her spouse), provided the redemption is requested within one year of the death or initial determination of disability; (2) any partial or complete redemption in connection with certain distributions from Individual Retirement Accounts ("IRA's") or other qualified retirement plans, and (3) redemptions by the Trustees, officers and any employees of Applicant and by employees of Thomson McKinnon Securities Inc., Applicant's principal underwriter (the "Distributor"), or of Thomson McKinnon Asset Mangement Inc., Applicant's investment manager (the "Manager"), or of their parent corporation, Thomson McKinnon Inc., or its other existing and future subsidiaries ("Affiliated Employees"). Thomson McKinnon Inc. is a holding company which through its subsidiaries is engaged primarily in providing customers with a wide variety of financial services in connection with securities, commodities, options, corporate and public finance and related fields.

Applicant states that the contigent deferred sales charge is calculated on the basis of Applicant's current net asset value and the aggregate purchase payments (including purchase payments allocable to exchanges from other series) of the particular series from which shares are being redeedmed. Applicant states that, in determining the applicability of a contingent deferred sales charge to each redemption, the amount which represents an increase in the net asset value of the investor's shares in the series from which the redemption is being made above the amount of the total payment for the purchase of shares in such series within the last five years will be redeemed first. In the event the redemption amount exceeds such increase in value, the next portion of the amount redeemed will be the amount which represents the net asset value of the investor's shares purchased more than five years prior to the redemption and/or purchased through reinvestment of dividends or distributions. Applicant states that any portion of the amount redeemed which exceeds an amount which represents both such increase in value and the value of shares purchased through reinvestment of dividends or distributions will be subject to a contingent deferred sales charge. Applicant states that where a contingent deferred sales charge is imposed, the amount of the charge will depend on the number of years since the investor made the purchase payment from which an amount is redeemed, according to the following table:

Year since purchase payment made	Contingent deferred sales charge as a percentage of amount redeemed (percent)
First	5.0
Second	4.0
Third	3.0
Fourth	2.0
Fifth	2.0
Sixth	None.

Applicant states that the amount of the contingent deferred sales charge is calculated by determining the date on which the purchase payment which is the source of the redemption was made, and applying the appropriate percentage to the amount of the redemption subject to the charge. Applicant states that, in determining the rate of any applicable contingent deferred sales charge, it will be assumed that a redemption is made of shares held by the investor for the longest period of time within the applicable five-year period. Applicant asserts that this will result in any such charge being imposed at the lowest possible rate.

According to Applicant, the holding period for calculation of the contingent charge payable on redemptions of shares acquired in exchange transactions will equal the aggregate time that an investor has maintained an investment in any series of Applicant. Also, in computing the charge payable on such redemptions, the purchase date will be the date of acquisition of the exchanged shares.

Applicant asserts that imposition of the contingent deferred sales charge is fair and is in the best interests of shareholders. Applicant submits that the proposed contingent deferred sales charge permits shareholders to have the advantages of greater investment dollars working for them from the time of the purchase of Applicant's shares. Applicant asserts that because the contingent deferred sales charge applies only to redemptions of amounts representing purchase payments, it does not apply to increases in the value of a shareholder's account through increases in net asset value per share, or to amounts representing reinvestment of distributions.

Applicant proposes to finance its own distribution expenses pursuant to a distribution plan adopted pursuant to Rule 12b/1 under the Act. The proposed distribution plan requires Applicant to pay an annual fee to the Distributor for expenses related to the offering of Applicant's shares. Applicant states that its distribution fee is equal on an annual basis for each series of Applicant to 1.0% of the lesser of (1) aggregate gross sales of the shares of such series since inception of the series (excluding reinvestments of dividend or capital gain distributions and sales of shares that have been exchanged for shares of another series, but including sales of shares acquired by exchanges of shares of another series), less the aggregate dollar amount of redemptions since inception upon which a contingent deferred sales charge has been imposed or with respect to which such charge has been waived, or (2) the average daily net assets of such series.

Applicant asserts that where amounts attributable to purchase payments are redeemed (and thus no longer contribute to the annual distribution charge) it is fair (1) to impose on the withdrawing shareholder a lump sum payment reflecting approximately the amount of distribution expense which has not been recovered through payments pursuant to Applicant's 12b-1 plan and (2) to remove the assets on which the contigent deferred sales charge was imposed from the base amount on which Applicant's distribution fee is calculated.

Applicant asserts that imposition of the proposed contingent deferred sales charge will in no way restrict a shareholder from receiving his proportionate share of Applicant's current net assets, but merely defers deduction of a sales charge and makes it contingent upon an event that may never occur. Accordingly, Applicant requests an exemption from the provisions of Section 2(a)(32) of the Act

to the extent necessary to permit implementation of the proposed contingent deferred sales charge.

Applicant asserts that the contingent deferred sales charge is paid to the Distributor to reimburse it solely for expenses related to offering Applicant's shares for sale to the public, and, therefore, the contingent deferred sales charge is within the Section 2(a)(35) definition of "sales load," but for the timing of the imposition of the charge. Applicant states that the deferral of the sales charge, and its contingency upon the occurrence of an event that might not occur, does not change the basic nature of the charge, which is in every respect a sales charge. Accordingly, Applicant requests an exemption from the provisions of Section 2(a)(35) of the Act, to the extent necessary to permit implementation of the proposed charge.

Applicant states that when a redemption of Applicant's shares occurs, the price of the shares on redemption will be based on current net asset value. However, the contingent deferred sales charge will be deducted at the time of redemption in arriving at the shareholder's proportionate redemption proceeds. Accordingly, Applicant requests an exemption from the provisions of Section 22(c) of the Act and Rule 22c–1 thereunder to the extent necessary to permit implementation of the proposed contingent deferred sales charge.

Applicant requests an exemption from the provisions of Section 22(d) of the Act and Rule 22d–1 thereunder to permit waiver of the contingent deferred sales charge under the circumstances described above (except where waiver of the charge is permitted by Rule 22d–1(i) under the Act). Applicant asserts that, in each situation where the charge would be waived, the redeeming shareholder is a member of a class of shareholders that is favored under the tax laws or the securities laws or for which Applicant would not incur distribution expense under its 12b–1 plan. Applicant further asserts that the proposed waiver of the contingent deferred sales charge is fair to remaining shareholders because Applicant will not be charged with any revenue lost as a result of the waiver. Applicant states that, as with redemptions subject to the contingent deferred sales charge, redemptions subject to the waiver are removed from the base of aggregate purchase payments for purposes of calculating Applicant's distribution fee.

Applicant asserts that waiver of the contingent deferred sales charge in the extraordinary circumstances of death or total disability of the investor is justified on basic considerations of fairness. Applicant further asserts that waiving the charge on certain distributions from a qualified retirement plan is fully consistent with the policies reflected in (1) the Code provisions granting favored tax treatment to accumulations under such plans and imposing additional taxes on early distributions from IRA's and other plans, and (2) Rules 22d–1(a)(3) and 22d–1(b)(3) under the Act, which permit quantity discounts to plans qualified under Code Section 401, and Rule 22d–1(f) under the Act, which permits variations in the sales load for qualified and non-qualified employee benefit plans (which need not be based on realization of economies of scale where the plans are qualified under Section 401 of the Code).

Applicant asserts that waiving the charge with respect to redemptions by trustees, officers and employees of Applicant and Affiliated Employees is justified because of the absence of selling expenses associated with sales to such persons. Applicant further asserts that, as to Applicant's Trustees and officers and employees of Applicant or of the Distributor and Manager, such waivers are fully consistent with Rule 22d–1(i) under the Act. Rule 22d–1(i) generally permits reduction or elimination of sales loads in connection with sales of a registered investment company's shares to directors, officers and employees of the company, its investment adviser and principal underwriter.

Applicant argues that waiver of the deferred sales charge on redemptions of Applicant's shares by employees of Thomson McKinnon Inc. and its existing and future subsidiaries could be permitted by Rule 22d–1(f) under the Act because such employees are participants in an employee benefit plan (the "Plan") that offers economies of scale in sales effort and expense and would be described in Applicant's prospectus. Rule 22d–1(f) under the Act permits elimination of sales charges upon a sale of shares pursuant to a uniform offer described in the prospectus and made to employee benefit plans not qualified under Code Section 401 provided such non-qualified plans satisfy uniform criteria relating to the realization of economies of scale in sales effort and sales related expenses. However, it is not clear that waiver of the deferred sales charge on redemptions by employees of Thomson McKinnon Inc. would meet the "uniform offer" requirement of Rule 22d–1(f).

Applicant states that employees of Thomson McKinnon Inc. can be expected to have a basic understanding of the nature of an investment in a mutual fund as well as general familiarity with, and a significant degree of loyalty to, Applicant. Applicant submits that the relationship between the Distributor and Manager with the other Thomson McKinnon Inc. corporate affiliates is the basis for a unique relationship that can be expected to result in economies in sales effort and sales related expense that justifies elimination of all contingent deferred sales charges on Applicant's shares purchased by participants in the Plan without discrimination against other employee benefit plans or other purchasers of Applicant's shares.

Notice is further given that any interested person wishing to request a hearing on the application may, not later than April 9, 1984, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon Applicant at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the application will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary

BILLING CODE 8010–01–M

[Release No. 13824; 811–2332]

VIP Growth Fund, Inc.; Proposal To Terminate Registration Pursuant to Section 8(f) of the Investment Company Act of 1940

March 15, 1984.

Notice is hereby Given that the Commission proposes, pursuant to Section 8(f) of the Investment Company Act of 1940 ("Act") to declare by order on its own motion that VIP Growth Fund, Inc. ("VIP"), Warfside Building San Francisco, California 94109 registered under the Act as an open-end, diversified management investment company, ceased to be an investment company required to be registered under the Act.

Information contained in the files of the Commission indicates that VIP, a corporation organized under the laws of

California, registered under the Act on November 13, 1972, and subsequently became inactive.

Section 8(f) provides, in pertinent part, that whenever the Commission on its own motion finds that a registered investment company has ceased to be an investment company, it shall so declare by order.

Notice is further given that any interested person wishing to request a hearing on the proposal may, not later than April 9, 1984, at 5:30 p.m., do so by submitting a written request setting forth the nature of his/her interest, the reasons for the request, and the specific issues of fact or law that are disputed, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of the request should be served personally or by mail upon VIP at the address stated above. Proof of service (by affidavit or, in the case of an attorney-at-law, by certificate) shall be filed with the request. After said date, an order disposing of the proposal will be issued unless the Commission orders a hearing upon request or upon its own motion.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010-01-M

[Release No. 20754; SR-CBOE-80-16]

Self-Regulatory Organization; Chicago Board Options Exchange, Inc.; Order Extending Partial Approval of Proposed Rule Change on a Summary and Temporary Basis

March 14, 1984.

I. Introduction

On June 9, 1980, the Chicago Board Options Exchange, Incorporated ("CBOE"), LaSalle at Van Buren, Chicago, IL 60605, filed with the Commission, pursuant to the Securities Exchange Act of 1934 (the "Act") and Rule 19b-4 thereunder, copies of a proposed rule change to modify its operations and procedures relating to options market makers. Among other things, the proposed rule change created a single class of market makers by eliminating supplemental appointments, increased the number of options classes in which market makers were permitted to have appointments, and established a new Exchange committee responsible for evaluating the performance of and taking disciplinary action against market makers. The proposed rule change also prescribed minimum requirements concerning the extent to which a market maker's trading activity must be conducted in person.[1] The rule change was approved by the Commission on February 12, 1981,[2] but the 1981 approval order was vacated on April 5, 1982, by the United States Court of Appeals for the Seventh Circuit in *Clement* v. *Securities and Exchange Commission,* an action challenging the minimum requirement for in-person market maker transactions, and the matter was remanded to the Commission.[3]

On May 11, 1982, with extensions thereafter effective until February 10, 1984, the Commission reviewed the rule filing and summarily and temporarily approved those portions of the proposed rule change not addressed in *Clement.*[4] During this interval, the Commission awaited certain amendments to the proposal and additional information from CBOE.[5] The Commission also solicited and evaluated public comment upon the proposed rule change.[6]

Further information has been received from the CBOE concerning the impact of CBOE's previous in-person requirement prior to that requirement's elimination by *Clement* v. *Securities and Exchange Commission.*[7] The Commission expects to act soon with respect to the proposed in-person rule. In the interim, it will be necessary for the Commission to extend for an additional 30 days its summary and temporary approval of those portions of the proposed rule change not at issue in *Clement.*[8]

Copies of the original submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the CBOE.

It is therefore ordered, that the proposed rule change referenced above, and to the extent indicated above, be, and it hereby is, approved until April 13, 1984.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[5] CBOE filed a substantive amendment to the proposed rule change on October 19, 1982. *See* Securities Exchange Act Release No. 19203 (November 1, 1982), 47 FR 50790 (1982). The Commission also received a letter from CBOE requesting approval of its proposed "in-person" rule on a pilot basis. *See* letter of May 10, 1983, from Anne Taylor, Secretary and Associate General Counsel, CBOE, to Richard Chase, Division of Market Regulation, Securities and Exchange Commission. File No. SR-CBOE-80-16.

[6] The public comments received since the beginning of November 1982 are discussed in Securities Exchange Act Release Nos. 19386 (December 30, 1982), 48 FR 915 (1983); 19641 (March 29, 1983), 48 FR 14795 (1983); and 20082 (August 12, 1983), 48 FR 37755 (1983), and are available for public inspection in File No. SR-CBOE-80-16. A further letter from CBOE, noted in the preceding footnote, is discussed in Securities Exchange Act Release No. 19923 (June 28, 1983), 48 FR 31133 (1983). Further letters are discussed below.

[7] *See* letter of Anne Taylor, Secretary and Associate General Counsel, CBOE, to Kevin Fogarty, Division of Market Regulation, Securities and Exchange Commission, September 22, 1983. The Chicago Board of Trade also submitted its interpretation of the data provided in this CBOE letter. *See* letter of January 10, 1984, from Thomas R. Donovan, President, Chicago Board of Trade, to George A. Fitzsimmons, Secretary. File No. SR-CBOE-80-16.

[8] CBOE has consented to this extension of partial approval.

National Association of Securities Dealers, Inc. ("NASD") 1735 K Street, NW., Washington, D.C. 20006, filed with the Securities and Exchange Commission the proposed rule change as described herein. Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 19382, December 29, 1982) and by publication in the **Federal Register** (48 FR 1137, January 10, 1983). One comment was received. The NASD filed an amendment to the proposed rule change on August 18, 1983. The Commission is publishing this notice to solicit comments on the amendment to the proposed rule change from interested persons.

The proposed rule change would amend Part I of Schedule C of the NASD's By-Laws to adopt standards and procedures that NASD staff members will follow when discussing membership with an applicant ("pre-membership interview" or "Interview"). The amendment to the proposed rule change modifies some of the procedures relating to these Interviews. In general, the proposal provides that once an applicant has been interviewed by the NASD's District Office, the District Office will make a preliminary determination and advise the applicant in writing of whether it may become an NASD member, and, if so what restrictions would be imposed on its membership. Paragraph (2)(c) was amended to provide that if the applicant does not consent to these restrictions, it may request the District Committee to make a *de novo* determination regarding what, if any, restrictions will be imposed on the member. Similarly, paragraph (2)(f) provides for *de novo* consideration by the Board of Governors of the restrictions on membership imposed by the District Committee and/or the District Office. Paragraph (3) provides for the removal of restrictions imposed as a result of the Interview. Two sections were added to paragraph (3) to indicate that modifications of restrictions are subject to review by the Board of Governors and by the Commission and to clarify that the NASD and the applicant must execute a new agreement whenever the restrictions are modified.

In order to assist the Commission in determining whether to approve the proposed rule change or institute proceedings to determine whether the proposed rule change should be disapproved, interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the **Federal Register.** Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–NASD–82–24.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying at the Commission's Public Reference Room. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the NASD.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

George A. Fitzsimmons,

Secretary.

BILLING CODE 8010–01–M

[Release No. 20756; File No. SR–OCC–84–2]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of a Proposed Rule Change by the Options Clearing Corp.

March 15, 1984.

The Options Clearing Corporation ("OCC") on February 18, 1984, submitted a proposed rule change to the Commission pursuant to Rule 19b-4 under the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), that amends Interpretation and Policy No. 2 OCC Rule 604 relating to the maximum allowable amounts of letters of credit from non-U.S. institutions ("foreign LC's") that clearing members may pledge for OCC margin purposes. Under the proposal, OCC will calculate each clearing member's maximum allowable amount of foreign LC's on the basis of the member's aggregate OCC margin deposit, rather than on its OCC margin requirement.[1]

[1] Previously, the Interpretation and Policy provided that no more than 50% of a clearing member's margin requirement at any time could be met by foreign LC's in the aggregate and no more than 20% could be met by LC's issued by a single foreign institution. The proposal does not change the Interpretation and Policy's applicable percentages.

OCC believes that its clearing members will benefit from the proposal in several ways. First, clearing members will be able to exercise greater control over their allowable amount of foreign LC's by maintaining a stable margin deposit. Second, clearing members no longer will need to monitor constantly their foreign LC level, which changed daily because of fluctuations in their margin requirements, or to amend frequently their foreign letter of credit agreements. Third, the proposal conforms with clearing members' current practices. Most clearing members keep excess margin deposits to allow for fluctuating margin requirements.

OCC also believes that it will benefit from the proposal. The proposal should reduce OCC's unnecessary costs and administrative burdens incurred in monitoring the foreign LC program. In addition, the proposal should encourage clearing members to maintain higher OCC margin deposits of all types, thereby enhancing OCC's financial safeguarding systems.

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Securities Exchange Act of 1934 and Rule 19b-4 thereunder. At any item within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate the proposed rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the submission within twenty-one days from the date of publication in the **Federal Register.** Persons desiring to make a written submission should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR–OCC–84–2.

Copies of the submission, with accompanying exhibits, and of all written comments will be available for public inspection at the Securities and Exchange Commission's Public Reference Room, 450 Fifth Street, NW., Washington, D.C. Copies of the filing will also be available at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 84-7604 Filed 3-20-84; 8:45 am]

BILLING CODE 8010-01-M

[Release No. 20757; File No. SR-PSE-84-4]

Self-Regulatory Organizations; Filing and Immediate Effectiveness of Proposed Rule Change by Pacific Stock Exchange, Inc.

March 15, 1984.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on March 1, 1984, the Pacific Stock Exchange, Inc. ("PSE") filed with the Securities and Exchange Commission the proposed rule change as described herein. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

The PSE proposes to reduce the fee which the PSE charges its affected member firms for the direct costs of the computer terminal equipment for the PSE's on-line automated options trade check system.[1] The Exchange has noted in its filing that the proposed rule change is intended to permit the Exchange to pass on to its members the benefits of the reduced costs resulting from its acquisition of different data processing equipment. The proposed rule change reflects the reduction in the Exchange's direct costs from $130 to approximately $70 per terminal per month. The PSE states that the proposed rule change is consistent with Section 6(b)(4) of the Act in that the Exchange has provided for the equitable allocation of reasonable fees and charges among its members.

The foregoing change has become effective, pursuant to Section 19(b)(3)(A) of the Act and subparagraph (e) of Rule 19b-4 under the Act. At any time within 60 days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

Interested persons are invited to submit written data, views and arguments concerning the submission within 21 days after the date of publication in the Federal Register. Persons desiring to make written comments should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, 450 5th Street, NW., Washington, D.C. 20549. Reference should be made to File No. SR-PSE-84-4.

Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change which are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those which may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Room, 450 5th Street, NW., Washington, D.C. Copies of the filing and of any subsequent amendments also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization.

For the Commission, by the Division of Market Regulation pursuant to delegated authority.

George A. Fitzsimmons,

Secretary.

[FR Doc. 84-7608 Filed 3-20-84; 8:45 am]

BILLING CODE 8010-01-M

[1] The Commission approved the adoption of the PSE's on-line automated options trade check system and its plan to charge each affected member firm for the direct costs of the required computer terminal equipment (SR-PSE-83-13) on August 6, 1983 (Securities Exchange Act No. 20154, 48 FR 41255 September 14, 1983).

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2121]

Texas; Declaration of Disaster Loan Area

Harris County and the adjacent Counties of Brazoria, Chambers, Fort Bend, Galveston, Liberty, Montgomery and Waller in the State of Texas constitute a disaster area because of damage caused by below freezing temperatures on December 22-29, 1983. Applications for loans for physical damage may be filed until the close of business on May 14, 1984, and for economic injury until the close of business on December 17, 1984, at the address listed below: U.S. Small Business Administration, 2525 Murworth, Suite 112, Houston, Texas 77054, or other locally announced locations.

Interested rates for this disaster are:

	Percent
Homeowners with credit available elsewhere	12.500
Homeowners without credit available elsewhere	6.250

VETERANS ADMINISTRATION

Career Development Committee; Meeting

The Veterans Administration gives notice under the provisions of Public Law 92-463 that a meeting of the Career Development Committee, authorized by 38 U.S.C. 4101, will be held in the Caucus Room of the Georgetown Hotel, 2121 P Street, NW., Washington, DC 20037, April 11 through 13, 1984 at 8:30 a.m. The meeting will be for the purpose of scientific review of applications for appointment to the Career Development Program in the Veterans Administration. The committee advises the Director, Medical Research Service on selection and appointment of Associate Investigators, Research Associates, Clinical Investigators, Medical Investigators, Senior Medical Investigators and William S. Middleton Award Nominees.

The meeting will be open to the public up to the seating capacity of the room from 8:30 a.m. to 9 a.m. to discuss the general status of the program. Because of the limited seating capacity of the room, those who plan to attend should contact Mr. David D. Thomas, Executive Secretary of the Career Development Committee (151J), Veterans Administration Central Office, Washington, DC 20420 (Phone 202-389-2317) prior to April 4, 1984.

The meeting will be closed from 9 a.m. to 5 p.m. on April 11 through 13 for consideration of individual applications for positions in the Career Development Program. This necessarily requires examination of personnel files and discussion and evaluation of the qualifications, competence, and potential of the several candidates, disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Accordingly, closure of this portion of the meeting is permitted by section 10(d) of the Federal Advisory Committee Act, Public Law 92-463 as amended, in accordance with subsection (c)(6), 5 U.S.C. 552b.

Minutes of the meeting and rosters of the committee members may be obtained from Mr. David D. Thomas, Chief, Career Development Program, Medical Research Service (151J), Veterans Administration, Washington, DC 20420, (Phone 202-389-2317).

Dated: March 13, 1984.

Rosa Maria Fontanez,

Committee Management Officer.

BILLING CODE 8320-01-M

St. Cloud, Minnesota—120-Bed Nursing Home Care Unit; Finding of No Significant Impact

The Veterans Administration (VA) has assessed the potential environmental impacts that may occur as a result of the development of a 120-Bed Nursing Home Care Unit (NHCU) at the VA Medical Center in St. Cloud, Minnesota. The Assessment found that there are no anticipated long-term, adverse impacts associated with the development and subsequent operation of the proposed NHCU and, therefore, the VA concludes a Finding of No Significant Impact.

The proposed project is a single level, freestanding structure of approximately 43,500 gross square feet. The new construction would be connected to existing Building No. 51 through a corridor.

There are no identified long-term impacts associated with the project, but several temporary impacts may occur as a result of the construction process. These temporary impacts include: air pollution (dust and fumes), construction noise, and solid waste generation. The proper planning and implementation of the project will mitigate potential impacts on land use, vegetation, and cultural resources.

Construction related impacts will be mitigated through the application of the best available engineering techniques and construction specifications. The project will be in compliance with all applicable Federal, State, and local environmental regulations during construction and subsequent operation.

The significance of the identified impacts has been evaluated relative to considerations of both context and intensity as defined by the Council on Environmental Quality, (40 CFR 1508.27).

An Environmental Assessment has been perfomred in accordance with the requirements of the National Environmental Policy Act Regulations, §§ 1501.3 and 1508.9. A "Finding of No Significant Impact" has been reached based upon the information presented in this assessment.

The assessment is being placed for public examination at the Veterans Administration, Washington, D.C. Persons wishing to examine a copy of the document may do so at the following office: Mr. William F. Sullivan, Director, Office of Environmental Affairs (088C), Room 423, Veterans Administration, 811 Vermont Avenue, NW., Washington, D.C. 20420, (202) 389–3316. Questions or requests for single copies of the Environmental Assessment may be addressed to the above office.

Dated: March 14, 1984.

By direction of the Administrator:

Everett Alvarez, Jr.,

Deputy Administrator.

[FR Doc. 84–7546 Filed 3–20–84; 8:45 am]

BILLING CODE 8320–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RE84–1–000]

Central Illinois Public Service Co.; Application for Exemption

March 16, 1984.

Take notice that Central Illinois Public Service Company (CIPS) filed an application on February 13, 1984 for exemption from certain requirements of Part 290 of the Federal Energy Regulatory Commission's (FERC) regulations concerning collection and reporting of cost of service information under Section 133 of the Public Utility Regulatory Policies Act (PURPA), Order No. 48 (44 FR 58687, October 11, 1979). Exemption is sought from the requirement to file on or prior to June 30, 1984 and biennially thereafter, information on the costs of providing electric service as specified in Subparts B, C, D, and E of Part 290.

In its application for exemption CIPS states, in part, that it should not be required to file the specified data for the following reasons:

The data produced and submitted in compliance with Part 290 are for an unadjusted historical period and therefore unlikely to be useful in retail rate proceedings before the Illinois Commerce Commission (ICC) which requires numerous adjustments to historical test periods and authorizes use of both current and future test periods.

The ICC currently requires that CIPS, as part of the record in each CIPS retail rate proceeding, file both embedded/accounting cost of service studies and marginal cost of service studies in formats different from those specified in Part 290.

CIPS' current program of class load studies is more extensive than the load studies required by Part 290. The results of CIPS' ongoing research in class loads are provided to the ICC.

The ICC allows its staff and retail intervenors wide latitude to serve data requests upon CIPS for data and information that have not been provided in the initial rate case filings. These data requests are tailored to the specific issues of the rate cases, and are not satisfied by the scope of Part 290 information. CIPS is not aware of any instance where Part 290 data has reduced the number and scope of such data requests.

CIPS' costs to comply with Part 290 requirements for the 1982 filing were approximately $11,000. Since Part 290 information has not been utilized to any significant extent by either the ICC or intervenors in any past CIPS rate proceeding, CIPS submits that any incurrence of costs in connection with future Part 290 filings would be unjustified and that the requirements imposed by Part 290 constitute an unwarranted burden on CIPS.

The Illinois Commerce Commission supports the applicant's request for a blanket exemption from the filing requirements of PURPA Section 133 and 18 CFR Part 290 filing requirements for the June 30, 1984 filing and all subsequent filings.

Copies of the application for exemption are on file with FERC and are available for public inspection. FERC's regulations require that said utility also apply to any state regulatory authority having jurisdiction over it to have the application published in any official state publication in which electric rate change applications are usually noticed, and that the utility publish a summary of the application in newspapers of general circulation in the affected jurisdiction.

Any person desiring to present written views, arguments, or other comments on the application for exemption should file such information with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before 45 days following the date this notice is published in the **Federal Register**. Within that 45 day period, such person must also serve a copy of such comments on: Mr. Carl Wall, Vice President, Central Illinois Public Service Company, 607 East Adams Street, Springfield, Illinois 62701.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP84-253-000]

East Tennessee Natural Gas Co.; Request Under Blanket Authorization

March 16, 1984.

Take notice that on February 22, 1984, East Tennessee Natural Gas Company (East Tennessee), P.O. Box 10245, Knoxville, Tennessee 37919, filed in Docket No. CP84-253-000 a request pursuant to Section 157.205(b) of the Regulations under the Natural Gas Act (18 CFR 157.205(b)) that East Tennessee proposes to construct and operate two new delivery points for its existing customers, under authorization issued in Docket No. CP82-412-000 pursuant to section 7 of the Natural Gas Act, all as morefully set forth in the request on file with the Commission and open to public inspection.

Specifically, East Tennessee proposes to establish a new delivery point to Tennessee-Virginia Energy Corporation (Tenn-Va) located in Sullivan County, Tennessee, to serve the area of the Bristol-Kingsport-Johnson City (TriCity) airport and one delivery point to First Utility District of Maury County, Tennessee (The District) to serve the area along U.S. Highway 43, east of Mount Pleasant, Tennessee. East Tennessee states that Tenn-Va recently received authorization from the Tennessee Public Service Commission to serve Tri-City, an area which presently does not have gas service. East Tennessee further states that the new delivery point to the District would alleviate serious pressure problems encountered by the District in its service area along Highway 43. The proposed quantities of natural gas to be delivered at the new delivery points would be 27,283 Mcf and 27,754 Mcf, respectively, it is stated. All gas to be sold to Tenn-Va and The District through the proposed new delivery points would be within existing contract volumes and/or curtailment period quantity entitlements, it is explained. The estimated cost of each proposed new facility is $35,000 and would be paid from funds on hand, it is asserted.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. ES84-28-000]

El Paso Electric Co.; Amended Application

March 16, 1984.

Take notice that on March 7, 1984, El Paso Electric Company filed an amendment to its application with the Federal Energy Regulatory Commission (Commission) seeking authority, pursuant to Section 204 of the Federal Power Act, to issue and sell up to $80,000,000 principal amount of first mortgage bonds in addition to up to $50,000,000 principal amount of long-term promissory notes secured by second mortgage bonds via negotiated private placement. The proposed issuance of the notes and second mortgage bonds was previously noticed on February 6, 1984.

Any person desiring to be heard or to make any protest with reference to the application should file a motion to intervene or protest on or before April 2, 1984, with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 or 385.214). The application is on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP84-263-000]

Lone Star Gas Company, a Division of ENSERCH Corp.; Request Under Blanket Authorization

March 16, 1984.

Take notice that on February 27, 1984, Lone Star Gas Company a Division of ENSERCH Corporation (Lone Star), 301 South Harwood Street, Dallas, Texas 75201, filed in Docket No. CP84-263-000 a request pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Lone Star proposes the construction and operation of a sales tap and appurtenant facilities under the authorization issued in Docket No. CP83-59-000, as amended in Docket No. CP83-59-002, pursuant to section 7 of the Natural Gas Act, to provide service to Sun Production Company (Sun), a new commercial customer in Murray County, Oklahoma, all as more fully set forth in the request on file with the Commission and open to public inspection.

Lone Star proposes to sell up to 24,000 Mcf of natural gas on an annual basis to Sun. This service would be provided through the construction of a new sales tap and metering facility on Line GD1. It is stated that Sun would purchase natural gas at Lone Star's commercial rate, which is approved by the Oklahoma Corporation Commission.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to Section 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. CP84-275-000]

Texas Gas Transmission Corp.; Application

March 16, 1984.

Take notice that on March 1, 1984, Texas Gas Transmission Corporation (Applicant), P.O. Box 1160, Owensboro, Kentucky 42302, filed in Docket No. CP84-275-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale of natural gas to the City of Morgan City, Louisiana (Morgan City), for a period of two years and authorizing the construction and operation of facilities to accomplish such sale, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant is requesting authorization with pregranted abandonment authorization to serve Morgan City up to a maximum of 6,500 Mcf of natural gas per day from its general system supply, with an annual maximum of 650,000 Mcf, for residential and commercial service. It is stated that the sale would be on a firm basis but would be subject to curtailment in the event of a gas supply shortage on Applicant's system. It is further stated that the service would be performed pursuant to Applicant's Rate Schedule G-SL which terms are asserted to be identical to those under Applicant's currently effective Rate Schedule G. The one exception is that the service would be fully curtailed by Applicant prior to the curtailment of any other existing sales customer, it is stated. Rate Schedule G-SL would describe Applicant's general service in its Southern Louisiana zone; initial rates under this rate schedule would be $3.48 per Mcf for the monthly demand rate and 311.71 cents per Mcf for the commodity rate. Applicant asserts that the G-SL rates were determined in the settlement data for Docket No. RP82-74 approved by Commission letter order dated June 20, 1983.

Applicant additionally proposes to construct and operate a sales meter station and related facilities at the point of interconnection of Applicant's Eunice-Thibodaux 20-inch and 26-inch pipeline facilities and the facilities of Morgan City in St. Mary Parish, Louisiana. The total estimated cost of the proposed facilities is $103,400.00 which would be reimbursed to Applicant by Morgan City, it is asserted.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 6, 1984, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 84-7580 Filed 3-20-84; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP84-213-000]

United Gas Pipe Line Co.; Application

March 16, 1984.

Take notice that on January 27, 1984, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, filed in Docket No. CP84-213-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing an interruptible sale of natural gas to an existing on-system, direct industrial customer, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

United requests authorization in Docket No. CP84-213-000 to make deliveries for interruptible sales of natural gas to Shell Chemical Company (Shell), an existing on-system, direct industrial customer located near LeMoyne, Alabama. Specifically, United proposes to sell up to 2,000 Mcf of gas per day above the volumes under its existing sales agreement with Shell. United further states that it intends to offer this service to Shell only on such days as its supplies of natural gas exceed the demand of its customers, for firm service, taking into account storage volumes and the requirements for storage injection. It is indicated that the proposed sale would be made under United's Rate Schedule IRS 82-109, which provides Shell to pay United the sum of 40 cents per Mcf plus the weighted average cost of gas per Mcf in United's system, calculated according to the terms and conditions of Schedule S-82.

Any person desiring to be heard or to make any protest with reference to said application should on or before April 6, 1984, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no motions to intervene are filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If motions for leave to intervene are timely filed or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be

unnecessary for United to appear or be represented at the hearings.

BILLING CODE 6717-01-M

[Project No. 6284-001]

Washington Electric Cooperative; Surrender of Preliminary Permit

March 15, 1984.

Take notice that the Washington Electric Cooperative, Permittee for the proposed Peak Shaver No. 1 Project No. 6284, requested by letter dated February 2, 1984, that its preliminary permit be surrendered. The preliminary permit was issued on September 16, 1982, and would have expired on September 30, 1984. The Permittee has decided that because of environmental and economic concerns it would not be feasible to pursue the project.

The surrender of the preliminary permit for Project No. 6284 will become effective thirty days from the date of issuance of this notice.

Kenneth F. Plumb,

Secretary.

Western Hydro Electric, Inc.; Surrender of Exemption From Licensing

March 15, 1984.

Take notice that the Western Hydro Electric, Inc. ("WHE") Exemptee for the Smith Creek Project No. 6086, has requested that its exemption be terminated. The exemption for Project No. 6086 was issued on December 23, 1982. The project would have been located on Smith Creek in Lewis County, Washington. WHE states in its request that project construction has not commenced.

WHE filed the request on January 12, 1984. The surrender of the exemption for Project No. 6086 is deemed accepted as of January 12, 1984, and effective as of 30 days after the date of this notice.

Kenneth F. Plumb,

Secretary.

[FR Doc. 84-7583 Filed 3-20-84; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RE84-3-000]

Alabama Power Co.; Application for Exemption

March 16, 1984.

Take notice that Alabama Power Company (APCO) filed an application on January 24, 1984, for exemption from certain requirements of Part 290 of the Federal Energy Regulatory Commission's (FERC) regulations concerning collection and reporting of cost of service information under section 133 of the Public Utility Regulatory Policies Act (PURPA), Order No. 48 (44 FR 58687, October 11, 1979). Exemption is sought from the requirement to file on or prior to June 30, 1984 and biennially thereafter, information on the costs of providing electric service as specified in Subparts B, C, D, and E of Part 290. In addition, APCO requests a waiver of the requirement that an application for exemption shall be filed "no less than 18 months prior to the time the information would otherwise be required" (Section 290.601(a)).

In its application for exemption APCO states, in part, that it should not be required to file the specified data for the following reasons:

Section 133 data is of limited value in retail rate proceedings in Alabama because the time frame for collecting and reporting such information is not based on rate case test periods. As a consequence, Section 133 data cannot be used in rate filings before the Alabama Public Service Commission.

The collection and publication of Section 133 data impose considerable expense upon APCO and, ultimately, the consumers.

APCO periodically provides various federal and state regulatory agencies with the following documents: FERC Form 1, FERC Form 12, SEC Form 10-K, monthly operating reports, annual reports, load forecasts, rate schedules, generation expansion plans, annual budgets and forecasts, jurisdictional separation studies, retail and wholesale rate filings, cost of service studies, appliance saturation studies and other information, which to a large extent duplicate the information required by Part 290 of the FERC rules implementing section 133 of PURPA.

Copies of the application exemption are on file with FERC and are available for public inspection. FERC's regulations require that said utility also apply to any state regulatory authority having jurisdiction over it to have the application published in any official state publication in which electric rate change applications are usually noticed, and that the utility publish a summary of the application in newspapers of general circulation in the affected jurisdiction.

Any person desiring to present written views, arguments, or other comments on the application for exemption should file such information with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before 45 days following the date this notice is published in the Federal Register. Within that 45 day period, such person must also serve a copy of such comments on: Mr. Elmer B. Harris, Alabama Power Company, 600 North 18th Street, P.O. Box 2641, Birmingham, Alabama 35291.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Project No 6166-001]

Banta Carbona Irrigation District; Surrender of Generic Exemption

March 15, 1984.

Take notice that Banta Carbona Irrigation District, Exemptee for the proposed Pumping Plant No. 6, Project No. 6166, has requested that its generic exemption be terminated. The exemption was noticed on May 5, 1982. The project would have been located on Banta Carbona Irrigation District's major water conveyance system in San Joaquin County, California. The Exemptee filed its request on February 6, 1984, and the surrender of the exemption for Project No. 6166 is deemed accepted as of February 6, 1984, and effective 30 days after the date of this notice.

Kenneth Plumb,

Secretary.

[FR Doc. 84-7573 Filed 3-20-84; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. ES84-32-000]

Cambridge Electric Light Co.; Application

March 16, 1984.

Take notice that on March 7, 1984, Cambridge Electric Light Company filed an application with the Federal Energy Regulatory Commission seeking authority, pursuant to Section 204 of the Federal Power Act, to issue not more than $15,000,000 on or before December 31, 1984, with maturities on or before December 31, 1985.

Any person desiring to be heard or make any protest with reference to the application should file a motion to intervene or protest on or before April 9, 1984, with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules

of Practice and Procedure (18 CFR 385.211 or 385.214). The application is on file with the Commission and available for public inspection.

Kenneth F. Plumb,

Secretary.

[FR Doc. 84-7574 Filed 3-20-84; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. CP84-259-000]

Columbia Gas Transmission Corp.; Request Under Blanket Authorization

March 14, 1984.

Take notice that on February 27, 1984, Columbia Gas Transmission Corporation (Columbia), P.O. Box 1273, Charleston, West Virginia 24325-1273, filed in Docket No. CP84-259-000 a request pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) that Columbia proposes to transport natural gas on behalf of Stratoflex. Inc. (Stratoflex), under the authorization issued in Docket No. CP83-76-000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Columbia proposes to transport for one year up to 215 million Btu equivalent of natural gas per day on behalf of Stratoflex. Columbia would receive gas from Energy Management, Inc. (EMI), at existing points of receipt in Ohio and redeliver to Columbia Gas of Ohio, Inc., for ultimate delivery to Stratoflex, it is explained. Stratoflex involve certain gas supplies released by Columbia. Columbia states these supplies are subject to the ceiling price provisions of sections 102, 103, 107 and 108 of the Natural Gas Policy Act of 1978.

Depending upon whether gathering facilities are involved, Columbia states that it would charge either (1) Columbia's average system-wide storage and transmission costs, exclusive of company-use and unaccounted-for gas, or (2) Columbia's average system-wide storage, transmission and gathering costs, exclusive of company-use and unaccounted-for gas. It is stated that the storage and transmission charge is currently 40.11 cents per dt equivalent and the storage, transmission and gathering charge is 44.93 cents per dt equivalent. In addition, Columbia proposes to retain 2.85 percent of the gas delivered to it for company-use and unaccounted-for gas.

Any person or the Commission's staff may, within 45 days after issuance of the instant notice by the Commission, file pursuant to Rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefor, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Kenneth F. Plumb,

Secretary.

[FR Doc. 84-7571 Filed 3-20-84; 8:45 am]

BILLING CODE 6717-01-M

Energy Information Administration

Publication of Alternative Fuel Price Ceilings and Incremental Price Threshold for High Cost Natural Gas

The Natural Gas Policy Act of 1978 (NGPA) (Pub. L. 95-621) signed into law on November 9, 1978, mandated a new framework for the regulation of most facets of the natural gas industry. In general, under title II of the NGPA, interstate natural gas pipeline companies are required to pass through certain portions of their acquisition costs for natural gas to industrial users in the form of a surcharge. The statute requires that the ultimate costs of gas to the industrial facility should not exceed the cost of the fuel oil which the facility could use as an alternative.

Pursuant to Title II of the NGPA, Section 204(e), the Energy Information Administration (EIA) herewith publishes for the Federal Energy Regulatory Commission (FERC) computed natural gas ceiling prices and the high cost gas incremental pricing threshold which are to be effective April 1, 1984. These prices are based on the prices of alternative fuels.

FOR FURTHER INFORMATION CONTACT: Leroy Brown, Jr., Energy Information Administration, 1000 Independence Avenue, SW., Room BE-034, Washington, D.C. 20585, Telephone: (202) 252-6077.

Section I

As required by FERC Order No. 50, computed prices are shown for the 48 contiguous States. The District of Columbia's ceiling is included with the ceiling for the State of Maryland. FERC, by an Interim Rule issued on March 2, 1981, in Docket No. RM79-21, revised the methodology for calculating the monthly alternative fuel price ceilings for State regions. Under the revised methodology, the applicable alternative fuel price ceiling published for each of the contiguous States shall be the lower of the alternative fuel price ceiling for the State or the alternative fuel price ceiling for the multistate region in which the State is located.

The price ceiling is expressed in dollars per million British Thermal Units (BTU's). The method used to determine the price ceilings is described in Section III.

State	Dollars per million BTU's
Alabama	4.02
Arizona [1]	4.10
Arkansas [1]	3.96
California	4.00
Colorado [2]	4.07
Connecticut	4.39
Delaware [1]	4.39
Florida	4.36
Georgia [1]	4.30
Idaho [2]	4.07
Illinois [1]	4.24
Indiana	3.97
Iowa [1]	4.18
Kansas	4.02
Kentucky [1]	4.24
Louisiana [1]	3.96
Maine [1]	4.45
Maryland [1]	4.39
Massachusetts	4.36
Michigan [1]	4.24
Minnesota	4.18
Mississippi [1]	4.30
Missouri [1]	4.18
Montana [2]	4.07
Nebraska	4.16
Nevada [1]	4.10
New Hampshire [1]	4.45
New Jersey	4.19
New Mexico	3.67
New York [1]	4.39
North Carolina [1]	4.30
North Dakota [1]	4.18
Ohio	4.22
Oklahoma [1]	3.96
Oregon [1]	4.10
Pennsylvania	4.39
Rhode Island [1]	4.45
South Carolina [1]	4.30
South Dakota [1]	4.18
Tennessee	4.27
Texas [1]	3.96
Utah [2]	4.07
Vermont [1]	4.45
Virginia [1]	4.30
Washington [1]	4.10
West Virginia [1]	4.24
Wisconsin [1]	4.24
Wyoming [2]	4.07

[1] Region based price as required by FERC Interim Rule, issued on March 2, 1981, in Docket No. RM-79-21.
[2] Region based price computed as the weighted average price of Regions E, F, G, and H.

Section II. Incremental Pricing Threshold for High Cost Natural Gas

The EIA has determined that the volume-weighted average price for No. 2 distillate fuel oil landed in the greater New York City Metropolitan area during January 1984 was $38.14 per barrel. In order to establish the incremental pricing threshold for high cost natural gas, as identified in the NGPA, Title II section 203 (a)(7), this price was multiplied by 1.3 and converted to its equivalent in millions of BTU's by dividing by 5.8. Therefore, the incremental pricing threshold for high

cost natural gas, effective April 1, 1984, is $8.55 per million BTU's.

Section III. Method Used to Compute Price Ceilings

The FERC, by Order No. 50, issued on September 29, 1979, in Docket No. RM79–21, established the basis for determining the price ceilings required by the NGPA. FERC also, by Order No. 167, issued in Docket No. RM81–27 on July 24, 1981, made permanent the rule that established that only the price paid for No. 6 high sulfur content residual fuel oil would be used to determine the price ceilings. In addition, the FERC, by Order No. 181, isued on October 6, 1981, in Docket No. RM81–28, established that price ceilings should be published for only the 48 contiguous States on a permanent basis.

A. Data Collected

The following data were required from all companies identified by the EIA as sellers of No. 6 high sulfur content (greater than 1 percent sulfur content by weight) residual fuel oil: for each selling price, the number of gallons sold to large industrial users in the months of November 1983, December 1983, and January 1984.[1] All reports of volume sold and price were identified by the State into which the oil was sold.

B. Method Used To Determine Alternative Price Ceilings

(1) *Calculation of Volume-Weighted Average Price.* The prices which will become effective April 1, 1984, (shown in Section I) are based on the reported price of No. 6 high sulfur content residual fuel oil, for each of the 48 contiguous States, for each of the 3 months, November 1983, December 1983, and January 1984. Reported prices for sales in November 1983 were adjusted by the percent change in the nationwide volume-weighted average price from November 1983 to January 1984. Prices for December 1983 were similarly adjusted by the percent change in the nationwide volume-weighted average price from December 1983 to January 1984. The volume-weighted 3-month average of the adjusted November 1983 and December 1983, and the reported January 1984 prices were then computed for each State.

(2) *Adjustment for Price Variation.* States were grouped into the regions identified by the FERC (see Section III.C.). Using the adjusted prices and associated volumes reported in a region during the 3-month period, the volume-weighted standard deviation of prices was calculated for each region. The volume-weighted 3-month average price (as calculated in Section III.B. (1) above) for each State was adjusted downward by two times this standard deviation for the region to form the adjusted weighted average price for the State.

(3) *Calculation of Ceiling Price.* The lowest selling price within the State was determined for each month of the 3-month period (after adjusting up or down by the percent change in oil prices at the national level as discussed in Section III.B. (1) above). The products of the adjusted low price for each month times the State's total reported sales volume for each month were summed over the 3-month period for each State and divided by the State's total sales volume during the 3 months to determine the State's average low price. The adjusted weighted average price (as calculated in Section III.B. (2)) was compared to this average low price, and the higher of the values was selected as the base for determining the alternative fuel price ceiling for each State. For those States which had no reported sales during one or more months of the 3-month period, the appropriate regional volume-weighted alternative fuel price was computed and used in combination with the available State data to calculate the State alternative fuel price ceiling base. The State's alternative fuel price ceiling base was compared to the alternative fuel price ceiling base for the multistate region in which the State is located and the lower of these two prices was selected as the final alternative fuel price ceiling base for the State. The appropriate lag adjustment factor (as discussed in Section III.B.4) was then applied to the alternative fuel price ceiling base. The alternative fuel price (expressed in dollars per gallon) was multiplied by 42 and divided by 6.3 to estimate the alternative fuel price ceiling for the State (expressed in dollars per million But's).

There were insufficient sales reported in Region G for the months of November, December 1983, and January 1984. The alternative fuel price ceilings for the States in Region G were determined by calculating the volume-weighted average price ceilings for Region E, Region F, Region G, and Region H.

(4) *Lag Adjustment.* The EIA has implemented a procedure to partially compensate for the two-month lag between the end of the month for which data are collected and the beginning of the month for which ceiling prices become effective. It was determined that *Platt's Oilgram Price Report* publication provides timely information relative to the subject. The prices found in *Platt's Oilgram Price Report* publication are given for each trading day in the form of high and low prices for No. 6 residual oil in 20 cities throughout the United States. The low posted prices for No. 6 residual oil in these cities were used to calculate a national and a regional lag adjustment factor. The national lag adjustment factor was obtained by calculating a weighted average price for No. 6 high sulfur residual fuel oil for the ten trading days ending March 14, 1984, and dividing that price by the corresponding weighted average price computed from prices published by Platt's for the month of January 1984. A regional lag adjustment factor was similarly calculated for four regions. These are: one for FERC Regions A and B combined; one for FERC Region C; one for FERC Regions D, E, and G combined; and one for FERC Regions F and H combined. The lower of the national or regional lag factor was then applied to the alternative fuel price ceiling for each State in a given region as calculated in Section III.B. (3).

Listing of States by Region

States were grouped by the FERC to form eight distinct regions as follows:

Region A	*Region B*
Connecticut	Delware
Maine	Maryland
Massachusetts	New Jersey
New Hampshire	New York
Rhode Island	Pennsylvania
Vermont	
Region C	*Region D*
Alabama	Illinois
Florida	Indiana
Georgia	Kentucky
Mississippi	Michigan
North Carolina	Ohio
South Carolina	West Virginia
Tennessee	Wisconsin
Virginia	
Region E	*Region F*
Iowa	Arkansas
Kansas	Louisiana
Missouri	New Mexico
Minnesota	Oklahoma
Nebraska	Texas
North Dakota	
South Dakota	
Region G	*Region H*
Colorado	Arizona
Idaho	California
Montana	Nevada
Utah	Oregon
Wyoming	Washington

Issued in Washington, D.C., March 16, 1984.

FARM CREDIT ADMINISTRATION

Federal Farm Credit Board; Meeting

SUMMARY: Notice is hereby given, pursuant to the Government in the Sunshine Act (5 U.S.C. § 522b(e)(3)), of the forthcoming regular meeting of the Federal Farm Credit Board scheduled to be held on the first Monday of April 1984, as specified in 12 CFR § 604.325(a).

DATES AND TIMES: The regular meeting of the Federal Farm Credit Board is scheduled to be held on April 2, 1984, 8:30 a.m. to 4:30 p.m.; April 3, 1984, 8:30 a.m. to 4:30 p.m.; and April 4, 1984, 8:30 a.m. to 12:00.

ADDRESS: Farm Credit Administration, Federal Board Room, 1501 Farm Credit Drive, McLean VA 22102–5090.

FOR FURTHER INFORMATION CONTACT: Kenneth J. Auberger, Secretary to the Federal Farm Credit Board, Farm Credit Administration, 1501 Farm Credit Drive, McLean VA 22102–5090 (703–883–4000).

SUPPLEMENTARY INFORMATION: Parts of this meeting of the Federal Farm Credit Board will be open to the public (limited space available), and parts of the meeting will be closed to the public. The matters to be considered at the meeting are:

Portions Open to the Public:
- Reports of Board Members
- Governors Report
- Economic Report
- Legislative Report
- Report of National Committees
- Other Subjects to be Determined.

Portions Closed to the Public:
- Executive Session(s)
- Agency Report to District Boards of Directors
- Office of Supervision Report
- Office of Examination Report.

Dated at Washington, DC, March 19, 1984.

Donald E. Wilkinson,

Governor.

BILLING CODE 6705-01-M

2

FEDERAL RESERVE SYSTEM

TIME AND DATE: Approximately 11:00 a.m., Monday, March 26, 1984, following a recess at the conclusion of the open meeting.

PLACE: 20th Street and Constitution Avenue, NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204.

Dated: March 16, 1984.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

3

FEDERAL RESERVE SYSTEM

TIME AND DATE: 9:30 a.m., Monday, March 26, 1984.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, D.C. 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Consideration of issues relating to risk on large dollar transfer systems.
2. Any items carried forward from a previously announced meeting.

Note.—This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452–3684 or by writing to: Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, D.C. 20551.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204.

Dated: March 16, 1984.

James McAfee,

Associate Secretary of the Board.

LEGAL SERVICES CORPORATION

Board of Directors Meeting

TIME AND DATE: It will commence at 10:00 a.m. and continue until all official business is completed; Friday, March 30, 1984.

PLACE: DeSoto Hilton, Pulaski Room, 15 East Liberty Street, Savannah, Georgia.

STATUS OF MEETINGS: Open [Portion of Meeting is to be closed to discuss personnel, personal, criminal, litigation, and investigatory matters under 45 CFR 1622.5(a), (d), (e), (f), and (h)].

MATTERS TO BE CONSIDERED:

1. Approval of Agenda
2. Approval of Minutes
   —February 6, 1984
3. Report from the President
   —Needs Study
   —New Developments
   —ACCA
   —IOLTA
   —Legal Clinics
   —Law School Clinics
4. Report from the Operations and Regulations Committee Meeting Including recommendation on Proposed Final Regulations
   —1609–Fee Generating cases
   —1620–Priorities in Allocation of Resources
5. Report from the Office of General Counsel
   —Proposed Final Regulation
   1612–Restrictions on Lobbying and Other Certain Activities
   —Proposed Regulations
   1614–Private Attorney Involvement
   1628–Recipient Fund Balance
6. Report from the Office of Field Services
   —Support Studies Update
7. Report from the Office of Government Relations
   —Congressional Hearings
   —GAO Investigation
   —Annual Report

CONTACT PERSON FOR MORE INFORMATION: LeaAnne Bernstein, Office of the President, (202) 272–4040.

DATE ISSUED: March 19, 1984.

Donald P. Bogard,

President.

NATIONAL CREDIT UNION ADMINISTRATION

Notice of Previously Held Emergency Meeting

TIME AND DATE: 1:55 p.m., Friday, February 17, 1984.

PLACE: 1776 G Street, NW., Washington, D.C., 6th Floor.

STATUS: Closed.

MATTER CONSIDERED:

1. Revocation of Charter.

The Board unanimously voted that the Agency business required that a meeting be held with less than seven days advance notice.

The Board voted to close the meeting under exemptions (8) and (9)(B). The General Counsel certified that the meeting could be closed under those exemptions.

FOR MORE INFORMATION CONTACT: Rosemary Brady, Secretary of the Board, telephone (202) 357–1100.

Rosemary Brady,

Secretary of the Board.

NUCLEAR REGULATORY COMMISSION

DATE: Week of March 19, 1984 (Revised) and the Week of March 26, 1984.

PLACE: Commissioners' Conference Room 1717 H Street, NW., Washington, D.C.

STATUS: Open and Closed.

MATTERS TO BE DISCUSSED:

Monday, March 19

10:00 a.m.
Status of Pending Investigation on Diablo Canyon (Open/Closed—Ex. 5 & 7) (As Announced)

Tuesday, March 20

10:00 a.m.
Briefing on Grand Gulf Technical Specification Requirements (Public Meeting) (Replaces Briefing on Steam Generator Generic Requirements)

Thursday, March 22

2:00 p.m.
Briefing on Public Comments on ANPR—Role of the Staff (Public Meeting) (As Announced)

Friday, March 23

10:00 a.m.
Discussion/Possible Vote on Full Power Operating License for LaSalle–2 (Open/Closed—Ex. 5) (Postponed from March 19)

11:30 a.m.
Affirmation/Discussion and Vote (Public Meeting) (New Item)
a. Request to Deny Renewal of Construction Permit for Seabrook 2 (Tentative)
b. Review of ALAB–724 (Tentative)
c. Earthquakes—Diablo Canyon (Tentative) (Postponed from March 16)

2:00 p.m.
Discussion of Pending Investigation—TMI (Closed—Ex. 5 & 7) (Title Change)

Week of March 26

Monday, March 26

11:00 a.m.
Status of Pending Investigation on Diablo Canyon (Closed—Ex. 5 & 7)

2:00 p.m.
Discussion/Possible Vote on Diablo Canyon Critically and Low Power Operation (Public Meeting)

Tuesday, March 27

10:00 a.m.
Briefing on Status of Utility and NRC Compliance with TMI Action Plan (Public Meeting) (Postponed from March 23)

2:00 p.m.
Discussion of the Terms "Important to Safety" and "Safety Related" (Public Meeting)

Friday, March 30

2:00 p.m.
Discussion/Possible Vote on Full Power Operating License for WPPSS–2 (Public Meeting)

ADDITIONAL INFORMATION: Affirmation of License Fees and Hydrogen Control scheduled for March 16, *postponed.*

TO VERIFY THE STATUS OF MEETINGS CALL: (Recording)—(202) 634–1498.

CONTACT PERSON FOR MORE INFORMATION: Walter Magee, (202) 6534–1410

Walter Magee,

Office of the Secretary.

PAROLE COMMISSION

Pursuant To The Government In The Sunshine Act Pub. L. 94–409 (5 U.S.C. Section 552b)

U.S. Parole Commission, National Commissioners (the Commissioners presently maintaining offices at Chevy Chase, Maryland, Headquarters.

TIME AND DATE: Thursday, March 22, 1984—2:00 p.m.

PLACE: Room 420–F, One North Park Building, 5550 Friendship Boulevard, Chevy Chase, Maryland 20815.

STATUS: Closed pursuant to a vote to be taken at the beginning of the meeting.

MATTERS TO BE CONSIDERED: Referrals from Regional Commissioners of approximately 4 cases in which inmates of Federal prisons have applied for parole or are contesting revocation of . parole or mandatory release.

CONTACT PERSON FOR MORE INFORMATION: Linda Wines Marble, Chief Case Analyst, National Appeals Board, United States Parole Commission, (301) 492–5987.

Dated: March 16, 1984.

Joseph A. Barry,

General Counsel, United States Parole Commission.

SECURITIES AND EXCHANGE COMMISSION

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENTS: (To be published)

STATUS: Closed meeting.

PLACE: 450 Fifth Street, NW., Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Friday, March 9, 1984.

CHANGE IN THE MEETING: Deletion.

The following item will not be considered at a closed meeting scheduled for Thursday, March 22, 1984, following the 2:30 p.m. open meeting.

Opinion.

Chairman Shad and Commissioners Treadway and Cox determined that Commission business required the above change and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: JoAnn Zuercher at (202) 272–2014.

George A. Fitzsimmons,

Secretary.

March 15, 1984.

TENNESSEE VALLEY AUTHORITY

Meeting No. 1327

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 49 FR 10220 (March 19, 1984)

CHANGE IN PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: The previously announced time and date of TVA Board meeting No. 1327 is changed to 1 p.m. (EST), March 19, 1984.

PREVIOUSLY ANNOUNCED PLACE OF MEETING: TVA West Tower Auditorium, 400 West Summit Hill Drive, Knoxville, Tennessee.

STATUS: Open.

ADDITIONAL MATTER: The following item is added to the previously announced agenda:

Action Items

Consideration of formal settlement agreement on uranium antitrust litigation.

CONTACT PERSON FOR MORE INFORMATION: Craven H. Crowell, Jr., Director of Information, or a member of his staff can respond to requests for information about this meeting. Call 615–632–8000, Knoxville, Tennessee. Information is also available at TVA's Washington Office, 202–245–0101.

SUPPLEMENTARY INFORMATION:

TVA Board Action

The TVA Board of Directors has found, the public interest not requiring otherwise, that TVA business requires that this meeting be called at the time set out above, that the subject matter of this meeting be changed to include the additional item shown above, and that no earlier announcement of this change was possible.

The members of the TVA Board voted to approve the above findings and their approvals are recorded below.

Approved: C. H. Dean, Jr., S. David Freeman.

Dated: March 15, 1984.

Part II

Department of Transportation

Federal Aviation Administration

14 CFR Part 23

Airworthiness Standards for Normal, Utility and Acrobatic Category Airplanes; Proposed Rule

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 23

[Docket No. 23826; Notice No. 84-2]

Airworthiness Standards; Normal, Utility and Acrobatic Category Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This notice proposes to amend the airworthiness requirements of Part 23 of the Federal Aviation Regulations (FAR) for single-engine, turbopropeller-powered airplanes to include whirl mode instability analysis and test as one of the dynamic evaluations associated with freedom from flutter, control reversal, and divergence. Single-engine, turbopropeller-powered airplanes are now being manufactured, and the FAA has determined such dynamic evaluations are necessary. The proposal, if adopted, will establish a level of safety for powerplant installations in single-engine, turbopropeller-powered airplanes consistent with that already established for multiengine, turbopropeller-powered airplanes.

DATES: Comments must be received on or before June 19, 1984.

ADDRESS: Comments on this notice may be mailed in duplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Docket No. 23826, 800 Independence Avenue, SW., Washington, D.C. 20591, or delivered in duplicate to: Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591. Comments delivered must be marked: Docket No. 23826. Comments may be inspected in Room 916 between 8:30 a.m. and 5:00 p.m. weekdays, except on Federal holidays.

FOR FURTHER INFORMATION CONTACT: William Olson, Regulations and Policy Office (ACE-110), Aircraft Certification Division, Central Region, Federal Aviation Administration, 601 East 12th Street, Kansas City, Missouri 64106; Telephone (816) 374-5688.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking further rulemaking action. Commenters wishing the FAA to acknowledge receipt of comments submitted in response to this notice must include a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 23826." The postcard will be date/time stamped and returned to the commenter. All comments received will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attn: Public Information Center, (APA-430), 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on the mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

Propeller whirl flutter is an aeroelastic instability that can occur in an airplane with a flexible engine installation. While such instability was predicted as early as 1938, it was not likely to be encountered in the low-speed range and low power airplanes of that era. Consequently, designers considered, for propeller-driven airplanes, the mass of the engine-propeller combination and the natural frequencies of its suspension, but not the elastic, inertia, and aerodynamic forces associated with the rotations and displacements of the plane of the propeller.

During 1959 and 1960, two fatal accidents involving four-engine, turbopropeller airplanes focused particular attention on the hazards associated with aeroelastic instabilities in transport category airplanes. Subsequently, the regulations for transport category airplanes were amended to include investigations of the various forces with the rotations in and out of the plane of the propeller in evaluating airplane freedom from flutter.

When turbopropeller engines were first installed on small, multiengine airplanes, special conditions were written to include a dynamic evaluation of whirl mode degrees of freedom. The analysis accounted for the aeroelastic stability of the plane of rotation of the propeller and significant elastic, inertial, and aerodynamic forces as well as powerplant (from propeller to airplane structure) stiffness and damping variations appropriate to the particular configuration. Then, in 1969, the rules for the type certification of small multiengine, turbopropeller-powered airplanes were amended to include these dynamic evaluations of the possible whirl mode aeroelastic instabilities in the flutter analysis to show freedom from flutter.

Turbopropeller installations are becoming increasingly common on single-engine airplanes and a turbopropeller, wherever installed on an airplane, can exhibit unstable oscillatory motion resulting from combined aerodynamic, inertial, and gyroscopic modes. Special conditions have been issued to cover these requirements for single-engine airplanes with turbopropeller engines. This Notice proposes to codify the dynamic stability evaluation now required for multiengine small airplanes to include single-engine, turbopropeller-powered airplanes, and, in so doing, end the practice of imposing this single-engine requirement by special condition.

Discussion of Proposal

Because of their unique characteristics, turbopropeller engine installations require special consideration. If damping and aerodynamic forces are not considered and the structure allows angular deflections, the spinning propeller could behave like a gyroscopic pendulum. As an example, if the system were released from an initial pitch deflection, the resulting angular velocity as the system springs back would induce a gyroscopic moment about the yaw axis. This moment would, in turn, cause the system to yaw, inducing a pitching moment, and so on. Thus, in a flexible system it is very significant that gyroscopic action of the rotating propeller couples with natural pitch and yaw modes, causing a precession motion about the axis of the undisturbed system. This gyroscopic action by itself cannot lead to a divergent type whirl mode instability because the net energy input to the system is zero. However, when the

resultant air stream is misaligned from the propeller rotation axis due to an angular displacement or a transverse linear velocity of the propeller axis, certain forces and moments are generated. As an example, if the axis is deflected in pitch, a vertical lift force together with a yawing moment is developed by the propeller which, for small deflections, is proportional to the pitch angle.

During the 1960's, several reciprocating engine-powered, single-engine airplane models were converted to turbopropeller power and were approved without a required whirl mode evaluation. These airplanes have been flying without adverse service experience with regard to flutter. More recently, however, an applicant conducted a whirl mode investigation and, based on the findings, stiffened the engine mount before certificating the airplane. This occurrence, and characteristics typical to turbopropeller engine installations, concerned the FAA because the applicable airworthiness standards did not envision the novel and unusual features associated with single-engine, turbopropeller installations. As a result, the FAA has subsequently issued special conditions to require a whirl mode evaluation on all new certification projects involving turbopropeller engine installations.

On a typical conversion from reciprocating to turbopropeller propulsion in a single-engine airplane, the lighter weight powerplant is usually moved forward to maintain the center of gravity between established limits. While the new longer engine mount could meet requirements for engine support, thrust, and torque loads, it could be more flexible than the structure it replaced, to the point where propeller whirl flutter could occur.

In like manner, the fuselage of a new single-engine tractor turbopropeller airplane could be slimmed in profile to accommodate a smaller frontal area engine, lightened in structure to support less engine weight, and made rigid enough to absorb engine thrust and torque loads, but, at the same time, be too flexible to prevent propeller whirl mode flutter.

Another area in which flutter evaluation is of concern to the FAA is the empennage of single-engine, pusher, turbopropeller-powered airplanes. Several new airplanes of this type are now under development and, in this configuration, empennage motion may be as significantly influenced by loads from the propeller as wing motion is influenced in multiengine, turbopropeller airplanes.

The present wording of § 23.629(e)(2) of the FAR, "Engine-propeller-nacelle stiffness" places undue emphasis on engine mount and propeller hub flexibility with regard to the whirl mode analysis. In actuality, the airplane normal modes include airplane flexibility as well as flexibilities associated with the powerplant installation. Also, the word "nacelle" in § 23.629(e)(2) implies stiffness in an engine enclosure whose main purpose is reducing drag. Accordingly, a change is proposed for § 23.629(e)(2) to resolve this ambiguity by referring to propeller, engine, engine mount, and airplane structure stiffness for the required dynamic evaluation.

Present § 23.629(e) limits whirl mode requirements to multiengine, turbopropeller-powered airplanes. Accordingly, it is proposed to amend § 23.629(e) to include all turopropeller powered airplanes.

Economic Evaluation

In compliance with Executive Order 12291, 46 FR 13193 (1981), the FAA has determined that this proposal, if adopted, will not be a "major rule" having an annual effect on the economy of $100 million or more because it only codifies dynamic stability requirements of § 23.629 that the FAA has been imposing by special conditions. It will not result in a major increase in costs or prices for consumers, individual, Federal, State, or local government agencies, or geographic regions; and it will not have significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Regulatory Flexibility Act

In addition to the reasons discussed earlier, the regulatory impact of showing compliance with this proposed requirement is minimal in that the whirl mode evaluation only has to be conducted once for a specific airplane model and the expected cost is less than that considered significant on an annual basis, and the final rule is not expected to have subsequent secondary or incidental effects on a substantial number of small entities.

Because this proposed rule, if adopted, will not have a significant impact on a substantial number of small entities, a Regulatory Flexibility Analysis will not be prepared.

List of Subjects in 14 CFR Part 23

Aircraft, Aviation safety, Air transportation, Tires.

PART 23—AIRWORTHINESS STANDARDS: NORMAL, UTILITY, AND ACROBATIC CATEGORY AIRPLANES

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend Part 23 of the Federal Aviation Regulations (14 CFR Part 23) as follows:

By revising § 23.629(e) introductory text and paragraph (e)(2) to read as follows:

§ 23.629 Flutter.

* * * * *

(e) For turbopropeller-powered airplanes, the dynamic evaluation must include—

* * * * *

(2) Propeller, engine, engine mount, and airplane structure stiffness and damping variations appropriate to the particular configuration.

* * * * *

(Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421 and 1423) and 49 U.S.C. 106(g) (Revised Pub. L 97-449, Jan. 12, 1983) and 14 CFR, Sec. 11.45)

Note.—For reasons discussed earlier in the preamble, the FAA has determined that this proposed requirement is not a major rule under provisions of Executive Order 12291, is not significant under the provisions of the Department of Transportation Regulatory Policies and Procedures [44 FR 11034; February 26, 1979], and the FAA certifies that the proposal, if promulgated will not have a significant economic impact on a substantial number of small entities under provisions of the Regulatory Flexibility Act. In addition, this proposal if adopted, would have little or no impact on trade opportunities for U.S. firms doing business overseas, or for foreign firms doing business in the U.S. The draft evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person under the caption "FOR FURTHER INFORMATION CONTACT".

Issued in Kansas City, Missouri, on November 18, 1983.

James O. Robinson,

Acting Director.

Part III

Department of Labor

Office of the Secretary

29 CFR Part 6

Rules of Practice for Administrative Proceedings Enforcing Labor Standards in Federal and Federally Assisted Construction Contracts and Federal Service Contracts; Final Rule

DEPARTMENT OF LABOR

Office of the Secretary

29 CFR Part 6

Rules of Practice for Administrative Proceedings Enforcing Labor Standards in Federal and Federally Assisted Construction Contracts and Federal Service Contracts

AGENCY: Office of the Secretary, Labor.

ACTION: Final rule.

SUMMARY: This document provides the final text of procedural regulations resulting from the Administration's reexamination of the regulations applicable to Federal and federally assisted construction contracts and Federal service contracts under the Davis-Bacon and Service Contract Acts.

It is intended to provide for administrative proceedings in enforcement matters and questions of substantial interest, and substantial variance and arm's-length proceedings under Section 4(c) of the Service Contract Act. These revisions are designed to make such proceedings as uniform as possible.

EFFECTIVE DATE: This final rulemaking becomes effective on March 21, 1984.

FOR FURTHER INFORMATION CONTACT: Gail V. Coleman, Counsel for Trial Litigation, Fair Labor Standards Division, Office of the Solicitor, U.S. Department of Labor, Room N2716, Frances Perkins Department of Labor Building, 200 Constitution Avenue NW., Washington, D.C. 20210, Phone (202) 523–7626.

SUPPLEMENTARY INFORMATION: On April 22, 1980, a proposal was published in the **Federal Register** (45 FR 27400) to make revisions to 29 CFR Part 6, Rules of Practice for Administrative Proceedings Enforcing Labor Standards in Federal and Federally Assisted Construction Contracts and Federal Service Contracts. As stated in the proposal, its purpose was primarily to make more uniform the proceedings for enforcement under the various labor standards statutes and to provide more expedited hearings under Section 4(c) of the Service Contract Act.

On January 16, 1981, the regulation was published in the **Federal Register** (46 FR 4398) as a final rule with a scheduled effective date of February 17, 1981. However, pursuant to the President's Memorandum of January 29, 1981, the Department published notices on February 6, 1981 (46 FR 11253), and thereafter, delaying implementation of this regulation until August 15, 1981, in order to reconsider the rule pursuant to Executive Order 12291. See 46 FR 18973 (March 27, 1981); 46 FR 23739 (April 28, 1981); 46 FR 33514 (June 30, 1981); 46 FR 36140 (July 14, 1981).

On January 16 and 19, 1981, the Department also published final rules under the Davis-Bacon and Related Acts, the Contract Work Hours and Safety Standards Act (29 CFR Parts 1 and 5; 46 FR 4306 and 4380), and the Service Contract Act (29 CFR Part 4; 46 FR 4320 and 4886). However, these rules were also delayed pursuant to the President's Memorandum in order to fully reconsider the rules as required by Executive Order 12291.

During this period, the Department conducted a thorough review of these regulations which led to significant new proposals which on August 14, 1981, were published for comment in the **Federal Register**. Interested persons were afforded the opportunity to submit comments to the Office of the Solicitor on or before October 13, 1981. The effective dates of the regulations published in January 1981 were postponed until action could be taken on these proposals.

Comments on or pertaining to the August 14, 1981 publication of Part 6 were received from four interested parties, namely the National Aeronautics and Space Administration (NASA), the Department of Energy (DOE), the Laborers' International Union of North America, AFL–CIO–CLC, and the International Association of Machinists and Aerospace Workers.

Subsequent to the publication in the **Federal Register** on August 14, 1981 of this rulemaking, the Department published (48 FR 32538, July 15, 1983) as a final rule (to be codified at 29 CFR Part 18) rules of practice and procedure for administrative hearings before the Office of Administratve Law Judges. As explained in the preamble to 29 CFR Part 18, its provisions generally govern administrative hearings before ALJ's, and are intended to provide maximum uniformity in the conduct of administrative hearings. However, in the event of an inconsistency or conflict between the provisions of 29 CFR Part 18 and a rule or procedure required by statute, executive order or regulation, the latter controls. The Department has reviewed the provisions of 29 CFR Part 6 as published on August 14, 1981 *vis-a-vis* the provisions of 29 CFR Part 18, and has determined that certain of the provisions in the former are no longer necessary since they are adequately covered by the latter. Thus, deleted in their entirety were provisions in Subpart A of the proposed Part 6 on the following specific matters: computation of time; motions and requests; depositions; witnesses and fees; prehearing conferences; hearing; and transmission of record. Other revisions to proposed Part 6 were made which, while they did not result in the deletion of specific provisions, incorporated certain of the provisions of 29 CFR Part 18 into Part 6. An intended effect of these revisions to Part 6 is to facilitate the uniformity established by 29 CFR Part 18 and to harmonize the provisions of Parts 6 and 18.

Subsequent to the publication on August 14, 1981, of this proposed Part 6, the Department issued final rules for implementing the Equal Access to Justice Act which became effective on October 1, 1981; those rules are codified at 29 CFR Part 16. Therein at § 16.104(a)(2), the Department listed those proceedings involving the Employment Standards Administration which were found to be subject to the provisions of the Equal Access to Justice Act; none of the proceedings covered by this Part 6 are listed as being subject to that Act. Moreover, when the Equal Access final rules were published on December 29, 1981 (46 FR 63020), the Department discussed in the Supplementary Information section of the Preamble the types of proceedings which were not subject to the Act, including certain proceedings under the Service Contract Act and the Davis-Bacon Act. In view of the exclusion from the Equal Access to Justice Act of the proceedings covered by this Part 6, a new section has been added (§ 6.6(a)) expressly providing that Administrative Law Judges shall have no authority to award attorney fees or other litigation expenses pursuant to the Equal Access to Justice Act in any proceeding covered by this Part 6.

On July 1, 1983, the Department published (48 FR 30602) the final text of procedural regulations pertaining to the Davis-Bacon and Related Acts, the Contract Work Hours and Safety Standards Act (except where the contract is subject to the Service Contract Act) and the Copeland Act. At that time, it was expressly noted that procedural regulations pertaining to the Service Contract Act were being deferred pending publication of final substantive regulations under the Service Contract Act (29 CFR Part 4). Those substantive regulations were published as a final rule on October 27, 1983, and became effective on January 27, 1984 (48 FR 49736, 48 FR 56577). The final rule herein set forth, containing procedures for both Davis-Bacon and Service Contract Act hearings, is in large part the same as the proposed rule

published on August 14, 1981 (46 FR 41428).

A procedure for appeal to a Board of Service Contract Appeals for issues arising under the Service Contract Act is established in a separate 29 CFR Part 8, which Part is being simultaneously published in the **Federal Register**.

Discussion of Major Comments

Both NASA and DOE expressed concern over proposed Section 6.12(b), which would give a party the right to file a petition for review of an ALJ's decision by the Board of Service Contract Appeals, even if the party had failed to appear before the ALJ. In particular, they suggest that such a party might unjustifiably protract the resolution of a proceeding by not appearing in the ALJ proceeding but then seeking and obtaining a remand of the case by the Board for the taking of additional evidence. This concern is well-taken and accordingly pertinent sections in both Part 6 and Part 8 have been revised to address this matter. Proposed Section 6.12(b)—which has been re-designated as § 6.7(b)—has been revised to expressly authorize the presiding ALJ to enter default judgment in such cases without the need for the appearing party to present evidence, and has been further revised to permit a non-appearing party to file a petition for review of such default judgment only in cases where the petition cites alleged procedural irregularities in the proceeding below and not to permit such filing where the petition is addressed to the merits of the case. Section 8.1(d) of Part 8 is likewise being revised to reflect this change.

Finally, both NASA and DOE expressed concern over Sections 6.50–6–57, which relate to the substantial variance and arm's-length proceedings referred by the Administrator to the ALJ procedure. The commentators noted that while specific time limits would be prescribed by these provisions for action by the Chief Administrative Law Judge, the assigned ALJ, the contracting agency and other parties, there is no corresponding time limitation placed upon the Administrator. The Department has carefully considered these concerns and has concluded that, due to the great variations in the scope and complexity of the issues which must be considered in such proceedings, it is not practicable to prescribe an absolute limitation upon the Administrator in the performance of his duties therein. However, the Department does agree that the Administrator has an obligation to assure the most expeditious treatment of such cases and is therefore providing that he respond within 30 days to requests for substantial variance hearings or in the alternative that he notify the requesting party if additional time is needed to consider such request. Accordingly, the Department is amending its proposed regulations in 29 CFR Part 4, Section 4.10(b)(2), to expressly provide for such action by the Administrator.

Classification

This rule is procedural in character. It is not classified as a "major rule" under Executive Order 12291 on Federal Regulations, because it is not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory impact analysis is required.

The Department believes that the rule will have no "significant economic impact on a substantial number of small entities" within the meaning of § 3(a) of the Regulatory Flexibility Act, Pub. L. No. 96–354, 91 Stat. 1164 (5 U.S.C. 605(b)). The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. This conclusion is reached because the rule, which is procedural in character, will effect a substantial uniformity in administrative proceedings, with a resulting economy in such proceedings. Accordingly, no regulatory flexibility analysis is required.

The rule is not subject to section 3504(h) of the Paperwork Reduction Act, 44 U.S.C. 3504(h), since it does not require the collection or retention of information.

Effective Date

Final rules for the Service Contract Act, 29 CFR Part 4, which were published in the **Federal Register** on October 27, 1983 (48 FR 49736), became effective on January 27, 1984. This Part 6 contains procedures for administrative hearings in cases arising under the Service Contract Act. In order to preserve uninterrupted such rights, it is essential that this Part 6 become effective as soon as possible. Accordingly, the Secretary has determined that good cause exists for waiving the customary requirement of delaying the effective date of a final rule for at least 30 days after its publication. 5 U.S.C. 553(d). This rule, therefore, will become effective immediately upon publication.

Appendix; 46 Stat. 1494, as amended by 49 Stat. 1011, 78 Stat. 238, 40 U.S.C. 276a–276a–7, 76 Stat. 357–359, 40 U.S.C. 327–332; 48 Stat. 948, as amended by 63 Stat. 108, 72 Stat. 967, 40 U.S.C. 276c.

Subpart A—General

§ 6.1 Applicability of rules.

This part provides the rules of practice for administrative proceedings under the Service Contract Act, the Davis-Bacon Act and related statutes listed in § 5.1 of Part 5 of this title which require payment of wages determined in accordance with the Davis-Bacon Act, the Contract Work Hours and Safety Standards Act, and the Copeland Act. See Parts 4 and 5 of this title.

§ 6.2 Definitions.

(a) "Administrator" means the Administrator of the Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, or authorized representative.

(b) "Associate Solicitor" means the Associate Solicitor for Fair Labor Standards, Office of the Solicitor, U.S. Department of Labor, Washington, D.C. 20210.

(c) "Chief Administrative Law Judge" means the Chief Administrative Law Judge, U.S. Department of Labor, 1111 20th Street, N.W., Suite 700, Washington, D.C. 20036.

(d) "Respondent" means the contractor, subcontractor, person alleged to be responsible under the contract or subcontract, and/or any firm, corporation, partnership, or association in which such person or firm is alleged to have a substantial interest (or interest, if the proceeding is under the Davis-Bacon Act) against whom the proceedings are brought.

§ 6.3 Service; copies of documents and pleadings.

(a) *Manner of Service.* Service upon any party shall be made by the party filing the pleading or document by delivering a copy or mailing a copy to the last known address. When a party is represented by an attorney, the service should be upon the attorney.

(b) *Proof of service.* A certificate of the person serving the pleading or other document by personal delivery or by mailing, setting forth the manner of said service shall be proof of the service. Where service is made by mail, service shall be complete upon mailing. However, documents are not deemed filed until received by the Chief Clerk at the Office of Administrative Law Judges and where documents are filed by mail 5 days shall be added to the prescribed period.

(c) *Service upon Department, number of copies of pleading or other documents.* An original and three copies of all pleadings and other documents shall be filed with the Department of Labor: The original and one copy with the Administrative Law Judge before whom the case is pending, one copy with the attorney representing the Department during the hearing, and one copy with the Associate Solicitor.

§ 6.4 Subpoenas (Service Contract Act).

All applications under the Service Contract Act for subpoenas ad testificandum and subpoenas duces tecum shall be made in writing to the Administrative Law Judge. Application for subpoenas duces tecum shall specify as exactly as possible the documents to be produced.

§ 6.5 Production of documents and witnesses.

The parties, who shall be deemed to be the Department of Labor and the respondent(s), may serve on any other party a request to produce documents or witnesses in the control of the party served, setting forth with particularity the documents or witnesses requested. The party served shall have 15 days to respond or object thereto unless a shorter or longer time is ordered by the Administrative Law Judge. The parties shall produce documents and witnesses to which no privilege attaches which are in the control of the party, if so ordered by the Administrative Law Judge upon motion therefor by a party. If a privilege is claimed, it must be specifically claimed in writing prior to the hearing or orally at the hearing or deposition, including the reasons therefor. In no event shall a statement taken in confidence by the Department of Labor or other Federal agency be ordered to be produced prior to the date of testimony at trial of the person whose statement is at issue unless the consent of such person has been obtained.

§ 6.6 Administrative Law Judge.

(a) *Equal Access to Justice Act.* Proceedings under this part are not subject to the provisions of the Equal Access to Justice Act (Pub. L. 96–481). In any hearing conducted pursuant to the provisions of this Part 6, Administrative Law Judges shall have no power or authority to award attorney fees and/or other litigation expenses pursuant to the provisions of the Equal Access to Justice Act.

(b) *Contumacious conduct: failure or refusal of a witness to appear or answer.* Contumacious conduct at any hearing before an Administrative Law Judge shall be ground for exclusion from the hearing., In cases arising under the Service Contract Act, the failure or refusal of a witness to appear at any hearing or at a deposition when so ordered by the Administrative Law Judge, or to answer any question which has been ruled to be proper, shall be ground for the action provided in section 5 of the Act of June 30, 1936 (41 U.S.C. 39) and, in the discretion of the Administrative Law Judge, for striking out all or part of the testimony which may have been given by such witness.

§ 6.7 Appearances.

(a) *Representation.* The parties may appear in person, by counsel, or otherwise.

(b) *Failure to appear.* In the event that a party appears at the hearing and no party appears for the opposing side, the presiding Administrative Law Judge is authorized, if such party fails to show good cause for such failure to appear, to dismiss the case or to find the facts as alleged in the complaint and to enter a default judgment containing such findings, conclusions and order as are appropriate. Only where a petition for review of such default judgment cites alleged procedural irregularities in the proceeding below and not the merits of the case shall a non-appearing party be permitted to file such a petition for review. Failure to appear at a hearing shall not be deemed to be a waiver of the right to be served with a copy of the Administrative Law Judge's decision.

§ 6.8 Transmission of record.

If a petition for review of the Administrative Law Judge's decision is filed with the Board of Service Contract Appeals or the Wage Appeals Board, the Chief Administrative Law Judge shall promptly transmit the record of the proceeding.

If a petition for review is not filed within the time prescribed in this part, the Chief Administrative Law Judge shall so advise the Administrator.

Subpart B—Enforcement Proceedings Under the Service Contract Act (and Under the Contract Work Hours and Safety Standards Act for Contracts Subject to the Service Contract Act)

§ 6.15 Complaints.

(a) Enforcement proceedings under the Service Contract Act and under the Contract Work Hours and Safety Standards Act for contracts subject to the Service Contract Act, may be instituted by the Associate Solicitor for Fair Labor Standards or a Regional Solicitor by issuing a complaint and causing the complaint to be served upon the respondent.

(b) The complaint shall contain a clear and concise factual statement of the grounds for relief and the relief requested.

(c) The Administrative Law Judge shall notify the parties of the time and place for a hearing.

§ 6.16 Answer.

(a) Within 30 days after the service of the complaint the respondent shall file an answer with the Chief Administrative Law Judge. The answer shall be signed by the respondent or his/her attorney.

(b) The answer shall (1) contain a statement of the facts which constitute the grounds of defense, and shall specifically admit, explain, or deny each of the allegations of the complaint unless the respondent is without knowledge, in which case the answer shall so state; or (2) state that the respondent admits all of the allegations of the complaint. The answer may contain a waiver of hearing. Failure to file an answer to or plead specifically to any allegation of the complaint shall constitute an admission of such allegation.

(c) Failure to file an answer shall constitute grounds for waiver of hearing and entry of a default judgment unless respondent shows good cause for such failure to file. In preparing the decision of default judgment the Administrative Law Judge shall adopt as findings of fact the material facts alleged in the complaint and shall order the appropriate relief and/or sanctions.

§ 6.17 Amendments to pleadings.

At any time prior to the close of the hearing record, the complaint or answer may be amended with the permission of the Administrative Law Judge and on such terms as he/she may approve. When issues not raised by the pleadings are reasonably within the scope of the original complaint and are tried by express or implied consent of the parties, they shall be treated in all respects as if they had been raised in the pleadings, and such amendments may be made as necessary to make them conform to the evidence. Such amendments shall be allowed when justice and the presentation of the merits are served thereby, provided there is no prejudice to the objecting party's presentation on the merits. A continuance in the hearing may be granted or the record left open to enable the new allegations to be addressed. The presiding Administrative Law Judge may, upon reasonable notice and upon such terms as are just, permit supplemental pleadings setting forth transactions, occurrences or events which have happened since the data of the pleadings and which are relevant to any of the issues involved.

§ 6.18 Consent findings and order.

(a) At any time prior to the receipt of evidence or, at the discretion of the Administrative Law Judge, prior to the issuance of the decision of the Administrative Law Judge, the parties may enter into consent findings and an order disposing of the processings in whole or in part.

(b) Any agreement containing consent findings and an order disposing of a proceeding in whole or in part shall also provide:

(1) That the order shall have the same force and effect as an order made after full hearing;

(2) That the entire record on which any order may be based shall consist solely of the complaint and the agreement;

(3) A waiver of any further procedural steps before the Administrative Law Judge and Board of Service Contract Appeals regarding those matters which are the subject of the agreement; and

(4) A waiver of any right to challenge or contest the validity of the findings and order entered into in accordance with the agreement.

(c) Within 30 days after receipt of an agreement containing consent findings and an order disposing of the disputed matter in whole, the Administrative Law Judge shall, if satisfied with its form and substance, accept such agreement by issuing a decision based upon the agreed findings and order. If such agreement disposes of only a part of the disputed matter, a hearing shall be conducted on the matters remaining in dispute.

§ 6.19 Decision of the Administrative Law Judge.

(a) *Proposed findings of fact, conclusions, and order.* Within 20 days of filing of the transcript of the testimony or such additional time as the Administrative Law Judge may allow each party may file with the Administrative Law Judge proposed findings of fact, conclusion of law, and order, together with a supporting brief expressing the reasons for such proposals. Such proposals and brief shall be served on all parties, and shall refer to all portions of the record and to all authorities relied upon in support of each proposal.

(b) *Decision of the Administrative Law Judge.* (1) Within a reasonable time after the time allowed for the filing of proposed findings of fact, conclusions of law, and order, or within 30 days after receipt of an agreement containing consent findings and order disposing of the disputed matter in whole, the Administrative Law Judge shall make his/her decision. If any aggrieved party desires review of the decision, a petition for review thereof shall be filed as provided in § 6.20 of this title, and such decision and order shall be inoperative unless and until the Board of Service Contract Appeals issues an order affirming the decision. The decision of the Administrative Law Judge shall include findings of fact and conclusions of law, with reasons and bases therefor, upon each material issue of fact, law, or discretion presented on the record. The decision of the Administrative Law Judge shall be based upon a consideration of the whole record, including any admissions made under §§ 6.16, 6.17 and 6.18 of this title. It shall be supported by reliable and probative evidence. Such decision shall be in accordance with the regulations and rulings contained in Parts 4 and 5 and other pertinent parts of this title.

(2) If the respondent is found to have violated the Service Contract Act, the Administrative Law Judge shall include in his/her decision an order as to whether the respondent is to be relieved from the ineligible list as provided in Section 5(a) of the Act, and, if relief is ordered, findings of the unusual circumstance, within the meaning of Section 5(a) of the Act, which are the basis therefor. If respondent is found to have violated the provisions of the Contract Work Hours and Safety Standards Act, the Administrative Law Judge shall issue an order as to whether the respondent is to be subject to the ineligible list as provided in § 5.12(a)(1)

of Part 4 of this title, including findings regarding the existence of aggravated or willful violations. If wages and/or fringe benefits are found due under the Service Contract Act and/or the Contract Work Safety Standards Act and are unpaid, no relief from the ineligible list shall be ordered except on condition that such wages and/or fringe benefits are paid.

(3) The Administrative Law Judge shall make no findings regarding liquidated damages under the Contract Work Hours and Safety Standards Act.

§ 6.20 Petition for review.

Within 40 days after the date of the decision of the Administrative Law Judge (or such additional time as is granted by the Board of Service Contract Appeals), any party aggrieved thereby who desires review thereof shall file a petition for review of the decision with supporting reasons. Such party shall transmit the petition in writing to the Board of Service Contract Appeals pursuant to 29 CFR Part 8, with a copy thereof to the Chief Administrative Law Judge. The petition shall refer to the specific findings of fact, conclusions of law, or order at issue. A petition concerning the decision on the ineligibility list shall also state the unusual circumstances or lack thereof under the Service Contract Act, and/or the aggravated or willful violations of the Contract Work Hours and Safety Standards Act or lack thereof, as appropriate.

§ 6.21 Ineligible list.

(a) Upon the final decision of the Administrative Law Judge or Board of Service Contract Appeals, as appropriate, the Administrator shall within 90 days forward to the Comptroller General the name of any respondent found in violation of the Service Contract Act, including the name of any firm, corporation, partnership, or association in which the respondent has a substantial interest, unless such decision orders relief from the ineligible list because of unusual circumstances.

(b) Upon the final decision of the Administrative Law Judge or the Board of Service Contract Appeals, as appropriate, the Administrator promptly shall forward to the Comptroller General the name of any respondent found to be in aggravated or willful violation of the Contract Work Hours and Safety Standards Act, and the name of any firm, corporation, partnership, or association in which the respondent has a substantial interest.

Subpart C—Enforcement Proceedings Under the Davis-Bacon and Related Prevailing Wage Statutes, the Copeland Act, and the Contract Work Hours and Safety Standards Act (Except Under Contracts Subject to the Service Contract Act)

§ 6.30 Referred to Chief Administrative Law Judge.

(a) Upon timely receipt of a request for a hearing under § 5.11 (where the Administrator has determined that relevant facts are in dispute) or § 5.12 of Part 5 of this title, the Administrator shall refer the case to the Chief Administrative Law Judge by Order of Reference, to which shall be attached a copy of the notification letter to the respondent from the Administrator and response thereto, for designation of an Administrative Law Judge to conduct such hearings as may be necessary to decide the disputed matters. A copy of the Order of Reference and attachments thereto shall be served upon the respondent.

(b) The notification letter from the Administrator and response thereto shall be given the effect of a complaint and answer, respectively, for purposes of the administrative proceedings. The notification letter and response shall be in accordance with the provisions of § 5.11 or § 5.12(b)(1) of Part 5 of this title, as appropriate.

§ 6.31 Amendments to pleadings.

At any time prior to the closing of the hearing record, the complaint (notification letter) or answer (response) may be amended with the permission of the Administrative Law Judge and upon such terms as he/she may approve. For proceedings pursuant to § 5.11 of Part 5 of this title, such an amendment may include a statement that debarment action is warranted under § 5.12(a)(1) of Part 5 of this title or under Section 3(a) of the Davis-Bacon Act. Such amendments shall be allowed when justice and the presentation of the merits are served thereby, provided there is no prejudice to the objecting party's presentation on the merits. When issues not raised by the pleadings are reasonably within the scope of the original complaint and are tried by express or implied consent of the parties, they shall be treated in all respects as if they had been raised in the pleadings, and such amendments may be made as necessary to make them conform to the evidence. The presiding Administrative Law Judge may, upon reasonable notice and upon such terms as are just, permit supplemental pleadings setting forth transactions, occurrences or events which have happened since the date of the pleadings and which are relevant to any of the issues involved. A continuance in the hearing may be granted or the record left open to enable the new allegations to be addressed.

§ 6.32 Consent findings and order.

(a) At any time prior to the receipt of evidence or, at the discretion of the Administrative Law Judge, prior to the issuance of the decision of the Administrative Law Judge, the parties may enter into consent findings and an order disposing of the proceeding in whole or in part.

(b) Any agreement containing consent findings and an order disposing of a proceeding in whole or in part shall also provide:

(1) That the order shall have the same force and effect as an order made after full hearing;

(2) That the entire record on which any order may be based shall consist solely of the complaint and the agreement;

(3) That any order concerning debarment under the Davis-Bacon Act (but not under any of the other statutes listed in § 5.1 of Part 5 of this title) shall constitute a recommendation to the Comptroller General;

(4) A waiver of any further procedural steps before the Administrative Law Judge and the Wage Appeals Board regarding those matters which are the subject of the agreement; and

(5) A waiver of any right to challenge or contest the validity of the findings and order entered into in accordance with the agreement.

(c) Within 30 days after receipt of an agreement containing consent findings and an order disposing of the disputed matter in whole, the Administrative Law Judge shall, if satisfied with its form and substance, accept such agreement by issuing a decision based upon the agreed findings and order. If such agreement disposes of only a part of the disputed matter, a hearing shall be conducted on the matters remaining in dispute.

§ 6.33 Decision of the Administrative Law Judge.

(a) *Proposed findings of fact, conclusions, and order.* Within 20 days of filing of the transcript of the testimony or such additional time as the Administrative Law Judge may allow, each party may file with the Administrative Law Judge proposed findings of fact, conclusions of law, and order, together with a supporting brief expressing the reasons for such proposals. Such proposals and brief

shall be served on all parties, and shall refer to all portions of the record and to all authorities relied upon in support of each proposal.

(b) *Decision of the Administrative Law Judge.* (1) Within a reasonable time after the time allowed for filing of proposed findings of fact, conclusions of law, and order, or within 30 days of receipt of an agreement containing consent findings and order disposing of the disputed matter in whole, the Administrative Law Judge shall make his/her decision. If any aggrieved party desires review of the decision, a petition for review thereof shall be filed as provided in §6.34 of this title, and such decision and order shall be inoperative unless and until the Wage Appeals Board either declines to review the decision or issues an order affirming the decision. The decision of the Administrative Law Judge shall include findings of fact and conclusions of law, with reasons and bases therefor, upon each material issue of fact, law, or discretion presented on the record. Such decision shall be in accordance with the regulations and rulings contained in Part 5 and other pertinent parts of this title. The decision of the Administrative Law Judge shall be based upon a consideration of the whole record, including any admissions made in the respondent's answer (response) and § 6.32 of this title. It shall be supported by reliable and probative evidence.

(2) If the respondent is found to have violated the labor standards provisions of any of the statutes listed in § 5.1 of Part 5 of this title other than the Davis-Bacon Act, and if debarment action was requested pursuant to the complaint (notification letter) or any amendment thereto, the Administrative Law Judge shall issue an order as to whether the respondent is to be subject to the ineligible list as provided in § 5.12(a)(1) of this title, including any findings of aggravated or willful violations. If the respondent is found to have violated the Davis-Bacon Act, and if debarment action was requested, the Administrative Law Judge shall issue as a part of the order a recommendation as to whether respondent should be subject to the ineligible list pursuant to Section 3(a) of the Act, including any findings regarding respondent's disregard of obligations to employees and subcontractors. If wages are found due and are unpaid, no relief from the ineligible list shall be ordered or recommended except on condition that such wages are paid.

(3) The Administrative Law Judge shall make no findings regarding liquidated damages under the Contract Work Hours and Safety Standards Act.

§ 6.34 Petition for review.

Within 40 days after the date of the decision of the Administrative Law judge (or such additional time as is granted by the Wage Appeals Board), any party aggrieved thereby who desires review thereof shall file a petition for review of the decision with supporting reasons. Such party shall transmit the petition in writing to the Wage Appeals Board, pursuant to Part 7 of this title, with a copy thereof to the Chief Administrative Law judge. The petition shall refer to the specific findings of fact, conclusions of law, or order at issue. A petition concerning the decision on debarment shall also state the aggravated or willful violations and/or disregard of obligations to employees and subcontractors, or lack thereof, as appropriate.

§ 6.35 Ineligible lists.

Upon the final decision of the Administrative Law judge or Wage Appeals Board, as appropriate, regarding violations of any statute listed in § 5.1 of Part 5 of this title other than the Davis-Bacon Act, the Administrator promptly shall foward to the Comptroller General the name of any respondent found to have committed aggravated or willful violations of the labor standards provisions of such statute, and the name of any firm, corporation, partnership, or association in which such respondent has a substantial interest. Upon the final decision of the Administrative Law judge or Wage Appeals Board, as appropriate, regarding violations of the Davis-Bacon Act, the Administrator promptly shall forward to the Comptroller General any recommendation regarding debarment action against a respondent, and the name of any firm, corporation, partnership, or association in which such respondent has an interest.

Subpart D—Substantial Interest Proceedings

§ 6.40 Scope.

This subpart supplements the procedures contained in § 4.12 of Part 4 and § 5.12(d) of Part 5 of this title, and states the rules of practice applicable to hearings to determine whether persons of firms whose names appear on the ineligible list pursuant to Section 5(a) of the Service Contract Act or § 5.12(a)(1) of Part 5 of this title have a substantial interest in any firm, corporation, partnership, or association other than those listed on the ineligible list; and/or to determine whether persons or firms whose names appear on the ineligible list pursuant to Section 3(a) of the Davis-Bacon Act have an interest in any firm, corporation, partnership, or association other than those listed on the ineligible list.

§ 6.41 Referral to Chief Administrative Law Judge.

(a) Upon timely receipt of a request for a hearing under § 4.12 of Part 4 or § 5.12 of Part 5 of this title, where the Administrator has determined that relevant facts are in dispute, or on his/her own motion, the Administrator shall refer the case to the Chief Administrative Law Judge by Order of Reference, to which shall be attached a copy of any findings of the Administrator and response thereto, for designation of an Administrative Law Judge to conduct such hearings as may be necessary to decide the disputed matters. A copy of the Order of Reference and attachments thereto shall be served upon the person or firm requesting the hearing, if any and upon the respondents.

(b) The findings of the Administrator and response thereto shall be given the effect of a complaint and answer, respectively, for purposes of the administrative preceedings.

§ 6.42 Amendments to pleadings.

At any time prior to the closing of the hearing record, the complaint (Administrator's findings) or answer (response) may be amended with the permission of the Administrative Law Judge and upon such terms as he/she may approve. Such amendments shall be allowed when justice and the presentation of the merits are served thereby, provided there is no prejudice to the objecting party's presentation on the merits. When issues not raised by the pleadings are reasonably within the scope of the original complaint and are tried by express or implied consent of the parties, they shall be treated in all respects as if they had been raised in the pleadings, and such amendments may be made as necessary to make them conform to the evidence. The presiding Administative Law Judge may, upon such terms as are just, permit supplemental pleadings setting forth transactions, occurrences or events which have happened a since the data of the pleadings and which are relevant to any of the issues involved. A continuance in the hearing may be granted or the record left open to enable the new allegations to be addressed.

§ 6.43 Consent findings and order.

(a) At any time prior to the receipt of evidence or, at the discretion of the Administrative Law Judge, prior to the issuance of the decision of the Administrative Law Judge, the parties may enter into consent findings and an order disposing of the proceeding in whole or in part.

(b) Any agreement containing consent findings and an order disposing of a proceeding in whole or in part shall provide:

(1) That the order shall have the same force and effect as an order made after full hearing;

(2) That the entire record on which any order may be based shall consist solely of the complaint and the agreement;

(3) A waiver of any further procedural steps before the Administrative Law Judge and the Board of Service Contract Appeals or the Wage Appeals Board, as appropriate, regarding those matters which are the subject of the agreement; and

(4) A waiver of any right to challenge or contest the validity of the findings and order entered into in accordance with the agreement.

(c) Within 30 days after receipt of an agreement containing consent findings and an order disposing of the disputed matter in whole, the Administrative Law Judge shall accept such agreement by issuing a decision based upon the agreed findings and order. If a such agreement disposes of only a part of the disputed matter, a hearing shall be conducted on the matters remaining in dispute.

§ 6.44 Decision of the Administrative Law Judge.

(a) *Proposed findings of fact, conclusions, and order.* Within 30 days of filing of the transcript of the testimony, each party may file with the Administrative Law Judge proposed findings of fact, conclusions of law, and order, together with a supporting brief expressing the reasons for such proposals. Such proposals and brief shall be served on all parties, and shall refer to all portions of the record and to all authorities relied upon in support of each proposal.

(b) *Decision of the Administrative Law Judge.* Within 60 days after the time allowed for filing of proposed findings of fact, conclusions of law, and order, or within 30 days after receipt of an agreement containing consent findings and order disposing of the disputed matter in whole, the Administrative Law Judge shall make his/her decision. If any aggrieved party desires review of the decision a petition for review thereof shall be filed as provided in § 6.45 of this title, and such decision and order shall be inoperative unless and until the Board of Service Contract Appeals or the Wage Appeals Board issues an order affirming the decision. The decision of the Administrative Law Judge shall include findings of fact and conclusions of law, with reasons and bases therefor, upon each material issue of fact, law, or discretion presented on the record. Such decision shall be in accordance with the regulations and rulings contained in Parts 4 and 5 and other pertinent parts of this title. The decision of the Administrative Law Judge shall be based upon a consideration of the whole record, including any admissions made in the respondents' answer (response) and § 6.43 of this title.

§ 6.45 Petition for review.

Within 30 days after the date of the decision of the Administrative Law Judge, any party aggrieved thereby who desires review thereof shall file a petition for review of the decision with supporting reasons. Such party shall transmit the petition in writing to the Board of Service Contract Appeals pursuant to 29 CFR Part 8 if the proceeding was under the Service Contract Act, or to the Wage Appeals Board pursuant to 29 CFR Part 7 if the proceeding was under § 5.12(a)(1) of Part 5 of this title or under Section 3(a) of the Davis-Bacon Act, with a copy thereof to the Chief Administrative Law Judge. The petition for review shall refer to the specific findings of fact, conclusions of law, or order at issue.

§ 6.46 Ineligible list.

Upon the final decision of the Administrative Law Judge, Board of Service Contract Appeals or Wage Appeals Board, as appropriate, the Administrator promptly shall forward to the Comptroller General the names of any firm, corporation, partnership, or association in which a person or firm debarred pursuant to Section 5(a) of the Service Contract Act or § 5.12(a) of Part 5 of this title has a substantial interest; and/or the name of any firm, corporation, partnership, or association in which a person or firm debarred pursuant to Section 3(a) of the Davis-Bacon Act has an interest.

Subpart E—Substantial Variance and Arm's Length Proceedings

§ 6.5 Scope.

This subpart supplements the procedures contained in §§ 4.10 and 4.11 of Part 4 of this title and states the rules of practice applicable to hearings under Section 4(c) of the Act to determine whether the collectively bargained wages and/or fringe benefits otherwise required to be paid under that section and Sections 2(a) (1) and (2) of the Act are substantially at variance with those which prevail for services of a character similar in the locality, and/or to determine whether the wages and/or fringe benefits provided in the collective bargaining agreement were reached as a result of arm's-length negotiations.

§ 6.51 Referral to Chief Administrative Law Judge.

(a) Referral pursuant to § 4.10 or § 4.11 of Part 4 of this title will be by an Order of Reference from the Administrator to the Chief Administrative Law Judge, to which will be attached the material submitted by the applicant or any other material the Administrator considers relevant and, for proceedings pursuant to § 4.11 of this title, a copy of any findings of the Administrator. A copy of the Order of Reference and all attachments will be sent by mail to the following parties: the agency whose contract is involved, the parties to the collective bargaining agreement, any contractor or subcontractor performing on the contract, any contractor or subcontractor known to be desirous of bidding thereon or performing services thereunder who is known or believed to be interested in the determination of the issue, any unions or other authorized representatives of service employees employed or who may be expected to be employed by such contractor or subcontractor on the contract work, and any other affected parties known to be interested in the determination of the issue. The Order of Reference will have attached a certificate of service naming all interested parties who have been served.

(b) Accompanying the Order of Reference and attachments will be a notice advising that any interested party, including the applicant, who intends to participate in the proceeding shall submit a written response to the Chief Administrative Law Judge within 20 days of the date on which the certificate of service indicates the Order of Reference was mailed. The notice will state that such a response shall include:

(1) A statement of the interested party's case;

(2) A list of witnesses the interested party will present, a summary of the testimony each is expected to give, and copies of all exhibits proposed to be proffered;

(3) A list of persons who have knowledge of the facts for whom the interested party requests that subpoenas

be issued and a brief statement of the purpose of their testimony; and

(4) A certificate of service in accordance with § 6.3 of this title on all interested parties, including the Administrator.

§ 6.52 Appointment of Administrative Law Judge and notification of prehearing conference and hearing date.

Upon receipt from the Administrator of an Order of Reference, notice to the parties, attachments and certificate of service, the Chief Administrative Law Judge shall appoint an Administrative Law Judge to hear the case. The Administrative Law Judge shall promptly notify all interested parties of the time and place of a prehearing conference and of the hearing which shall be held immediately upon the completion of prehearing conference. The date of the prehearing conference and hearing shall be not more than 60 days from the date on which the certificate of service indicates the Order of Reference was mailed.

§ 6.53 Prehearing conference.

(a) At the prehearing conference the Administrative Law Judge shall attempt to determine the exact areas of agreement and disagreement raised by the Administrator's Order of Reference and replies thereto, so that the evidence and arguments presented at the hearing will be relevant, complete, and as brief and concise as possible.

(b) Any interested party desiring to file proposed findings of fact and conclusions of law shall submit them to the Administrative Law Judge at the prehearing conference.

(c) If the parties agree that no hearing is necessary to supplement the written evidence and the views and arguments that have been presented, the Administrative Law Judge shall forthwith render his/her final decision. The Administrative Law Judge with the agreement of the parties may permit submission of additional written evidence or argument, such as data accompanied by affidavits attesting to its validity or depositions, within ten days of commencement of the prehearing conference.

§ 6.54 Hearing.

(a) Except as provided in § 6.53(c) of this title, the hearing shall commence immediately upon the close of the prehearing conference. All matters remaining in controversy, including the presentation of additional evidence, shall be considered at the hearing. There shall be a minimum of formality in the proceeding consistent with orderly procedure.

(b) To expedite the proceeding the Administrative Law Judge shall, after consultation with the parties, set reasonable guidelines and limitations for the presentations to be made at the hearing. The Administrative Law Judge may limit cross-examination and may question witnesses.

(c) Under no circumstances shall source data obtained by the Bureau of Labor Statistics, U.S. Department of Labor, or the names of establishments contacted by the Bureau be submitted into evidence or otherwise disclosed. Where the Bureau has conducted a survey, the published summary of the data may be submitted into evidence.

(d) Affidavits or depositions may be admitted at the discretion of the Administrative Law Judge. The Administrative Law Judge may also require that unduly repetitious testimony be submitted as affidavits. Such affidavits shall be submitted within three days of the conclusions of the hearing.

(e) Counsel for the Administrator shall participate in the proceeding to the degree he/she deems appropriate.

(f) An expedited transcript shall be made of the hearing and of the prehearing conference.

§ 6.55 Closing of record.

The Administrative Law Judge shall close the record promptly and not later than 10 days after the date of commencement of the prehearing conference. Post-hearing briefs may be permitted, but the filing of briefs shall not delay issuance of the decision of the Administrative Law Judge pursuant to § 6.56 of this title.

§ 6.56 Decision of the Administrative Law Judge.

Within 15 days of receipt of the transcript, the Administrative Law Judge shall render his/her decision containing findings of fact and conclusions of law. The decision of the Administrative Law Judge shall be based upon consideration of the whole record, and shall be in accordance with the regulations and rulings contained in Part 4 and other pertinent parts of this title. If any party desires review of the decision, a petition for review thereof shall be filed as provided in § 6.57 of this title, and such decision and order shall be inoperative unless and until the Board of Service Contract Appeals issues an order affirming the decision. If a petition has not been filed within 10 days of issuance of the Administrative Law Judge's decision, the Administrator shall promptly issue any wage determination which may be required as a result of the decision.

§ 6.57 Petition for review.

Within 10 days after the date of the decision of the Administrative Law Judge, any interested party who participated in the proceedings before the Administrative Law Judge and desires review of the decision shall file a petition for review by the Board of Service Contract Appeals pursuant to 29 CFR Part 8. The petition shall refer to the specific findings of fact, conclusions of law, or order excepted to and the specific pages of transcript relevant to the petition for review.

Part IV

Department of Labor

Office of the Secretary

29 CFR Part 8

Practice Before the Board of Service Contract Appeals: Final Rule

DEPARTMENT OF LABOR

29 CFR Part 8

Practice Before the Board of Service Contract Appeals

AGENCY: Office of the Secretary, Labor.

ACTION: Final rule.

SUMMARY: A Board of Service Contract Appeals is established to hear appeals from decisions of the Wage and Hour Administrator and appeals from decisions pursuant to 29 CFR Part 6 by Administrative Law Judges involving Service Contract Act matters and related Contract Work Hours and Safety Standards Act matters. Part 6 sets forth rules of practice for administrative proceedings enforcing labor standards in Federal and federally assisted construction contracts and Federal service contracts.

EFFECTIVE DATE: This final rulemaking becomes effective on March 21, 1984.

FOR FURTHER INFORMATION CONTACT: Gail V. Coleman, Counsel for Trial Litigation, Fair Labor Standards Division, Office of the Solicitor, U.S. Department of Labor, Room N2716, 200 Constitution Ave., N.W., Washington, D.C. 20210, Phone 202-523-7626.

SUPPLEMENTARY INFORMATION: On April 22, 1980, a proposal was published in the **Federal Register** (45 FR 27410) to make a new Part 8 of Title 29, Code of Federal Regulations, Practice Before the Board of Service Contract Appeals. The purpose of this proposal was to issue procedures concerning a new appellate Board of Service Contract Appeals. Interested persons were afforded the opportunity to submit comments to the Office of the Solicitor on or before May 27, 1980. Comments were received from 13 interested parties.

On January 19, 1981, proposed Part 8 was withdrawn (46 FR 4951). On January 16, 1981, 29 CFR Part 6 was published as a final rule (46 FR 4398) with a scheduled effective date of February 17, 1981. That regulation contained a new Subpart F providing for appeals to the Secretary on matters arising under the Service Contract Act (and the Contract Work Hours and Safety Standards Act on contracts subject to the Service Contract Act), instead of appeals to a Board. Pursuant to the President's Memorandum of January 29, 1981, the Department published notices on February 6, 1981 (46 FR 11253), and thereafter delaying implementation of the regulation until August 15, 1981 in order to reconsider the rule pursuant to Executive Order 12291. See 46 FR 18973 (March 27, 1981); 46 FR 23739 (April 20, 1981); 46 FR 33514 (June 30, 1981); 46 FR 36140 (July 14, 1981).

The procedures in this Part 8, which was published for comment in the **Federal Register** on August 14, 1981 (46 FR 41438), are substantially identical to those published as Subpart F of Part 6 January 16, 1981, except that appeal is provided to a Board of Service Contract Appeals, rather than to the Secretary. It is envisioned that it would operate in a manner similar to the Wage Appeals Board, which hears appeals under the Davis-Bacon and Related Acts, and the Department is considering consolidating it with the Wage Appeals Board into one Board with jurisdiction to hear all issues under government contract wage statutes.

With respect to the jurisdiction of the Board of Service Contract Appeals, which is prescribed by 29 CFR § 8.1(b) herein, the Board is empowered to hear and decide in its discretion appeals from decisions of Administrative Law Judges issued under Subparts B, D and E of Part 6 of this title, entitled Rules of Practice for Administrative Proceedings Enforcing Labor Standards in Federal and Federally Assisted Construction Contracts and Federal Service Contracts. Part 6 is being simultaneously published in the **Federal Register.**

Comments on this proposed Part 8 were received from five interested parties, namely the National Aeronautics and Space Administration (NASA), the Department of Energy (DOE), the Laborers' International Union of North America, AFL-CIO-CLC, the International Association of Machinists and Aerospace Workers, and the Service Employees International Union, AFL-CIO-CLC. In addition, NASA and DOE in commenting upon proposed 29 CFR Part 6, offered comments on Part 8 which relate to matters addressed by this Part 8; to the extent such comments are relevant to this final rulemaking, they will be discussed below.

Subsequent to the publication on August 14, 1981, of this proposed Part 8, the Department issued final rules for implementing the Equal Access to Justice Act which became effective on October 1, 1981; those rules are codified at 29 CFR Part 16. Therein at § 16.104(a)(2), the Department listed those proceedings involving the Employment Standards Administration which were found to be subject to the provisions of the Equal Access to Justice Act; none of the proceedings covered by Part 6 or 8 are listed as being subject to that Act. Moreover, when the Equal Access final rules were published on December 29, 1981 (46 FR 63020), the Department discussed in the Supplementary Information section of the Preamble the types of proceedings which were not subject to the Act, including certain proceedings under the Service Contract Act and the Davis-Bacon Act. In view of the inapplicability of the Equal Access to Justice Act to proceedings covered by Part 6, a new subsection (§ 6.6(a)) has been added to Part 6 expressly providing that Administrative Law Judges shall have no authority to award attorney fees or other litigation expenses pursuant to the Equal Access to Justice Act in any proceeding covered by Part 6. Similarly, a new section (§ 8.19) has been added to Part 8 to the same effect. If an appeal to the Board under this Part 8 involves a decision pursuant to Part 6 wherein an Administrative Law Judge erroneously awarded attorney fees or other litigation expenses pursuant to that Act, the Board shall have the authority to vacate such award.

A new section 8.0 has been added to provide that during the period before the Board has been duly constituted, the Secretary or his designee will act on appeals in its stead.

Discussion of Major Comments

Section 8.1(b)—Both NASA and DOE expressed concern that granting the Board authority to review substantial variance cases pursuant to Section 4(c) of the Service Contract Act would cause such proceedings to become unduly protracted. Similar concerns were expressed by the labor organizations which commented upon this Part 8. For a discussion of such concerns, see the comments and supplementary information set out *infra*.

Section 8.1(c)—Both NASA and DOE questioned whether a decision issued by the Board, acting within the scope of its jurisdiction, would be binding upon the Secretary of Labor, and suggested that, if it is intended not to accord such finality to a Board decision, the regulations clarify such intent. It is intended by this Part 8 that Board decisions shall be final and binding upon the Secretary; Section 8.1(c) has been revised to expressly reflect this intent.

Section 8.1(d)—Both NASA and DOE expressed concern over the non-inclusion in this section of a settlement which expressly indicates the standard of review to be exercised by the Board. This concern is well-taken, and the section has been revised to provide that the Board shall base its decision on the preponderance of the evidence, the statutory standard under the Service Contract Act. A similar revision has been made in Section 8.9(b). With

further reference to Section 8.1(d), these commentators, in their comments upon proposed 29 CFR Part 8, expressed concern that a party which did not appear in the ALJ proceeding might attempt to unduly protract such a case by filing with the Board a petition for review. This concern is also well-taken. Accordingly, Section 8.1(d) is revised to provide that the Board shall not consider on the merits any petition for review filed by a party against whom default judgment has been entered pursuant to the provisions of Part 6 of this Title.

Section 8.7—Both NASA and DOE questioned whether a Federal agency, under this section, could be included within the definition of "aggrieved party" for purpose of filing a petition for review of an ALJ decision pursuant to Subpart B, D or E of Part 6 of this title. By the use of the term "any aggrieved party" the Department intends that such term may include a Federal agency, and does not consider it necessary to amend or change Section 8.7 as now written.

General—Both NASA and DOE recommended that certain administrative matters concerning the composition of the Board be addressed in this Part 8. It is the Department's position that such internal administrative matters would be more appropriately addressed in a separate order of the Secretary rather than in this Part 8 which prescribes the rules of procedure of such Board; it is the Department's intention to promulgate such an order forthwith.

Comments received from the Laborers' International and the IAM expressed concern that a hearing procedure for wage determinations might result in a court decision such as that in *Wirtz* v. *Baldor Electric Co.*, 337 F.2d 518 (D.C. Cir. 1963) (arising under the Walsh-Healey Public Contracts Act), and the cessation of wage determinations under the Service Contract Act. These concerns have been carefully considered. The Department has concluded that since the basis of the *Baldor* decision was the provision in the Walsh-Healey Act (section 10) which expressly requires an APA hearing, and since no similar statutory provision exists in the Service Contract Act, these concerns are ill-founded. Accordingly, the Department has concluded that further changes in Part 8 to address this perceived problem are not necessary.

Both of these commentators expressed the further concern that creation of a separate Board might encourage or foster frivolous appeals from an ALJ decision. The Department agrees that the Board's procedure should expressly provide for the rejection of any petition for review which appears to the Board to constitute a frivolous appeal. Accordingly, Sections 8.6(a) and 8.9(a) have been revised to specifically vest authority in the Board to decline review of particular types of cases, including frivolous appeals.

Finally, all three labor organizations (as well as NASA and DOE) which commented upon Part 8 expressed concern that creation of the Board constitutes an unnecessary level of review and poses a potential obstacle to a timely resolution of cases brought before it. These concerns have been carefully considered and have been found to be without foundation, particularly when viewed in the context of the added assurance of a thorough adjudication which is afforded by the Board's appellate process. As previously indicated, pursuant to Sections 8.6(a) and 8.9(a), the Board is empowered to decline review in certain enumerated instances, and in addition pursuant to Section 8.1(d) the Board shall not hear appeals on the merits filed by parties against whom default judgment has been entered pursuant to the provisions of Part 6 of this Title.

Classification

This rule is procedural in character. Therefore, this rule is not classified as a "major rule" under Executive Order 12291 on Federal Regulations, because it is not likely to result in: (1) An annual effect on the economy of $100 million or more; (2) a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; or (3) significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. Accordingly, no regulatory impact analysis is required.

The Department believes that the rule will have no "significant economic impact on a substantial number of small entites" within the meaning of § 3(a) of the Regulatory Flexibility Act, Pub. L. No. 96-354, 91 Stat. 1164 (5 U.S.C. 605(b)). The Secretary has certified to the Chief Counsel for Advocacy of the Small Business Administration to this effect. This conclusion is reached because the rule is procedural in character. Accordingly, no regulatory flexibility analysis is required.

The rule is not subject to section 3504(h) of the Paperwork Reduction Act, 44 U.S.C. 3504(h), since it does not require the collection or retention of information.

Effective Date

Final rules for the Service Contract Act, 29 CFR Part 4, which were published in the **Federal Register** on October 27, 1983 (48 FR 49736), became effective on January 27, 1984 (48 FR 56577). This Part 8 contains procedures for administrative appeals from decisions made under Part 4 and under Part 6, published this date. In order to preserve uninterrupted such appellate rights, it is essential that this Part 8 become effective as soon as possible. Accordingly, the Secretary has determined that good cause exists for waiving the customary requirements of delaying the effective date of a final rule for at least 30 days after its publication. 5 U.S.C. 553(d). This rule, therefore, will become effective immediately upon publication.

List of Subjects in 29 CFR Part 8

Administrative practice and procedures, Government contracts, Labor, Minimum wages, Wages.

Accordingly, 29 CFR Part 8 is adopted as a final rule as set forth below.

Signed at Washington, D.C. on this 13th day of March 1984.

Raymond J. Donovan,

Secretary of Labor.

PART 8—PRACTICE BEFORE THE BOARD OF SERVICE CONTRACT APPEALS

Subpart A—Purpose and Scope

Sec.
8.0 Interim procedures.
8.1 Purpose and scope.

Subpart B—Review of Wage Determinations

8.2 Who may file petitions for review.
8.3 When to file.

8.5 Filing of wage determination record.
8.6 Disposition by the Board of Service Contract Appeals.

Subpart C—Review of Other Proceedings and Related Matters

8.7 Review of decisions in other proceedings.
8.8 Filing of administrative record.
8.9 Disposition by the Board of Service Contract Appeals.

Subpart D—General Procedural Matters

8.10 Filing and service.
8.11 Presentations of other interested persons.
8.12 Intervention; other participation.
8.13 Right to counsel.
8.14 Consolidations.
8.15 Motions; extensions of time.
8.16 Oral proceedings.
8.17 Decision of the Board.
8.18 Public information.
8.19 Equal Access to Justice Act.

Authority: Secs. 4 and 5, 79 Stat. 1034, 1035, as amended by 86 Stat. 789, 790, 41 U.S.C. 353, 354; 5 U.S.C. 301; Reorg. Plan No. 14 of 1950, 64 Stat. 1267, 5 U.S.C. Appendix; 76 Stat. 357–359, 40 U.S.C. 327–332.

Subpart A—Purpose and Scope

§ 8.0 Interim procedures.

The Secretary of Labor shall establish a Board of Service Contract appeals, by Secretary's Order and delegate to the Board the authority and responsibilities set forth herein. During the interim period prior to the appointment of a duly constituted Board, the functions of the Board shall be performed by the Secretary or his designee. In all other respects the rules in this part shall be applicable, unless inconsistent herewith.

§ 8.1 Purpose and scope.

(a) This part contains the rules of practice of the Board of Service Contract Appeals (hereinafter referred to as the Board).

(b) The Board has jurisdiction to hear and decide in its discretion appeals concerning questions of law and fact from final decisions of the Administrator of the Wage and Hour Division or authorized representative, and from decisions of Administrative Law Judges under Subparts B, D, and E of Part 6 of this title, arising under the Service Contract Act and the Contract Work Hours and Safety Standards Act where the contract is also subject to the Service Contract Act. The Board shall not have jurisdiction to pass on the validity of any portion of the Code of Federal Regulations which has been duly promulgated through notice and comment by the Department of Labor and shall observe the provisions thereof, where pertinent, in its decisions. The jurisdiction of the Board includes:

(1) Wage determinations issued under the Service Contract Act;

(2) Substantial variance proceedings or arm's-length negotiations proceedings pursuant to Section 4(c) of the Service Contract Act;

(3) Debarment or other enforcement proceedings;

(4) Proceedings to determine substantial interest of debarred persons or firms;

(5) Decisions of the Wage-Hour Administrator or authorized representative regarding recommendations of a Federal agency for adjustment or waiver of liquidated damages assessed under the Contract Work Hours and Safety Standards Act;

(6) Other final actions of the Wage-Hour Administrator or authorized representative (e.g., additional classification actions and rulings with respect to application of the Act(s), or the regulations, or of wage determinations issued thereunder).

(7) Other matters specifically referred to the Board by the Secretary of Labor.

(c) In considering the matters within the scope of its jurisdiction the Board shall act as the authorized representative of the Secretary of Labor and shall act as fully and finally as might the Secretary of Labor concerning such matters.

(d) The Board is an appellate body and shall decide cases properly brought before it on the basis of all relevant matter contained in the entire record before it. Decisions by the Board shall be based upon the preponderance of the evidence before it. It may remand with appropriate instructions any case for the taking of additional evidence and the making of new or modified findings by reason of the additional evidence. However, unless the petition for review cities alleged procedural irregularities in the proceeding below and not the merits of a case, the Board shall not consider a petition for review filed by any party against whom default judgment has been entered pursuant to the provisions of Part 6 of this Title.

Subpart B—Review of Wage Determinations

§ 8.2 Who may file petitions of review.

(a) Any interested party who is seeking a modification of other change in a wage determination under the Service Contract Act and who has requested the Wage-Hour Administrator or authorized representative to make such modification or other change under § 4.55 of Part 4 of this title, and the request has been denied, shall have a right to petition of review of the action taken by that officer.

(b) For purposes of this subpart, the term "interested party" shall mean:

(1) Any employee or any labor organization which represents an employee who is likely to be employed or to seek employment under a contract containing a particular wage determination, or any contractor or an association representing a contractor who is likely to seek a contract or to work under a contract containing a particular wage determination;

(2) The Federal agency(s) which will administer a proposed contract containing a particular wage determination issued pursuant to the Service Contract Act; and

(3) Any other party whom the Board finds to have a sufficient interest in the wage determination.

§ 8.3 When to file.

(a) Requests for review of wage determinations must be filed within 20 days of issuance of the Wage-Hour Administrator's decision denying a request to make a change in the wage determination.

(b) The Board shall under no circumstances request any administering agency to postpone any contract action because of the filing of a petition.

§ 8.4 Contents of petition.

(a) A petition for review of a wage determination shall:

(1) Be in writing and signed by the petitioner or his/her counsel (or other authorized representative);

(2) Be addressed to the Board of Service Contract Appeals;

(3) Identify clearly the wage determination, location where the contract will be performed, if known, and the agency concerned;

(4) State that the petitioner has requested reconsideration of the wage determination in question pursuant to 29 CFR 4.55 and describe briefly the action taken in response to the request;

(5) Contain a short and plain statement of the grounds for review;

(6) Be accompanied by supporting data, views, or arguments; and

(7) Contain a statement that all data or other evidence submitted have previously been submitted to the Administrator.

(b) A petition shall indicate whether or not the petitioner consents to the disposition of the questions involved by a single member of the Board.

§ 8.5 Filing of wage determination record.

The Associate Solicitor for Fair Labor Standards shall, promptly after service of the petition, file with the Board the record upon which the wage determination was based. Under no circumstances shall source data obtained by the Bureau of Labor Statistics, U.S. Department of Labor, or the names of establishments contacted by the Bureau be filed with the Board or otherwise disclosed. Where the Bureau has conducted a survey, the published summary of the data may be filed.

§ 8.6 Disposition by the Board of Service Contract Appeals.

(a) The Board may decline review of any case whenever in its judgment review would be inappropriate because of lack of timeliness, the nature of the relief sought, the case involves only settled issues of law, the appeal is frivolous on its face, or other reasons. A

case will be reviewed upon the affirmative vote of one member.

(b) Except as provided in paragraphs (c) and (d) of this section, the Board will not review a wage determination after award, exercise of option, or extension of a contract, unless such procurement action was taken without the wage determination required pursuant to §§ 4.4 and 4.5 of Part 4 of this title.

(c) A wage determination may be reviewed after award, exercise of option, or extension of a contract if it is issued after a finding by an Administrative Law Judge or the Board that a substantial variance exists between collectively bargained wage rates and/or fringe benefits otherwise required to be paid pursuant to Section 4(c) of the Act and those prevailing for services of a character similar in the locality, or after a finding that such collective bargaining agreement was not reached as a result of arm's length negotiations.

(d) Where a petition for review of a wage determination is filed prior to award, exercise of option, or extension of a contract, the Board may review the wage determination after such award, exercise of option, or extension of a contract if the issue is a significant issue of general applicability. The Board's decision shall not affect the contract after such award, exercise of option, or extension.

(e) In issuing its decision the Board will act expeditiously, taking into consideration procurement deadlines. The Board shall decide the case upon the basis of all relevant matters contained in the entire record before it and shall not consider any data not submitted to the Wage-Hour Administrator with the request for reconsideration. The Board in its decision affirming, modifying, or setting aside the wage determination, shall include a statement of reasons or bases for the actions taken. In any remand of a case as provided in § 8.1(d) of this title, the Board shall include appropriate instructions.

Subpart C—Review of Other Proceedings and Related Matters

§ 8.7 Review of decisions in other proceedings.

(a) A petition for review of a decision of an Administrative Law Judge pursuant to Subparts B, D or E of Part 6 of this title may be filed by any aggrieved party in accordance with the provisions therein.

(b) A petition for review of a final written decision (other than a wage determination) of the Administrator or authorized representative may be filed by any aggrieved party within 60 days of the date of the decision of which review is sought. Where a case has been referred directly to the Board pursuant to § 4.11 or § 4.12 of this title, no petition for review shall be necessary; a brief in support of the aggrieved party's position shall be filed within 30 days of filing of the administrative record by the Administrator.

(c) A petition shall state concisely the points relied upon, and shall be accompanied by a statement setting forth supporting reasons. The petition shall also indicate whether or not the petitioner consents to the disposition of the questions involved by a single member.

§ 8.8 Filing of administrative record.

(a) If a petition for review has been filed concerning a decision pursuant to Part 6 of this title, the Chief Administrative Law Judge shall promptly forward the record of the proceeding before the Administrative Law Judge to the Board.

(b) If a petition for review has been filed concerning a final decision of the Wage-Hour Administrator or authorized representative, the Associate Solicitor for Fair Labor Standards shall promptly file with the Board a record upon which the decision was based.

§ 8.9 Disposition by the Board of Service Contract Appeals.

(a) The Board may decline review of any case whenever in its judgment review would be inappropriate because of lack of timeliness, the nature of the relief sought, the case involves only settled issues of law, the appeal is frivolous on its face, or other reasons. A case will be reviewed upon the affirmative vote of one member.

(b) In issuing its decision the Board will take into consideration procurement deadlines where appropriate. The Board shall pass upon the points raised in the petition upon the basis of the entire record before it. The Board may affirm, modify or set aside, in whole or in part, the decision under review and shall issue a decision including a statement of reasons or bases for the actions taken. The Board shall modify or set aside findings of fact only when it determines that those findings are not supported by a preponderance of the evidence. In any remand of a case as provided in § 8.1(e) of this title, the Board shall include any appropriate instructions.

Subpart D—General Procedural Matters

§ 8.10 Filing and service.

(a) *Filing.* All papers submitted to the Board under this part shall be filed with the Executive Secretary of the Board of Service Contract Appeals, U.S. Department of Labor, Washington, D.C. 20210.

(b) *Number of copies.* An original and four copies of all papers shall be submitted.

(c) *Manner of service.* Service under this part shall be personal or by mail. Service by mail is complete on mailing. For purposes of this part, filing is accomplished upon the day of service, by mail or otherwise.

(d) *Proof of service.* Papers filed with the Board shall contain an acknowledgement of service by the person served or proof of service in the form of a statement of the date and the manner of service and the names of the person or persons served, certified by the person who made service.

(e) *Service upon the Department of Labor and other interested parties.* A copy of all documents filed with the Board shall be served upon the Associate Solicitor, Division of Fair Labor Standards, U.S. Department of Labor, Washington, D.C. 20210; the Administrator, Wage and Hour Division, U.S. Department of Labor, Washington, D.C. 20210; the Federal contracting agency involved; and all other interested parties.

§ 8.11 Presentations of other interested persons.

(a) Where a petition has been filed for review of a wage determination or other final decision of the Administrator or authorized representative, the Board shall notify the parties known or believed to be interested in the case. The Associate Solicitor and any other parties interested in presenting their views shall file a statement within 30 days of the filing of the petition (or such other time as is specified by the Board, with consideration of procurement deadlines, as appropriate).

(b) Where a petition has been filed for review of a decision issued pursuant to Subparts B, D or E of Part 6 of this title, any other parties to the proceeding interested in presenting their views shall file a statement within 30 days of the filing of the petition (or such other time as is specified by the Board, with consideration of procurement deadlines, as appropriate).

§ 8.12 Intervention; other participation.

For good cause shown, the Board may permit any interested party to intervene or otherwise participate in any proceeding held by the Board. Except when requested orally before the Board, a petition to intervene or otherwise participate shall be in writing (original and four copies) and shall state with precision and particularity:

(a) The petitioner's relationship to the matters involved in the proceedings, and

(b) The nature of the presentation which the peititioner would make.

§ 8.13 Right to counsel.

Each interested party shall have the right to appear in person or by counsel or other representative in any proceeding before the Board.

§ 8.14 Consolidations.

Upon its own initative or upon motion of any interested party, the Board may consolidate any proceeding or concurrently consider two or more appeals which involve substantially the same parties, or issues which are the same or closely related, if it finds that such consolidation or concurrent review will contribute to a proper dispatch of its business and to the ends of justice, and it will not unduly delay consideration of any such appeals.

§ 8.15 Motions; extensions of time.

(a) Except as otherwise provided in this part, any application for an order or other relief shall be made by motion. Except when made orally before the Board, motions shall be in writing and shall be accompanied by proof of service on all other parties. If a motion is supported by briefs, affidavits, or other papers, they shall be served and filed with the motion. Any party may respond to the motion within such time as may be provided by the Board.

(b) Requests for extension of time as to the filing of papers or oral presentation shall be in the form of a motion under paragraph (a) of this section.

§ 8.16 Oral proceedings.

(a) With respect to any proceedings before it, the Board may upon its own initative or upon request of any interested party direct the interested parties to appear before the Board or its designee at a specified time and place in order to simplify the issues persented or to take up any other matters which may tend to expedite or facilitate the disposition of the proceeding.

(b) In its discretion, the Board or a single presiding member may permit oral argument in any proceeding. The Board or the presiding member shall prescribe the time and place for argument and the time allocated for argument. A petitioner wishing to make oral argument should make the request therefore in the petition.

§ 8.17 Decision of the Board.

(a) Unless the petitioner consents to disposition by a single member, decisions of the Board shall be by majority vote.

(b) Where petitioner consents to disposition by a single member, other interested parties shall have an opportunity to oppose such disposition, and such opposition shall be taken into consideration by the Board in determining whether the decision shall be by a single member or majority vote.

§ 8.18 Public information.

Subject to the provisions of Part 70 of this title, all papers and documents made a part of the official record in the proceedings of the Board and decisions of the Board shall be made available for public inspection during usual business hours at the Office of the Board of Service Contract Appeals, U.S. Department of Labor, Washington, D.C. 20210.

§ 8.19 Equal Access to Justice Act.

Proceedings under the Service Contract Act and the Contract Work Hours and Safety Standards Act are not subject to the Equal Access to Justice Act (Pub. L. 96–481). Accordingly, in any proceeding conducted pursuant to the provisions of this Part 8, the Board shall have no power or authority to award attorney fees and/or other litigation expenses pursuant to the Eqaul Access to Justice Act.

March 21, 1984

Part V

Department of Energy

Federal Energy Regulatory Commission

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978; Notice

DEPARTMENT OF ENERGY

[Vol. 1086]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: March 16, 1984.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register.**

Source data from the Form 121 for this and all previous notices in available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd, Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–GS: Coal Seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation

Section 108: Stripper well
108–SA: Seasonally affecte
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-C

[Vol. 1087]

Determinations by Jurisdictional Agencies Under the Natural Gas Policy Act of 1978

Issued: March 16, 1984.

The following notices of determination were received from the indicated jurisdictional agencies by the Federal Energy Regulatory Commission pursuant to the Natural Gas Policy Act of 1978 and 18 CFR 274.104. Negative determinations are indicated by a "D" before the section code. Estimated annual production (PROD) is in million cubic feet (MMCF).

The applications for determination are available for inspection except to the extent such material is confidential under 18 CFR 275.206, at the Commission's Division of Public Information, Room 1000, 825 North Capitol St., Washington, D.C. Persons objecting to any of these determinations may, in accordance with 18 CFR 275.203 and 275.204, file a protest with the Commission within fifteen days after publication of notice in the **Federal Register**.

Source data from the Form 121 for this and all previous notices is available on magnetic tape from the National Technical Information Service (NTIS). For information, contact Stuart Weisman (NTIS) at (703) 487–4808, 5285 Port Royal Rd, Springfield, Va 22161.

Categories within each NGPA section are indicated by the following codes:

Section 102–1: New OCS lease
102–2: New well (2.5 Mile rule)
102–3: New well (1000 Ft rule)
102–4: New onshore reservoir
102–5: New reservoir on old OCS lease.

Section 107–DP: 15,000 feet or deeper
107–GB: Geopressured brine
107–CS: Coal seams
107–DV: Devonian Shale
107–PE: Production enhancement
107–TF: New tight formation
107–RT: Recompletion tight formation.

Section 108: Stripper well
108–SA: Seasonally affected
108–ER: Enhanced recovery
108–PB: Pressure buildup

Kenneth F. Plumb,
Secretary.

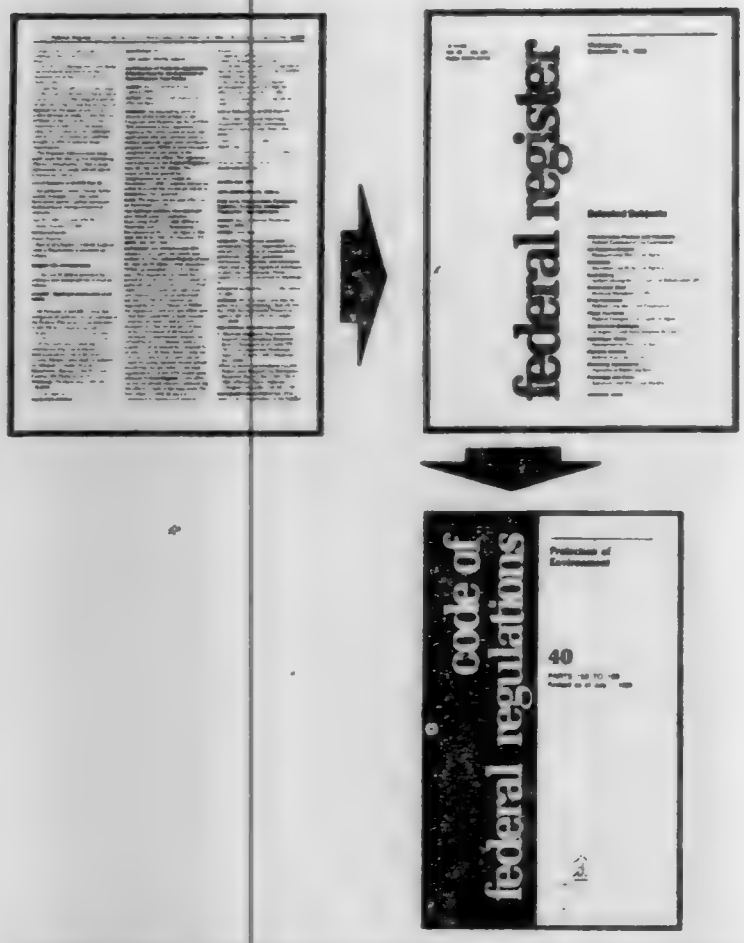
List of Public Laws

Note: No public bills which have become law were received by the Ofice of the Federal Register for inclusion in today's **List of Public Laws.**

Last List March 20, 1984

The Federal Register

Regulations appear as agency documents which are published daily in the **Federal Register** and codified annually in the **Code of Federal Regulations**



The **Federal Register**, published daily, is the official publication for notifying the public of proposed and final regulations. It is the tool for you to use to participate in the rulemaking process by commenting on the proposed regulations. And it keeps you up to date on the Federal regulations currently in effect.

Mailed monthly as part of a **Federal Register** subscription are: the LSA (List of CFR Sections Affected) which leads users of the **Code of Federal Regulations** to amendatory actions published in the daily **Federal Register**; and the cumulative **Federal Register Index.**

The **Code of Federal Regulations** (CFR) comprising approximately 180 volumes contains the annual codification of the final regulations printed in the **Federal Register.** Each of the 50 titles is updated annually.

Subscription Prices:

- **Federal Register**
  - **Paper:**
    - One year as issued: $300 domestic; $375 foreign
    - Six months: $150 domestic; $187.50 foreign
  - **24x Microfiche Format:**
    - One year as issued: $175 domestic; $218.75 foreign
    - Six months: $87.50 domestic; $109.40 foreign
- **Code of Federal Regulations**
  - **Paper:**
    - One year as issued: $550.00 domestic; $687.50 foreign
    - Single volumes: Individually priced.
  - **24x Microfiche Format:**
    - Current year (as issued): $200 domestic; $250 foreign
    - Previous year's full set (single shipment): $155 domestic; $193.75 foreign

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for six months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

Title 3—

The President

Proclamation 5165 of March 20, 1984

Afghanistan Day, 1984

By the President of the United States of America

A Proclamation

For much of the world spring is now beginning. It is a time of new life, renewal, freshness, and hope.

For the people of Afghanistan, March 21 is the traditional celebration of the New Year, the beginning of the cycle of life. It is a period of rejoicing and celebration for life's regeneration as a gift of God.

But today, for most of the people of Afghanistan, the March 21 New Year brings only the renewal of fighting, destruction, and death. For more than four years, the armed forces of the Soviet Union have occupied Afghanistan. More than 100,000 Soviet soldiers now occupy that beleaguered country. The overwhelming majority of the Afghan people are struggling against the Soviet occupation troops and the puppet regime headed by Babrak Karmal. It is a regime that is maintained only by Soviet force.

Afghan resistance to Marxist rule grew dramatically after the Soviet invasion, and it has now spread throughout the country. A solution to the Afghanistan problem must begin with the removal of the Soviet troops. A negotiated political settlement can be achieved if the Soviet Union agrees to withdraw its military forces of occupation.

The goal of United States policy remains clear and consistent. We seek the removal of Soviet military forces so that the Afghan people can live freely in their own country and are able to choose their own way of life and government.

Hope, it is said, springs eternal. We continue to hope that a negotiated settlement can be found, a settlement which fulfills the conditions spelled out five times in resolutions resoundingly endorsed by the General Assembly of the United Nations.

These resolutions, passed by the overwhelming majority of the world's nations, call for the immediate withdrawal of foreign troops from Afghanistan; reaffirm the right of the Afghan people to determine their own form of government and to choose their economic, political, and social system; reiterate that the preservation of the sovereignty, territorial integrity, political independence, and nonaligned character of Afghanistan is essential for a peaceful solution of the problem; and call for the creation of the conditions which would enable the Afghan refugees to return voluntarily to their homes in safety and honor.

We stand in admiration of the indomitable will and courage of the Afghan people who continue their resistance to tyranny. All freedom-loving people around the globe should be inspired by the Afghan people's struggle to be free and the heavy sacrifices they bear for liberty.

Afghanistan Day will serve to recall the fundamental principles involved when a people struggles for the freedom to determine its own future and the right to be free of foreign interference. Let us therefore resolve to pay tribute to the brave Afghan people by observing March 21, 1984 as Afghanistan Day.

Let us pledge our continuing admiration for their cause and for their perseverance, and lend our support to the Afghan refugees in Pakistan.

Let us redouble our determination to help find a negotiated settlement that will enable the Afghan people to again welcome spring without the suffering brought by war, but with celebration and joy.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim March 21, 1984, as Afghanistan Day.

IN WITNESS WHEREOF, I have hereunto set my hand this 20th day of March, in the year of our Lord nineteen hundred and eighty-four, and of the Independence of the United States of America the two hundred and eighth.

Ronald Reagan

Vol. 49, No. 57
Thursday, March 22, 1984

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 984

Walnuts Grown in California; Free and Reserve Percentages for the 1983–84 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule establishes free and reserve percentages of 76 percent and 24 percent, respectively, for California walnuts certified as merchantable during the 1983–84 marketing year, which began August 1, 1983. The rule is designed to allocate this season's supplies between domestic and export markets so as to make ample supplies available for domestic needs and all of the excess merchantable walnuts available for export. The percentages are authorized by the Federal marketing order for walnuts grown in California.

EFFECTIVE DATES: August 1, 1983 through July 31, 1984.

FOR FURTHER INFORMATION CONTACT: Frank M. Grasberger, Acting Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, USDA, Washington, D.C. 20250, (202) 447–5053.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

It is found that good cause exists for not postponing the effective time of this action until 30 days after publication in the **Federal Register** (5 U.S.C. 553). The relevant provisions of the order require that the free and reserve percentages established for a particular marketing year shall apply to all walnuts certified as merchantable from the beginning of that year. The 1983–84 marketing year began August 1, 1983.

Notice of this action was published in the January 16, 1984, issue of the **Federal Register** (49 FR 1909), and interested persons were afforded an opportunity to submit written comments. No comments were received.

The authority to establish free and reserve percentages is pursuant to § 984.49 of the marketing agreement and Order No. 984, both as amended (7 CFR Part 984), regulating the handling of walnuts grown in California and hereinafter referred to collectively as the "order." The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The proposal was unanimously recommended by the Walnut Marketing Board, hereinafter referred to as the "Board," which works with USDA in administering the order.

Pursuant to § 984.48 of the order, the Board based its recommendation for free and reserve percentages of 76 percent and 24 percent, respectively, on estimates of supply and combined inshell and shelled domestic trade demand for the current marketing year. Estimated trade demand was adjusted to account for supplies of certified walnuts carried in from the 1982–83 marketing year and for supplies deemed desirable to be carried out on July 31, 1983, for early season domestic use next marketing year until the 1984 crop is available for market.

The estimated 1983 production is well in excess of the 1983–84 marketing year domestic needs. While the proposal is designed to tailor the supply to domestic demand, it would still ensure the availablity of ample supplies of walnuts for domestic markets during that year and promote maximum usage.

Supplies in excess of domestic needs would be available chiefly for export. Handlers may also obtain reserve disposition credit for disposing of substandard walnuts in oil, feed, or other outlets the Board determines to be noncompetitive with existing domestic and export markets for merchantable walnuts.

The Board used the estimates given in the table below in making its recommendation for the 1983–84 marketing year. Weight figures for inshell walnuts are converted to their equivalent shelled kernel weights.

	Inshell weight (1,000 lbs)	Conversion factor (per-cent)	Kernel weight (1,000 lbs)
SUPPLY			
1. Orchard-Run production	[illegible]		
2. Less: Miscellaneous farm use	[illegible]		
3. Commercial production	[illegible]	[illegible]	143,200
4. Plus:			
Uncertified carryin inshell	11,578	[illegible]	5,210
Uncertified carryin shelled			[illegible]
5. Total merchantable supply			178,490
6. Plus: Substandard creditable for reserve			8,000
7. Total supply subject to regulation			[illegible]
DEMAND			
8. Inshell demand	[illegible]		
9. Plus: Desirable carryout	[illegible]		
10. Less: Certified carryin	12,677		
11. Adjusted inshell demand	[illegible]	45	[illegible]
12. Shelled demand			[illegible]
13. Plus: Desirable carryout			[illegible]
14. Lessess: Certified carryin			31,740
15. Adjusted shelled demand			110,760
16. Total demand (item 11 + item 15)			141 955
MARKETING PERCENTAGES			
17. Free percentage (item 16 ÷ item 7) 76% (75.6% rounded up by the Board)			
18. Reserve percentage (100% – item 17) 24% (24.4% rounded down by the Board)			

List of Subjects in 7 CFR Part 984

Marketing agreement and orders, Walnuts, California.

After consideration of all relevant matter presented, including that in the notice, the information and recommendation submitted by the Board, and other available information, it is further found that establishment of the free and reserve percentages under the order, as hereinafter set forth, will tend to effectuate the declared policy of the act.

PART 984—[AMENDED]

Therefore, § 984.229 is added to 7 CFR Part 984 as follows: [This section will not appear in the Code of Federal Regulations).

§ 984.229 Free and reserve percentages for California walnuts during the 1983–84 marketing year.

The free and reserve percentages for California walnuts during the marketing year beginning August 1, 1983, shall be 76 percent and 24 percent, respectively.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 16, 1984.

Russell L. Hawes,

Acting Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410-02-M

7 CFR Part 985

Spearmint Oil Produced in the Far West; Establishment of Salable Quantities and Allotment Percentages for the 1984–85 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule establishes the quantity of spearmint oil produced in the Far West, by class, that may be purchased from, or handled for, producers by handlers during the 1984–85 marketing year which begins June 1, 1984. This action is taken under the marketing order for spearmint oil produced in the Far West to promote orderly marketing conditions. The proposal was recommended by the Spearmint Oil Administrative Committee which works with USDA in administering the order.

EFFECTIVE DATE: June 1, 1984 through May 31, 1985.

FOR FURTHER INFORMATION CONTACT: Frank M. Grasberger, Acting Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–5053.

SUPPLEMENTARY INFORMATION: This final rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

Notice of this action was published in the February 8, 1984, issue of the **Federal Register** (49 FR 4763), and interested persons were afforded an opportunity to submit written comments. No comments were received.

The salable quantity and allotment percentage for each class of spearmint oil are established in accordance with the provisions of Marketing Order No. 985, regulating the handling of spearmint oil produced in the Far West, hereinafter referred to as the "order". The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The salable quantities and allotment percentages were recommended by the Spearmint Oil Administrative Committee, which works with the USDA in administering the order.

The salable quantity and allotment percentage established for each class of spearmint oil for the 1984–85 marketing year beginning June 1, 1984, are based upon recommendations of the Committee and the following data and estimates:

(1) "Class 1" Oil (Scotch Spearmint).

(A) Estimated carryin on June 1, 1984—186,769 pounds.

(B) Estimated trade demand (domestic and export) for the 1984–85 marketing year based on prior 3-year average sales—728,467 pounds.

(C) Recommended desirable carryout on May 31, 1985—50,000 pounds.

(D) Salable quantity required from 1984 production—591,698 pounds.

(E) Total allotment bases for "Class 1" Oil—1,602,434 pounds.

(F) Computed allotment percentage—36.9 percent.

(G) The Committee's recommendation for the salable quantity—673,022 pounds.

(H) Recommended allotment percentage—42 percent.

(2) "Class 3" Oil (Native Spearmint).

(A) Estimated carryin on June 1, 1984—206,227 pounds.

(B) Estimated trade demand (domestic and export) for the 1984–85 marketing year based on 3-year average sales—811,508 pounds.

(c) Recommended desirable carryout on May 31, 1985—0 pounds.

(D) Salable quantity required from 1984 production—605,281 pounds.

(E) Total allotment bases for "Class 3" Oil—1,774,169 pounds.

(F) Computed allotment percentage—34.1 percent.

(G) The Committee's recommendation for the salable quantity—745,151 pounds.

(H) Recommended allotment percentage—42 percent.

The salable quantity is the total quantity of each class of oil which handlers may purchase from or handle on behalf of producers during a marketing year. Each producer is allotted a share of the salable quantity by applying the allotment percentage to his allotment base for the applicable class.

In conformity with the order's provisions, the Committee conducted a drawing on October 4, 1983, and issued additional allotment bases to both new and existing producers for the 1984–85 marketing year. New producers were issued allotment bases in units of 1,823 pounds for "Class 1" Oil and 2,205 pounds for "Class 3" Oil. Existing producers who had initially received small allotment bases and applied for additional allotment base were issued an amount of allotment base that would bring their total base up to a more economic unit. The issuance of the additional allotment bases increased the total of "Class 1" Oil bases by 26,450 pounds and "Class 3" Oil by 10,077 pounds.

The Committee's recommendations are based on expected increased sales of spearmint oil during the 1984–85 marketing year and a further reduction in the quantity of spearmint oil held by producers. The Committee's recommendations appear appropriate for the 1984–85 season and are expected to aid in achieving the objectives of the act of maintaining a stable market for each class of oil and promoting orderly marketing.

After consideration of all relevant matter presented, including the information and recommendations submitted by the Committee, and other available information, it is found that to establish a salable quantity and allotment percentage for each class of oil, as hereinafter set forth, will tend to effectuate the declared policy of the act.

List of Subjects in 7 CFR Part 985

Marketing agreements and orders, Spearmint oil.

PART 985—[AMENDED]

Therefore, a new § 985.204 under Subpart—Salable Quantities and Allotment Percentages is added to read as follows: (The following provisions will not be published in the Code of Federal Regulations).

§ 985.204 Salable quantities and allotment percentages—1984–85 marketing year.

The salable quantity and allotment percentage for each class of spearmint oil during the marketing year which begins June 1, 1984, shall be as follows:

(a) "Class 1" Oil—a salable quantity of 673,022 pounds, and an allotment percentage of 42 percent.

(b) "Class 3" Oil—a salable quantity of 745,151 pounds, and an allotment percentage of 42 percent.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 19, 1984.

7 CFR Part 985

Spearmint Oil Produced in the Far West; Revision of the Salable Quantity and Allotment Percentage for "Class 3" Native Spearmint Oil for the 1983–84 Marketing Year

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Emergency final rule.

SUMMARY: This emergency final rule increases the quantity of "Class 3" Native Spearmint Oil produced in the Far West that may be purchased from, or handled for, producers by handlers during the 1983–84 marketing year. That year began June 1, 1983. This action is taken under the marketing order for spearmint oil produced in the Far West to promote orderly marketing conditions and was recommended unanimously by the Spearmint Oil Administrative Committee, which works with the USDA in administering the spearmint oil marketing order.

EFFECTIVE DATE: June 1, 1983 through May 31, 1984.

FOR FURTHER INFORMATION CONTACT: Frank M. Grasberger, Acting Chief, Specialty Crops Branch, Fruit and Vegetable Division, AMS, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–5053.

SUPPLEMENTARY INFORMATION: This emergency final rule has been reviewed under USDA guidelines implementing Executive Order 12291 and Secretary's Memorandum No. 1512–1 and has been classified a "non-major" rule under criteria contained therein.

William T. Manley, Deputy Administrator, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities.

It is found that it is impractical, unnecessary, and contrary to the public interest to give preliminary notice because an emergency situation exists which warrants publication and implementation of this action without opportunity for a public comment period. This emergency final action would increase the salable quantity and allotment percentage for "Class 3" Native Spearmint Oil for the 1983–84 marketing year. It relieves restrictions on handlers by increasing the quantity of "Class 3" Oil that may be freely marketed immediately and should be effective as soon as possible to enable handlers to satisfy current market needs for "Class 3" Oil. In the absence of this action being made effective promptly, the price of "Class 3" Oil could rise to high levels and defeat the Committee's goal of maintaining stable marketing conditions at reasonable prices.

Further, under this marketing program, the salable quantity and allotment percentage established for a class of oil for a particular marketing year, and any revisions thereof, apply during the entire marketing year. The current marketing year began June 1, 1983, and the revisions made herein will automatically apply beginning with that date. Handlers are aware of this action and need no advance notice.

Therefore, pursuant to the administrative procedure provisions in 5 U.S.C. 553, it is found upon good cause that notice and other public procedures with respect to this emergency final action are impractical and contrary to the public interest; and good cause is found for making this emergency final action effective less than 30 days after publication of this document in the **Federal Register**.

The Spearmint Oil Administrative Committee has recommended unanimously that the salable quantity and allotment percentage for "Class 3" Native Spearmint Oil for the 1983–84 marketing year be increased. The salable quantity and allotment percentage for that class of oil was issued on April 22, 1983, and published in the **Federal Register** on April 29, 1983 (§ 985.203; 48 FR 19357). The revision would increase the salable quantity from 867,901 pounds to 1,045,024 pounds and increase the salable percentage from 49 percent to 59 percent. The Committee is established under, and its recommendations are made pursuant to the provisions of Marketing Order No. 985, regulating the handling of spearmint oil produced in the Far West, hereinafter referred to collectively as the "order" (7 CFR Part 985). The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The revision is pursuant to § 985.51 of the marketing order program.

The salable quantity is the total quantity of a class of oil which handlers may purchase from or handle on behalf of producers during a marketing year. Each producer is allotted a share of the salable quantity by applying the allotment percentage to the producer's allotment base for that class of oil.

The market for "Class 3" Oil has strengthened dramatically in the last few months and in order to keep prices at reasonable levels a higher salable quantity and allotment percentage for "Class 3" Oil are required. To meet current market needs and maintain stable prices for "Class 3" Oil, the Committee recommended a salable quantity of 1,045,024 pounds and an allotment percentage of 59 percent. The salable percentage is computed by dividing the salable quantity by 1,771,227 pounds which is the total of all 1983 crop allotment bases.

The Committee determined that an additional 80,000 pounds of "Class 3" Oil was needed to meet current market needs. However, because some producers had already used their reserve pool oil to fill their individual production deficits (as authorized under § 985.57(b)) the Committee had to increase the salable quantity by 177,123 pounds to make an additional 79,782 pounds available for current market needs.

After consideration of all relevant matter presented, including that in the action issued on April 22, 1983, in connection with the initial establishment of the salable quantity and allotment percentage for "Class 3" Oil, the information and recommendation submitted by the Committee, and other available information, it is found that to amend § 985.203 (48 FR 19357) so as to change the salable quantity and allotment percentage for "Class 3" Native Spearmint Oil, as set forth below, will tend to effectuate the declared policy of the act.

List of Subjects in 7 CFR Part 985

Marketing agreements and orders, Spearmint oil.

PART 985—[AMENDED]

Therefore, § 985.203 is amended by revising paragraph (c) to read as follows: (The following provisions will not be published in the Code of Federal Regulations).

§ 985.203 Salable quantities and allotment percentages—1983–84 marketing year.

* * * * *

(c) Class "3" Oil—a salable quantity of 1,045,024 pounds and an allotment percentage of 59 percent.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Dated: March 16, 1984.

BILLING CODE 3410-02-M

---

7 CFR Part 1033

[Milk Order No. 33]

Milk in the Ohio Valley Marketing Area; Order Suspending Certain Provisions

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Suspension of rule.

SUMMARY: This action continues for the months of April through August 1984 a previous suspension of certain provisions affecting the regulatory status of fluid milk plants under the Ohio Valley Federal milk order. The suspension makes inoperative the requirement that a distributing plant must dispose of not less than 45 percent of its receipts on routes to qualify as a pool plant.

The action was requested by a proprietary handler operating four distributing plants that are fully regulated under the order. This emergency action is needed to maintain pool status for the handler's distributing plants and to assure producer status for dairy farmers who have been associated with such plants and who have regularly supplied the market's fluid milk needs. It is also needed to accommodate the efficient disposition of the market's reserve milk supplies. The suspension is based on the record of a public hearing, held at Columbus, Ohio, on October 12 and 13, 1983, where this particular pooling requirement was an issue.

EFFECTIVE DATE: April 1, 1984.

FOR FURTHER INFORMATION CONTACT: Maurice M. Martin, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447-7183.

SUPPLEMENTARY INFORMATION: Prior documents in this proceeding:

Notice of Hearing: Issued September 26, 1983; published September 29, 1983 (48 FR 44565).

Suspension Order: Issued December 6, 1983; published December 12, 1983 (48 FR 55275).

Suspension Order: Issued December 12, 1983; published December 16, 1983 (48 FR 55829).

Suspension Order: Issued January 12, 1984; published January 17, 1984 (49 FR 1980).

Termination Order: Issued February 24, 1984; published February 29, 1984 (49 FR 7353).

William T. Manley, Deputy Administrator, Marketing Programs, Agricultural Marketing Service, has certified that this action will not have a significant economic impact on a substantial number of small entities. This action lessens the regulatory impact of the order on certain milk handlers and tends to ensure that dairy farmers who supply milk for the area will have their milk priced under the order and thereby receive the benefits that accrue from such pricing.

This order of suspension is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and of the order regulating the handling of milk in the Ohio Valley marketing area.

It is hereby found and determined that for the months of April through August 1984, the following provisions of the order do not tend to effectuate the declared policy of the Act:

In § 1033.12, paragraph (a)(2).

Statement of Consideration

This action is based on the record of a public hearing held on October 12 and 13, 1983, at Columbus, Ohio, to consider certain proposed amendments to the Ohio Valley order. It continues a suspension that has been effective since December 1, 1983 (48 FR 55829 and 49 FR 1910). The action continues for the months of April through August, 1984, to make inoperative the requirement that a distributing plant must dispose of not less than 45 percent of its receipts on routes to qualify as a pool plant.

A continuation of the suspension was requested by Beatrice Foods Company (Beatrice), a proprietary handler who operates four pool distributing plants under the order.

The basis for the handler's request is a continuing downward trend in Class I sales of the handler's distributing plants during a period in which producer receipts have been steadily increasing. The handler claims that recently it has lost more Class I customers so the need for a suspension now is even more acute than it was at the time of the hearing and when it requested the previous suspensions. This situation likely will cause the handler's total route disposition of the four distributing plants to fall below the order's total route disposition requirement for pooling distributing plants. Unless the suspension is continued, it probably will be necessary for the handlers to engage in uneconomic movements of milk merely for the purpose of meeting the order's total route disposition requirement.

At the hearing, a proposed amendment by Beatrice was considered that would reduce the total route disposition requirement by 10 percentage points each month. The proponent testified that the amendment is necessary to accommodate the pooling of all of the milk received at its four distributing plants from producers who historically have been associated with the market. The handler requested that the total route disposition requirement be suspended pending completion of the hearing proceeding.

Whether or not the total route disposition requirement for distributing plants shall be reduced on a permanent basis and to what extent, is a matter to be decided after the hearing record and post-hearing briefs have been thoroughly analyzed. However, there is not adequate time to resolve the handler's pooling problem for the months of April through August 1984 through amendatory action. Continuation of the suspension through August 1984 is the only practical means of providing the immediate relief sought by proponent. Such action is warranted because it will promote orderly marketing pending the final outcome of this issue based on the conclusion of the hearing proceeding.

It is unlikely that this 5-month suspension of the pooling requirement will have a significant adverse impact on producers or handlers serving the market. However, it will eliminate the possibility of a handler making certain uneconomic adjustments to maintain pool plant status for its distributing plants and producer status for the milk of dairy farmers who have been historically associated with such plants and the market's fluid milk needs. Such action also will facilitate the disposal of the market's reserve milk supplies during this 5-month period. For these reasons, the continuation of the suspension through August 1984 should be and hereby is granted.

The handler requested that the suspension apply also to the month of September. It is anticipated that the amendatory process based on the hearing record should be completed by September 1, 1984. Thus, the question of whether or not the total route disposition requirement for pooling distributing plants should be permanently reduced and to what extent would be resolved for the month of September and no suspension would be necessary. If, however, the amendatory process is not completed by September 1, the handler could request a further

suspension at that time. Accordingly, the request to include the month of September in this suspension action is hereby denied.

It is hereby found and determined that notice of proposed rulemaking, public procedure thereon, and thirty days' notice of the effective date hereof are impractical, unnecessary and contrary to the public interest in that:

(a) The suspension is necessary to reflect current marketing conditions and to assure orderly marketing conditions in the marketing area in that substantial quantities of milk of producers who have regularly supplied this market otherwise could be excluded from the market wide pool.

(b) This suspension does not require of persons affected substantial or extensive preparation prior to the effective date; and

(c) The marketing problems that provide the basis for this suspension action were fully reviewed at a public hearing where all interested parties had the opportunity of being heard on this matter.

Therefore, good cause exists for making this order effective April 1, 1984.

List of Subjects in 7 CFR Part 1033

Milk marketing orders, Milk, Dairy products.

PART 1033—[AMENDED]

It is therefore ordered, that the aforesaid provisions in § 1033.12(a)(2) of the Ohio Valley order are hereby suspended for the months of April through August 1984.

Effective Date: April 1, 1984.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674)

Signed at Washington D.C., on March 16, 1984.

14 CFR Part 39

[Docket No. 83–NM–87–AD; Amdt. 39–4832]

Airworthiness Directives; Airbus Industrie Model A300 B2 and B4 Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adds a new airworthiness directive (AD) applicable to Airbus Industrie Model A300 B2 and B4 series airplanes which requires replacement of certain components of the slat and flap transmission systems. At least 13 instances of failure in these transmission systems have been reported. These failures create inoperative slats or flaps which can lead to asymmetrical deployment of flight control surfaces, compromising the controllability of the airplane.

EFFECTIVE DATE: May 14, 1984.

ADDRESSES: The service bulletin specified in this AD may be obtained upon request to Airbus Industrie, Airbus Support Division, Avenue Didier Daurat, 31700 Blagnac, France, or may be examined at the address shown below.

FOR FURTHER INFORMATION CONTACT: Mr. Sulmo Mariano, Foreign Aircraft Certification Branch, ANM–150S, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region, 9010 East Marginal Way South, Seattle, Washington, telephone (206) 431–2979. Mailing address: FAA, Northwest Mountain Region, 17900 Pacific Highway South, C–68966, Seattle, Washington 98168.

SUPPLEMENTARY INFORMATION: The Direction Generale de l'Aviation Civile (DGAC), the civil aviation authority of France, the country of manufacture for the Airbus Industrie Model A300, has classified certain Airbus Industrie (AI) and Lucas Aerospace (LA) service bulletins as mandatory. These service bulletins specify actions necessary to solve reported service difficulties in the flap and slat transmission systems.

A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring inspections, repairs, and modifications, as necessary, of the slat and flap linkages was published in the **Federal Register** on October 31, 1983 (48 FR 50083). The comment period closed December 16, 1983, and interested persons have been afforded an opportunity to participate in the making of this amendment. One comment was received. This commenter stated that he has accomplished the major part of the requirements of the AD and, therefore, there is no reason for issuing a final rule. The FAA disagrees; there are still outstanding French AD's on the subject and no verification that the world fleet of A300 airplanes has accomplished the AD requirements. Hence, the AD is also issued to cover the import of A300 airplanes that may not have completed the required inspections, repairs, and modifications.

The U.S. fleet of A300 airplanes has accomplished most of the requirements of the AD but repetitive inspections and repairs if necessary, must still be accomplished. It is estimated that the cost impact to the U.S. operator will be less than $2,000 per airplane, or less than $52,000 for the entire fleet for each of the repetitive inspections. For these reasons, the final rule is not considered to be a major rule under the criteria of Executive Order 12291. No small entities within the meaning of the Regulatory Flexibility Act will be affected.

Therefore, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

Aviation safety, Aircraft.

PART 39—[AMENDED]

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Airbus Industrie: Applies to Model A300 B2 and B4 series airplanes, certificated in all categories. To prevent failure of the flap and slat control linkages, within 120 days after the effective date of this AD or upon reaching the landing thresholds specified in the service bulletins, whichever occurs later, accomplish the following, unless previously accomplished:

A. Inspect, repair, and modify, as necessary, the slat and flap linkages in accordance with the service bulletins listed below:

Airbus Industrie A300–27–151, Revision 4, dated December 20, 1982;
Airbus Industrie A300–27–150, Revision 2, dated December 20, 1982;
Airbus Industrie A300–27–158, Revision 1, dated March 9, 1982;
Airbus Industrie A300–27–101, Revision 2, dated March 2, 1982;
Lucas Aerospace 704–27–599, Revision 1, dated September 25, 1981;
Lucas Aerospace 704–27–1063, Revision 1, dated October 11, 1982; and
Lucas Aerospace 704–27–602, Revision 1, dated November 27, 1981.

B. Alternate means of compliance which provide an equivalent level of safety may be used when approved by the Manager, Seattle Aircraft Certification Office, FAA, Northwest Mountain Region.

C. Special flight permits may be issued in accordance with FAR 21.197 and 21.199 to operate airplanes to a base for the accomplishment of inspections and/or modifications required by this AD.

This amendment becomes effective May 14, 1984.

(Secs. 313(a), 314(a), 601 through 610, and 1102, Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 through 1430, and 1502); 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.89)

Note.—For the reasons discussed earlier in the preamble, the FAA has determined that this regulation is not considered to be major under Executive Order 12291 or significant under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and it is further certified under the criteria of the Regulatory Flexibility Act that this rule will not have a significant economic effect on a substantial number of small entities because no small entities operate Airbus Industrie Model A300 airplanes. A final evaluation has been prepared for this regulation and has been placed in the docket. A copy of it may be obtained by contacting the person identified under the caption "**FOR FURTHER INFORMATION CONTACT.**"

Issued in Seattle, Washington on March 14, 1984.

Wayne J. Barlow,

Acting Director, Northwest Mountain Region.

14 CFR Part 71

[Airspace Docket No. 84–ASW–4]

Alteration of Transition Area; Sand Springs, OK

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment will alter the transition area at Sand Springs, OK. The intended effect of the amendment is to provide additional controlled airspace for aircraft executing a new standard instrument approach procedure (SIAP) to the William R. Pogue Airport. This amendment is necessary since the owner proposed to install a nonfederal nondirectional radio beacon (NDB) on the airport and a SIAP will be developed from this facility to Runway 35 at the William R. Pogue Airport.

EFFECTIVE DATE: July 5, 1984.

FOR FURTHER INFORMATION CONTACT: Kenneth L. Stephenson, Airspace and Procedures Branch (ASW–535), Air Traffic Division, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, TX 76101, telephone (817) 877–2630.

SUPPLEMENTARY INFORMATION:

History

On February 2, 1984, a notice of proposed rulemaking was published in the **Federal Register** (49 FR 4102) stating that the Federal Aviation Administration proposed to alter the Sand Springs, OK, transition area. Interested persons were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the Federal Aviation Administration. Comments were received without objections. Except for editorial changes, this amendment is that proposed in the notice.

List of Subjects in 14 CFR Part 71

Transition areas, Aviation safety.

PART 71—[AMENDED]

Adoption of the Amendment

§ 71.181 [Amended]

Accordingly, (pursuant to the authority delegated to me by the Administrator) Subpart G of Part 71, § 71.181, of the Federal Aviation Regulations (14 CFR Part 71) as republished in Advisory Circular AC 70–3A dated January 3, 1983, is amended, effective 0901 GMT, July 5, 1984, by adding the following:

Sand Springs, OK [Amended]

* * * and within 3 miles each side of a 164° bearing of the NDB (latitude 36°10'24" N., longitude 96°09'17" W.), extending from the 6.5-mile radius to 8.5 miles south of the NDB.

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), 49 U.S.C. 106(g) (Revised, Pub. L. 97–449, January 12, 1983); and 14 CFR 11.61(c))

Note.—The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Fort Worth, TX, on March 12, 1984.

F. E. Whitfield,

Acting Director, Southwest Region.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

14 CFR Part 1215

Tracking and Data Relay Satellite System (TDRSS); Use and Reimbursement Policy for Non-U.S. Government Users

AGENCY: National Aeronautics and Space Administration.

ACTION: Final rule.

SUMMARY: The existing rule states that rates for TDRSS services will be set by NASA Headquarters. 14 CFR Part 1215 is hereby being amended by revising 14 CFR 1215.114(b) to identify the Associate Administrator for Space Tracking and Data Systems as the NASA official who will set the rates for TDRSS services. Appendix A is also amended to reflect the rate changes for January through December for CY 1985. Since this revision involves NASA management procedures and decisions, no public comment is required.

EFFECTIVE DATE: March 22, 1984.

ADDRESS: Office of Space Tracking and Data Systems, Code T, Washington, D.C. 20546.

FOR FURTHER INFORMATION CONTACT: Robert O. Aller, 202–453–2019.

SUPPLEMENTARY INFORMATION:

Satellites, Tracking and data relay satellite, Communications equipment, Government contract.

PART 1215—TRACKING AND DATA RELAY SATELLITE SYSTEM (TDRSS)

For reasons set out in the Preamble, 14 CFR 1215.114(b) and Appendix A are revised to read as follows:

§ 1215.114 Service rates.

* * * * *

(b) Rates for TDRSS services will be set by the Associate Administrator for Space Tracking and Data Systems each October for the following year, January through December. Rate variations will reflect changes in operating costs, loading formulas and escalation.

* * * * *

Appendix A—Estimated Service Rates in 1985 Dollars for TDRSS Standard Services (Based on NASA Escalation Estimate)

TDRSS user service rates for services rendered in CY–85 based on current projections in 1985 dollars are as follows:

Single Access Service—Forward command, return telemetry, or tracking, or any combination of these, the base rate is $120.00 per minute for non-U.S. Government users.

Multiple Access Forward Service—Base rate is $27.00 per minute for non-U.S. Government users.

Multiple Access Return Service—Base rate is $8.00 per minute for non-U.S. Government users.

BILLING CODE 7510–01–M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 7

Contract Market Rule Amendment

AGENCY: Commodity Futures Trading Commission.

ACTION: Notice of contract market rule change.

SUMMARY: The Chicago Board of Trade ("CBT") has amended CBT Regulation 620.01(B), which relates to the exchange's customer arbitration procedures. The amendment, which the Commodity Futures Trading Commission ("Commission") has permitted the CBT to place into effect, conforms that Regulation to recent amendments to the Commodity Exchange Act ("Act") and the Commission's regulations which have eliminated a previously existing limitation upon disputes which must be accepted for arbitration by contract markets. Because CBT Regulation 620.01(B) was altered by the Commission in November 1981 pursuant to the Commission's statutory authority to alter contract market rules, the text of CBT Regulation 620.01(B) is set forth in Part 7 of the Commission's regulations. The Commission is therefore amending Commission regulation § 7.201 to set forth accurately the language of CBT Regulation 620.01(B) as recently amended by the CBT.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Karen Matteson, Attorney-Advisor, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street NW., Washington, D.C. 20581. Telephone: (202) 254–8955.

SUPPLEMENTARY INFORMATION: On November 24, 1981, the Commission, pursuant to its authority under sections 5a(12)[1] and 8a(7)[2] of the Act, disapproved, altered, and approved as altered CBT Regulation 620.01(B), relating to the Exchange's arbitration of disputes between customers and exchange members. As the Commission explained at that time, proposed CBT regulation 602.01(B) would have restricted the ability of customers to obtain CBT-sponsored arbitration of certain claims and grievances had it not been disapproved and altered by the Commission. In particular, the CBT asserted that Section 5a(11) of the Act (7 U.S.C. 7a(11)) and Part 180 of the Commission's regulations (17 CFR Part 180), which require each contract market to provide a fair and equitable procedure through arbitration or otherwise for the settlement of customers' claims and grievances against any member or employee of the contract market, did not require members of the CBT and their employees to submit to customer-initiated arbitration proceedings. The Commission therefore altered CBT regulation 620.01(B) to conform it to the requirements of the Act and the Commission's regulations and simultaneously published the text of the amended CBT regulation as § 7.201 of its own regulations.[3]

---

[1] Section 5a(12) of the Act, 7 U.S.C. 7a(12) (Supp. V 1981), provided in relevant part:

[T]he Commission shall disapprove, after appropriate notice and opportunity for hearing, any [contract market] bylaw, rule, regulation, or resolution which the Commission finds at any time is in violation of the provisions of this Act or the regulations of the Commission * * *.

Section 5a(12) was amended by section 216(2) of the Futures Trading Act of 1982, Pub. L. 97–444, 96 Stat. 2306.

[2] Section 8a(7) of the Act, 7 U.S.C. 12a(7) (Supp. V 1981), provided in relevant part:

[The Commission is authorized—] to alter or supplement the rules of a contract market insofar as necessary or appropriate by rule or regulation or by order, if after making the appropriate request in writing to a contract market that such contract market effect on its own behalf specified changes in its rules and practices, and after appropriate notice and opportunity for hearing, the Commission determines that such contract market has not made the changes so required, and that such changes are necessary or appropriate for the protection of persons producing, handling, processing, or consuming any commodity traded for future delivery on such contract market, or the product or byproduct thereof, or for the protection of traders to insure fair dealing in commodities traded for future delivery on such contract market * * *.

[3] 46 FR 57457 (November 24, 1981).

Section 5a(11) of the Act was subsequently amended by Section 217(a) of the Futures Trading Act of 1982.[4] Among other things, this statutory amendment eliminated what had been a $15,000 limitation upon disputes which must be accepted for arbitration by contract markets. The Commission subsequently amended its arbitration regulations to conform those regulations to amended section 5a(11) of the Act.[5]

By letter dated January 20, 1984, the CBT submitted to the Commission, pursuant to section 5a(12) of the Act and Commission regulation 1.41(c), amendments to its Regulation 620.01(B) which delete references to the $15,000 limitation on disputes which must be accepted for arbitration by the CBT.

In a letter dated January 27, 1984, the Commission's Division of Trading and Markets informed the CBT that the amendments did not require the Commission's prior approval and could be made effective immediately. Because the text of Commission regulation 7.201 is intended to reflect the language of CBT regulation 620.01(B), the Commission is now amending § 7.201 in order to conform its rule to CBT Regulation 620.01(B).

List of Subjects in 17 CFR Part 7

Commodity exchanges, Arbitration, Commodity futures.

PART 7—CONTRACT MARKET RULES ALTERED OR SUPPLEMENTED BY THE COMMISSION

Pursuant to the authority contained in the Commodity Exchange Act and, in particular, sections 5a and 8a thereof, 7 U.S.C. 7a, 12a (1982), the Commission is amending Chapter I of Title 17 of the Code of Federal Regulations by revising § 7.201 as follows:

Subpart C—Board of Trade of the City of Chicago Rules

Section 7.201 is revised to read as follows:

§ 7.201 Regulation 620.01(B).

Customers' Claims and Grievances. The Arbitration Committee and Mixed Panels constituted pursuant to Regulation 620.02 have jurisdiction to arbitrate all customers' claims and grievances against any member or employee thereof which have arisen prior to the date the customer's claim is asserted. If the customer elects to initiate an arbitration proceeding of any customer claim or grievance, the member shall submit to arbitration in accordance with these Arbitration Rules and Regulations. The Arbitration shall be initiated by delivery to the Administrator of (a) a Statement of Claim and a "Chicago Board of Trade Arbitration Submission Agreement for Customer's Claims and Grievances" signed by the customer or (b) a Statement of Claim and another arbitration agreement between the parties, which agreement conforms in all respects with any applicable requirements prescribed by the Commodity Futures Trading Commission. The refusal of any member or employee to sign the "Chicago Board of Trade Arbitration Submission Agreement for Customer's Claims and Grievances" shall not deprive the Arbitration Committee or a Mixed Panel constituted pursuant to Regulation 620.02 of jurisdiction to arbitrate customers' claims under these Arbitration Rules and Regulations. The Committee and Mixed Panels have jurisdiction to arbitrate a counterclaim asserted in such an arbitration, but only if it arises out of the transaction or occurrence that is the subject of the customer's claim or grievance and does not require for adjudication the presence of essential witnesses, parties or third persons over whom the Association does not have jurisdiction. Other counterclaims are subject to arbitration by the Committee, or a Mixed Panel, only if the customer agrees to the submission after the counterclaim has arisen.

Issued in Washington, D.C. on March 16, 1984 by the Commission.

Jane K. Stuckey,

Secretary of the Commission.

DEPARTMENT OF STATE

Bureau of Consular Affairs

22 CFR Part 42

[Dept. Reg. 108.837]

Ineligible Classes of Immigrants; Aliens Ineligible To Receive Visas

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: The amendment to § 42.91(a)(15) eliminates the alternative use by an employer in the United States of a form prescribed by the Department to establish the essential elements of a prearranged offer of employment to an alien seeking to establish eligibility for an immigrant visa under the provisions of section 212(a)(15) of the Immigration and Nationality Act. This rule is less stringent because it retains only the requirement that the essential elements of such an offer of employment be established by a document sworn and subscribed to before a notary public by the employer or his authorized agent.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Gerald M. Brown, Chief, Legislation and Regulations Division, Visa Service, Washington, D.C. 20520, (202) 632-1900.

SUPPLEMENTARY INFORMATION: The Paperwork Reduction Act of 1980 is designed in part "to minimize the Federal paperwork burden on individuals, small businesses, State and local governments, and other persons". In an effort to reduce the volume of information collected through standardized forms, and in response to a survey conducted by the Department, which resulted overwhelmingly in favor of eliminating Form DS-1743 (Offer of Employment to an Alien), the Department has decided to discontinue the prescribed form.

Because the rule eliminates the cost of printing and distributing Form DS-1743 and fascilitates data collecting in an alternative manner without having adverse effect on any person, compliance with the procedures of 5 U.S.C 553, Administrative Procedure Act, relating to notice of proposed rulemaking and delayed effective date is not required and the provisions of E.O. 12291 are not applicable in this instance.

List of Subjects in 22 CFR Part 42

Aliens, Immigrant visas, Ineligible classes of immigrants.

PART 42—[AMENDED]

In light of the foregoing, § 42.91(a)(15)(ii) is amended by revising the first two sentences to read as set forth below:

§ 42.91 Aliens ineligible to receive visas.

(a) *Aliens ineligible under the provisions of section 212(a) of the Act.* * * *

(15) *Public charge.* * * *

(ii) An alien relying on an offer of prearranged employment to establish eligibility under section 212(a)(15) of the Act, other than an offer of employment certified by the Department of Labor pursuant to section 212(a)(14) of the Act, must establish the offer of employment by a document which confirms the essential elements of the employment offer. The document presented to confirm the employment offer must be sworn to and subscribed to before a

notary public by the employer or an authorized employee or agent of the employer.

* * * * *

(Sec. 104, 66 Stat. 166; 8 U.S.C. 1104; 109(b)(1), 91 Stat. 847)

Dated: February 24, 1984.

Joan M. Clark,

Assistant Secretary for Consular Affairs.

BILLING CODE 4710-06-M

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

23 CFR Part 652

Pedestrian and Bicycle Accommodations and Projects

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Final rule.

SUMMARY: This revision of existing FHWA pedestrian and bikeway regulations reflects the amendments to 23 U.S.C. 217 made by section 126 of the Surface Transportation Assistance Act of 1982, and makes other changes to promote clarity and improve program effectiveness.

EFFECTIVE DATE: April 23, 1984.

FOR FURTHER INFORMATION CONTACT: John C. Wasley, Highway Design Division, Office of Engineering (202–426–0306), or Reid Alsop, Office of the Chief Counsel (202–426–0800), Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m., ET, Monday through Friday.

SUPPLEMENTARY INFORMATION: The FHWA issued a notice of proposed rulemaking (NPRM) under Docket No. 83–17 on August 11, 1983 (48 FR 36470) to revise 23 CFR Part 652 which primarily concerns FHWA participation in the costs of bicycle and pedestrian projects. The NPRM reflected amendments to 23 U.S.C. 217 and proposed other changes to Part 652 that would improve program effectiveness. The statutory changes and the proposed revisions to Part 652 were discussed in detail in the NPRM.

In response to the NPRM 31 comments were received, including 13 from State transportation agencies, 9 from bicycle groups, 4 from local governments, 2 from regional planning agencies, and 1 each from a Federal agency, a private citizen and an association of bicycle manufacturers. The majority of comments were positive and supported pedestrian and bicycle accommodations as a part of highway transportation, as well as the incorporation of the new statutory requirements. Many commenters wished to have more prescriptive provisions provided in the final rule, other provisions were cited as needing clarification and further explanation.

The following is a description of the significant comments that were received in response to the NPRM, and the changes that were made as a result.

Title Change

In response to several comments the title of Part 652 was changed from "Pedestrian and Bicycle Facilities" to "Pedestrian and Bicycle Accommodations and Projects" to acknowledge availability of FHWA participation in nonconstruction projects. Apparently to many people the term "bicycle facilities" means bicycle paths, and thus could be misinterpreted to mean that Federal-aid funds are restricted to the development of bicycle paths. Also, the addition of the term "accommodations" is intended to make it clear that Federal-aid funds can be used in the construction of shared roadways and in the construction of those design features which enable a roadway to function as a shared roadway.

Section 652.3 Definitions.

Two commenters wanted to change the definition of "bicycle" either to expand the definition to include adult tricycles, bicycle trailers, etc., or to bring the definition into compliance with the Uniform Vehicle Code. No change is proposed. The American Association of State Highway and Transportation Officials design guide definition is used as it describes the basic vehicle the characteristics of which are used for design purposes. Other similar vehicles may have different characteristics.

These non-motorized vehicles may be allowed to operate on bicycle facilities if they are safe. Changes were made in the definitions of "Independent Bicycle Project" and "Independent Walkway Project", in paragraphs (i) and (j), to promote greater clarity without changing the meaning. They now more clearly describe the relationship between Independent projects and Incidental projects.

Section 652.5 Policy.

A sentence has been added requiring consideration of the special needs of the elderly and handicapped on all Federal-aid projects that include pedestrian facilities.

The largest number of comments received concerned deletion of the sentence in former § 652.9(b) which provided that in developing bicycle projects consultation with organized groups of bicyclists should be sought. In response a statement encouraging such consultation has been added to this section. Consultation with local groups of bicyclists has proven a valuable source of local information about bicycling. These groups can and do provide insight and knowledge toward the development of bicycle facilities and often serve to promote safety. It is the Federal policy to encourage their counsel and support in promoting safe operational practices on new facilities.

Section 652.7 Eligibility.

Proposed § 652.9(a) concerning "transportation" use was revised slightly and renumbered as § 652.7(a), as it is more appropriately considered an eligibility requirement rather than a condition for Federal participation. In response to several comments, the word "principally" was inserted between "be" and "for" in the first sentence.

A number of comments concerned the difficulty in distinguishing between transportation and recreation use. The proposed examples were deleted because there could be instances where these examples might not be appropriate. The nature and purpose of a bicycle project can best be determined on a case-by-case basis considering the facts and circumstances of the individual project. It is intended that the FHWA Division Administrator will review proposed projects to determine if the proposed expenditure of funds is reasonable in addition to evaluating the proposed usage of the facility as conditioned in § 652.7.

The remainder of proposed § 652.7 was renumbered, with some revisions, as § 652.7(b). The first sentence was revised slightly to insure that its coverage included nonconstruction projects.

Twelve comments were received on proposed § 652.7(c)(2) which provided that all motorized vehicles should be banned from pedestrian or bicycle facilities. In the case of a shared roadway, it was not intended to ban motorized vehicles, but rather to ban parking that would block or otherwise restrict bicycle movements. Section 652.7(b)(3) has been revised to (1) limit the ban on motorized vehicles to walkways and bicycle paths, and (2) ban parking on bicycle lanes that are contiguous to traffic lanes except in the case of a breakdown or other such emergencies.

Section 652.9 Participation.

As noted above, proposed § 652.9(a) was renumbered as 652.7(a). The

remaining paragraphs of § 652.9 were renumbered (a) through (d). The first sentence of the last paragraph of proposed § 652.9(e) was added at the end of § 652.9(a) to promote clarity and remove duplication. The remainder of the last paragraph of proposed § 652.9(e) was deleted as unnecessary.

Nine comments dealt with funding. At least one State indicated that it is prohibited by State law from using State gasoline tax revenues for the construction of bicycle paths. The 100 percent FHWA funding, which is provided by § 652.9(a), creates a new method for developing bicycle transportation, without the use of State or local funds. However, it is not the intent of this regulation to preclude the use of local and/or State financial participation to supplement 100 percent Federal funds provided for independent projects. Acting on their own, local jurisdictions and States may provide right-of-way, engineering, additional construction and/or provide funds in conjunction with an independent Federal-aid project.

The last sentence of § 652.9(b)(2) was rewritten to make it clear that independent bicycle projects may include design features necessary to enable a roadway to function as a shared roadway.

Eight comments concerned the identification of eligible nonconstruction projects. This regulation does not attempt to describe every eligible nonconstruction project. However, the last sentence of § 652.9(b)(3) was revised to make the proposed language more specific and to make clear that the cost of staff salaries for development of a specific nonconstruction project may be included.

The first sentence of § 652.9(c) was changed slightly to make it clear that funds provided by FHWA for direct Federal projects, described in § 652.9(d), may be used for incidental bicycle and pedestrian highway features.

Section 652.11 Planning.

This section was revised and simplified to reflect current FHWA project planning requirements. Policy related language in proposed § 652.11(a) was moved to § 652.5.

Section 652.13 Design and Construction Criteria.

This section is unchanged.

The FHWA has determined that this document contains neither a major rule under Executive Order 12291 nor a significant regulation under DOT regulatory policies and procedures. The FHWA has also determined that the change reflected in this action will have only minimal impact on the affected States and public. The total amount of Federal funds available annually for pedestrian and bicycle facilities will remain unchanged. Accordingly, for the foregoing reasons and under the criteria of the Regulatory Flexibility Act, it is certified that this action will not have a significant economic impact on a substantial number of small entities. The anticipated economic impact of this proposal is so minimal as not to require preparation of a full regulatory evaluation.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning, and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

List of Subjects in 23 CFR Part 652

Bicycles, Grant programs—transportation, Highways and roads.

Issued on: March 15, 1984.

R. A. Barnhart,

Federal Highway Administrator, Federal Highway Administration.

In consideration of the foregoing, the FHWA hereby amends Chapter I of title 23 Code of Federal Regulations, by revising Part 652 to read as follows:

PART 652—PEDESTRIAN AND BICYCLE ACCOMMODATIONS AND PROJECTS

Sec.

652.1 Purpose.
652.3 Definitions.
652.5 Policy.
652.7 Eligibility.
652.9 Federal participation.
652.11 Planning.
652.13 Design and construction criteria.

Authority: 23 U.S.C. 109, 217, 315, 402(b)(1)(F); 49 CFR 1.48(b).

§ 652.1 Purpose.

To provide policies and procedures relating to the provision of pedestrian and bicycle accommodations on Federal-aid projects, and Federal participation in the cost of these accommodations and projects.

§ 652.3 Definitions.

(a) *Bicycle.* A vehicle having two tandem wheels, propelled solely by human power, upon which any person or persons may ride.

(b) *Bikeway.* Any road, path, or way which in some manner is specifically designated as being open to bicycle travel, regardless of whether such facilities are designated for the exclusive use of bicycles or are to be shared with other transportation modes.

(c) *Bicycle Path (Bike Path).* A bikeway physically separated from motorized vehicular traffic by an open space or barrier and either within the highway right-of-way or within an independent right-of-way.

(d) *Bicycle Lane (Bike Lane).* A portion of a roadway which has been designated by striping, signing and pavement markings for the preferential or exclusive use of bicyclists.

(e) *Bicycle Route (Bike Route).* A segment of a system of bikeways designated by the jurisdiction having authority with appropriate directional and informational markers, with or without a specific bicycle route number.

(f) *Shared Roadway.* Any roadway upon which a bicycle lane is not designated and which may be legally used by bicycles regardless of whether such facility is specifically designated as a bikeway.

(g) *Pedestrian Walkway or Walkway.* A continuous way designated for pedestrians and separated from the through lanes for motor vehicles by space or barrier.

(h) *Highway Construction Project.* A project financed in whole or in part with Federal-aid or Federal funds for the construction, reconstruction or improvement of a highway or portions thereof, including bridges and tunnels.

(i) *Independent Bicycle Construction Project (Independent Bicycle Project).* A project designation used to distinguish a bicycle facility constructed independently and primarily for use by bicyclists from an improvement included as an incidental part of a highway construction project.

(j) *Independent Pedestrian Walkway Construction Project (Independent Walkway Project).* A project designation used to distinguish a walkway constructed independently and solely as a pedestrian walkway project from a pedestrian improvement included as an incidental part of a highway construction project.

(k) *Incidental Bicycle or Pedestrian Walkway Construction Project (Incidental Feature).* One constructed as an incidental part of a highway construction project.

(l) *Nonconstruction Bicycle Project.* A bicycle project not involving physical construction which enhances the safe use of bicycles for transportation purposes.

(m) *Snowmobile.* A motorized vehicle solely designed to operate on snow or ice.

§ 652.5 Policy.

The safe accommodation of pedestrians and bicyclists should be given full consideration during the development of Federal-aid highway projects, and during the construction of such projects. The special needs for the elderly and the handicapped shall be considered in all Federal-aid projects that include pedestrian facilities. Where current or anticipated pedestrian and/or bicycle traffic presents a potential conflict with motor vehicle traffic, every effort shall be made to minimize the detrimental effects on all highway users who share the facility. On highways without full control of access where a bridge deck is being replaced or rehabilitated, and where bicycles are permitted to operate at each end, the bridge shall be reconstructed so that bicycles can be safely accommodated when it can be done at a reasonable cost. Consultation with local groups of organized bicyclists is to be encouraged in the development of bicycle projects.

§ 652.7 Eligibility.

(a) Independent pedestrian projects, incidental bicycle projects, and nonconstruction bicycle projects must be principally for transportation rather than recreational use and must meet the project conditions for authorization where applicable.

(b) The implementation of pedestrian and bicycle accommodations may be authorized for Federal-aid participation as either incidental features of highways or as independent projects where all of the following conditions are satisfied.

(1) The safety of the motorist, bicyclist, and/or pedestrian will be enhanced by the project.

(2) The project is initiated or supported by the appropriate State highway agency(ies) and/or the Federal land management agency. Projects are to be located and designed pursuant to an overall plan, which provides due consideration for safety and contiguous routes.

(3) A public agency has formally agreed to:

(i) Accept the responsibility for the operation and maintenance of the facility,

(ii) Ban all motorized vehicles other than maintenance vehicles, or snowmobiles where permitted by State or local regulations, from pedestrian walkways and bicycle paths, and

(iii) Ban parking, except in the case of emergency, from bicycle lanes that are contiguous to traffic lanes.

(4) The estimated cost of the project is consistent with the anticipated benefits to the community.

(5) The project will be designed in substantial conformity with the latest official design criteria. (See § 652.13.)

§ 652.9 Federal participation.

(a) Independent walkway projects, independent bicycle projects and nonconstruction bicycle projects shall be financed with 100 percent Federal-aid primary, secondary or urban highway funds, provided the total amount obligated for all such projects in any one State in any fiscal year does not exceed $4.5 million of Federal-aid funds or a lesser amount apportioned by the Federal Highway Administrator to avoid exceeding the annual $45 million cost limitation on these projects for all States in a fiscal year. The Federal Highway Administrator may, upon application, waive this limitation for a State for any fiscal year. This limitation also applies to projects funded under § 652.9(d). This limitation does not apply to projects of the type described in § 652.9(c). The FHWA Offices of Direct Federal Programs and Engineering will coordinate projects of the type described in § 652.9(d) to ensure that the annual cost limitations will not be exceeded.

(b) Specific eligibility requirements for Federal-aid participation in independent and nonconstruction projects are:

(1) An independent walkway project must be constructed on highway right-of-way or easement, or right-of-way acquired for this purpose. Independent walkway projects may be constructed separately or in conjunction with a Federal-aid highway construction project. Where an independent walkway project is located away from the Federal-aid highway right-of-way, it must serve pedestrians who would normally desire to use the Federal-aid route.

(2) An independent bicycle project may include the acquisition of land needed for the facility, or such projects may be constructed on existing highway right-of-way or easement acquired for this purpose. Independent bicycle projects may include construction of bicycle lanes, paths, shelters, bicycle parking facilities and other roadway and bridge work necessary to accommodate bicyclists.

(3) Nonconstruction bicycle projects must be related to the safe use of bicycles for transportation, and may include safety educational material and route maps for safe bicycle transportation purposes. Nonconstruction bicycle projects shall not include salaries for administration, law enforcement, maintenance and similar items required to operate transportation networks and programs, but may include cost of staff or consultants for development of specific nonconstruction projects.

(c) Bicycle and pedestrian accommodations may also be constructed as incidental features of highway construction projects. These incidental features may be financed with the same type of Federal-aid funds, including funds of the type described in § 652.9(d) (except Interstate construction funds) and at the same Federal share payable as a basic highway project. These accommodations are not subject to the funding limitations for independent walkway, independent bicycle and nonconstruction bicycle projects. In the case of the Interstate construction projects, Federal-aid Interstate construction funds may only be used to replace existing facilities that would be interrupted by construction of the project, or to mitigate specific environmental impacts. Interstate 4R funds provided by 23 U.S.C. 104(b)(5)(B) may be used only for incidental features. As incidental features, these accommodations must be part of a highway improvement and must be located within the right-of-way of the highway, including land acquired under 23 U.S.C. 319 (Scenic Enhancement Program).

(d) Funds authorized for Federal lands highways (forest highways, public lands highways, park roads, parkways, and Indian reservation roads which are public roads), forest development roads and trails (i.e., roads or trails under the jurisdiction of the Forest Service), and public lands development roads and trails (i.e., roads or trails which the Secretary of the Interior determines are of primary importance for the development, protection, administration, and utilization of public lands and resources under his/her control), may be used for independent bicycle routes and independent walkway projects. These funds may not be used for nonconstruction bicycle projects.

§ 652.11 Planning.

Federally aided bicycle and pedestrian projects implemented within urbanized areas must be included in the transportation improvement program/annual (or biennial) element unless excluded by agreement between the State and the metropolitan planning organization.

§ 652.13 Design and construction criteria.

(a) The American Association of State Highway and Transportation Officials' "Guide for Development of New Bicycle Facilities, 1981" (AASHTO Guide) or equivalent guides developed in

cooperation with State or local officials and acceptable to the division office of the FHWA, shall be used as standards for the construction and design of bicycle routes. Copies of the AASHTO Guide may be obtained from the American Association of State Highway and Transportation Officials, 444 North Capitol Street, NW., Suite 225, Washington, D.C. 20001.

(b) Curb cuts and other provisions as may be appropriate for the handicapped are required on all Federal and Federal-aid projects involving the provision of curbs or sidewalks at all pedestrian crosswalks.

[FR Doc. 84-7068 Filed 3-21-84; 8:45 am]
BILLING CODE 4910-22-M

National Highway Traffic Safety Administration

23 CFR Parts 1209, 1213, 1214, 1215, 1217, 1309, and 1317

[Docket No. 84-03; Notice 1]

Incentive Grant Criteria for Alcohol Traffic Safety Programs; Incentive Grant Criteria for State Safety Belt Use Laws; Incentive Grant Criteria for Reduction of State Annual Highway Fatality Rates; Interim Grant Criteria for Reduction of Annual State Highway Fatalities; Innovative Project Grants

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: This notice makes a number of changes to the agency's highway safety regulations codified in Title 23 of the Code of Federal Regulations. It deletes three regulations on incentive grant programs which have been terminated by Congress. It also transfers two regulations from Chapter II to a new Chapter III in Title 23 to show that these regulations are administered solely by NHTSA, rather than being jointly-administered with the Federal Highway Administration (FHWA). In addition, it also amends Part 1209 to indicate that the Office of Management and Budget (OMB) has approved the recordkeeping requirements of that rule.

EFFECTIVE DATE: The amendments are effective on March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Stephen L. Oesch, Office of the Chief Counsel, National Highway Traffic Safety Administration, 400 Seventh Street SW., Washington, D.C. 20590 (202-426-1834).

SUPPLEMENTARY INFORMATION: The agency's regulations on traffic safety programs are codified in Chapter II of Title 23 of the Code of Federal Regulations. Parts 1213, Incentive Grant Criteria for State Safety Belt Use Laws, 1214, Incentive Grant Criteria for Reduction of State Annual Highway Fatality Rates, and 1215, Interim Grant Criteria for Reduction of Annual State Highway Fatalities, of the agency's regulations set requirements for three incentive grant programs that were established by Congress in 1973. Subsequently, in section 1107(d) of the Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35), Congress terminated those three incentive grant programs. This notice amends Title 23 by removing those regulations.

New Chapter III

Almost all of the regulations in Chapter II of Title 23 concern programs that are jointly administered by NHTSA and FHWA. Two of those regulations, Parts 1209, Incentive Grant Criteria for Alcohol Traffic Safety Programs, and 1217, Innovative Product Grants, are administered solely by NHTSA. To reflect that fact, the agency is creating a new Chapter III in Title 23 and transferring Parts 1209 and 1217 to that Chapter and redesignating them as Parts 1309 and 1317, respectively.

Information Collection

The Paperwork Reduction Act of 1980 (44 U.S.C. 3501 et seq.) establishes policies and procedures for controlling paperwork burdens imposed by Federal agencies on the public. Section 3516 of the Act authorizes the Director, Office of Management and Budget (OMB) to "promulgate rules, regulations, or procedures necessary to exercise the authority provided by this Chapter." OMB used this authority and recently promulgated a new regulation, 5 CFR Part 1320. Sections 1320.7(f)(2) and 1320.14(e) of that regulation require agencies to display the control number assigned by OMB, after OMB approved the information collection requirements contained in agency rules.

On February 7, 1983 (49 FR 5548) NHTSA published a final rule establishing incentive grant criteria for effective program to reduce crashes resulting from persons driving while under the influence of alcohol. In the preamble, NHTSA noted that, pursuant to the Paperwork Reduction Act, it had requested OMB approval for the recordkeeping requirements adopted in the final rule. OMB has approved the use of the recordkeeping requirements through January 31, 1986. The OMB approval number is 2127-0501. This notice amends new Part 1309 to add that approval number to the regulation.

Effect of Amendment

The amendments made by this notice impose no obligations or responsibilities on any party, nor do they alter any existing obligations. Accordingly, NHTSA finds for good cause that notice and opportunity for comment are unnecessary, and that the amendments are effective as soon as this notice is published.

NHTSA has analyzed the impacts of this action and determined that it is neither "major" within the meaning of Executive Order 12291 nor "significant" within the meaning of the Department of Transportation regulatory policies and procedures. This rule does not affect any existing duties or obligations under agency regulations, and will have no cost impacts. Therefore, a full regulatory evaluation is unnecessary.

For the same reasons, NHTSA has determined that this rule will not significantly affect the human environment, after considering the environmental implications in accordance with the National Environmental Policy Act of 1969. Likewise, I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities, after making the evaluation required by the Regulatory Flexibility Act.

List of Subjects

23 CFR Part 1209

Alcoholism Grant Programs.

23 CFR Parts 1213, 1214, 1215 and 1217

Grant programs, Highway Safety.

In consideration of the foregoing the following amendments are made to Title 23 of the Code of Federal Regulations.

1. A new Chapter III is added entitled "Chapter III—National Highway Traffic Safety Administration."

PARTS 1209 AND 1217 [REDESIGNATED AS PARTS 1309 AND 1317]

2. Parts 1209 and 1217 of Chapter II are transferred to Chapter III and redesignated as 1309 and 1317, respectively.

PARTS 1213, 1214 AND 1215 [REMOVED]

3. Chapter II is amended by removing parts 1213, 1214, and 1215.

PART 1309—[AMENDED]

§ 1309.14 [Amended]

4. Section 1309.4 is amended by adding the following parenthetical

language at the end of the section to read as follows:

(Approved by the Office of Management and Budget under control number 2127–0501)

Authority: Sec. 2, Pub. L. 96–511, 94 Stat. 2819 (44 U.S.C. 3507); Sec. 101 Pub. L. 97–384; 96 Stat. 1738 (23 U.S.C. 408); Sec. 208, Pub. L. 95–599; 92 Stat. 2732 (23 U.S.C. 407); Delegations of authority at 49 CFR 1.48 and 1.50.

Issued on March 13, 1984.

Diane K. Steed,

Administrator.

[Docket No. R–83–1070]

Intergovernmental Review of the Department of Housing and Urban Development Programs and Activities; Correction

AGENCY: Office of the Secretary, HUD.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule published on June 24, 1983 (49 FR 29206) that implemented Executive Order 12372, "Intergovernmental Review of Federal Programs", by adding the authority citation to the end of the text of the rule.

FOR FURTHER INFORMATION CONTACT: Dr. June Koch, Deputy Under Secretary for Intergovernmental Relations, Telephone number (202) 755–6580. (This is not a toll-free number).

Accordingly, the following correction is being made to FR Doc. 83–16843 in the issue of June 24, 1983 appearing on page 29206:

1. On page 29221, third column, after the five asterisks following § 891.305(b) and before the word "Dated:———", add the following citation, "**Authority:** Executive Order 12372, July 14, 1982 (47 FR 30959), amended April 8, 1983 (48 FR 15887); Sec. 401, Intergovernmental Cooperation Act of 1968, as amended (31 U.S.C. 6506); Sec. 204 of the Demonstration Cities and Metropolitan Development Act of 1966, as amended (42 U.S.C. 3334); Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d))."

Authority: Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)).

Dated: March 16, 1984.

Grady J. Norris,

Assistant General Counsel for Regulations

Mortgage Insurance and Home Improvement Loans; Changes in Interest Rates; Correction

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Correction to final rule.

SUMMARY: This document corrects amendatory language contained in a final rule that decreased the maximum allowable interest rates on HUD/FHA mortgage insurance programs that was published in the **Federal Register** on November 9, 1983 (48 FR 51455).

FOR FURTHER INFORMATION CONTACT: John N. Dickie, Director, Financial Analysis Division, Office of Financial Management, Telephone number (202) 755–7270. (This is not a toll-free number).

Accordingly, the following correction is being made to FR Doc. 83–30208 appearing in the issue of November 9, 1983 on page 51456 as item 14:

On page 51456, third column, item 14, the amendatory language, "In § 241.75 paragraph (a) is revised to read as follows" is corrected to read "Section 241.75 is revised to read as follows."

Authority: Section 3(a), 82 Stat. 113; 12 U.S.C. 1709–1; Section 7 of the Department of Housing and Urban Development Act, 42 U.S.C. 3535(d).

Dated: March 16, 1984.

BILLING CODE 4210–27–M

24 CFR Part 888

[Docket No. R–83–1137; FR–1864]

Section 8—Fair Market Rents for New Construction and Substantial Rehabilitation—All Market Areas

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Notice of effective date.

SUMMARY: This document announces the effective date for the interim rule published in the **Federal Register** on February 8, 1984 (49 FR 4892) which amends the Section 8 Fair Market Rents applicable to New Construction and Substantial Rehabilitation for all market areas, in compliance with the requirements of section 8(c)(1) of the U.S. Housing Act of 1937. The rule provided for a 30-day public comment period from the date of publication, and the effective date provision of the rule stated that, after the comment due date of March 9, 1984, a notice of the effective date of the rule would be published in the **Federal Register**.

On the basis of its consideration of the comments received during the public comment period, HUD has determined not to make any changes at this time in the Fair Market Rents published on February 8, 1984. Accordingly, all of the Fair Market Rents contained in Schedule A, as published in the **Federal Register** on February 8, 1984, will become effective as provided under "**EFFECTIVE DATE**," below.

However, HUD will continue carefully to evaluate all comments received, whether during or after expiration of the public comment period, to determine whether any further revision of the Fair Market Rent schedules should be made. If this evaluation indicates a need to make any further revision of the Fair Market Rent schedules for particular market areas, HUD will publish a revision of those schedules at a future date.

EFFECTIVE DATE: The effective date for the interim rule published February 8, 1984 at 49 FR 4892, is March 21, 1984.

FOR FURTHER INFORMATION CONTACT: Department of Housing and Urban Development, Room 6138, 451 Seventh Street, SW., Washington, D.C. 20410. Telephone: (202) 755–5743. This is not a toll-free number.

Dated: March 19, 1984.

Grady J. Norris,

Assistant General Counsel for Regulations.

[FR Doc. 84–7684 Filed 3–21–84; 8:45 am]

BILLING CODE 4210–27–M

Office of the Assistant Secretary for Housing—Federal Housing Commissioner

24 CFR Part 3282

[Docket No. R–79–553]

Manufactured Home Procedural and Enforcement Regulations; Correction

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This document corrects an inaccurate cross-reference to paragraph (a)(3)(i) located in Part 3282 in Title 24 of the Code of Federal Regulations.

FOR FURTHER INFORMATION CONTACT: Grady J. Norris, Assistant General Counsel for Regulations, Telephone number, (202) 755–7055. (This is not a toll-free number.)

Accordingly, 24 CFR Part 3282 is amended as follows:

1. In § 3282.12(b)(3)(ii), remove the reference to "paragraph (a)(3)(i)" whenever it appears, and add in its place the following: "(b)(3)(i)".

(Secs. 604(h) and 625 of the National Manufactured Housing Construction and Safety Standards Act, 42 U.S.C. 5403 and 5424, and Sec. 7(d), Department of HUD Act, 42 U.S.C. 3535(d))

Dated: March 16, 1984.

Grady J. Norris,

Assistant General Counsel for Regulations.

BILLING CODE 4210–27–M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Parts 250 and 252

Definition of "Area Adjacent to a State"

AGENCY: Minerals Management Service, Interior.

ACTION: Final rule.

SUMMARY: This rule amends the definition of "area adjacent to a State" to that portion of the Outer Continental Shelf (OCS) included within a planning area if such planning area is bordered by that State. This change will facilitate the proper inspection of privileged information by an affected State concerning any offshore activity adjacent to such State.

EFFECTIVE DATE: April 23, 1984.

FOR FURTHER INFORMATION CONTACT: David A. Schuenke; Chief, Branch of Rules, Orders, and Standards; Offshore Rules and Operations Division; Minerals Management Service; 12203 Sunrise Valley Drive; Mail Stop 646; Reston, Virginia 22091. Telephone: (703) 860–7916, (FTS) 928–7916.

SUPPLEMENTARY INFORMATION:

Background

Section 26 of the OCS Lands Act, 43 U.S.C. 1352, permits the Governor of any affected State, pursuant to an agreement with the Secretary, to designate an official to inspect any privileged information received by the Department of the Interior (Department) regarding any offshore activity adjacent to such State. As the Act does not specifically define the phrase "area adjacent to a State" for these purposes, the regulations must define the offshore area for which a State is permitted to inspect privileged and proprietary information. The current regulations define "area adjacent to a State" as "that portion of the OCS which would be within the area of a State if the State's boundaries were extended seaward to the outer margin of the OCS." For purposes of identifying the extended boundaries, the Department employed boundaries established by the National Oceanic and Atmospheric Administration for purposes of the Coastal Energy Impact Program (CEIP). In the alternative, States were invited to adopt their own mutually acceptable boundaries. Some States objected to the use of CEIP boundaries and suggested the use of Minerals Management Service (MMS) planning areas in determining areas adjacent to a State. Recognizing that a State has a legitimate interest in obtaining access to information on offshore activities adjacent to such a State, the Department is amending the regulations to accommodate that legitimate State interest.

The determination of adjacency by planning area makes use of geographic boundaries which have already been established by MMS and are used in the lease-offering process. The list below gives the established planning areas and the States which border each planning area.

Planning area	States which border planning area
North Atlantic Planning Area	Massachusetts, New Hampshire, and Maine.
Mid-Atlantic Planning Area	Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Delaware, Maryland, Virginia, and North Carolina.
South Atlantic Planning Area	North Carolina, South Carolina, Georgia, and Florida.
Eastern Gulf of Mexico Planning Area.	Florida and Alabama.
Central Gulf of Mexico Planning Area.	Alabama, Mississippi, Louisiana, and Texas.
Western Gulf of Mexico Planning Area.	Texas.
Southern California Planning Area.	California.
Central and Northern California Planning Area.	Do.
Diapir Field Planning Area	Alaska.
Barrow Arch Planning Area	Do.
Norton Basin Planning Area	Do.
Navarin Basin Planning Area	None.
St. George Basin Planning Area.	Alaska.
North Aleutian Basin Planning Area.	Do.
Shumagin Planning Area	Do.
Kodiak Planning Area	Do.
Cook Inlet Planning Area	Do.
Gulf of Alaska Planning Area	Do.

In the Alaska Region, the Navarin Basin Planning Area does not include the area immediately seaward of Alaska and, as a result, is not bordered by any State. Since the Navarin Basin Planning Area is the first planning area seaward of Alaska, the MMS believes that it should be deemed adjacent to Alaska, and the definition is broadened to include this Area.

Difference Between Proposed Rule and Final Rule

The final rule differs from the proposed rule only in that the new definition of "area adjacent to a State" appears only in Part 252 and not in Part 250. The definition of "area adjacent to a State" for Part 250 was removed since it is not used in that part.

Discussion of Comments

A Notice of Proposed Rulemaking was published in the **Federal Register** on Wednesday, August 24, 1983 (48 FR 38500). Fourteen timely comments were received—4 from oil companies and 10 from States. Many commenters favored the change and made no specific comments. Other commenters raised specific points which are addressed below.

One commenter pointed out that the person inspecting data is a qualified representative of the Governor and not any member of the general public. Another commenter pointed out that the State inspecting the data must be affected, in addition to being adjacent. The MMS agrees with these comments; however, the proposed change addresses only the definition of adjacency. Whether the State is affected and who will inspect the data are addressed in other parts of the regulations.

Two commenters felt that an entire planning area was a larger area than Congress had intended when they used the term "adjacent." The MMS disagrees. Since Congress did not define "area adjacent to a State" for the purpose of sharing proprietary data, the MMS has the discretion to define the term. The MMS has done so taking into account the interests of the States, the regulated industry, and the general public.

One State suggested that it have access to data in the next planning area (not bordered by that State) because of its close proximity to such planning area. The commenter said that activity in the second planning area would impact onshore communities within their State. Proprietary data is intended to provide a State with information concerning how Federal leases will

effect hydrocarbon production on existing or future State leases. If offshore activity in the next planning area will affect local communities within a particular State, then that State can obtain necessary information from other sources such as the OCS Oil and Gas Information Program and Exploration and Development and Production Plans rather than by examining proprietary data.

One State suggested that the planning areas be defined in the rule. The MMS has chosen planning areas as the basis for adjacency to a State, in part, because the planning area boundaries are an existing part of the lease-offering process and have previously been defined. The general limits of a planning area are included in each call for information, and specific limits are available from protraction diagrams in appropriate regional offices. The viewing of proprietary data by a representative of the Governor of the adjacent State is only applicable to areas already under lease and, therefore, is only applicable to areas already in a specific planning area. Any time a State wishes to inspect data, the data will be from a specific lease and that lease will be in a specific planning area. To further assist interested parties, general maps of the planning areas are included with this Notice.

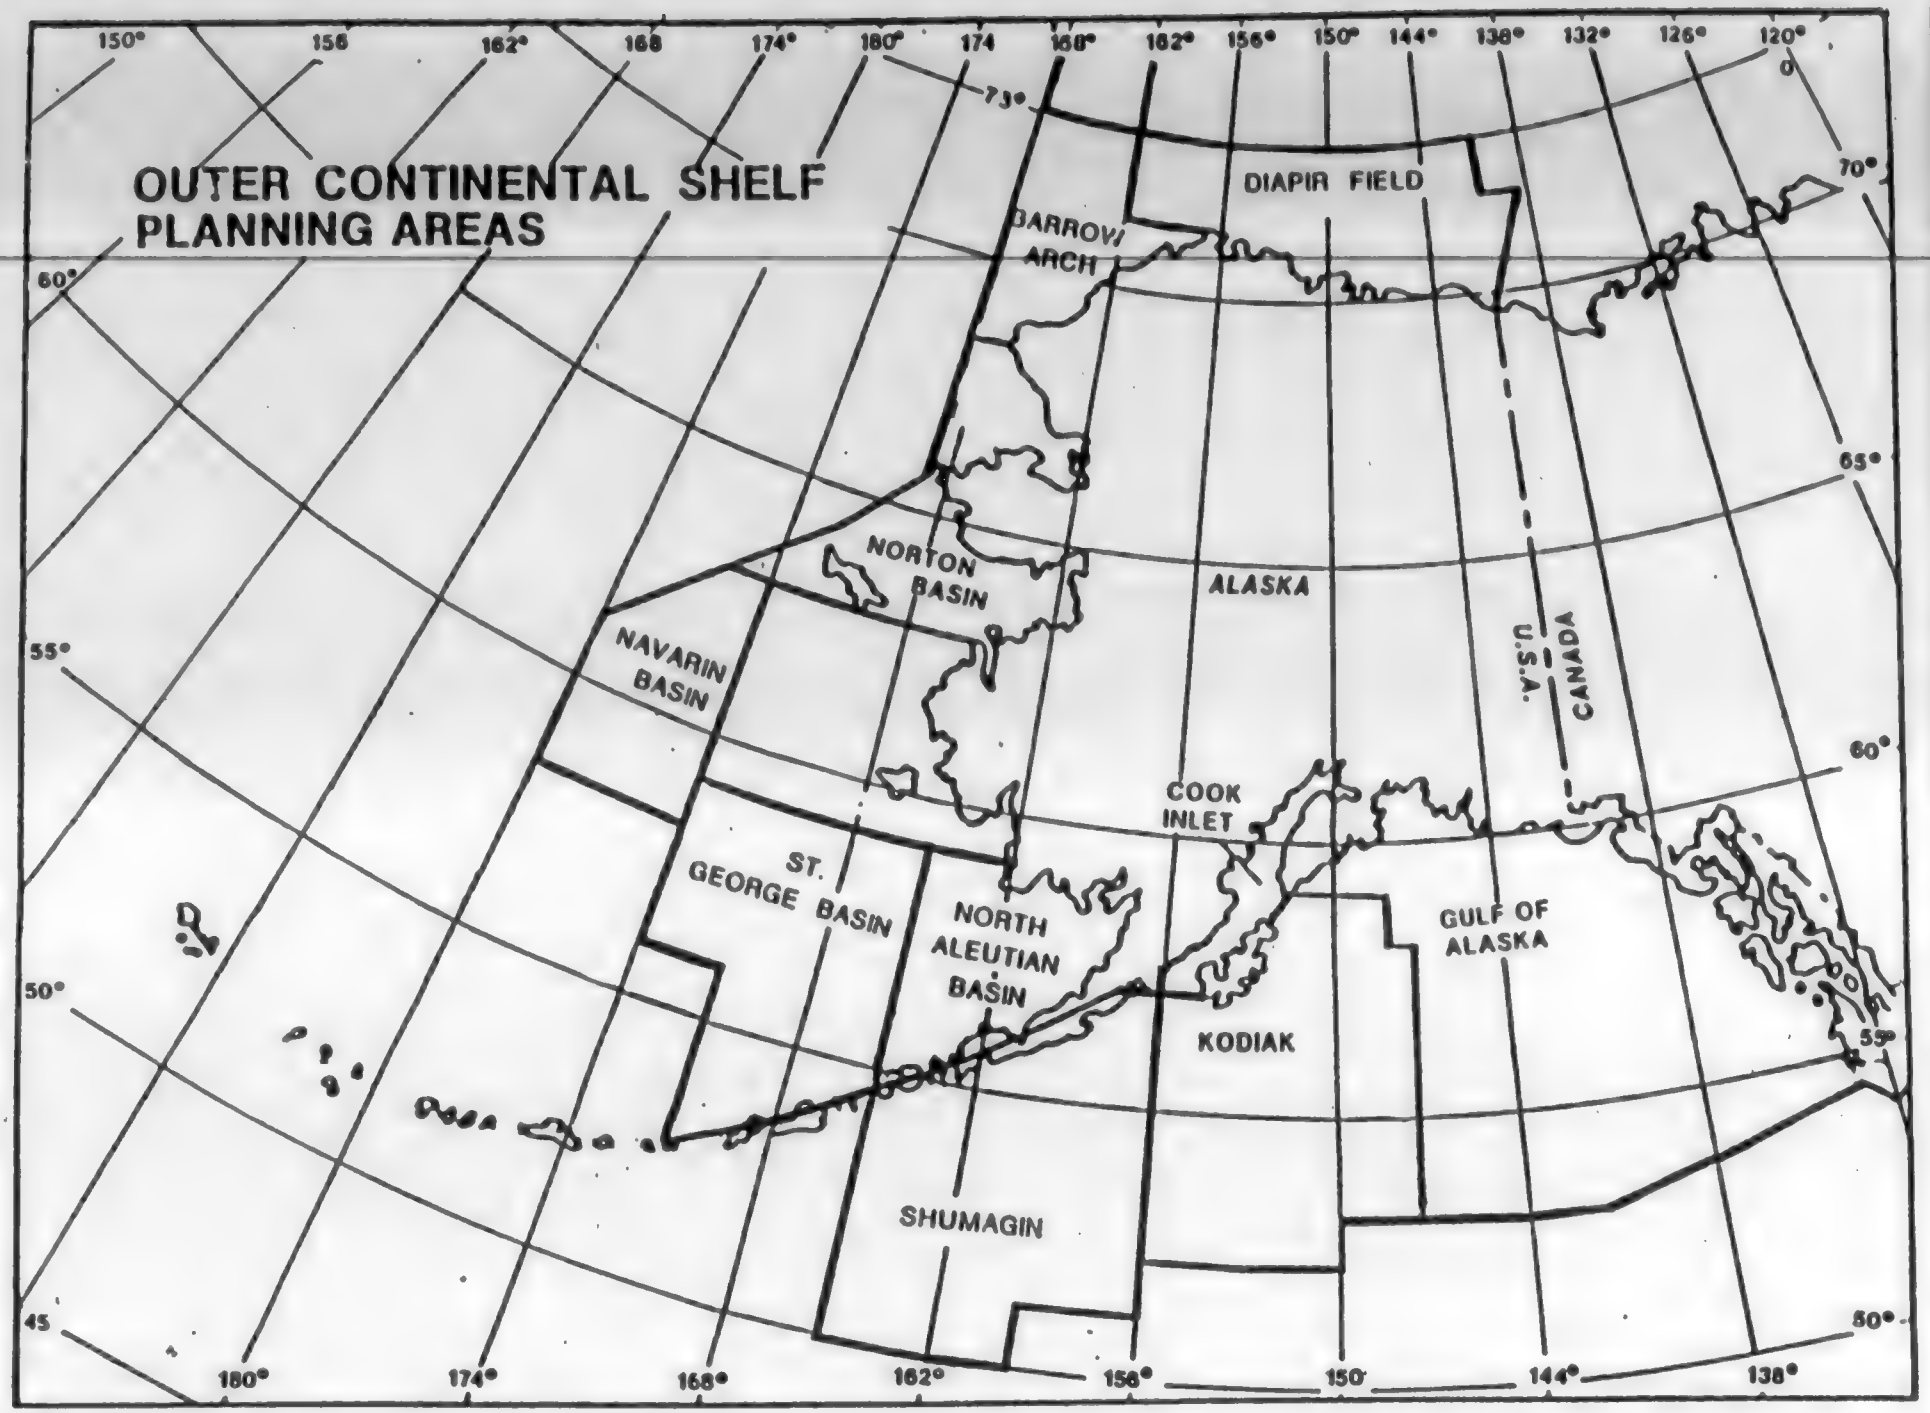
VOL 49 NO 57 MR 22 1984 UMI



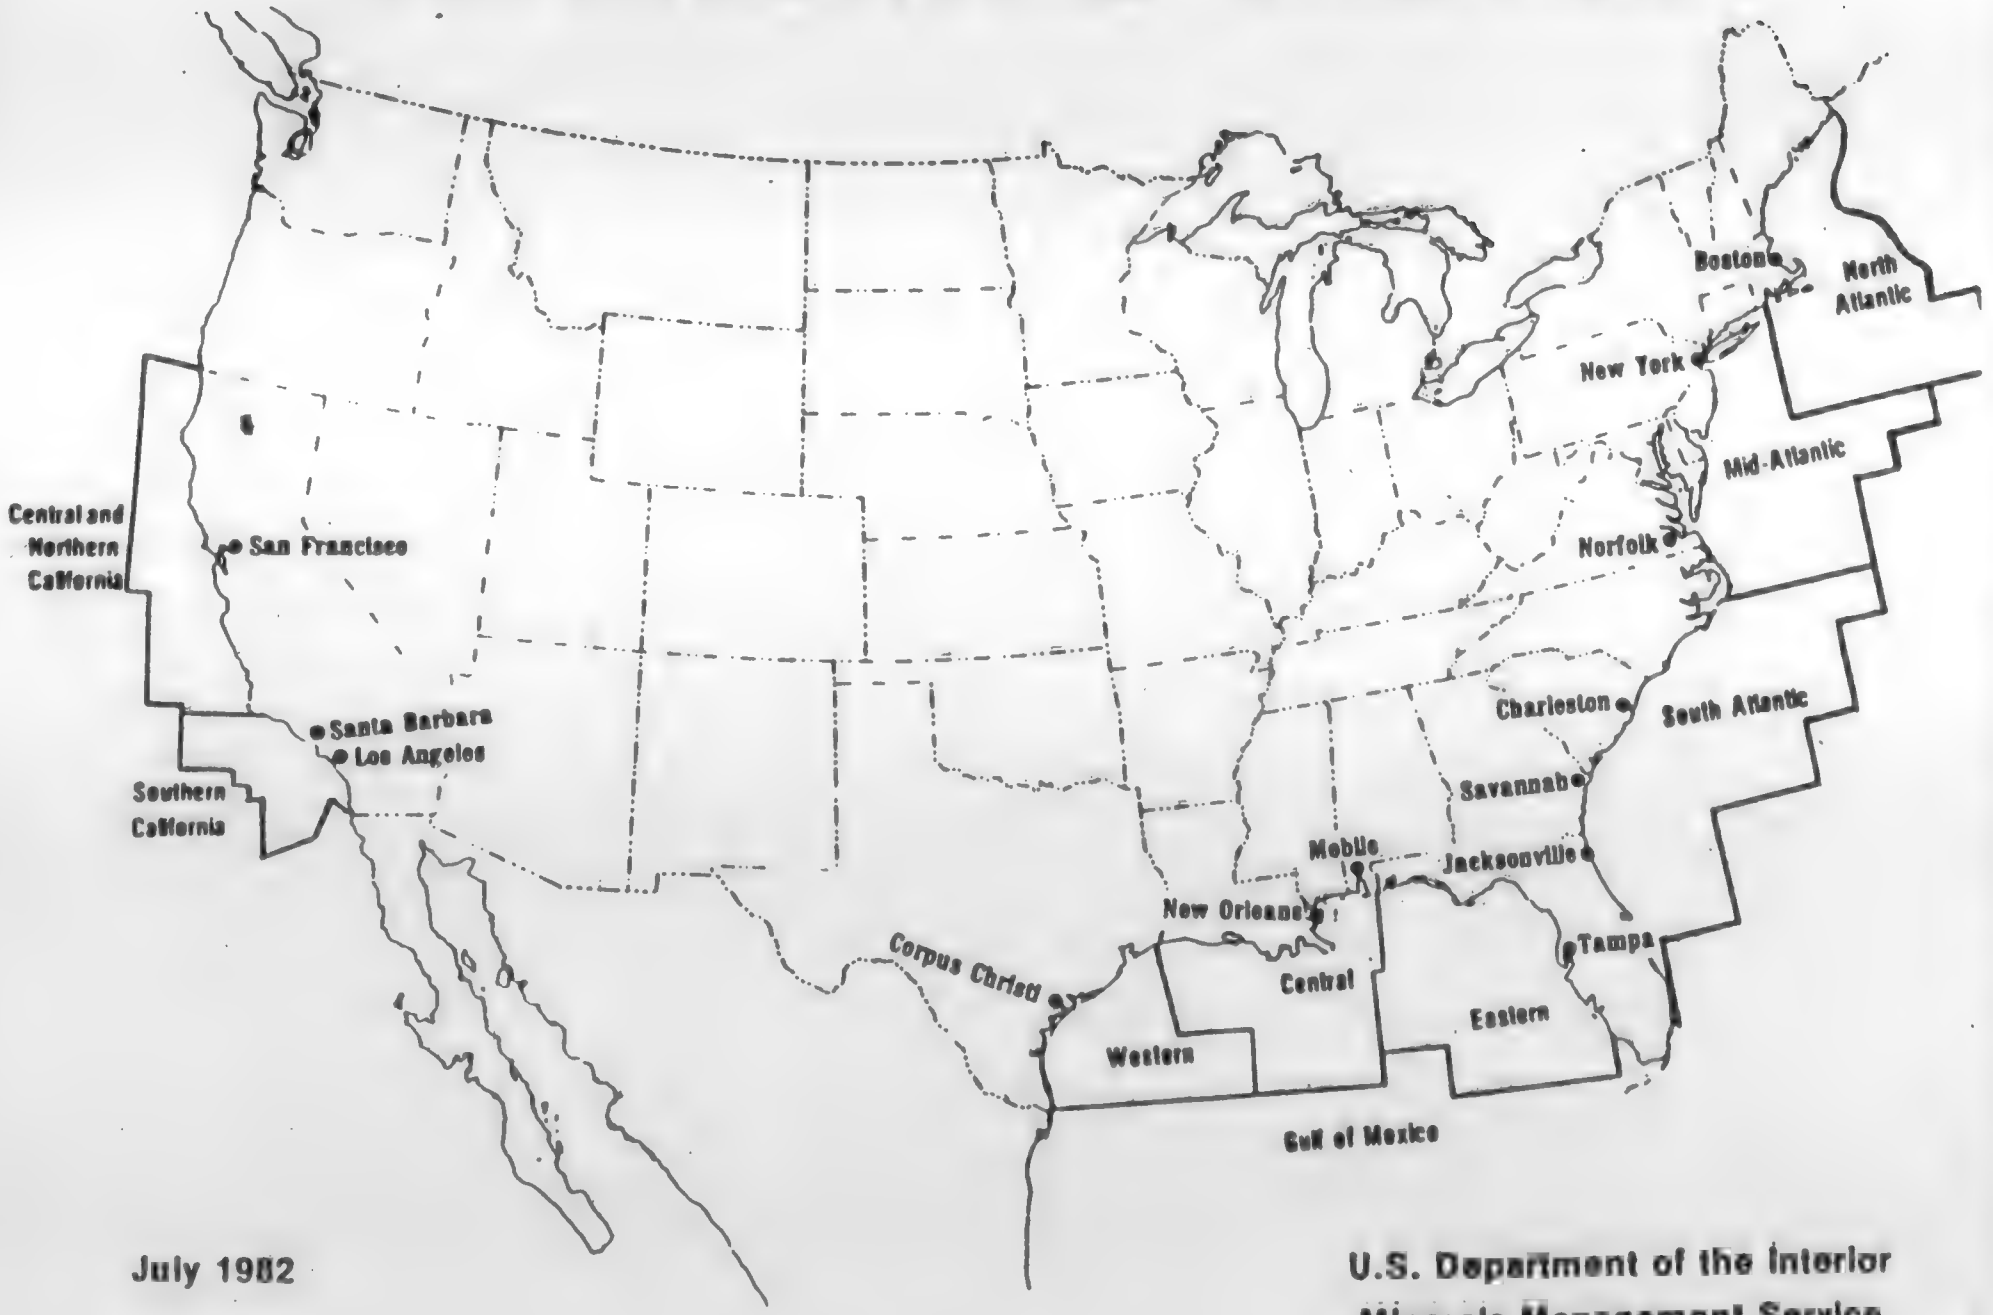
July 1982

U.S. Department of the Interior
Minerals Management Service

OUTER CONTINENTAL SHELF PLANNING AREAS

BILLING CODE 4310-MR-C

OUTER CONTINENTAL SHELF PLANNING AREAS



July 1982

U.S. Department of the Interior
Minerals Management Service

One State suggested that the limits of planning areas be published for comment. The MMS established planning area boundaries as part of the lease sale process. Planning areas are being addressed by MMS in this rulemaking to determine whether these existing boundaries should be used in defining "area adjacent to a State" and not to determine new planning area boundaries.

One commenter questioned the need to have the definition of "area adjacent to a State" included in Part 250 since it is only used in Part 252. The MMS agrees with this comment and the definition for "area adjacent to a State" has been removed from Part 250.

Regulatory Analysis, and Small Entity Flexibility Analysis

As this is an alteration of a definition to determine State interests in inspecting privileged information, the Department has determined that this document is not a major rule under Executive Order 12291.

The Department also certifies that this rule will not have a significant effect on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., as the entities that engage in offshore activities are not considered small due to the technical complexity and financial resources necessary to conduct such activities.

Paperwork Reduction Act

This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 et seq.

Author

This document was prepared by John Mirabella, Offshore Rules and Operations Division, Minerals Management Service.

List of Subjects

30 CFR Part 250

Continental shelf, Environmental impact statements, Environmental protection, Government contracts, Investigations, Minerals royalties, Oil and gas reserves, Penalties, Pipelines, Public lands/mineral resources, Reporting and recordkeeping requirements.

30 CFR Part 252

Continental shelf, Freedom of information, Intergovernmental relations, Oil and gas exploration, Public lands/mineral resources, Reporting and recordkeeping requirements.

Dated: January 31, 1984.

William D. Bettenberg,

Director, Minerals Management Service.

For the reasons set forth above, 30 CFR Parts 250 and 252 are amended as shown:

PART 250—[AMENDED]

1. In § 250.2, paragraph (e) is removed and reserved as follows:

§ 250.2 Definitions.

* * * * *

(e) [Reserved]

* * * * *

PART 252—[AMENDED]

1. In § 252.2, paragraph (e) is revised to read as follows:

§ 252.2 Definitions.

* * * * *

(e) "Area adjacent to a State" means all of that portion of the OCS included wihtin a planning area if such planning area is bordered by that State. The portion of the OCS in the Navarin Basin Planning Area is deemed to be adjacent to the State of Alaska.

BILLING CODE 4310-MR-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 117

[CGD3 83-060]

Drawbridge Operation Regulations; Nacote Creek, New Jersey

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: At the request of Atlantic County, New Jersey, the Coast Guard is changing the regulations governing the Route 575 Bridge over Nacote Creek at Port Republic, NJ by requiring notice of opening at all times and an opening as soon as possible for a public vessel of the United States. This change is being made because no requests have been made to open the draw since 1979. This action will relieve the bridge owner of the burden of having a person constantly available to open the draw and will still provide for the reasonable needs of navigation.

EFFECTIVE DATE: April 23, 1984.

FOR FURTHER INFORMATION CONTACT: William C. Heming, Bridge Administrator, Third Coast Guard District, (212) 668-7994.

SUPPLEMENTARY INFORMATION: On January 12, 1984, the Coast Guard published a proposed rule (49 FR 1535) concerning this amendment. The Commander, Third Coast Guard District also published this proposal as a Public Notice dated January 27, 1984. In each notice interested persons were given until February 27, 1984 to submit comments.

Drafting Information

The drafters of this rule are Ernest J. Feemster, project manager, and Mary Ann Arisman, project attorney.

Discussion of Comments

Two responses were received on the public notice, both expressing no objection to this proposed action. This general lack of objection corroborates the Coast Guard's finding that few if any future openings of the Route 575 bridge will be required. The bridge has a minimum eight foot clearance and this appears to be adequate for the few vessels using the waterway.

No changes to the substance of the proposed rule have been made in this final rule. Also no draft or final economic evaluation has been conducted for this action. This is because no water-dependent facilities, entities or other persons will be adversely affected by this action.

Economic Assessment and Certification

These final regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be major rules. They are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 22 May 1980). As explained above, an economic evaluation has not been conducted since its impact is expected to be minimal. In accordance with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is also certified that these rules will not have a significant economic impact on a substantial number of small entities.

Bridges.

Regulations

In consideration of the foregoing, Part 117 of Title 33, Code of Federal Regulations, is amended by adding a new § 117.225(f)(9-a) to read as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

§ 117.225 Navigable waters in the State of New Jersey; bridges where constant attendance of draw tenders is not required.

* * * * *

(f) * * *

(9–a) Nacote Creek; the draw of the Ocean County Route 575 bridge, mile 3.5 at Port Republic shall open on signal if at least eight hours notice is given, and shall open as soon as possible at all times for passage for a public vessel of the United States.

* * * * *

BILLING CODE 4910–14–M

Federal Highway Administration

49 CFR Part 350

[BMCS Docket No. MC–108; Amdt. No. 83–6]

Motor Carrier Safety Assistance Program

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Amendment to interim final rule; request for comments.

SUMMARY: The FHWA is amending its interim final rule, published August 31, 1983 (48 FR 39455), establishing the Motor Carrier Safety Assistance Program (MCSAP), at 49 CFR 350, authorized by sections 401–404 of the Surface Transportation Assistance Act of 1982 (Pub. L. 97–424) (STAA of 1982). This amendment will provide for a waiver, upon request, of the State matching share which would otherwise be required to be provided by the Virgin Islands, American Samoa, Guam, or the Commonwealth of the Northern Marianas as a condition of their participating in the MCSAP. The FHWA invites comments on this amendment to the interim final rule.

DATES: This final rule is effective March 22, 1984.

Comments must be received by May 21, 1984.

ADDRESS: All written comments should refer to the docket number that appears at the top of this document and should be submitted, preferably in triplicate, to Room 3404, Bureau of Motor Carrier Safety, 400 Seventh St., Washington, D.C. 20590. Those desiring notification of receipt of comments must include a self-addressed, stamped post card.

FOR FURTHER INFORMATION CONTACT: Mr. W. R. Fiste, Bureau of Motor Carrier Safety, (202) 426–0701 or Mr. Thomas P. Holian, Office of the Chief Counsel, (202) 426–0346, Federal Highway Administration, 400 Seventh Street SW., Washington, D.C. 20590. Office hours are from 7:45 a.m. to 4:15 p.m. Monday through Friday, except legal holidays.

SUPPLEMENTARY INFORMATION: Section 403 of the STAA of 1982 provides that Federal participation in the MCSAP will not exceed 80 per centum of the costs incurred by any State. Accordingly, in its interim final rule published on August 31, 1983, the FHWA provided that "[t]he Federal share payable to reimburse States for eligible costs incurred in the development or implementation of a commercial motor carrier safety program shall not exceed 80 percent." 49 CFR 350.13(a).

The Congress has also declared, however, that it is the policy of the Congress that agencies waive any requirements for matching funds otherwise required by law to be provided by an "Insular Area," which includes the Virgin Islands, American Samoa, Guam, and the Commonwealth of the Northern Marianas. This policy has been set forth at section 1469a(d) of title 48, United States Code. These named areas are considered as States for purposes of the MCSAP and, therefore, are eligible for participation therein, 49 U.S.C. 401(6), 49 CFR 350.3.

The FHWA has carefully reviewed the Congressional policy toward these areas and the special circumstances surrounding them. We note in particular the severely limited resources available to these areas and the consequent extensive involvement of other Federal funds there. Thus, we believe that insistence upon the provision of a "local match" might prove pointless. Moreover, the FHWA has concluded that, in certain instances, the absence of a provision for waiver of the "local match" would preclude participation in the MCSAP. This, obviously, would not enhance motor carrier safety in these areas, nor would it promote the objectives of sections 401–404 of the STAA of 1982.

Consequently, the FHWA will, upon request, waive the requirement for the Virgin Islands, American Samoa, Guam, or the Northern Marianas to provide local funds as a match in order to participate in this program.

The FHWA has determined that this action does not contain a major rule under Executive Order 12291 or a significant regulation under the regulatory policies and procedures of the Department of Transportation. The amendment, however, is important inasmuch as it may enable a territory to participate in the MCSAP when otherwise, because of severely limited funds, it might not be able to. The economic impact of this action is minimal and, accordingly, a full regulatory evaluation is not required.

For the foregoing reasons, under the criteria of the Regulatory Flexibility Act, it is certified that this action will not have a significant economic impact on a substantial number of small entities.

The FHWA recognizes that any delay in publishing this amendment would prevent the effective use of a portion of the appropriated funds to carry out the statutory purposes of improving motor carrier safety enforcement during FY 1984. For this reason, and since the rule relieves a burden, the FHWA finds good cause to make this regulation effective without prior notice and opportunity for comment and without a 30-day delay in the effective date. Neither a general notice of proposed rulemaking nor a 30-day delay of the effective date is required under the Administrative Procedures Act because the matters affected relate to grants, benefits or contracts pursuant to 5 U.S.C. 553(a)(2). Accordingly, the regulation is effective upon publication. The FHWA will accept comments on this action which will be evaluated in determining the need for future revisions to the interim final rule as amended herein.

Since this amendment is being published in order to carry out the legislative objectives of sections 401–404 of the STAA of 1982, publication of this amendment without an opportunity for prior comment, but with a request for comment following publication, is consistent with the Department of Transportation's regulatory policies.

List of Subjects in 49 CFR Part 350

Highways and roads, Motor carriers, Motor vehicle safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, and under the authority of Sections 401–404 of the Surface Transportation Assistance Act of 1982 (Pub. L. 97–424) and section 1469a(d) of title 48, United States Code, the FHWA hereby amends Title 49, Code of Federal Regulations, Part 350, by revising § 350.13(a) to read as follows:

PART 350—COMMERCIAL MOTOR CARRIER SAFETY ASSISTANCE PROGRAM

350.13 Distribution of Funds.

(a)(1) The Federal share payable to reimburse States for eligible costs incurred in the development or implementation of a commercial motor carrier safety program shall not exceed 80 percent.

(2) *Exception.* The FHWA shall, upon request, waive the requirement for matching funds to be provided by the Virgin Islands, American Samoa, Guam, or the Commonwealth of the Northern Marianas.

Proposed Rules

Federal Register
Vol. 49, No. 57
Thursday, March 22, 1984

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Ch. I

[Summary Notice No. PR-84-2]

Petitions for Rulemaking; Summary of Petitions Received and Dispositions of Petitions Denied or Withdrawn

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for rulemaking and of dispositions of petitions denied or withdrawn.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for rulemaking (14 CFR Part 11), this notice contains a summary of certain petitions requesting the initiation of rulemaking procedures for the amendment of specified provisions of the Federal Aviation Regulations and of denials or withdrawls of certain petitions previously received. The purpose of this notice is to improve the public's awareness of this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATES: Comments on petitions received must identify the petition docket number involved and be received on or before, May 21, 1984.

ADDRESSES: Send comments on the petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket #———, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received, and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 916, FAA Headquarters Building (FOB-10A), Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (b) and (f) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C. on February 16, 1984.

John H. Cassady,
Assistant Chief Counsel, Regulations and Enforcement Division.

Petitions for Rulemaking

Docket No.

23894.

Petitioner

Kenneth B. Sherman.

Description of the Petition

To change Part 63: Certification of Flight Crewmembers Other than Pilots to extend to fully qualified military flight navigators the same privilege that has been enjoyed for decades by military pilots, i.e., to award FAA certification on the basis of military competency.

Regulations Affected

14 CFR Part 63.

Petitioner's Reason for Rule

In summary:

1. The FAA fails to recognize that military navigator training and subsequent qualification in a great variety of military aircraft, as conducted by the Armed Forces of the U.S., is equal to pilot training in all degrees of professionalism and skill.

2. There is no meaningful reason to deny issuance of the FAA Flight Navigator Certificate to suitably qualified military navigators, as the FAA issues pilot licenses to suitably qualified pilots, on the basis of military competency.

3. The rationale that the commercial pilot license and the flight navigator certificate refer to two, mutually exclusive worlds of civil aviation (air transport versus nonair transport) is spurious and further obviated by the conditions and qualifications given as part of this proposed rule change.

4. The FARs need to be changed to redress this inequity.

BILLING CODE 4910-22-M

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 914

Permanent State Regulatory Program of Indiana

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is proposing to modify the deadline for Indiana to promulgate and submit rules governing the training, examination and certification of blasters. On March 6, 1984, Indiana requested an extension of time for the development of a blaster certification program. All States with regulatory programs approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act) are required to develop and adopt a blaster certification program by March 4, 1984. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

DATE: Comments must be received by April 23, 1984, at the address below, no later than 5:00 p.m.

ADDRESSES: Written comments should be mailed or hand delivered to Mr. Richard D. McNabb, Field Office Director, Indianapolis Field Office, Office of Surface Mining, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204.

FOR FURTHER INFORMATION CONTACT: Mr. Richard D. McNabb, Field Office Director, Indianapolis Field Office, Office of Surface Mining, Federal Building and U.S. Courthouse, Room 522, 46 East Ohio Street, Indianapolis, Indiana 46204; Telephone: (317) 269–2600.

SUPPLEMENTARY INFORMATION: On March 4, 1983, OSM issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Chapter M (48 FR 9486). Section 850.12 of these regulations stipulates that the regulatory authority in each State with an approved program under SMCRA shall develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation within 12 months after approval of a State program or within 12 months after publication date of OSM's rule at 30 CFR Part 850, whichever is later. In the case of Indiana's program, the applicable date is 12 months after publication date of OSM's rule, or March 4, 1984.

On March 6, 1984, Indiana advised OSM that it would be unable to meet the March 4, 1984 deadline and requested an extension until either September 1, 1984, or March 1, 1985, to develop and adopt a blaster certification program.

The Director of the Indiana Department of Natural Resources, the regulatory authority for Indiana's program, advised OSM that the State would require the additional time in order to promulgate and submit proposed rules for its blaster certification and training program. He state that rules necessary to implement the blaster certification and training program were preliminarily adopted on June 22, 1983. However, substantial public comment was received, primarily in opposition to the rules as proposed. Therefore, it is necessary for the Hearing Officer to review and make a recommendation on the substantial comment received and to evaluate the proposed rules. If the Hearing Officer's recommendation on the rules for final adoption results in rules not substantially different than those preliminarily adopted, the rules could be promulgated and submitted to OSM by September 1, 1984. If the Hearing Officer's recommendation would result in substantialy different rules from those preliminarily adopted, it would be necessary for the Natural Resources Commission to reinitiate its process to promulgate the rules resulting in promulgation and submittal of the rules by March 1, 1985. Also, he stated another factor in the delay is the resignation of the Blasting Specialist who would have conducted the training and examination of the blasters.

OSM is seeking comment on the State's request for additional time to develop and adopt a blaster cetification program. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a

program upon a demonstration of good cause.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7 and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paper Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

30 CFR Part 926

Proposed Modifications to the Montana Permanent Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Reopening of public comment period.

SUMMARY: OSM is reopening the period for review and comment on modified portions of the Montana permanent regulatory program. In the February 6, 1984 **Federal Register**, OSM announced a public comment period and procedure for requesting a public hearing on the substantive adequacy of proposed amendments to the Montana permanent regulatory program under the Surface Mining Control and Reclamation Act of 1977 (SMCRA) submitted by Montana on January 3, 1984. The amendments submitted by Montana are modifications to the Montana rules that, among other things, address the training, examination and certification of blasters, and the assessment and waiver of civil penalties under the Montana Strip and Underground Mine Reclamation Act. OSM is reopening the comment period to allow the public an opportunity to comment on revisions made to the rules addressing the waiver on civil penalties. The rules addressing the blaster certification program will be the subject of separate rulemaking.

DATE: Written comments must be received on or before 4:00 p.m. on April 23, 1984.

ADDRESSES: Written comments should be mailed or hand delivered to William R. Thomas, Field Office Director, Casper Field Office, Office of Surface Mining, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82644.

Copies of the revised material submitted by Montana and other relevant documents are available for review at the OSM offices and the office of the State regulatory authority listed below, Monday through Friday, 8:00 a.m. to 4:00 p.m., excluding holidays.

Office of Surface Mining Reclamation and Enforcement, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82644.

Montana Department of State Lands, Reclamation Division, Capitol Station, Helena, Montana 59620

FOR FURTHER INFORMATION CONTACT: William R. Thomas, Field Office Director, Office of Surface Mining, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82644; Telephone: (307) 328–5830.

SUPPLEMENTARY INFORMATION: The general background on the permanent regulatory program, the State program approval process, the Montana program and the conditional approval can be found in the Secretary's Findings and conditional approval published in the April 1, 1980 **Federal Register** (45 FR 21560) and the February 11, 1982 **Federal Register** (47 FR 6266).

On January 3, 1984, Montana submitted to OSM a program amendment that, among other things, addresses civil penalties. The proposed amendment consists of proposed regulations governing procedures for the assessment and waiver of civil penalties; implementation of a point system for civil penalties and waivers; issuance of notice of non-compliance and cessation orders; informal hearings; operator's inability to comply with a notice of compliance or cessation order; and continuation of health and safety activities during the period an order is in effect. The February 6, 1984, **Federal Register** announced receipt of the modification by OSM as well as a public comment period (49 FR 4385). In that same notice, OSM announced that a public hearing would be held only if requested. No requests were received and no hearing was held. The State of Montana, however, on February 2, 1984, conducted a public hearing to receive comments on the adequacy of Montana's proposed regulations. As a result of comments received at the hearing, the State, on March 6, 1984, submitted to OSM revised proposed regulations addressing civil penalties. Copies of the revised material are available in the OSM Administrative Record. Therefore, OSM is reopening the comment period in order to allow the public an opportunity to review and comment on the revised material submitted to OSM by the State on March 6, 1984.

Specifically, OSM is seeking comment on whether the material pertaining to civil penalties submitted by Montana on March 6, 1984, satisfies the criteria for approval of State program amendments at 30 CFR 732.17 and 732.15.

30 CFR Part 926

Permanent State Regulatory Program of Montana

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Proposed rule.

SUMMARY: OSM is proposing to modify the deadline for Montana (1) to promulgate rules governing the training, examination and certification of blasters and (2) to develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation. On March 6, 1984, Montana requested an extension of time for the development of a blaster certification program until May 31, 1984. All States with regulatory programs approved under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act) are required to develop and adopt a blaster certification program by March 4, 1984. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

DATE: Comments must be received by April 23, 1984 at the address below, no later than 5:00 p.m.

ADDRESSES: Written comments should be mailed or hand delivered to Mr. William Thomas, Field Office Director, Casper Field Office, Office of Surface Mining, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82644.

FOR FURTHER INFORMATION CONTACT: Mr. William Thomas, Field Office Director, Casper Field Office, Office of Surface Mining, Freden Building, 935 Pendell Boulevard, Mills, Wyoming 82644; Telephone: (307) 328–5830.

SUPPLEMENTARY INFORMATION: On March 4, 1983, OSM issued final rules effective April 14, 1983, establishing the Federal standards for the training and certification of blasters at 30 CFR Chapter M (48 FR 9486). Section 850.12 of these regulations stipulates that the regulatory authority in each State with an approved program under SMCRA shall develop and adopt a program to examine and certify all persons who are directly responsible for the use of explosives in a surface coal mining operation within 23 months after approval of a State program or within 12 months after publication date of OSM's rule at 30 CFR Part 850, whichever is later. In the case of Montana's program, the applicable date is 12 months after publication date of OSM's rule, or March 4, 1984.

On January 3, 1984, the State of Montana submitted to OSM amendments to its permanent regulatory program. One amendment was intended to implement the provisions of 30 CFR Part 850 relating to blaster training, examination and certification. In addition to the proposed blaster certification regulations, Montana submitted to OSM a proposed program amendment addressing civil penalties.

OSM announced in the February 6, 1984 **Federal Register** (49 FR 4385), receipt of the proposed program amendment and procedures for the public comment period and public hearing on the adequacy of the proposed amendments.

The State of Montana conducted on February 2, 1984, a public hearing to receive comments on the adequacy of Montana's proposed regulations. As a result of substantive comments received at the hearing, the State decided to revise its amendment package and reopen the comment period until April 13, 1984.

To accommodate the revised schedule, the State submitted to OSM on March 6, 1984, a request for an extension until May 31, 1984, to submit final rules addressing the blaster certification program. The State also indicated that the final rules addressing civil penalties would be resubmitted at that time. Subsequently, on March 6, 1984, Montana submitted the revised rules addressing civil penalties. Through a separate rulemaking, OSM will publish shortly a **Federal Register** notice reopening the public comment period on the proposed amendment pertaining to civil penalties.

Therefore, OSM is seeking comment on the State's request for additional time to develop and adopt a blaster certification program. Section 850.12(b) of OSM's regulations provides that the Director, OSM, may approve an extension of time for a State to develop and adopt a program upon a demonstration of good cause.

Additional Determinations

1. *Compliance with the National Environmental Policy Act:* The Secretary has determined that, pursuant to Section 702(d) of SMCRA, 30 U.S.C. 1292(d), no environmental impact statement need be prepared on this rulemaking.

2. *Executive Order No. 12291 and the Regulatory Flexibility Act:* On August 28, 1981, the Office of Management and Budget (OMB) granted OSM an exemption from Sections 3, 4, 7, and 8 of Executive Order 12291 for actions directly related to approval or conditional approval of State regulatory programs. Therefore, this action is exempt from preparation of a Regulatory Impact Analysis and regulatory review by OMB.

The Department of the Interior has determined that this rule would not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This rule would not impose any new requirements; rather, it would ensure that existing requirements established by SMCRA and the Federal rules would be met by the State.

3. *Paperwork Reduction Act:* This rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3507.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 80

[CGD 80–142]

COLREGS Demarcation Lines; Savannah River, GA to Amelia Island, FL; Withdrawal

AGENCY: Coast Guard, DOT.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: On July 27, 1981, the Coast Guard published a notice of proposed rulemaking to relocate the demarcation lines authorized by the International Regulations for Preventing Collisions at Sea (1972), (COLREGS) along the barrier islands off the coast of Georgia to coincide with the Georgia State Department of Natural Resources (DNR) sound/beach boundaries. (46 FR 38378; July 27, 1981). After further study of the proposal, the Coast Guard has determined that the COLREGS Lines should not be relocated and is withdrawing the Notice of Proposed Rulemaking.

DATE: This withdrawal is effective March 22, 1983.

FOR FURTHER INFORMATION CONTACT: LCDR Kent Kirkpatrick, Office of Navigation, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, D.C. 20593, (202) 245–0108.

SUPPLEMENTARY INFORMATION: In July of 1980, the Georgia State DNR petitioned the Coast Guard requesting that the COLREGS demarcation lines on the Georgia coast be reestablished to coincide with DNR sound/beach boundary lines. The Coast Guard gave preliminary approval to the Georgia DNR petition and published a notice of proposed rulemaking seeking further input from interested parties. [46 FR 38378; July 27, 1981].

Four comments on the proposed rule were received. None of these comments were pertinent to the issues involved. No comments were received in support of the proposed rule. The Coast Guard has reevaluated the proposal and concluded that the COLREGS demarcation lines should not be relocated at this time.

The COLREGS demarcation lines distinguish those waters upon which the International Regulations for Preventing Collisions at Sea, 1972, apply from those waters upon which mariners must comply with the Inland Navigation Rules. The COLREGS demarcation lines were established in 1977. A great deal of care was taken to make placement of the lines as consistent as possible throughout the United States. The proposed change to the demarcation lines to coincide with boundaries established for unrelated reasons could confuse mariners entering these waters from other geographic areas. No problems have been reported with current placements in Georgia. Further, the Georgia DNR has withdrawn its request for modification of the demarcation lines.

It is in the interest of navigational safety to retain the established demarcation lines absent compelling needs for modification. Therefore, no final rule or revised proposal to amend or modify Part 80 of Title 33, Code of Federal Regulations is contemplated at this time except to update the COLREGS demarcation line descriptions where landmarks used to describe locations have been renamed, destroyed, or moved.

In view of the foregoing, the notice of proposed rulemaking published at 46 FR 38378, Coast Guard Docket CGD 80–142, is hereby withdrawn.

Dated: March 14, 1984.

T. J. Wojnar,

Rear Admiral, U.S. Coat Guard, Chief, Office of Navigation.

BILLING CODE 4910–14–M

33 CFR Part 110

[CGD5 83–08]

Anchorage Ground; Baltimore Harbor, MD

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rule making.

SUMMARY: The Coast Guard is considering a proposal to disestablish the small vessel anchorage in Northwest Harbor. This action is being taken at the request of the City of Baltimore which intends to build a marina in the location of this anchorage. It is necessary to disestablish this small vessel anchorage to permit this marina to be built.

DATES: Comments must be received on or before May 7, 1984.

ADDRESSES: Comments should be mailed to Commander (mpv), Fifth Coast Guard District, Federal Building, 431 Crawford St., Portmouth, VA 23705. The comments will be available for inspection and copying at 431 Crawford St., Room 408, Portmouth, VA. Normal office hours are between 8:00 a.m. and 4:30 p.m. Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Lt. W. J. Wetzel at (804) 398–6388.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this rule making by submitting written views, data, or arguments. Persons submitting comments should include their names and addresses, identify this notice (CGD5 83–08) and the specific section of the proposal to which their comments apply, and give reasons for each comment. Receipt of comments will be acknowledged if a stamped self-addressed postcard or envelope is enclosed.

The rules may be changed in light of comments received. All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The drafters of this notice are Lieutenant W. J. Wetzel, project officer, Marine Safety Division, and Lieutenant W. J. Bruydzinski, project attorney, Fifth Coast Guard District Legal Office.

Discussion of Proposed Regulation

This proposal to disestablish the small vessel anchorage in Northwest Harbor is being taken at the request of the City of Baltimore to allow for the construction of a new marina. As part of its waterfront redevelopment, the City of Baltimore plans to build a marina which will encroach upon a portion of the area presently designated as the small vessel anchorage. As a result, either the marina cannot be built as now designed, or the anchorage must be discontinued or relocated. The Maryland Department of Transportation has already stated that if has no objection to the elimination of this anchorage. Our investigation has shown that it is seldom if ever used. Most boat operators anchor instead in the Inner Harbor nearer the center of the city. The addition of over 300 new vessel berths will also provide for more berthing capacity than currently exists in the small vessel anchorage. For reasons cited above it is proposed that this small vessel anchorage be eliminated.

Economic Assessment and Certification

This proposed regulation is considered to be nonsignificant in accordance with DOT Policies and Procedures for Simplification, Analysis, and Review of Regulations. (DOT Order 2100.5.) It's economic impact is expected to be minimal since this anchorage area is seldom used and the marina which will replace it will greatly add to the berthing spaces currently available to boat operators. Based upon this assessment it is certified in accordance with section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)) that this regulation, if promulgated, will not have a significant economic impact on a substantial number of small entities for the reasons stated above. Also, the regulation has be reviewed in accordance with Executive Order 12291 of February 17, 1981, on Federal Regulation and has been determined not to be major rule under the terms of that order.

List of Subjects in 33 CFR Part 110

Anchorage grounds.

Proposed Regulation

In consideration of the foregoing, the Coast Guard proposes to amend Part 110 of Titles 33, Code of Federal Regulations, by removing section 110.158(a)(9).

(33 U.S.C. 471; 49 U.S.C. 1655(g)(1); 49 CFR 1.46; and 33 CFR 1.05–1(g))

Dated: March 5, 1984.

33 CFR Part 110

[CGD5-83-04]

Anchorage Ground; Hampton Roads, VA

AGENCY: Coast Guard, DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: Based upon discussions with the Virginia Department of Highways and Transportation, the U.S. Navy, the U.S. Army Corps of Engineers, the Virginia Pilots Association and the Hampton Roads Maritime Association, the Coast Guard is proposing to review and amend the anchorage regulations for Hampton Roads, Virginia and adjacent waters. This proposal is being made to accommodate the intended construction of the Newport News Bridge-Tunnel, a proposed widening and deepening of the Newport News Channel, and the construction of a U.S. Navy ammunition barge mooring facility. The intended effect of the proposed action is to provide safer anchorage grounds in Hampton Roads while still providing for the reasonable needs of navigation.

DATES: Comments must be received on or before May 7, 1984.

ADDRESSES: Comments should be mailed to Commander(mpv), Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia, 23705. Comments will be available for inspection and copying at the office of the Commander, Fifth Coast Guard District(mpv), Room 408-A, Federal Building, 431 Crawford Street, Portsmouth, Virginia, 23705. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Lieutenant W. J. Wetzel, Port and Vessel Safety Branch, Fifth Coast Guard District, 431 Crawford Street, Portsmouth, Virginia, 23705, (804) 398-6388.

SUPPLEMENTARY INFORMATION: Interested persons are invited to submit written views, data, or arguments. Persons submitting comments should include their names and addresses, and give reasons for their comments. Receipt of comments will be acknowledged if a stamped, self-addressed postal card or envelope is enclosed.

Discussion

The anchorage grounds which are affected by this proposal are located in Hampton Roads between the Hampton Roads (Interstate 64) Bridge-Tunnel and the James River (Route 17) Bridge. Three major projects which will have a significant impact on navigation in the Hampton Roads area are presently underway or are planned for the near future. These projects are:

a. Planned construction of the Newport New (Interstate 664) Bridge-Tunnel between downtown Newport News, Virginia and Suffolk, Virginia under Army Corps of Engineers, Norfolk District permit application NAOOP-P-83-0094-15 dated April 6, 1983;

b. The construction of a Navy ammunition barge mooring facility in anchorage B, under Army Corps of Engineers, Norfolk District permit 82-0370-01; and

c. A proposed widening of Newport News Channel to 1000 feet and dredging to a depth of 55 feet.

The Newport News Bridge-Tunnel is a 3.9 mile long, four-laned project with its northern terminus located near the Newport News Small Boat Harbor and its southern terminus near Salter's Creek in Suffolk, Virginia, approximately one mile east of Pig Point. This complex will be similar to the Hampton Roads Bridge Tunnel between Hampton, Virginia and Norfolk, Virginia.

The construction of the bridge-tunnel complex will require the elimination or realignment of some Federal anchorage grounds, as well as the removal of the Navy ammunition barge mooring facility which is located approximately 1 mile southwest of Newport News Middle Ground. Based upon the damages sustained by the Chesapeake Bay Bridge Tunnel during the past several years, the Coast Guard desires to reduce the likelihood of similar damages to the Newport News Bridge Tunnel by developing regulations which restrict vessel operation and/or anchoring in its vicinity. There are many feasible ways that this can be done and the Coast Guard would like to find that way which least disrupts navigation and vessel operations, yet which still provides an acceptable level of safety.

The Navy Ammunition barge mooring facility presently under construction in the vicinity of 38°58'34" N., 7°21'21"W. is situated in anchorage B near other anchorages and major ship channels. This means that changes in safety regulations will have to be developed. This facility is intended to berth loaded and unloaded ammunition barges for short periods of time, and quite likely, similar regulations to those which exist at the present barge mooring facility in Anchorage F will need to be implemented. The present barge mooring facility in Anchorage F will be dismantled and the sight abandoned by the U.S. Navy. Newport News Channel is presently maintained to a width of 800 feet, but if it is widened to 1,000 feet by the Corps of Engineers the anchorage boundaries along this channel will have to be shifted. This change should significantly improve the navigability of this channel but at the same time it will mean a reduction in the available anchorage ground along its perimeter.

Your specific recommendations for addressing the concerns of the proposals outlined above are invited. Additionally, your thoughts on matters not addressed above, but which you feel can improve the usefulness and safety of anchorage areas in Hampton Roads are especially desired, and will assist the Coast Guard in the development of any proposed regulations which result from this advance notice.

33 CFR Part 117

[CGD3 84-06]

Drawbridge Operation Regulations; Christina River, Delaware

AGENCY: Coast Guard, DOT.

ACTION: Proposed rule.

SUMMARY: At the request of Delaware Department of Transportation, the Coast Guard is considering a change to the regulations governing the Market Street Bridge over Christina River at Wilmington, Delaware to require advance notice at all times while still providing for closed periods during commuter rush hours. This proposal is being made because no requests have been made to open the draw since 1980. This action should relieve the bridge owner of the burden of having a person constantly available to open the draw

and should still provide for the reasonable needs of navigation.

DATE: Comments must be received on or before May 7, 1984.

ADDRESS: Comments should be submitted to and are available for examination from 9 a.m. to 3 p.m., Monday through Friday, except holidays, at the office of the Commander (oan-br), Third Coast Guard District, Building 135A, Governors Island, NY 10004. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: William C. Heming, Bridge Administrator, Third Coast Guard District, (212) 668–7994.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in this proposed rulemaking by submitting written views, comments, data, or arguments. Persons submitting comments should include their name and address, identify the bridge, and give reasons for concurrence with or for any recommended change in the proposal. Persons desiring acknowledgment that their comments have been received should enclose a stamped, self-addressed postcard or envelope.

The Commander, Third Coast Guard District will evaluate all communications received and will determine a final course of action on this proposal. The proposed regulations may be changed in light of comments received.

Drafting Information

The drafters of this notice are Ernest J. Feemster, project manager, and Mary Ann Arisman, project attorney.

Discussion of Proposed regulations

The requirement for eight hours advance notice is proposed in addition to existing regulations. Existing regulations providing for closed periods during the morning and evening rush hour remain unchanged. These new regulations are being proposed because marine traffic is very sparse through the area consisting, as far as can be determined, of pleasure boats. There are no water-dependent, commercial facilities upstream of the bridge, and no defined requirement for commercial vessel openings. Bridge opening logs show that openings for commercial vessels were last made in 1980 but such openings are not presently required or anticipated.

Bridge opening logs (1980–1983) are not complete, mainly because the bridge was not functioning properly (because of repair) from May 1981 until August 1982. However, no openings of any kind are shown since 1980. The bridge owner has also stated that no openings were requested during the period the bridge was out of service because of repair. It is for these reasons that the regulations are being proposed. No draft economic evaluation has been conducted since very few if any openings are expected to be required each year. Therefore the regulations are expected to have minimal effect on the mariner. Also no entities of any type have been identified as being adversely affected by these proposed regulations.

Economic Assessment and Certification

These proposed regulations have been reviewed under the provisions of Executive Order 12291 and have been determined not to be a major rule. In addition, these proposed regulations are considered to be nonsignificant in accordance with guidelines set out in the Policies and Procedures for Simplification, Analysis, and Review of Regulations (DOT Order 2100.5 of 5–22–80). As explained above, an economic evaluation has not been conducted since its impact is expected to be minimal. In accordance with § 605(b) of the Regulatory Flexibility Act (5 U.S.C. 605(b)), it is certified that these rules, if promulgated, would not have a significant economic impact on a substantial number of small entities.

List of Subjects in 33 CFR Part 117

Bridges.

Proposed Regulations

In consideration of the foregoing, the Coast Guard proposes to amend Part 117 of Title 33, Code of Federal Regulations, by adding a new § 117.235(g)(6)(iii) to read as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

§ 117.235 Christina River, Del.; bridges.

* * * * *

(g) * * *

(6) * * *

(iii) Market Street Bridge, mile 3.0, at Wilmington. Except as provided in paragraph (h) of this section, the draw shall open on signal if at least eight hours notice is given. The draw shall open at all times as soon as possible for passage of a public vessel of the United States.

* * * * *

(33 U.S.C. 499; 49 U.S.C. 1655(g)(2); 49 CFR 1.46(c)(5); 33 CFR 1.05–1(g)(3))

Dated: March 12, 1984.

W. E. Caldwell,

Vice Admiral, U.S. Coast Guard Commander, Third Coast Guard District.

BILLING CODE 4910–14–M

---

33 CFR Part 166

[CGD 84–011]

Port Access Routes

AGENCY: Coast Guard, DOT.

ACTION: Notice of study.

SUMMARY: The Coast Guard is undertaking a study of the potential vessel traffic density and the need for safe access routes in the approach to Boston, Massachusetts. New safety fairways will be considered for this area to overlay the Traffic Separation Scheme (TSS), in the Approach to Boston, Massachusetts, and the Precautionary Area located between that TSS and the TSS Off New York (Eastern Approach Off Nantucket). This study is being conducted in accordance with standards contained in the Ports and Waterways Safety Act (PWSA) (Pub. L. 95–474; 33 U.S.C. 1223 and 1224). As a result of this study, new or modified routing measures may be proposed in a future **Federal Register**. Also, the results of this study could cause restrictions in the manner in which specific offshore areas leased after the date of this notice may be explored and developed.

DATE: Comments due by June 30, 1984.

ADDRESS: Commander (mps), First Coast Guard District, Boston, MA 02114.

FOR FURTHER INFORMATION CONTACT: Lt. Commander Paul J. Howard, (617) 223–6915.

SUPPLEMENTARY INFORMATION:

Specifically, the area to be examined during the study is bounded by a line connecting the following geographic positions:

Latitude	*Longitude*
(1) 42°12′00″ N.,	69°38′00″ W.
(2) 40°28′00″ N.,	66°28′00″ W.
(3) 40°10′00″ N.,	69°16′00″ W.
(4) 40°59′00″ N.,	69°16′00″ W.
(5) 42°12′00″ N.,	70°04′00″ W.

The above area encompasses the TSS in the Approach to Boston, Massachusetts and the Precautionary Area that connects the Boston TSS with the TSS Off New York (Eastern Approach, Off Nantucket). The study area is approximately 500 meters wider than the existing TSS and precautionary area to consider the need for a fairway buffer area along the traffic lanes. (Similar

measurers are being considered in a study of the Eastern Approach off New York as announced at 49 FR 5017, and corrected at 49 FR 8593).

Port access routing needs in the Boston Approach area were previously studied in 1980; and results were published on January 7, 1982, in 47 FR 879. It was announced that a new precautionary area was needed at the junction of the New York and Boston TSSs off Nantucket. This precautionary area was adopted by the International Maritime Organization as a TSS amendment in June 1983. It became effective on January 1, 1984. New interest in leasing tracts on the North Atlantic Outer Continental Shelf in the area of the Boston Approach traffic lanes poses a potentially significant impact on navigation and the Coast Guard has determined that the area must be restudied.

The First Coast Guard District will be conducting the study and developing recommendations. Following is the name, address and telephone number of the project officer who will be responsible for the study of this area: LCDR Paul J. Howard, (mps), First Coast Guard District, Boston, MA 02114, (617) 223–6915.

The Coast Guard is interested in receiving information and opinions from persons who have an interest in safe routing of ships as affected by other uses of the area. Written comments should be mailed to the above address. In accordance with the PWSA, the Coast Guard will directly consult with the Secretaries of State, the Interior, Commerce and Army, and the Governors of the affected states during the study. In order to be most useful, any relevant information should be made available to the First District office by 30 June 1984.

In particular, the Coast Guard would like comments pertaining to the need for and the benefits and costs of a shipping safety fairway to overlay the TSS in the Approach to Boston and the Precautionary Area off Nantucket. Vessel operators are invited to comment on any navigational benefits of having a safety fairway. Offshore developers are encouraged to identify and support any foreseeable cost impact of indirect access resulting from a new fairway.

Study Policies

The actions to be taken as a result of this study cannot be specified at this time. However, the Coast Guard will be governed by certain policies which are emphasized here to assist those who wish to submit comments. These policies and intentions are based on Coast Guard experience in the areas of vessel traffic management, navigation, shiphandling, the effects of weather, and prior analysis of the traffic density in certain regions, as well as the mandates of the PWSA.

The PWSA directs that "in order to provide safe access routes for the movement of vessel traffic proceeding to and from ports * * * the Secretary shall designate necessary fairways and traffic separation schemes" in which the "paramount right of navigation over all others uses" shall be recognized. Before a designation can be made, the Coast Guard is required to "undertake a study of the potential traffic density and the need for safe access route."

During the study, the Coast Guard is directed to consult with federal and state agencies and to "consider the views of representatives of the maritime community, port and harbor authorities or associations, environmental groups, and other parties who may be affected by the proposed action."

The use conflict which is of current concern in the area to be studied involves the present or potential placement of oil exploration and production facilities in or near traditional transatlantic traffic routes. The location of oil and gas exploration and development facilities in areas of heavy vessel traffic can be regulated by the establishment of shipping safety fairways. In accordance with 33 U.S.C. 1223(c), the Coast Guard will "to the extent practicable, reconcile the need for safe access routes with the needs of all other reasonable uses of the area involved." If the Coast Guard determines that a new routing measure designation is needed, a notice of proposed rulemaking will be published.

It is anticipated that the study will be concluded by January 31, 1985.

Dated: March 13, 1984.

T. J. Wojnar,

Rear Admiral, U.S. Coast Guard Chief, Office of Navigation.

[FR Doc. 84–7728 Filed 3–21–84; 8:45 am]

BILLING CODE 4910–14–M

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

33 CFR Part 207

Navigation Regulations; McClellan—Kerr Arkansas River Navigation System

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Proposed regulations.

SUMMARY: The Corps of Engineers proposes to amend the regulations which govern the use, administration and navigation of the McClellan-Kerr Arkansas River Navigation System. This proposed revision eliminates obsolete requirements and provides for an improved format similar to regulations promulgated by the Corps for other major waterways. In addition, several paragraphs pertaining to safety items are included in these regulations.

DATE: Comments must be received on or before April 23, 1984.

ADDRESS: Comments should be submitted in writing to: Office of the Chief of Engineers, Attn: DAEN–CWO–M, Washington, D.C. 20314.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Reavis, Little Rock District, at (501) 378–5738 or Mr. Bob Schmidt, (202) 272–0245.

SUPPLEMENTARY INFORMATION: The existing regulations were written in the late 1960's and contain obsolete requirements. The need for revising the regulations was increased when parts of the regulations were transferred to the Coast Guard in 1977. The draft regulations have an improved format similar to the Ohio River and Mississippi River regulations which will be easier to comprehend.

The principal additions to the regulations are in paragraphs (e), (f), (m), and (o) which are titled: "Safety Rules for Vessels Using Navigation Locks," "Dangerous Cargo Barges," "Restricted Areas at Locks and Dams," and "Repair and Construction of Navigation Structures," respectively. These paragraphs pertain to safety items which are essential to protect the locks and dams and the users.

List of Subjects in 33 CFR Part 207

Navigation (water), water transportation, vessels, Boats and boating safety.

An environmental impact assessment of the revised regulations has been prepared and placed on file in Little Rock and Tulsa Districts. The evaluation of the assessment was favorable.

Note.—The Chief of Engineers has determined that this document does not contain a major rule requiring a regulatory impact analysis under Executive Order 12291 because it will not result in an annual effect on the economy of $100 million or more and it will not result in a major increase in costs or prices. The Chief of Engineers has also determined that this proposed rule will not have a significant economic impact on a substantial number of entities and thus does not require the preparation of a regulatory flexibility analysis.

Dated: January 24, 1984.

Michael Volpe,

Colonel, Corps of Engineers, Executive Director of Civil Works.

PART 207—[AMENDED]

Accordingly, the Corps of Engineers proposes, to revise 33 CFR 207.275 as set forth below.

§ 207.275 McClellan-Kerr Arkansas River Navigation System: Use, administration, and navigation.

(a) *Applicability of regulations.* These regulations apply to all locks and appurtenant structures, wharves, and other Corps of Engineers structures in the following waterways: The White River between Mississippi River and Arkansas Post Canal, Arkansas; Arkansas Post Canal, Arkansas; Arkansas River between Dam No. 2, Arkansas, and Verdigris River, Oklahoma; Verdigris River between Arkansas River and Catoosa, Oklahoma; and reservoirs on these waterways between Mississippi River, Arkansas, and Catoosa, Oklahoma.

(b) *Authority of district engineers.* The use, administration, and navigation of the structures to which this section applies shall be under the direction of the officers of the Corps of Engineers, U.S. Army detailed in charge of the respective districts, and their authorized assistants. The cities in which these district engineers are located, and the limits of their jurisdictions, are as follows:

(1) *District engineer, U.S. Army Engineer District, Little Rock, Arkansas.* From Mississippi River, Arkansas, to Arkansas-Oklahoma State line at Fort Smith, Arkansas.

(2) *District Engineer, U.S. Army Engineer District, Tulsa, Oklahoma.* From Arkansas-Oklahoma State line at Fort Smith, Arkansas, to Catoosa, Oklahoma.

(c) *Authority of lockmasters.* The lockmaster shall be charged with the immediate control and management of the lock and of the area set aside as the lock area. The lockmaster shall ensure that all laws, rules, and regulations for the use of the lock and lock area are duly complied with, to which end he/she is authorized to give all necessary orders and directions both to employees of the Government and to any person within the limits of the lock area, whether navigating the lock or not. No one shall cause any movement of any vessel or other floating thing in the lock area except by or under the direction of the lockmaster. Failure to comply with directions given by the lockmaster pursuant to the regulations in this section may result in refusal of lockage. For the purpose of the regulations in this section, the "lock area" is considered to be between the upstream and downstream arrival points. The district engineer may extend the limits of the lock area consistent with the safe and efficient use of the waterway.

(d) *Precedence at locks.* (1) Precedence shall be given to vessels owned by the United States, licensed commercial passenger vessels operating on a published schedule or regularly operating in the "for hire" trade, commercial tows, rafts, and pleasure craft, in the order named. Precedence being equal, the first vessel to arrive at a lock will normally be the first to lock through; however, the lockmaster may depart from this procedure to achieve optimum utilization of the lock or in accordance with the order of precedence stated above and paragraphs (d)(2) and (h). Arrival points have been established ashore upstream and downstream of the locks. Vessels arriving at these markers or the mooring cells immediately upstream and downstream of the lock will be considered as having arrived at the lock within the meaning of this subparagraph.

(2) Vessels or tows, with overall dimensions greater than 105 feet wide or 595 feet long may transit the lock at such time as the lockmaster determines that they will neither unduly delay the transit of craft of lesser dimensions, nor endanger the lock structure and appurtenances because of wind, current, or other adverse conditions. These craft are also subject to such special handling requirements as the lockmaster deems necessary at the time of transit.

(e) *Safety rules for vessels using navigation locks.* (1) Leaking vessels may be excluded from the locks.

(2) Open flames, burning or other flammable activities such as painting will not be permitted in the lock chamber during the locking cycle.

(3) All deckhands handling lines during locking procedures shall wear a personal flotation device.

(f) *Dangerous cargo barges.* The following rules are prescribed for all tows containing dangerous cargoes as defined in Title 46, Code of Federal Regulations. These rules are applicable to both loaded barges and empty barges.

(1) All hatches on barges used to transport dangerous cargoes shall be closed before the tow enters the lock area.

(2) Prior to entering the lock area, towboat pilots shall furnish the name of product, the source of shipment, the company which made the shipment, and the consignee. If a towboat is not equipped with a radio or its radio is out of service, pilots shall furnish this information to the lockmaster while the tow is in the lock chamber. The shipping papers required by Title 46, Code of Federal Regulations, shall be available for review by the lockmaster. Lockage shall be refused when this information is not furnished to the lockmaster.

(3) Fenders shall be water-soaked or otherwise spark proofed.

(4) Smoking, open flames, chipping, or other spark producing activity are prohibited in the "lock area".

(5) Simultaneous lockage of other vessels with vessels carrying dangerous cargoes or containing flammable vapors shall normally not be permitted. If significant delays are occurring at a lock, such simultaneous lockages, except with pleasure craft, may be permitted by the lockmaster, when he/she determines such action safe and appropriate, provided:

(i) The first vessel entering or the last vessel exiting shall be secured before the other enters or leaves.

(ii) All masters involved have agreed to the joint use of the lock.

(g) *General locking procedures.* (1) In case two or more boats or tows are to enter for the same lockage, their order of entry and exit shall be determined by the lockmaster.

(2) Tows entering a lock shall come to a complete stop at a point designated by the district engineer before proceeding to the mooring position.

(3) When entering or exiting locks, tow speeds shall not exceed 200 feet per minute (rate of slow walk) or the rate of travel whereby the tow can be stopped by checking should mechanical difficulties develop. when navigating over Norrell Dam during high water, vessels shall reduce speed to barely maintain steerage way. Pilots should check with the individual lockmasters concerning prevailing conditions. It is also recommended that pilots check their ability to reverse their engines prior to beginning an approach. Towboat engines shall not be turned off in the lock unless authorized by lockmaster.

(4) The sides and ends of all vessels passing through any lock shall be free from protrusions of any kind which might damage the lock structure.

(5) All vessels shall be provided with suitable fenders. One or more deckhands, as the lockmaster may direct, shall be kept at the bow and stern of every tow until it has cleared the lock and guidewalls to protect the walls by use of hand-held fenders. When entering a lock, two deckhands are required at the bow of tows 105 feet wide or wider until the bow passes the recessed miter gates.

(6) Masters and pilots must use every precaution to prevent unnecessary delay in entering or leaving locks. Vessels failing to enter locks with reasonable promptness when signaled to do so shall lose their turn. Rearranging or switching of barges in the locks or in approaches is prohibited unless approved or directed by the lockmaster.

(7) No vessel shall enter a lock unless its draft is at least 2 feet less than the least depth of water over the sills. Information concerning controlling depth over sills can be obtained from the lockmaster at each lock or by inquiry at the office of the District Engineer of the District in which the lock is located.

(8) Vessels awaiting their turn to lock shall be positioned so that they will not interfere with vessels leaving the lock. However, to the extent practicable under the prevailing conditions, vessels and tows shall position themselves so as to minimize approach time when signaled to do so.

(9) *Number of Lockages.* (i) Tows or rafts locking in sections will generally be allowed only two consecutive lockages if other vessels are waiting lockage, but may be allowed more in special cases. No part of a tow shall pass a lock until the whole of the one preceding it shall have passed. The lockmaster may prescribe a departure from the normal order of precedence to achieve the best lock utilization.

(ii) One or more deckhands, as the lockmaster may direct, shall tend the lines at the bow and stern of each section of a tow that transits a lock or moors to the guidewalls.

(10) Vessels shall enter and leave locks under such control as to prevent any damage to the walls and gates.

(h) *Lockage of pleasure craft.* In order to fully utilize the capacity of the lock, lockmasters may expedite the lockage of pleasure craft by locking them through with commercial vessels, except vessels carrying volatile cargoes or other substances likely to emit toxic, flammable, or explosive vapors. If the lockage of pleasure craft cannot be accomplished within the time required for three single lockages, a separate lockage of pleasure craft shall be made. Pleasure craft operators are advised that the locks have a pull chain located at the end of each guidewall which signals the lockmaster that lockage is desired.

(i) *Locking rafts and floating dredge discharge line.* While awaiting lockage, rafts and tows containing floating dredge discharge line shall not obstruct the lock approaches. They shall be properly and securely assembled to assure adequate control while entering and exiting the locks. The passage of loose logs through a lock is prohibited. Lockage will be refused to rafts unless the logs float sufficiently high to make it evident that the raft will not sink.

(j) *Mooring.* (1) *At Locks.* (i) When in the locks, all vessels shall be moored as directed by the lockmaster. Vessels shall be Moored with bow and stern lines leading in opposite directions to prevent the vessel from "running" in the lock. All vessels will have one additional line available on the head of the tow for emergency use. The pilot of a vessel shall remain at his station in the pilot house and the deckhands shall stand by the mooring lines during the entire locking procedure. When the vessel is securely moored, the pilot shall not cause movement of the propeller except in an emergency or unless directed by the lockmaster. Tying to lock ladders is strictly prohibited.

(ii) Mooring of any vessel will not be permitted at or between the arrival points without permission of the lockmaster.

(2) *Outside of Locks.* (i) Vessels over 40 feet in length shall not anchor over revetted banks of the river, except in case of emergency. Vessels over 40 feet in length shall not land against revetted banks without written permission of the district engineer. In all cases, every precaution to avoid damage to the revetment works shall be exercised. The construction of log rafts along mattressed or paved banks or the tying up and landing of log rafts against such banks require the permission of the district engineer.

(ii) Government mooring facilities at the junction of main stem and secondary channels are to provide temporary mooring for tows awaiting transfer of barges to or from ports, docks, or fleeting areas located on the secondary channels. These facilities shall not be used for storage of barges or fleeting activities. The maximum permissible time of mooring at the facilities shall be determined by the district engineer.

(k) *Locking signals.* Vessels must approach the locks with caution and not enter or leave the locks until signaled to do so by the lockmaster.

(1) *Signal By Radio.* Requests for lockage by radio will be the primary signal for vessels equipped with VHF–FM radios operating in the FCC authorized Maritime Band. District engineers will advise all known interested parties of the channels available for use in communicating with the locks. Commercial tows should contact the locks at least one-half hour before arrival in order that the pilots may be informed of current river and traffic conditions that may affect the safe passage of their tows.

(2) *Sound Signals.* In addition to radio communication, the following sound signals are prescribed for use during lockage. Sound signals given by vessels and locks shall be given by means of a horn. Long blasts of the horn shall not exceed 10 seconds and short blasts shall not exceed 3 seconds. The following sound signals are prescribed:

(i) Vessels desiring a single lockage shall give notice to the lockmaster by one long blast of the horn followed by one short blast. If a double lockage is required, vessels shall give one long blast of the horn followed by two short blasts. These signals are not required from pleasure craft not equipped with horns. Locking procedures for pleasure craft are prescribed in paragraph (h).

(ii) When the lock is ready for entrance, the lockmaster shall give one long blast of the horn to signal permission to enter the lock chamber.

(iii) The lockmaster shall give permission to leave the lock chamber by one short blast of the horn.

(iv) Four or more short blasts of the lock horn delivered in rapid succession will be used as a means of attracting attention, to indicate caution, or to signal danger. This signal will be used to attract the attention of the masters and crews of vessels using the lock or navigating in the lock area and to indicate that something unusual involving danger or requiring special caution is happening or is about to happen. When this signal is given by the lockmaster, the masters and crews of vessels in the vicinity shall immediately become alert to determine the reason for the signal and shall take the necessary steps to cope with the situation.

(3) *Visual Signals.* Signal lights are displayed outside each lock gate to supplement the radio and sound signals. Vessels will be governed as follows:

(i) One flashing green light to indicate that the lock is open to approaching navigation.

(ii) One flashing red light to indicate that the lock is not open to approaching navigation. Vessels shall stand clear.

(iii) One flashing amber light to indicate that the lock is being made ready to receive vessels for lockage. Vessels may move along side the guidewall, but shall remain at least 200 feet from the miter gates.

(iv) Flashing amber and green lights to indicate that one or both lock gates can not be fully recessed or other unusual conditions exist. Vessels can enter the lock with caution.

(v) In the absence of any of the above visual signals, pilot shall signal for lockage by radio or horn and wait for

the lockmaster to acknowledge their signal.

(l) *Navigation lights on locks and dams.*

(1) The following navigation lights will be displayed at all locks except Norrell Lock and Lock No. 2 during hours of darkness and heavy fog.

(i) Three green lights visible through an arc of 360 degrees arranged in a vertical line on the end of the upstream guidewall.

(ii) Two green lights visible through an arc of 360 degrees arranged in a vertical line on the end of the downstream guardwall.

(iii) A single red light visible through an arc of 360 degrees on each end of the upstream and downstream guardwall.

(2) The following navigation lights will be displayed at Norrell Lock and Lock No. 2 during hours of darkness and heavy fog, except when navigation is passing over Norrel Dam.

(i) Three green lights visible through an arc of 360 degrees arranged in a vertical line on the end of the upstream guardwall.

(ii) Two green lights visible through an arc of 360 degrees arranged in a vertical line on the end of the downstream guidewall.

(iii) A single red light visible through an arc of 360 degrees on the dolphin located furthest upstream in line with the guidewall and on the dolphin located furthest downstream in line with the guidewall.

(3) The following navigation lights will be displayed at Norrell Lock and Dam during hours of darkness and heavy fog when navigation is passing over the dam. During daylight hours a yellow and black disc will be displayed on each end (upstream and downstream) of the guidewall to signal navigation over the dam.

(i) Three red lights visible through an arc of 360 degrees arranged in a vertical line on the end of the upstream guardwall.

(ii) Two red lights visible through an arc of 360 degrees arranged in a vertical line on the end of the downstream guidewall.

(iii) A single red light visible through an arc of 360 degrees on the dolphin located furthest upstream in line with the guidewall and on the dolphin located furthest downstream in line with the guidewall.

(iv) A single, flashing blue light visible through an arc of 360 degrees located on the end of the dam opposite the lock.

(m) *Restricted areas at locks and dams.* All water immediately above and below each dam, as posted by the respective district engineers, are hereby designated as restricted areas. No vessel or other floating craft shall enter any such restricted area without permission of the lockmaster. The limits of the restricted areas at each dam will be determined by the responsible district engineer and marked by signs installed in conspicuous and appropriate places.

(n) *Trespass on lock and dam property.* (1) Trespass on locks or dams or other United States property pertaining to the locks or dams is strictly prohibited except in those areas specifically permitted by the lockmaster. Any person committing a willful injury to any United States property or personnel will be prosecuted.

(2) No fishing will be permitted from the lock and dam structures.

(3) No one but employees of the United States shall move any lock machinery unless directed by the lockmaster. Tampering or meddling with the machinery or other parts of the lock is strictly forbidden.

(o) *Repair and construction of navigation structures.* To avoid damage to plant and structures connected with the construction or repair of locks and dams, vessels passing structures in the process of construction or repair shall reduce their speed and navigate with special caution while in the vicinity of such work.

(p) *Reporting of navigation incidents.* In furtherance of maintaining the navigation channel the following rules are prescribed for all navigation interests:

(1) Any incident resulting in uncontrolled barges shall immediately be reported to the nearest lock and the appropriate U.S. Coast Guard Office. The report shall include information as to the number of loose barges, their cargo, and the time and location where they broke loose. The lockmaster shall be kept informed of the progress being made in bringing the barges under control so that he/she can initiate whatever actions may be warranted.

(2) Masters, owners, or other persons using the waterways to which the regulations in this section apply shall report to the nearest lockmaster or the district engineer by the most expeditious means available all marine accidents; such as fire, collision, sinking, or grounding, where there is possible obstruction of the channel or interference with navigation; furnishing a clear statement as to the name, address, and ownership of the vessel or vessels involved; the time and place; and the action taken. In all cases, the owner of a sunken vessel shall take immediate steps to mark the wreck properly.

(i) Sunken or sinking barges shall be reported to the nearest lock both downstream and upstream of the location in order that traffic passing those points may be advised of the hazards. The appropriate U.S. Coast Guard Office shall also be notified.

(ii) Whenever it is necessary to report an incident involving uncontrolled, sunken or sinking barges, the cargo in the barges shall be precisely identified.

(iii) The owners or masters of vessels sunk in the navigable waters of the United States shall provide the appropriate district engineer with a copy of the sunken vessel report furnished to the appropriate U.S. Coast Guard Marine Inspection Office.

(q) *Statistical information.* Masters of vessels shall furnish to the lockmaster such statistics on passengers or cargo as may be requested. Statistics must be furnished in writing and/or orally as requested by the lockmaster.

(r) *Liability for damage.* This section shall not affect the liability of the owners and operators of vessels for any damage caused by their operations. Should any Government property be damaged as the result of the operation of a vessel, the master of the vessel shall report the accident to the nearest lockmaster or the appropriate district engineer.

(s) *Persistent violation of regulations.* If the owner or operator of any vessel persistently violates the regulations of this section or any orders given in pursuance thereof, after due notice of same, lockage may be refused by the district engineer. The lockmaster may refuse lockage if deemed necessary to protect Government property in the vicinity of the lock.

(t) *Vessels to carry regulations.* A copy of these regulations shall be kept at all times on board each commercial vessel engaged in navigating the waterway. Copies may be obtained from any lock or district engineer's office on request. Masters of such vessels are also required to have on board current copies of the navigation charts and applicable Notices to Navigation Interest.

BILLING CODE 3710-92-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 271

[SW-1-FRL-2549-3]

Hazardous Waste Management Program; Massachusetts Amended Application for Interim Authorization, Phase II, Components A, B, and C

AGENCY: Environmental Protection Agency.

ACTION: Notice of public comment period and notice of a public hearing.

SUMMARY: Today EPA is announcing the availability for public review of the Massachusetts amended application for Phase II, Components A, B, and C, Interim Authorization, Hazardous Waste Management Program, inviting public comment, and giving notice that if significant public interest is expressed, EPA will hold a public hearing on the amended application. These amendments have been developed by Massachusetts to address comments made by EPA on the state's earlier submission.

40 CFR 271.123 (formerly § 123.123(c)) requires the formal review period to recommence upon receipt of a revised submission of a state's application, if the state's submission is "materially changed". EPA today reopens Massachusetts Phase II, Components A, B, and C application for public review because Massachusetts has made material changes to its regulations in order to respond to EPA comments on the state's earlier submission. EPA's review of the State's revised application began on March 6, 1984, the date EPA received the amended application. Within 90 days of this notice in the **Federal Register**, EPA will give notice again in the **Federal Register** as to the denial or issuance of Interim Authorization.

DATE: If significant public interest is expressed in holding a hearing, a public hearing is scheduled for Tuesday, April 24, 1984 at 10:00 a.m. EPA reserves the right to cancel the public hearing if significant public interest in holding a hearing is not communicated to EPA by telephone or in writing by April 17, 1984. All written comments on the Interim authorization application must be received by the close of business on April 24, 1984. If you wish to know whether a hearing will be held, write or telephone the EPA contact person listed below after April 18, 1984. This procedure is being used to expedite consideration of the Massachusetts application. As a result no additional **Federal Register** notice will be published concerning this hearing.

ADDRESSES: EPA will hold a public hearing, if necessary, on Massachusetts application at the University of Massachusetts Medical Center, Level A Lecture Hall, 55 Lake Avenue North, Worcester, Massachusetts, 01605.

Written comments on the application and written or telephone communication of interest in holding a hearing must be sent to the EPA contact person listed below.

Copies of the amended Massachusetts Phase II Interim Authorization application are available during normal business hours for inspection and copying by the public at the following addresses:

Massachusetts Department of Environmental Quality Engineering, Division of Hazardous Waste, 1 Winter Street, Boston, Massachusetts 02108, Telephone (617) 292–5851

Massachusetts Department of Environmental Quality Engineering, Division of Hazardous Waste, Central Regional Office, 75 Grove Street, Worcester, Massachusetts 01605, Telephone (617) 792–7650

Environmental Protection Agency, Region I Office Library, Room E–121, John F. Kennedy Federal Building, Boston, Massachusetts 02203, Telephone (617) 223–5791

EPA Headquarters Library, Room 2404, 401 M Street, S.W., Washington, DC 20460

FOR FURTHER INFORMATION CONTACT: Gary B. Gosbee, Massachusetts State Coordinator, State Waste Programs Branch, U.S. EPA, Region I, John F. Kennedy Federal Building, Boston, Massachusetts 02203, Telephone (617) 223–1922.

SUPPLEMENTARY INFORMATION: The Commonwealth of Massachusetts received Interim Authorization for Phase I on February 25, 1981. Its Phase II application for Components A, B, and C was submitted to EPA on October 21, 1983. In the November 22, 1983 **Federal Register**, 48 FR 52754, a notice was published concerning a public hearing to be held on Massachusetts' Phase II Components A, B, and C Application for Interim Authorization. The notice also announced the availability of the application for public review and invited public comment on the application. A public hearing on the application was held on December 22, 1983 at which 8 parties presented comments.

On December 20, 1983, EPA transmitted its comments to the state on their Phase II application. Some of these comments raised questions concerning the Program Description, Memorandum of Agreement, Authorization Plan and Attorney General's Statement. Other comments dealt with our ability to determine whether the Massachusetts regulations were substantially equivalent to the Federal regulations, particularly in the area of recycle/reuse of hazardous waste.

On March 6, 1984, Massachusetts submitted a revised application reflecting changes to the Massachusetts program to address the comments raised in our December 20, 1983 letter. In particular, they have made regulation changes in the area of recycle/reuse of hazardous waste to respond to our earlier comments on this subject. It is this revised application that is being presented for public comment in this Notice. Within 90 days of this notice in the **Federal Register**, EPA will give notice again in the **Federal Register** as to the denial or issuance of Interim Authorization.

Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this action will not have a significant economic impact on a substantial number of small entities. The authorization of a state suspends the applicability of certain federal regulations in favor of the state program, thereby eliminating duplicative requirements for handlers of hazardous waste in the state. It does not impose any new burdens on small entities. This action, therefore, does not require a regulatory flexibility analysis.

Executive Order 12291

The Office of Management and Budget has exempted this action from the requirements of Section 3, Executive Order 12291.

Lists of Subjects in 40 CFR Part 271

Hazardous materials, Indian lands, Reporting and recordkeeping requirements, Waste treatment and disposal, Intergovernmental relations, Penalties, Confidential business information.

Authority

This notice is issued under the authority of Sections 2002(a), 3006, and 7004(b) of the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act of 1976 as amended, 42 U.S.C. 6912(a), 6926, and 6974(b), and delegation 8–7.

Dated: March 12, 1984.

Michael R. Deland,

Regional Administrator.

BILLING CODE 6560–50–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

46 CFR Parts 25, 58, 147, and 184

[CGD 83-013]

Carriage and Use of Liquefied or Nonliquefied Flammable Gas as Cooking Rules on Vessels Carrying Passengers for Hire

AGENCY: Coast Guard, DOT.

ACTION: Proposed rules.

SUMMARY: Coast Guard regulations in 46 CFR Parts 25, 58, 147, and 184 currently prohibit the carriage and use of liquefied and nonliquefied flammable gas as ships' stores on vessels carrying passengers for hire. The purpose of this rulemaking is to remove this prohibition as it pertains to cooking appliances and to promulgate standards to govern the design, installation and testing of cooking appliances using these fuels.

DATE: Comments must be received on or before May 22, 1984.

ADDRESSES: 1. Send comments to Commandant (G-CMC/44) [CGD 83-013], U.S. Coast Guard, Washington, DC 20593. All comments received and other materials referenced in this notice will be available for examination or copying between 7:30 a.m. and 3:30 p.m, Monday through Friday, exclusive of Federal holidays, at the Marine Safety Council (G-CMC/44), Room 4402, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593. Comments may also be hand delivered to this address.

2. The standards proposed for incorporation by reference may be obtained from the American Boat and Yacht Council Inc., P.O. Box 806, Amityville, NY 11701, (516) 598-0050. They may also be examined at most Coast Guard Marine Inspection and Marine Safety Offices.

FOR FURTHER INFORMATION CONTACT: LCDR Alan E. Spackman, Project Manager, (202) 426-4431.

SUPPLEMENTARY INFORMATION: The public is invited to participate in this proposed rulemaking by submitting written views, data or arguments. Comments should include the name and address, identify this notice [CGD 83-103], the specific section of the proposal to which the comments apply, and give reasons. If acknowledgement of receipt of a comment is desired, a stamped, self-addresed post card should be enclosed. The proposal may be changed in light of comments received. All comments will be considered before final action is taken on this proposal. No public hearing is planned, but one will be held if requested by anyone raising a genuine issue.

Drafting Information

The principal persons involved in drafting this document are LCDRs Alan E. Spackman and James W. Gormanson, Office of Merchant Marine Safety, and Michael N. Mervin, Office of the Chief Counsel.

E.O. 12291 and DOT Regulatory Policies and Procedures

These proposed regulations are considered to be non-major under Executive Order 12291 and non significant under the DOT regulatory policies and procedures (44 FR 11034; February 26, 1979) A draft regulatory evaluation has been prepared and placed in the rulemaking docket. It may be inspected or copied at the location specified in the **ADDRESSES** paragraph. Copies may also be obtained by sending a written request to that address.

As explained in the draft evaluation, the proposed rules are deregulatory. They provide alternatives to fuels currently in use by permitting the use of cooking fuels that are currently prohibited by the regulations. The rules would not require vessel owners or operators to install systems using these fuels. Vessel owners would choose to install LPG or CNG cooking appliances on new vessels only if they believed that the cost of such equipment, in terms of initial purchase price, installation costs or operating costs were less than the currently permitted systems, or if they believed that these systems provided added convenience that outweighted any additional costs. Owners of existing vessels with installed cooking appliances may choose to replace them with LPG or CNG systems if they believed them to be less costly, if they are experiencing difficulty in obtaining fuel for their current systems and LPG or CNG are readily available, or if they prefer these systems for their cleanliness and ease of operation.

Because the proposed rules serve only to expand the choices available to vessel owners, and because some vessel owners may choose to install LPG or CNG systems for their added convenience even though they may in some instances be more costly, it is not possible to quantify the economic impact of this proposal. There are relatively minor differences between the cost of electric marine stoves and those with similar features that are fueled either by alcohol or LPG. Depending upon the individual features of an electric stove, its purchase price may range from less than $100 to over $400; typically, an equivalent alcohol stove would be priced $10 to $30 more, and an LPG stove priced $15 to $45 more. There would be little, if any, difference in installation costs. The differences in operating costs would be governed by the relative costs and availability of the fuels.

Environmental Assessment

An environmental assessment had not been prepared. As specified by DOT Order 5610.1C and Commandant Instruction M16714.1A, regulations of this type are excluded from the requirement to prepare an environmental assessment.

Regulatory Flexibility Act

The Coast Guard certifies that this proposal will not have a significant economic impact on a substantial number of small entities. This proposal principally affects small vessels carrying passengers for hire. This includes both Coast Guard inspected and uninspected vessels. Many of these are operated as small businesses. While it has not been possible to quantify the economic impact of this proposal, any cost of installing LPG or CNG cooking appliances would be voluntarily assumed by the vessel owner or operator. The proposal does not require the installation of systems using these fuels.

Discussion of the Proposed Regulations

The Coast Guard's ships' store regulations, 46 CFR Part 147, prohibit the carriage of liquefied and non-liquefied gases, such as liquefied petroleum gas (LPG) and compressed natural gas (CNG), as ships' stores items (items intended for use or consumption on board a vessel) on vessels carrying passengers for hire. This prohibition dates back to 1937. The prohibition is referenced or paraphrased in 46 CFR 25.45—Uninspected Vessels, 46 CFR 58.16—Marine Engineering, and 46 CFR 184.05—Small Passenger Vessels.

The Coast Guard has recently received numerous requests asking that this prohibition, as it pertains to the use of LPG and CNG as cooking fuels, be re-evaluated. A technical proposal submitted by the Virgin Islands Charterboat League (VICBL) cites advances in the technology of LPG systems, the adoption by the American Boat and Yacht Council (ABYC) of voluntary standards, and their own perception of the hazards of these fuels vis-a-vis the principal alternative fuels—alcohol and kerosene—as reasons for re-evaluating the regulations. Also mentioned are cleanliness, convenience and commercial availability of LPG as compared to the alternative fuels. Some vessel operators also claim that they

face inequitable treatment because LPG cooking appliances are not prohibited on vessels offered for bareboat charter or on similar vessels operating in the British Virgin Islands.

The Coast Guard has reviewed its casualty statistics for recreational boats, where LPG and CNG systems are not prohibited. This data indicates that LPG and CNG cooking systems do not contribute to a greater number of galley fires than the principal alternative fuels—kerosene and alcohol. However, data is not available to indicate the number of LPG and CNG units installed vis-a-vis kerosene or alcohol units.

The ABYC has adopted voluntary standards for both LNG and CNG systems on small vessels. ABYC standard A–1–78 provides standards for the design, installation, testing and use of LPG systems; ABYC standard A–22–78 provides similar standards for CNG systems. Coast Guard regulations (46 CFR 58.16) permit the use of LPG systems on inspected vessels that do not carry passengers for hire; ABYC standard A–1–78 is similar in most respects to these regulations. The Coast Guard does not have regulations specifically governing the design, installation or testing of CNG systems on inspected vessels. The Coast Guard has concluded that there is not sufficient interest in installing CNG systems on large inspected vessels to develop specific regulations at this time; such installations may be considered on a case-by-case basis under the provisions of 46 CFR 50.20–30.

Having reviewed the ABYC standards A–1–78 and A–22–78 the Coast Guard has concluded that, with few exceptions, they can be adopted and used to govern the design, installation and testing of attended LPG and CNG systems on vessels carrying passengers for hire. A major concern with both LPG and CNG is the possibility of a dangerous concentration of vapor accumulating in any enclosed space through which the fuel supply piping is led, where the appliances are located, or where the cylinders are stored. To minimize the possibility of inadvertent vapor accumulations the Coast Guard is proposing to limit the use of LPG and CNG to cooking appliances at this time. The ABYC standards do permit the use of LPG and CNG for unattended appliances such as heating units. Cooking appliances are normally operated by a member of the vessel's crew, the fuel need only be supplied to these appliances for a limited period of time, and they are normally attended while in operation. Most other LPG or CNG applications involve unattended appliances or appliances, such as heating units, which would normally be accessible to and operated by the passengers. The Coast Guard has concluded that the greater possibility of undetected vapor accumulation or misuse with these other LPG and CNG applications warrants their continued prohibition on passenger-carrying vessels for the present. To further reduce the possibility of dangerous vapor accumulations, the Coast Guard is proposing to retain its requirements that LPG and CNG cylinders be located outside enclosed areas, and to add a requirement that a remotely operated shut-off valve be installed in the fuel supply line if it enters an enclosed space on the vessel.

On 26 August 1983, all the maritime shipping laws related to vessels and seamen which were contained in the Revised Statutes and the Statutes at Large were recodified and enacted into Subtitle II of Title 46, United States Code, "Shipping". The recodification repealed Revised Statute 4472 (46 U.S.C. 170) on the basis that its authority was duplicated elsewhere within the Coast Guard's and Department of Transportation's statutes, and that no substantive changes were made to the law. The Coast Guard's authority to regulate Ship's Stores on inspected vessels is now 46 U.S.C. 3306. The authority to regulate cooking, heating, and lighting systems on uninspected vessels carrying passengers for hire (46 CFR 25.45) is now 46 U.S.C. 4105 and 46 U.S.C. 4302. The authority citations in the proposed rule indicate these changes.

In accordance with 46 U.S.C. 4302(c), the Coast Guard consulted with the National Boating Safety Advisory Council concerning the proposed amendment to 46 CFR 25.45 at its scheduled meeting 9–10 November 1983 in St. Louis, Missouri and no comments were received.

In this Notice of Proposed Rulemaking (NPRM) the Coast Guard proposes to amend 46 CFR Subpart 25.45 by consolidating into one subpart all the existing requirements in Parts 25 and 147 related to cooking, heating, and lighting systems on uninspected vessels carrying passengers for hire. Included in the proposed Subpart 25.45 is the authorization for using LPG and CNG as cooking fuels. If the proposal is adopted, the ABYC standards would be incorporated by reference and would apply to LPG and CNG cooking appliances on uninspected passenger-carrying vessels. The proposal would further modify the existing regulations in Parts 58, 147, and 184 to permit LPG and CNG systems on inspected vessels carrying passengers for hire.

List of Subjects

46 CFR Part 25

Marine safety, Vessels, Fishing vessels, Passenger vessels, Fire prevention, Hazardous materials transportation.

46 CFR Part 58

Marine safety, Vessels, Oil and gas exploration.

46 CFR Part 147

Marine safety, Arms and munitions, Hazardous materials transportation.

46 CFR Part 184

Marine safety, Passenger vessels, Navigation (water), Communication equipment.

In consideration of the foregoing, the Coast Guard proposes to amend Chapter I of Title 46 of the Code of Federal Regulations as set forth below.

PART 25—REQUIREMENTS

* * * * *

1. By revising Subpart 25.45 to read as follows:

Subpart 25.45—Cooking, Heating, and Lighting Systems

25.45–1 Heating and lighting systems on vessels carrying passengers for hire.
25.45–2 Cooking systems on vessels carrying passengers for hire.

Authority: 46 U.S.C. 2104; 46 U.S.C. 4102; 46 U.S.C. 4104; 46 U.S.C. 4105; 46 U.S.C. 4302; 49 CFR 1.4 (a) and (g); and CFR 1.46 except as otherwise noted.

Subpart 25.45—Cooking, Heating, and Lighting Systems

§ 25.45–1 Heating and lighting systems on vessels carrying passengers for hire.

(a) No fuel may be used in any heating or lighting system on any vessel carrying passengers for hire without approval of Commandant (G-MTH), except—

(1) Alcohol, solid,

(2) Alcohol, liquid, combustible,

(3) Fuel oil, No. 1, No. 2, or No. 3,

(4) Kerosene, and

(5) Wood.

(b) Heating and lighting systems using alcohol must meet the following requirements:

(1) Containers of solidified alcohol must be properly secured to a fixed base.

(2) Fluid alcohol burners, where wet priming is used, must have—

(i) A catch pan of not less than ¾" depth secured inside the frame of the stove; or

(ii) The metal protection under the stove flanged up at least ¾" to form a pan.

(c) Heating and lighting systems using kerosene of fuel oil must meet the following requirements:

(1) Where wet priming is used, each system must have—

(i) A catch pan of not less than ¾" depth secured inside the frame of the stove; or

(ii) The metal protection under the stove flanged up at least ¾" to form a pan.

(2) Fuel tanks must be—

(i) Separated from the stove that they serve;

(ii) Mounted in a location open to the atmosphere or mounted inside a compartment that is vented to the atmosphere; and

(iii) Fitted with an outside fill and vent.

§ 25.45–2 Cooking systems on vessels carrying passengers for hire.

(a) No fuel may be used in any cooking system on any vessel carrying passengers for hire without approval of Commandant (G–MTH) except those listed in § 25.45–1, subject to the requirements stated therein, and liquefied petroleum gas (LPG), and compressed natural gas (CNG).

(b) Cooking systems using LPG or CNG must meet the following requirements:

(1) The design, installation, and testing of each LPG system meet ABYC A–1–78.

(2) The design, installation and testing of each CNG system meet ABYC A–22–78.

(3) The stowage of each LPG or CNG cylinder in a cooking system must be as follows:

(i) Each cylinder must be located in a locker or housing on or above the weather deck in such a position that any escaping vapor cannot reach living quarters or enclosed compartments on board the vessel;

(ii) The lockers or housings must be vented to the open air near the bottom for LPG and near the top of the enclosure for CNG; and

(iii) The cylinder must be protected from climatic extremes.

(4) If the fuel supply line of an LPG or CNG system enters an enclosed space on the vessel, a remote shut-off valve must be installed that can be operated from a position adjacent to the appliance. The valve must be located between the regulatory and the point where the fuel supply line enters the enclosed portion of the vessel.

(c) In accordance with 5 U.S.C. 552(a), the following standards of the American Boat and Yacht Council, Inc. (ABYC), P.O. Box 806, Amityville, NY 11701, (516) 598–0050, are incorporated by reference in this section as approved by the Director of the Federal Register on February 6, 1984.

(1) Standard A–1–78, "Marine LPG—Liquefied Petroleum Gas Systems" dated December 15, 1978.

(2) Standard A–22–78, "Marine CNG—Compressed Natural Gas Systems" dated December 15, 1978.

PART 58—MAIN AND AUXILIARY MACHINERY AND RELATED SYSTEMS

3. The authority citation for Part 58 would be revised to read as follows:

Authority: 46 U.S.C. 1333(b); 46 U.S.C. 2104; 46 U.S.C. 3306; 46 U.S.C. 3316; 46 U.S.C. 3703; 46 U.S.C. 4104; 50 U.S.C. 198; 49 CFR 1.46; E.O. 12234, 45 FR 58801, Sept. 5, 1980 except as otherwise noted.

4. In § 58.61–1 by revising paragraph (a) to read as follows:

§ 58.16–1 Scope.

(a) This subpart prescribes standards for the use of liquefied pertroleum gas for heating and cooking on inspected vessels, except ferries.

5. By adding a new § 58.16–7 to read as follows:

§ 58.16–7 Use of liquefied petroleum gas.

(a) Cooking equipment using liquefied petroleum gas on vessels of 100 gross tons or more that carry passengers for hire must meet the requirements of this subpart.

(b) Cooking equipment using liquefied petroleum gas on vessels of less than 100 gross tons that carry passengers for hire must meet the requirements of 46 CFR 184–05.

(c) Liquefied petroleum gas for cooking or heating on any other vessels subject to inspection by the Coast Guard must be used in systems that meet the requirements of this subpart.

PART 147—REGULATIONS GOVERNING USE OF DANGEROUS ARTICLES AS SHIPS' STORES AND SUPPLIES ON BOARD VESSELS

6. The authority citation for Part 147 would be revised to read as follows:

Authority: 46 U.S.C. 2104; 46 U.S.C. 3306; 50 U.S.C. 198; 49 CFR 1.46 except as otherwise noted.

§ 147.05–100 [Amended]

7. By revising the entry in § 147.05–100, Table S—Classification: Ships' Stores and Supplies of a Dangerous Nature for "Liquefied or non-liquefied gas" under the descriptive heading of "Fuel for heating, cooking, lighting" to read as follows:

TABLE S.—CLASSIFICATION: SHIPS' STORES AND SUPPLIES OF A DANGEROUS NATURE

Descriptive name of article	Characteristic properties, precautions required, markings	Label required	Required conditions for transportation			
			Cargo vessel	Passenger vessel	Ferry vessel, [illegible] or vehicle	R R car ferry, [illegible] vehicle
Fuel for heating, cooking, lighting: Liquefied or nonliquefied gas.	Systems using a liquefied or nonliquefied gas, including regulating and safety equipment, exclusive of the cylinder, shall be of a design approved by the Commandant of the Coast Guard for such use. *Vapors from petroleum gases are heavier than air and with air form explosive mixtures over wide ranges. Acetylene, methane and coal gas are lighter than air.*	Flammable gas label required.	Permitted subject to Subpart [illegible]. Cylinders shall be DOT specification containers. The cylinder shall bear a test date marking indicating test within the preceding 5 years. Cylinders shall be located in a locker or housing on or above the weather deck in such position that any escaping vapor cannot reach living quarters or enclosed compartments on board the vessel. Lockers or housings shall be vented to the open air near the bottom for gases evolving vapors heavier than air and near the top of the enclosure for gases evolving vapors lighter than air. Cylinders shall be protected from climatic extremes.	Permitted only for cooking subject to the rquirements of §§ 58.16 and 184.05–1 of this chapter. Cylinders shall be DOT specification containers. The cylinders shall bear a test date marking indicating test within the preceding 5 years. Cylinders shall be located in a locker or housing on or above the weather deck in such position that any escapng vapor cannot reach living quarters or enclosed compartments on board the vessel. Lockers or housings shall be vented to the open air near the bottom for gases evolving vapors heavier than air and near the top of the enclosure for gases evolving vapors lighter than air. Cylinders shall be protected from climatic extremes.	Not permitted.....	Not permitted.

PART 184—VESSEL CONTROL AND MISCELLANEOUS SYSTEMS AND EQUIPMENT

8. The authority citation for Part 184 would be revised to read as follows:

Authority: 46 U.S.C. 2104; 46 U.S.C. 3306; 49 CFR 1.4(a)(2); 49 CFR 1.46 except as otherwise noted.

9. In § 184.05–1 by revising paragraph (b) and adding paragraphs (d) and (e) to read as follows:

§ 184.05–1 Restrictions.

* * * * *

(b) Except as provided by paragraph (d) of this section, the carriage or use of liquefied or non-liquefied gases and certain flammable liquids as ships' stores are prohibited by Part 147 of this chapter.

* * * * *

(d) Cooking equipment using liquefied petroleum gas (LPG) and compressed natural gas (CNG) must meet the following requirements:

(1) The design, installation and testing of each LPG system must meet ABYC A–1–78.

(2) The design, installation and testing of each CNG system must meet ABYC A–22–78.

(3) The stowage of each LPG or CNG cylinder shall be as follows:

(i) Each cylinder must be located in a locker or housing on or above the weather deck in such a position that any escaping vapor cannot reach living quarters or enclosed compartments on board the vessel;

(ii) The locker or housing must be vented to the open air near the bottom for LPG and near the top of the enclosure for CNG; and

(iii) The cylinder must be protected from climatic extremes.

(4) If the fuel supply line of an LPG or CNG system enters an enclosed space on the vessel, a remote shut-off valve must be installed which can be operated from a position adjacent to the appliance. The valve must be located between the regulator and the point where the fuel supply line enters the enclosed portion of the vessel.

(e) In accordance with 5 U.S.C. 552(a), the following standards of the American Boat and Yacht Council, Inc. (ABYC), P.O. Box 806, Amityville, NY 11701, (516) 598–0050, are incorporated by reference in this section as approved by the Director of the Federal Register on February 1984.

(1) Standard A–1–78, "Marine LPG—Liquefied Petroleum Gas Systems" dated December 15, 1978.

(2) Standard A–22–78, "Marine CNG—Compressed Natural Gas Systems" dated December 15, 1978.

(46 U.S.C. 3306; 49 CFR 1.46)

Clyde T. Lusk, Jr.,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

BILLING CODE 4910–14–M

Notices

Federal Register
Vol. 49, No. 57
Thursday, March 22, 1984

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

Forms Under Review by Office of Management and Budget

March 19, 1984.

The Department of Agriculture has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) since that last list was published. This list is grouped into new proposals, revisions, extensions, or reinstatements. Each entry contains the following information:

(1) Agency proposing the information collection; (2) Title of the information collection; (3) Form number(s), if applicable; (4) How often the information is requested; (5) Who will be required or asked to report; (6) An estimate of the number of responses; (7) An estimate of the total number of hours needed to provide the information; (8) An indication of whether section 3504(h) of Pub. L. 96–511 applies; (9) Name and telephone number of the agency contact person.

Questions about the items in the listing should be directed to the agency person named at the end of each entry. Copies of the proposed forms and supporting documents may be obtained from: Department Clearance Office, USDA, OIRM, Room 108–W Admin. Bldg., Washington, D.C. 20250, (202) 447–4414.

Comments on any of the items listed should be submitted directly to: Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503, ATTN: Desk Officer for USDA.

If you anticipate commenting on a submission but find that preparation time will prevent you from doing so promptly, you should advise the OMB Desk Officer of your intent as early as possible.

BILLING CODE 3410–01–M

Forest Service

Meadows Land Unit Plan Supplement; Region 4; Payette National Forest, McCall, Idaho; Intent To Prepare an Environmental Impact Statement

The U.S. Department of Agriculture will prepare an Environmental Impact Statement for supplementing land management direction in the Land Use Plan for the Meadows Planning Unit, Payette National Forest. The subject land use plan was approved April 29, 1976.

The Environmental Impact Statement will evaluate alternative management direction for a portion of management unit 3.3 covering approximately 1500 acres. Current management direction implies existing roads will not be reopened and states that no new roads will be constructed. The affected portion of unit 3.3 is downstream from three existing water storage reservoirs where a small hydroelectric project has been proposed to utilize the stored water for power production purposes. Some of the facilities for this project would encroach into management unit 3.3.

Alternatives to create a new management unit to allow roads and/or other similar ground-disturbing activities will be considered along with a no-action alternative.

Those parties that were involved in preparation of the original EIS and subsequent Land Use Plan will be invited to participate in the preparation of this supplement. In addition, all agencies, organizations, and individuals who have expressed an interest in small hydro development on the Forest will also be invited to participate. No public hearings or meetings are planned.

Key Weyers, Payette National Forest Supervisor is the responsible official. The draft Environmental Impact Statement should be available for review by May 1, 1984. Written comments concerning this analysis should be sent to Peter J. Walker, District Ranger, P.O. Box J, New Meadows, Idaho 83654 by April 1, 1984.

Dated: March 14, 1984.

Kenneth D. Weyers,

Forest Supervisor.

BILLING CODE 3410–11–M

Soil Conservation Service

Latimer County Critical Area Treatment No. 2 RC&D Measure, Oklahoma; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a finding of no significant impact.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Latimer County Critical Area Treatment No. 2 RC&D Measure, Latimer County, Oklahoma.

FOR FURTHER INFORMATION CONTACT: Roland R. Willis, State Conservationist, Soil Conservation Service, USDA Agricultural Center Building, Stillwater, Oklahoma, 74074, telephone (405) 624–4360.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Roland R. Willis, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns critical area treatment for reducing roadside erosion. The structural measures will consist of installing a concrete channel liner and replacing an inadequate culvert. The mechanical measures will consist of grading and shaping, filling, and topsoiling. The vegetative measures will consist of bermudagrass mulch sod, bermudagrass solid sod, and fertilizing.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Roland R. Willis.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register.**

BILLING CODE 3410–16–M

Middle Grave Creek Watershed, West Virginia; Intent To Prepare an Environmental Impact Statement

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is being prepared for the Middle Grave Creek Watershed, Marshall County, West Virginia.

FOR FURTHER INFORMATION CONTACT: Rollin N. Swank, State Conservationist, Soil Conservation Service, 75 High Street, Room 301, Morgantown, West Virginia, 26505, telephone: 304–291–4151.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project may cause significant local, regional, or national impacts on the environment. As a result of these findings, Rollin N. Swank, State Conservationist, has determined that the preparation and review of an environmental impact statement are needed for this project.

The project concerns a plan for watershed protection and flood prevention. Alternatives under consideration to reach this objective include conservation land treatment, nonstructural measures, earth dams, channel work, floodway, and dike.

A draft environmental impact statement will be prepared and circulated for review by agencies and the public. The Soil Conservation Service invites participation and consultation of agencies and individuals that have special expertise, legal jurisdiction, or interest in the preparation of the draft environmental impact statement. Meetings have been held with various resource agency personnel to determine the scope of the evaluation of the proposed action. Further information on the proposed action, or planned meetings may be obtained from Rollin N. Swank, State Conservationist, at the above address or telephone 304–291–4151.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention Program. The State of West Virginia's process regarding State and local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Rollin N. Swank,

State Conservationist.

[FR Doc. 84–7757 Filed 3–21–84; 8:45 am]

BILLING CODE 3410–16–M

Morlee Watershed, Iowa; Finding of No Significant Impact

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 1202(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Morlee Watershed, Franklin County, Iowa.

FOR FURTHER INFORMATION CONTACT: Hershel R. Read, Acting State Conservationist, Soil Conservation Service, 693 Federal Building, 210 Walnut Street, Des Moines, Iowa 50309, telephone 515–284–4260.

SUPPLEMENTARY INFORMATION: The environmental assessment of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Hershel R. Read, Acting State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The project concerns a plan that includes a system of measures for agricultural water management for drainage. The planned works of improvement include 2.8 miles of channel work with appurtenances and 17.2 miles of tile drains.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on

file and may be reviewed by contacting Hershel R. Read.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

(Catalog of Federal Domestic Assistance Program No. 10.904, Watershed Protection and Flood Prevention. Office of Management and Budget Circular A–95 regarding State and Local clearinghouse review of Federal and federally assisted programs and projects is applicable)

Dated: March 12, 1984.

BILLING CODE 6320–01–M

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–002]

Antidumping Duty Order; Chloropicrin From the People's Republic of China

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: In separate investigations concerning chloropicrin from the People's Republic of China (PRC), the United States Department of Commerce (the Department) and the United States International Trade Commission (the ITC) have determined that chloropicrin from the PRC is being sold at less than fair value and that sales of chloropicrin from the PRC are materially injuring a United States industry. Therefore, based on these findings, all unliquidated entries, or warehouse withdrawals, for consumption of chloropicrin from the PRC made on or after September 19, 1983, the date on which the Department published its "Preliminary Determination of Sales at Less Than Fair Value" notice in the **Federal Register**, will be liable for the possible assessment of antidumping duties. Further, a cash deposit of estimated antidumping duties must be made on all such entries and withdrawals from warehouse, for consumption made on or after the date of publication of this antidumping duty order in the **Federal Register**.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Michael Ready, Office of Investigations, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230; telephone: (202) 377–2613.

SUPPLEMENTARY INFORMATION: The merchandise covered by this investigation is chloropicrin, also known as trichloronitromethane. A major use of the product is as a pre-plant soil fumigant. Chloropicrin is currently classifiable under item numbers 408.1600, 408.2900 and 425.5290 of the *Tariff Schedules of the United States Annotated* (TSUSA).

In accordance with section 733 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673b), on September 9, 1983, the Department published its preliminary determination that there was reason to believe or suspect that chloropicrin from the PRC was being sold at less than fair value (48 FR 41799). On February 16, 1984, the Department published its final determination that these imports were being sold at less than fair value (49 FR 5982).

On March 19, 1984, in accordance with section 735(d) of the Act (19 U.S.C. 1673d(d)), the ITC notified the Department that such importations are materially injuring a United States industry.

Therefore, in accordance with sections 736 and 751 of the Act (19 U.S.C. 1673e and 1675), the Department directs United States Customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673e(a)(1)), antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of chloropicrin from the PRC. These antidumping duties will be assessed on all unliquidated entries of chloropicrin entered, or withdrawn from warehouse, for consumption on or after September 19, 1983, the date on which the Department published its "Preliminary Determination of Sales At Less Than Fair Value" notice in the **Federal Register**.

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated Customs duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below:

Manufacturers/producers/exporters	[illegible]
China National Chemicals Import and Export Corporation (SINOCHEM)	58.0
All Other Manufacturers/Producers/Exporters	[illegible]

This determination constitutes an antidumping order with respect to chloropicrin from the People's Republic of China, pursuant to section 736 of the Act (19 U.S.C. 1673e) and section 353.48 of the Commerce Regulations (19 CFR 353.48).

We have deleted from the Commerce Regulations, Annex I of 19 CFR Part 353, which listed antidumping findings and orders currently in effect. Instead, interested parties may contact the Office of Information Services, Import Administration, for copies of the updated list of orders currently in effect.

Notice of Review

In accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) the Department hereby gives notice that it is commencing an administrative review of this order on March 22, 1984. For further information regarding this review, contact Mr. William Matthews at (202) 377–5253.

This notice is published in accordance with section 736 of the Act (19 U.S.C.

1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48).

Alan F. Holmer,

Deputy Assistant Secretary for Import Administration.

March 16, 1984.

BILLING CODE 3510-DS-M

[A-351-012, A-351-014]

Antidumping Duty Orders; Hot-Rolled Carbon Steel Plate and Hot-Rolled Carbon Steel Sheet From Brazil

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: In separate investigations concerning hot-rolled carbon steel plate and hot-rolled carbon steel sheet from Brazil, the United States Department of Commerce (the Department) and the United States International Trade Commission (the ITC) have determined that hot-rolled carbon steel plate and hot-rolled carbon steel sheet from Brazil are being sold at less than fair value and that sales of hot-rolled carbon steel plate and hot-rolled carbon steel sheet from Brazil are materially injuring a United States industry. Additionally, both the Department of Commerce and the ITC found that "critical circumstances" did exist with respect to hot-rolled carbon steel plate and hot-rolled carbon steel sheet from Brazil. Therefore, based on these findings, all unliquidated entries, or warehouse withdrawals, for consumption of hot-rolled carbon steel plate and hot-rolled carbon steel sheet from Brazil made 90 days before September 8, 1983, the date on which the Department published its "Preliminary Determinations of Sales At Less Than Fair Value" notice in the **Federal Register**, will be liable for the possible assessment of antidumping duties. Further, a cash deposit of estimated antidumping duties must be made on all such entries, and withdrawals from warehouse, for consumption made on or after the date of publication of this antidumping duty order in the **Federal Register**.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Mary S. Clapp, Office of Investigations, International Trade Administration, United States Department of Commerce, 14th Street and Constitution Avenue NW., Washington, D.C. 20230, telephone: (202) 377-2438.

SUPPLEMENTARY INFORMATION: The products covered by these investigations are hot-rolled carbon steel plate and hot-rolled carbon steel sheet.

The term "hot-rolled carbon steel plate" covers hot-rolled carbon steel products, whether or not corrugated or crimped; not pickled; not cold-rolled; not in coils; not cut, not pressed, and not stamped to non-rectangular shape; 0.1875 inch or more in thickness and over 8 inches in width; as currently provided for in items 607.6615 and 607.9400 of the *Tariff Schedules of the United States Annotated* (TSUSA); and hot-rolled carbon steel plate which has been coated or plated with metal including any material which has been painted or otherwise covered after having been coated or plated with metal, as currently provided for in items 608.0710 and 608.1100 of the TSUSA. Semifinished products of solid rectangular cross sections with width at least four times the thickness in cast condition or processed only through primary mill hot rolling are not included.

Hot-rolled carbon steel plate is used in the construction of bridges, mining equipment, pressure vessels, railroad freight and passenger cars, ships, line pipe, industrial machinery, machine parts, and a large variety of other products.

The term "hot-rolled carbon steel sheet" covers hot-rolled carbon steel products, whether or not corrugated or crimped and not pickled; not cold-rolled; not cut, not pressed, and not stamped to non-rectangular shape; not coated or plated with metal and not clad; over 8 inches in width and over 0.1875 inch in thickness and in coils, as currently provided for in item 607.6610 of the TSUSA.

Hot-rolled carbon steel sheet is used in the construction of automobiles, industrial machinery and products, pipe, and a large variety of other products.

The hot-rolled carbon steel sheet covered by these investigations is a different product from that covered by the recently initiated investigations on "Certain Carbon Steel Products from Brazil". The sheet in these investigations is the product described as "plate in coil" in Appendix A to the notice of "Certain Steel Products from Mexico; Initiation of Countervailing Duty Investigations" (48 FR 55013).

In accordance with section 733 of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673b), on September 8, 1983, the Department published its preliminary determinations that there was reason to believe or suspect that hot-rolled carbon steel plate and hot-rolled carbon steel sheet from Brazil were being sold at less than fair value, (48 FR 40418). On September 6, 1983, the petition was amended to include an allegation that "critical circumstances" existed. We preliminarily determined that critical circumstances exist within the meaning of section 733(e) of the Act (19 U.S.C. 1673(b)) (48 FR 46829). On January 25, 1984, the Department published its final determinations that these imports were being sold at less than fair value and that "critical circumstances" existed with respect to hot-rolled carbon steel plate and hot-rolled carbon steel sheet from Brazil (49 FR 3102).

On March 9, 1984, in accordance with section 735(d) of the Act (19 U.S.C. 1673d(d)), the ITC notified the Department that such importations are materially injuring a United States industry. The ITC also made affirmative determinations regarding "critical circumstances."

Therefore, in accordance with section 736 and 751 of the Act (19 U.S.C. 1673e and 1675), the Department directs United States customs officers to assess, upon further advice by the administering authority pursuant to section 736(a)(1) of the Act (19 U.S.C. 1673e(a)(1)), antidumping duties equal to the amount by which the foreign market value of the merchandise exceeds the United States price for all entries of hot-rolled carbon steel plate and hot-rolled carbon steel sheet from Brazil. These antidumping duties will be assessed on all unliquidated entries of hot-rolled carbon steel plate and hot-rolled carbon steel sheet entered, or withdrawn from warehouse, for consumption 90 days before September 8, 1983, the date on which the Department published its "Preliminary Determinations of Sales At Less than Fair Value" notice in the **Federal Register.**

On and after the date of publication of this notice, United States Customs officers must require, at the same time as importers would normally deposit estimated Customs duties on this merchandise, a cash deposit equal to the estimated weighted-average antidumping duty margins as noted below:

Manufacturers/producers/exporters	Weighted-average margins (percent)
Hot-Rolled Carbon Steel Plate:	
COSIPA	102.04
USIMINAS	65.58
All Other Manufacturers/Producers/Exporters	86.81
Hot-Rolled Carbon Steel Sheet:	
COSIPA	59.46
CSN	52.67
USIMINAS	50.56
All Other Manufacturers/Producers/Exporters	57.42

These determinations constitute antidumping orders with respect, to hot-rolled carbon steel plate and hot-rolled

carbon steel sheet from Brazil, pursuant to section 736 of the Act (19 U.S.C. 1673e) and §353.48 of the Commerce Regulations (19 CFR 353.48).

We have deleted from the Commerce Regulations, Annex 1 of 19 CFR Part 353, which listed antidumping findings and orders currently in effect. Instead, interested parties may contact the Office of Information Services, Import Administration, for copies of updated list of orders currently in effect.

Notice of Review

In accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)), the Department hereby gives notice that it is commencing an administrative review of this order on March 22, 1984. For further information regarding this review, contact Mr. William Matthews at (202) 377–5253.

This notice is published in accordance with section 736 of the Act (19 U.S.C. 1673e) and § 353.48 of the Commerce Regulations (19 CFR 353.48).

Alan F. Holmer,

Deputy Assistant Secretary for Import Administration.

Bicycle Tires and Tubes From Korea; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of antidumping finding.

SUMMARY: On November 14, 1983, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on bicycle tires and tubes from Korea. The review covers the seven known manufacturers and/or exporters of this merchandise to the United States and generally the period April 1, 1981 through March 31, 1982.

We gave interested parties an opportunity to comment on the preliminary results. We received a comment from one importer. Based on our analysis of the comment received, the final results of review are unchanged from those presented in the preliminary results of review.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: G. Leon McNeill or John R. Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (203) 377–3601.

SUPPLEMENTARY INFORMATION:

Background

On Novemer 14, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 51800) the preliminary results of its administrative review of the antidumping finding on bicycle tires and tubes from Korea (44 FR 22051–2, April 13, 1979). The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of bicycle tires and tubes. The term "bicycle tires and tubes" means pnuematic bicycle tires and tubes of rubber or plastics, whether such tires and tubes are sold together as units or separately. Bicycle tires and tubes are currently classifiable under items 772.4800 and 772.5700 of the Tariff Schedules of the United States Annotated.

The review covers the seven known manufacturers and/or exporters of Korean bicycle tires and tubes to the United States and the period April 1, 1981 through March 31, 1982, as well as certain shipments by one of the seven firms not covered in prior reviews.

Analysis of Comment Received

We invited interested parties to comment on our preliminary results. We received a comment from one importer, Oriental Boeki.

Comment

The Department in its first review failed to analyze certain entries covered by the response of one of the exporters, Hung-A Industrial Co., Ltd. The Department deferred appraisement of those entries and has covered them in this review. During the first review, the Department disallowed all of Hung-A's general claim for credit on the entries covered by the response, because the caim was not sufficiently related to the Korean market or to the covered merchandise. Oriental Boeki claimed that, inasmuch as Hung-A in the first review provided documents, including promissory notes, shipping invoices, and balance sheets, in support of its claimed credit costs, and the Department verified that Hung-A incurred such expenses on the sales of bicycle tires and tubes, the Department's denial of an adjustment for credit cost differences is inappropriate.

Department's Position

Oriental Boeki's comment only relates to materials presented in the first administrative review of this case. In the current review Hung-A presented no supplemental evidence that would now support that these credit costs were directly related to Korean bicycle tire and tube sales. Therefore, we disallowed the claimed adjustment.

Final Results of the Review

Based on our analysis of the comment received, the final results of our review are the same as those presented in the preliminary results of review, and we determine that the following margins exists:

Manufacturer/exporter	Time period	Margin (percent)
Dae Yung Commercial Co., Ltd.	04/01/81–03/31/82	0
Hung-A Industrial Co., Ltd	04/01/78–12/31/78	[illegible]
	01/01/79–03/31/80	[illegible]
	04/01/81–03/31/82	[illegible]
Korea Inoue Kasei Co., Ltd	04/01/81–03/31/82	0.70
Shin Hung Rubber Co., Ltd	04/01/81–03/31/82	0
Dae Woo Industrial Co., Ltd	04/01/81–03/31/82	[1] 2.32
Kukje (KCC) Corporation	04/01/81–03/31/82	0
Nichiman Corporation	04/01/81–03/31/82	0

[1] No shipments during the period.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for by § 353.48(b) of the Commerce Regulations, the Department shall require a cash deposit of estimated antidumping duties based upon the most recent of the above margins for all shipments from these firms entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. The Department shall waive the cash deposit requirement for Korea Inoue Kasei Co., Ltd., since the margin for that firm is less than 0.5 percent and, therefore, *de minimis* for cash deposit purposes. No cash deposit of estimated antidumping duties shall be required on future entries from a new exporter not covered in this or prior reviews, whose first shipments occurred after March 31, 1982 and who is unrelated to any reviewed firm. These cash deposit requirements and waiver shall remain in effect until publication of the final results of the next administrative review.

Since the Department's revocation of the countervailing duty order on this merchandise with respect to Korea Inoue Kasei Co., Ltd. was effective on August 10, 1981, the Department shall

make an addition to the United States price in the amount of any countervailing duty attributable to any export subsidies only for entries of this merchandise during the period April 1, 1978 through August 9, 1981.

The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review. The Department intends to begin immediately the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Dated: March 16, 1984.

Alan F. Holmer,

Deputy Assistant Secretary for Import Administration.

Pig Iron From Czechoslovakia; Final Results of Administrative Review and Revocation of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Results of Administrative Review and Revocation of Antidumping Finding.

SUMMARY: On November 17, 1983, the Department of Commerce published the preliminary results of its administrative review and tentative determination to revoke the antidumping finding on pig iron from Czechoslovakia. The review covered the only known exporter of this merchandise to the United States, Ferromet Opletalova, and the period October 1, 1981 through September 30, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

We gave interested parties an opportunity to submit oral or written comments on the preliminary results and tentative determination to revoke. We received no comments. We also determined that there were no shipments of this merchandise to the United States during the period October 1, 1982 through November 17, 1983, the date of the tentative determination to revoke. We advised all interested parties that there were no shipments and we provided an additional opportunity to comment. Again we received no comments. Accordingly, these final results cover up to November 17, 1983 and we revoke the antidumping finding on pig iron from Czechoslovakia.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Susan M. Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-1130.

SUPPLEMENTARY INFORMATION:

Background

On November 17, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (48 FR 52345-6) the preliminary results of its administrative review and tentative determination to revoke the antidumping finding on pig iron from Czechoslovakia (33 FR 15904, October 29, 1968). The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of pig iron, currently classifiable under item numbers 606.1300 and 606.1500 of the Tariff Schedules of the United States Annotated. Such merchandise is used in steel production and in the iron foundry for making iron castings such as pipe, automobile castings, and machine parts.

The review covered the one known exporter of Czechoslovakian pig iron to the United States, Ferromet Opletalova, and the period October 1, 1981 through September 30, 1982. The Department has also determined that there were no shipments of this merchandise to the United States during the period October 1, 1982 through November 17, 1983, the date of publication of the tentative determination to revoke.

Final Results of Review and Revocation

We invited interested parties to comment on the preliminary results and tentative determination to revoke. We received no comments or requests for a hearing. The Department provided to all interested parties further preliminary results for the period up to the date of the tentative determination to revoke, and gave interested parties an additional opportunity to comment. Again we received no comments. Based on our analysis, the final results of our review are the same as those presented in the preliminary results. As a result of the review, the Department revokes the antidumping finding on pig iron from Czechoslovakia.

This revocation applies to all unliquidated entries of Czechoslovakian pig iron entered, or withdrawn from warehouse, for consumption on or after November 17, 1983.

This administrative review, revocation, and notice are in accordance with sections 751 (a)(1) and (c) of the Tariff Act of 1930 (19 U.S.C. 1675 (a)(1), (c)) and §§ 353.53 and 353.54 of the Commerce Regulations (19 CFR 353.53, 353.54).

Dated: March 16, 1984.

Alan F. Holmer,

Deputy Assistant Secretary for Import Administration.

[FR Doc. 84-7735 Filed 3-21-84; 8:45 am]

BILLING CODE 3510-DS-M

[A-588-046]

Polychloroprene Rubber From Japan; Final Results of Administrative Review of Antidumping Finding

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of Final Results of Administrative Review of Antidumping Finding.

SUMMARY: On January 16, 1984, the Department of Commerce published the preliminary results of its administrative review of the antidumping finding on polychloroprene rubber from Japan. The review covers the six known manufacturers and/or exporters of this merchandise to the United States and generally the period December 1, 1981 through November 30, 1982. There were no known shipments of this merchandise to the United States during the period and there are no known unliquidated entries.

We gave interested parties an opportunity to submit oral or written comments on the preliminary results. We received no comments. Based on our analysis, the final results of review are unchanged from those presented in our preliminary results of review.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Phyllis Derrick or John Kugelman, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377-3601.

SUPPLEMENTARY INFORMATION:

Background

On January 16, 1984, the Department of Commerce ("the Department") published in the **Federal Register** (49 FR 1921) the preliminary results of its last administrative review of the antidumping finding on polychloroprene rubber from Japan (38 FR 35393, December 6, 1973). The Department has

now completed that administrative review. The appropriate Customs Service regulations apply to all unliquidated entries made prior to January 1, 1980.

Scope of the Review

Imports covered by the review are shipments of polychloroprene rubber, an oil resistant synthetic rubber also known as polymerized chlorobutadiene or neoprene, currently classifiable under items 446.1521 and 446.2000 of the Tariff Schedules of the United States Annotated.

The review covers the six known Japanese manufacturers and/or exporters of this merchandise to the United States and generally the period December 1, 1981 through November 30, 1982. There were no known shipments of this merchandise to the United States by these firms during the period December 1, 1981 through November 30, 1982, and there are no known unliquidated entries for this period.

As part of the last administrative review of this finding the Department deferred its review of certain unliquidated entries of this merchandise exported by Hoei Sangyo and manufactured by Toyo Soda and Showa Neoprene. The Department has now reviewed these entries.

Final Results of the Review

We gave interested parties an opportunity to comment on the preliminary results. The Department received no written comments or requests for a hearing. Based on our analysis, the final results of our review are the same as those presented in the preliminary results of review, and we determine that the following margins exist:

Manufacturer/exporter	Time period	Margin (percent)
Denki Kagaku, K.K.	12/01/81–11/30/82	[1] 0
Denki Kagaku, Koggo, K.K./ Hoei Sangyo Co., Ltd.	12/01/81–11/30/82	[1] 55
Mitsui Bussan K.K.	12/01/81–11/30/82	[1] 0
Showa Neoprene, K.K.	12/01/81–11/30/82	[1] 0
Showa Neoprene, K.K./Hoei Sangyo Co., Ltd.	10/11/74–11/30/75	[1]
	12/01/81–11/30/82	[1] 0
Suzugo Corporation	12/01/81–11/30/82	[1] 55
Toyo Soda Manufacturing Co., Ltd.	12/01/81–11/30/82	[1] 0
Toyo Soda Manufacturing Co., Ltd./Hoei Sangyo Co., Ltd.	10/11/74–11/30/75	[1]
	12/01/81–11/30/82	[1] 0

[1] No shipments during the period.

The Department shall determine, and the U.S. Customs Service shall assess, dumping duties on all appropriate entries. The Department will issue appraisement instructions on each exporter directly to the Customs Service.

Further, as provided for by § 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based upon the most recent of the above margins shall be required on future shipments from these firms. The Department shall not require a cash deposit of estimated antidumping duties for future entries from a new exporter not covered in this or prior reviews, whose first shipments of polychloroprene rubber occurred after November 30, 1982 and who is unrelated to any reviewed firm. These deposit requirements are effective for all shipments of Japanese polychloroprene rubber entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice.

These deposit requirements shall remain in effect until publication of the final results of the next administrative review. The Department is beginning immediately the next administrative review.

The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act of 1930 (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Dated: March 8, 1984.

Alan F. Holmer,

Deputy Assistant Secretary for Import Administration.

Sorbitol From France; Final Results of Administrative Review of Antidumping Duty Order

AGENCY: International Trade Administration, Commerce.

ACTION: Notice of final results of administrative review of antidumping duty order.

SUMMARY: On September 15, 1983, the Department of Commerce published the preliminary results of its administrative review of the antidumping duty order on sorbitol from France. The review covers the one known exporter of this merchandise to the United States and the period October 1, 1981 through May 31, 1982.

We gave interested parties an opportunity to submit oral or written comments on the preliminary results. At the request of the exporter, we held a public hearing on Novemer 16, 1983.

As a result of correction of a clerical error, we have changed the margin for liquid sorbitol. Based on our review of the comments received, the final results of review for crystalline sorbitol remain unchanged from those presented in the preliminary results of review.

EFFECTIVE DATE: March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Amy F. Dale or Susan M. Crawford, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone: (202) 377–1130.

SUPPLEMENTARY INFORMATION:

Background

On September 15, 1983, the Department of Commerce ("the Department") published in the **Federal Register** (49 FR 41476–7) the preliminary results of its administrative review of the antidumping duty order on sorbitol from France (47 FR 153291–2, April 9, 1982). The Department has now completed that administrative review.

Scope of the Review

Imports covered by the review are shipments of sorbitol. Sorbitol is a polyol produced by the catalytic hydrogenation of sugars (glucose). It is commercially available in two forms: (1) Crystalline sorbitol, used in the production of sugarless gum, candy, groceries, and pharmaceuticals, and (2) liquid sorbitol used in cosmetics and toiletries (such as toothpaste). Sorbitol is currently classifiable under item 493.8820 of the Tariff Schedules of the United States Annotated.

The review covers the one known exporter of French sorbitol to the United States, Roquette Freres, and the period October 1, 1981 through May 31, 1982.

Analysis of Comments Received

We gave interested parties an opportunity to submit oral or written comments on the preliminary results. At the request of the respondent, Roquette Freres, we held a public hearing on November 16, 1983.

Comment 1: On April 9, 1982, the Department published an antidumping duty order on sorbitol from France. On May 7, 1982, Roquette Freres initiated a court challenge to the Department's final affirmative determination and the International Trade Commission's ("ITC") final affirmative determination of material injury (47 FR 14981, March 29, 1982). *See Roquette Freres and Roquette Corporation* v. *United States,* USCIT No. 82–5–00636.

The Court of International Trade ("CIT") granted the government's motion and remanded the case on July 18, 1983 to enable the ITC to consider in full all relevant information then presently before it, or which would be submitted during the remand, to determine whether an industry was materially injured by reason of imports of sorbitol from France being sold at less than fair value.

On October 17, 1983, the remand results were filed with the court. On remand, the ITC determined that an industry in the United States was materially injured by reason of imports of crystalline sorbitol, and was not being materially injured, or threatened with material injury, by reason of imports of liquid sorbitol. On February 3, 1984, the court granted a preliminary injunction against liquidation of all entries of sorbitol pending disposition of the litigation. The case is still before the CIT.

The respondent claims the the ITC's remand results constitutes a final determination. Therefore, the Department has no lawful basis for determination, assessment or imposition of antidumping duties on imports of liquid sorbitol, and the Department should revoke its antidumping duty order with respect to liquid sorbitol.

On the other hand, the petitioner, Pfizer, Inc., claims that the negative injury determination made by the ITC on remand of the court, is still before the court and subject to further revisions, and is therefore outside the scope of this administrative review. Pfizer contends that the Department cannot revoke or modify its antidumping duty order on sorbitol until it receives a directive from the court.

Department's Position

The determination of the ITC on remand was not a final determination. The litigation, which includes the ITC remand results, continues to be under the jurisdiction of the CIT and will remain so until the court disposes of the litigation. *See Roquette Freres* v. *United States*, USCIT No. 83–11–01683. Therefore, revocation would be premature prior to the court's disposition of this case.

The ITC's final affirmative determination of material injury (47 FR 14981, March 1982) is the final determination and shall remain in effect until a final court decision is rendered which is not in harmony with that determination. Since the court has ordered a preliminary injunction with respect to entries of sorbitol, the Department will not liquidate those entries prior to the disposition of the litigation.

Unless liquidation is enjoined by the court, the Department is required by section 516A of the Tariff Act of 1930 ("the Tariff Act") to liquidate all entries, entered, or withdrawn from warehouse, for consumption on or before the date of publication in the **Federal Register** of a notice of a decision of the court not in harmony with the ITC's affirmative determination, published March 1982. This is supported by the report of the Senate Finance Committee on the Trade Agreements Act of 1979 (Report No. 96–249, July 17, 1979, at 248), which states:

> Pursuant to subsection (c)(1) and (e), in the usual case, liquidation would proceed in accordance with the decision under challenge while the litigation is proceeding. If the court issues a decision which is contrary to the challenged determination decision, then the administering authority is to publish notice of the adverse decision in the **Federal Register** within 10 days and all entries which occur on or after the date of publication are to be liquidated in accordance with the court's decision.

Comment 2: Roquette Freres claims that the Department erred in failing to adjust the United States price upward by the amount of import levies on imported corn which it claims were refunded by reason of the exportation of sorbitol to the United States.

Pfizer on the other hand contends that the Department should disallow any claimed upward adjustment to United States price for an "export restitution payment". Since the European Community ("EC") makes this payment on all exports of sorbitol, whether the source of the corn used in its manufacture is domestic or imported, there is no link between the export payment and any import levy on corn.

Department's Position: There is an import tax levied by member countries of the EC on imports of corn. However, EC "export restitution payments" are paid on all exports of sorbitol outside the EC, regardless of whether the corn used to produce that sorbitol was domestic (from within the EC) or imported.

The import levy and the "export restitution payments" are not directly linked to, or dependent upon, one another within the context of EC regulations. It is irrelevant in this particular case that Roquette Freres could show it had paid an "import levy" on imported corn and received "export restitution payments" on the corn content of sorbitol. We have determined that the "export restitution payment" (Roquette Freres refers to it as an "import levy refund") is not a rebate of an import levy imposed by the EC on corn which has been rebated by reason of the exportation of sorbitol to the United States. Therefore, in this case we did not allow the payment as an adjustment to the United States price.

Final Results of the Review

As a result of correction of a clerical error, we have changed the margin for liquid sorbitol. The final results of the review for crystalline sorbitol remain unchanged from those presented in the preliminary results and we determine that the following weighted-average margins exist for the period October 1, 1981 through May 31, 1982:

Exporter	Margin (percent)
Roquette Freres:	
Crystalline Sorbitol	3.69
Liquid Sorbitol	17.14

The Department shall determine, and the U.S. Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentages stated above. The Department will issue appraisement instructions directly to the U.S. Customs Service after the preliminary injunction is lifted.

Further, as provided by section 353.48(b) of the Commerce Regulations, a cash deposit of estimated antidumping duties based on the above margins shall be required on all shipments of French sorbitol entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice. These deposit requirements shall remain in effect until publication of the final results of the next administrative review. The Department is beginning immediately the next administrative review.

The Department encourages interested parties to review the public record and submit applications for protective orders, if desired, as early as possible after the Department's receipt of the information during the next administrative review.

This administrative review and notice are in accordance with section 751(a)(1) of the Tariff Act (19 U.S.C. 1675(a)(1)) and § 353.53 of the Commerce Regulations (19 CFR 353.53).

Dated: March 12, 1984.

Judith Bello,

Acting Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

Consolidated Decision on Applications for Duty-Free Entry of Ion Microanalyzers

This is a decision consolidated pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651, 80 Stat. 897; 15 CFR Part 301). Related records can be viewed between 8:30 a.m. and 5:00 p.m. in Room 1523, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, D.C.

Docket No. 84–12. Applicant: Arizona State University, Tempe, AZ 85287. Instrument: Ion Microanalyzer, Model IMS–3F. Manufacturer: Cameca Instruments, France, Intended use: See notice at 48 FR 57581. Advice submitted by: National Bureau of Standards: February 6, 1984.

Docket No. 84–25. Applicant: University of California, Livermore, CA 94550. Instrument: Ion Microanalyzer, Model IMS–3F with Accessories. Manufacturer: Cameca, France. Intended use: See notice at 49 FR 922. Advice Submitted by: National Bureau of Standards: February 6, 1984.

Comments: None received.

Decision: Approved. No instrument of equivalent scientific value to the foreign instruments, for such purposes as these instruments are intended to be used, is being manufactured in the United States.

Reasons: Each foreign instrument to which the foregoing applications relate provides a mass resolving power greater than 5000. The National Bureau of Standards advises in its respectively cited memoranda that (1) the capability of each of the foreign instruments described above is pertinent to the purposes for which each article is intended to be used and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to either of the foreign instruments for such purposes as these instruments are intended to be used.

We know of no other instrument or apparatus of equivalent scientific value to either of the foreign instruments to which the foregoing applications relate which is being manufactured in the United States.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Material)

Frank W. Creel,

Acting Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Receipt of Application for General Permit; International Trading and Shipping Agency

Notice is hereby given that the following application has been received to take marine mammals incidental to the pursuit of commercial fishing operations within the U.S. Fishery Conservation Zone during 1984 and 1985 as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407) and the regulations thereunder.

Applicant: International Trading and Shipping Agency, 19 Rector Street, Suite 1115, New York, New York 10006, has applied on behalf of Spanish fishing vessels for a Category 1: "Towed or Dragged Gear" general permit to take up to 10 northern sea lions, 5 harbor seals and 5 cetaceans in the Bering Sea and Gulf of Alaska.

This application is available for review in the following office: Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, D.C.

Interested parties may submit written comments on this application within thirty (30) days of the date of this notice to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Washington, D.C. 20235.

Dated: March 13, 1984.

Richard B. Roe,

Director, Office of Protected Species and Habitat Conservation, National Marine Fisheries Service.

CONSUMER PRODUCT SAFETY COMMISSION

Request for Extension of Approval of Information Collection Requirements—Labels and Instructions for Certain Coal and Wood Burning Appliances

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1981 (44 U.S.C. 3501 *et seq.*), the Consumer Product Safety Commission has submitted to the Office of Management and Budget a request for extension of approval through April 30, 1985, of a collection of information in the form of a rule which requires the manufacturers of certain wood and coal burning appliances to submit to the Commission copies of labels and directions giving needed safety information which they are required to furnish with the products under 16 CFR Part 1406. The manufacturers are also required to submit to the Commission an explanation of how the appropriate clearance distances stated on the labels and directions were determined.

The purpose of this reporting requirement is to determine the extent to which the subject manufacturers are complying with 16 CFR Part 1406.

Information about the Requested Extension of Approval of Requirements for Collection of Information:

Agency address: Consumer Product Safety Commission, 1111 18th Street, NW., Washington, D.C. 20270.

Title of information collection: Coal and Wood Burning Appliances—Notification of Performance and Technical Data.

Type of request: Extension of approval.

Frequency of collection: One time, plus updates when new models are introduced or previously submitted materials are changed.

General description of respondents: Manufacturers and importers of coal and wood burning fireplace stoves, heaters, and similar appliances.

Estimated number of respondents: 200.

Estimated average number of hours per response: 3 per year.

Comments: Comments on this requested extension of approval of information collection requirements should be addressed to Andy Valez-Rivera, Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503; telephone: (202) 395–7313. Copies of the request for extension of information collection requirements are available from Francine Shacter, Office of Budget, Planning, and Program Evaluation, Consumer Product Safety Commission, Washington, D.C. 20207; telephone: (301) 492–6529.

This is not a proposal to which 44 U.S.C. 3504(h) is applicable.

Dated: March 19, 1984.

Sadye E. Dunn,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF ENERGY

Office of Assistant Secretary for International Affairs

International Atomic Energy Agreements; Civil Uses; Proposed Subsequent Arrangement; European Atomic Energy Community

Pursuant to section 131 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2160) notice is hereby given of a proposed "subsequent arrangement" under the Additional Agreement for Cooperation Between the Government of the United States of America and the European Atomic Energy Community (EURATOM) Concerning Peaceful Uses of Atomic Energy, as amended.

The subsequent arrangement to be carried out under the above mentioned agreement involves approval for the supply of the following material:

Contract Number WC–EU–268, for the supply of 4.63 kilograms of depleted uranium in the form of U_3Si_2 powder, and 0.05 kilograms of depleted uranium in the form of U_3Si_2-Al dispersion fuel, for studies related to the Reduced Enrichment Research and Test Reactor program. At conclusion of the studies the material is to be returned to the U.S.

In accordance with section 131 of the Atomic Energy Act of 1954, as amended, it has been determined that the furnishing of the nuclear material will not be inimical to the common defense and security.

This subsequent arrangement will take effect no sooner than fifteen days after the date of publication of this notice.

For the Department of Energy.

Dated: March 12, 1984.

Dr. H. A. Morklein,

Assistant Secretary for International Affairs and Energy Emergencies.

Economic Regulatory Administration

[Docket No. OFU– 044, 045, 046, 047]

Energy Supply and Environmental Coordination Act; Notice of Effectiveness of Prohibition Orders in Docket No. OFU– 046, 047; Notice and Proposed Rescission of Prohibition Orders in OFU– 044, 045; Delmarva Power and Light Co., Edgemoor Station

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of effectiveness; notice and proposed rescission of prohibition orders.

SUMMARY: On June 30, 1975, the Federal Energy Administration (FEA) issued Prohibition Orders[1] to the Delmarva Power and Light Company's (Delmarva) Edgemoor Generating Station Units 1, 2, 3, and 4 (hereafter referred to, jointly and severally, as Edgemoor 1, 2, 3, and 4), pursuant to Section 2 of the Energy Supply and Environmental Coordination Act of 1974, 15 U.S.C. 791 *et seq.* (ESECA).[2] The Economic Regulatory Administration (ERA) of the Department of Energy (DOE),[3] having completed the required administrative process, hereby issues: (1) Its Notice of Effectiveness (NOE) effectuating the prohibitions contained in the Prohibition Orders to Edgemoor 3 and 4 in Docket Nos. OFU–046 and OFU–047; and (2) its Notice and Proposed Rescission of the Prohibition Orders to Edgemoor 1 and 2 in Dockets Nos. OFU–044 and OFU–045. When the prohibitions applicable to Edgemoor 3 and 4 become effective, as stated in the **DATES** section below, Edgemoor 3 and 4 will be prohibited from using petroleum or natural gas as their primary energy source.

The NOE for Edgemoor 3 and 4, the Notice and Rescission Order proposed by ERA for Edgemoor 1 and 2, and other information on this proceeding are included in the **SUPPLEMENTARY INFORMATION** section below.

DATES: The Prohibition Orders to Edgemoor 3 and 4 in Docket Nos. OFU–046 and OFU–047 are effective upon March 22, 1984, the date of publication of the NOE in the **Federal Register**. The date of publication is also the date of service. The prohibitions contained in the orders will become effective on April 23, 1984.

Written responses to ERA's proposed rescission of the Prohibition Orders to Edgemoor 1 and 2 in Docket Nos. OFU–044 and OFU–045 must be received no later than April 23, 1984. The rescissions shall become final without further ERA action upon expiration of the established comment period, if ERA receives no adverse comments on its

[1] 40 FR 28430, July 3, 1975.

[2] Effective November 2, 1981, Delmarva elected, pursuant to section 1022 of the Omnibus Budget Reconciliation Act of 1981, to have Edgemoor 1, 2, 3, and 4 remain subject to the jurisdiction of section 2 of ESECA, rather than to become jurisdictional under Title III, section 301 of the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8341.

[3] Effective October 1, 1977, the responsibility for implementing ESECA was transferred by Executive Order No. 12009 from the Federal Energy Administration to the Department of Energy pursuant to the Department of Energy Organization Act (Pub. L. 95–91).

proposed action, and will become effective thirty (30) days thereafter. For purposes of appeal of the final rescission order, the date of service shall be the day following the expiration of the comment period.

ADDRESS: Written responses to the proposed rescissions in Docket Nos. OFU–044 and OFU–045 are to be addressed to: Department of Energy, Economic Regulatory Administration, Office of Fuels Programs, Case Control Unit, GA–093, 1000 Independence Avenue, S.W., Washington, D.C. 20585. "Delmarva Power, Edgemoor Station, OFU–044 and 045" should be printed on the outside of the envelope and on the documents contained therein.

FOR FURTHER INFORMATION CONTACT:

Robert L. Davies, Director, Coal and Electricity Division, Economic Regulatory Administration, Department of Energy, Forrestal Building, Room GA–033, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Phone: (202) 252–1316

Marya Rowan, Office of the General Counsel, Department of Energy, Forrestal Building, Room 6A–141, 1000 Independence Avenue, S.W., Washington, D.C. 20585, Phone: (202) 252–6739

SUPPLEMENTARY INFORMATION:

NOTICE OF EFFECTIVENESS (NOE)

Docket No.	Owner	Installation	Unit	Location
OFU–046.	Delmarva Power & Light Co.	Edgemoor	3	Wilmington, Del.
OFU–047.	do	do	4	Do.

In accordance with 10 CFR 303.10(b), 303.37, and 305.7, ERA hereby gives notice that the Prohibition Orders issued in Docket Nos. OFU–046 and OFU–047 to Edgemoor 3 and 4 by the Federal Energy Administration under section 2 of ESECA on June 30, 1975 shall be effective upon the date this NOE is published in the **Federal Register** and that the prohibitions in the orders shall take effect on April 23, 1984.

As directed in 10 CFR 305.7, ERA has established the effective date of the prohibitions, taking into account the following information: In accordance with the provisions of section 119(d)(1)(B) of the Clean Air Act (42 U.S.C. 1857 *et seq.*), which were in effect at the time the subject orders were issued, and in accordance with the requirements of the Clean Air Act, as amended (42 U.S.C. 7413(d)(5)) and section 112 of the Clean Air Act Amendments of 1977 (Pub. L. 95–95), the Environmental Protection Agency (EPA) certified to DOE by letter of February 17, 1984 that Delmarva's Edgemoor 3 and 4 are presently burning coal in compliance with all applicable regulations for air quality control.

NEPA Compliance. Due to Delmarva's earlier voluntary conversions, Edgemoor 3 and 4 are currently operated with coal as their primary energy source. Therefore, in complying with the requirements of the National Environmental Policy Act of 1969 (NEPA), DOE has determined that the prohibitions to Edgemoor 3 and 4, when made effective by the NOE, will not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of NEPA (42 U.S.C. 4332(2)(C)).

As provided in the June 30, 1975 Prohibition Orders, any person aggrieved by such orders may file an appeal with the DOE Office of Hearings and Appeals in accordance with 10 CFR Part 303, Subpart H. The appeal must be filed within 30 days after the service of the NOE. There has not been an exhaustion of administrative remedies until an appeal has been filed pursuant to Subpart H of Part 303, and the appellate proceeding is completed by the issuance of an order granting or denying the appeal.

Application may be made for modification or rescission of the Prohibition Orders in accordance with the provisions of 10 CFR Part 303, Subpart J. An application for modification or rescission of the Prohibition Orders based on "significantly changed circumstances," which circumstances occurred during the interval between issuance of the orders and service of the NOE, shall be filed within 30 days of the service date. Application for modification or rescission of the Prohibition Orders based on significantly changed circumstances occurring after that interval may be filed at any time after the NOE is served.

All or any part of the Prohibition Orders and the NOE may be the subject of an appeal or an application for modification or rescission. If an application for modification or rescission is filed, any appeal of the orders shall be suspended until 30 days after a decision on the application has been issued or the date on which it may be taken to have been denied.[4]

The Prohibition Orders made effective by this NOE are effective against any persons that, as of the date of service of this NOE, own, lease, operate, or control Edgemoor 3 and 4, and against any successors-in-interest or assignees of such persons. Any terms used in this NOE have the same meaning as such terms in 10 CFR Parts 303 and 305.

Notice and Proposed Rescission Order

ERA is also giving notice of the commencement of a proceeding to rescind the Prohibition Orders issued under section 2 of ESECA on June 30, 1975 in Docket Nos. OFU–044 and OFU–045 to Edgemoor 1 and 2.[5] The proceeding, begun by ERA on its own initiative under 10 CFR 303.130(b), is governed by the provisions of 10 CFR Part 303, Subpart J.

ERA proposes the following order to accomplish the rescission of the pending prohibitions in Docket Nos. OFU–044 and OFU–045:

RESCISSION ORDER

Docket No.	Owner	Installation	Unit	Location
OFU–044.	Delmarva Power & Light Co.	Edgemoor	1	Wilmington, Del.
OFU–045.	do	do	2	Do.

Based on information provided to it by Delmarva and incorporated into the record of the proceeding, ERA has determined that, as Edgemoor 1 and 2 are scheduled for retirement on or around January 31, 1984, the effectuation of the prohibitions against the use by these units of oil or natural gas as their primary energy source would serve no useful purpose under ESECA. Accordingly, having determined that significantly changed circumstances as defined in 10 CFR 303.136(b)(1) exist with respect to the application of the pending prohibitions to these units, ERA hereby rescinds the Prohibition Orders addressed to Edgemoor 1 and 2 in Docket Nos. OFU–044 and OFU–045.

Pursuant to 10 CFR 303.137(b), any person aggrieved by this action may file an appeal with the DOE Office of Hearings and Appeals in accordance with 10 CFR Part 303, Subpart H. As required by 10 CFR 303.139(c), any appeal of this order must be filed within 30 days of its service. If no adverse comments are received during the period

[4] Under 10 CFR 303.138, an applicant may treat the application as denied if DOE fails to take action on it within 90 days of filing.

[5] *Id.*

provided in the **DATES** section, above, the date of service, for purposes of appeal, shall be the day following the expiration of the comment period.

ERA is hereby giving notice to all parties to the original proceeding of their right under 10 CFR 303.134(a) to file a written response to ERA's proposed rescission within 30 days of the publication of this Notice in the **Federal Register** (see **DATES** section above). If no responses are received during the comment period established, the rescission order shall become final upon the expiration of such period.

NEPA Compliance

DOE has reviewed the environmental implications of its proposed action and has concluded that rescission of the Prohibition Orders to Edgemoor 1 and 2, as proposed, is not a major Federal action significantly affecting the quality of the human environment within the meaning of section 102(2)(C) of NEPA.

Issued in Washington, D.C. March 8, 1984.

Robert L. Davies,

Director, Coal and Electricity Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

[Docket No. ERA-FC-80-017; OFC Case No. 63011-9162-01-24]

Proposed Modification of an Order Granting Permanent Cogeneration Exemption; Great Western Malting Co.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) has commenced a proceeding under 10 CFR Part 501, Subpart G to modify the permanent cogeneration exemption granted by Order ("Order") to a new cogeneration powerplant owned and operated by Great Western Malting Company (Great Western) at its Vancourver, Washington facility, under the Powerplant and Industrial Fuel Use Act of 1978, 42 U.S.C. 8301 *et seq.* ("FUA" or "the Act").

Based upon its review of Great Western's February 14, 1984 modification request, ERA is proposing to modify the Order on the basis of its determination that significantly changed circumstances, as defined in 10 CFR 501.102(b), exist with respect to the applicability of the original exemption. Accordingly, ERA is hereby giving notice to all parties to the original proceeding of their right, pursuant to 10 CFR 501.101(d), to file a written response to ERA's proposal within 30 days of the publication of this Notice in the **Federal Register** (see **DATES** section, below). If no responses are received within the established period, the modification Order, as proposed, shall become final upon the expiration of that period without further action by ERA. A detailed discussion of the Order and Great Western's request for modification thereof is provided in the Supplementary Information section below.

DATES: Written responses to ERA's proposed modification of the Great Western Order must be received no later than April 23, 1984. Unless ERA receives comments adverse to its proposed action within the established comment period, the modification order shall become final on April 23, 1984; and the modification therein shall become effective on June 22, 1984.

ADDRESS: Written responses are to be addressed to Department of Energy, Economic Regulatory Administration, Office of Fuels Programs, Case Control Unit, GA-033, 1000 Independence Avenue, SW., Washington, D.C. 20585. OFC-63011-9162-01-24 should be printed on the outside of the envelope and the documents contained therein.

FOR FURTHER INFORMATION CONTACT:

Edward J. Peters, Jr., Office of Fuels Programs, Economic Regulatory Administration, Forrestal Building, Room GA-073, 1000 Independence Avenue, SW., Washington, D.C. 20585 Telephone (202) 252-8162.

Marya Rowan, Office of the General Counsel, Department of Energy, Forrestal Building, Room 6A-141, 1000 Independence Avenue, SW., Washington, D.C. 20585 Telephone (202) 252-6739.

SUPPLEMENTARY INFORMATION: On February 24, 1981, ERA exempted, by Order, Great Western's new combined combustion turbine and waste heat boiler cogeneration facility at its Vancouver, Washington malting plant from the prohibitions of section 201 of FUA.[1] The Order was published in the **Federal Register** on March 3, 1981 (46 FR 14916). Subject to the terms and conditions set forth in the Order, the permanent cogeneration exemption permitted the use of natural gas in the new combustion turbine as the unit's primary energy source. Great Western's exemption request was filed under the then-effective 10 CFR 503.37 (44 FR 28530, May 15, 1979 and 44 FR 28950, May 17, 1979) and was granted pursuant to section 212(c) of FUA.

By letter filed with ERA on February 16, 1984, Great Western requested that ERA now modify the Order to delete Term and Condition A which states:

> A. To the maximum extent practicable, Great Western will operate its natural gas oil-fired boilers instead of its cogeneration powerplant whenever the generation of electricity by its cogeneration powerplant would result in less than full utilization of alternate fuel capability available to the Western Group of the Northwest Power Pool.

Great Western bases its modification request upon the following situation which it believes to constitute significantly changed circumstances within the meaning of 10 CFR 501.102(b): Shortly after the issuance of the Order subject to the electric generating restriction in Term and Condition A, ERA commenced the process of substantially revising and modifying its FUA regulations, consistent with its policy of regulatory reform in the FUA program, to eliminate provisions that permitted the imposition of unnecessary and unduly burdensome regulatory requirements upon powerplant owners and operators. This process resulted in significant modifications to 10 CFR 503.37(a)(1) and 503.12(a), which formed the basis for the Great Western exemption and the imposition of Term and Condition A thereon.[2] Thereafter, ERA imposed no operting restrictions upon any cogeneration facilities exempted by it from the prohibitions of Title II of FUA, and, if Great Western's Order had been issued under the revised final regulations, Term and Condition A would not have been included therein.[3] Great Western believes, therefore, that Term and Condition A should be removed from the Order to make the treatment of the Vancouver, Washington cogenerator to which it applies consistent with ERA's policy of permitting order recipients to establish their own operational guidelines and to prevent any inequities that might arise as a result of the inclusion of such a restriction in the Great Western Order, but not in other cogeneration orders.

---

[1] Section 201 of FUA prohibits (1) the use of natural gas or petroleum as the primary energy source in any new electric powerplant, and (2) the construction of such a powerplant without the capability of using an alternate fuel as its primary energy source.

[2] See 47 FR 29209, July 6, 1982 and 46 FR 59872, December 7, 1981. In particular, at the time of ERA's consideration of the Great Western application in 1981, 10 CFR § 503.12(a) provided that: A petitioner must comply with the terms and conditions of any exemption granted by ERA, *including terms and conditions requiring the use of effective fuel conservation measures.* (Emphasis added)

The fuel conservation measures provision was deleted from the final rules published in December of 1981 reflecting ERA's intention not to impose such restrictions on powerplant owners and operators in the future.

[3] Great Western was the first United States company to apply for and to receive a cogeneration exemption for a natural gas turbine unit.

As requested, ERA has commenced a proceeding pursuant to 10 CFR § 501.101(a), for the modification of the above-described exemption Order. The procedures and criteria governing this proceeding are found in 10 CFR Part 501, Subpart G.

Having considered the information contained in Great Western's request, along with other information of record in this proceeding, ERA proposes to modify the original permanent cogeneration exemption Order as follows:

To: The Great Western Malting Company.

MODIFICATION ORDER

Powerplant	Location	Docket No.
Cogeneration facility.	Vancover, Washington.	ERA-FC-80-017 (OFC Case No. 63011-9162-01-24).

Based upon its review of the whole record in the proceeding, ERA has determined that the revision of the FUA regulations to eliminate provisions that permitted the imposition of unnecesary regulatory burdens and impediments to operational self-determination by powerplant owners and operators at a point in time subsequent to the issuance of the permanent cogeneration exemption to the above-cited facility constitutes significantly changed circumstances warranting the modification of the original exemption Order, as provided by 10 CFR 501.102 and 501.103.

Accordingly, ERA hereby modifies the Order in Docket Number ERA-FC-80-017 to remove Term and Condition A therefrom.

Procedures

Parties to the original proceeding in Docket No. ERA-FC-80-017 are hereby notified of ERA's proposed modification of the Order exempting Great Western's Vancouver, Washington cogeneration facility from the prohibitions of section 201 of FUA and of their right pursuant to 10 CFR 501.101(d) to file a response thereto within 30 days after the publication of this Notice in the **Federal Register**. If ERA receives no adverse responses within the allotted comment period, the modification Order shall become final as proposed, without further ERA action, upon the expiration of that period.

Issued in Washington, D.C., March 14, 1984.

Robert L. Davies,

Director, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Energy Information Administration

Agency Forms Under Review by the Office of Management and Budget

AGENCY: Energy Information Administration, DOE.

ACTION: Notice of submission of request for clearance to the Office of Management and Budget.

SUMMARY: Under provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35), Department of Energy (DOE) notices of proposed collections under review will be published in the **Federal Register** on the Thursday of the week following their submission to the Office of Management and Budget (OMB). Following this notice is a list of the DOE proposal sent to OMB for approval. The listing does not contain information collection requirements contained in regulations which are to be submitted under 3504(h) of the Paperwork Reduction Act, nor management and procurement assistance requirements collected by DOE.

Each entry contains the following information and is listed by the DOE sponsoring office: (1) The form number; (2) Forum title; (3) Type of request, e.g., new, revision, or extension; (4) Frequency of collection; (5) Response obligation, i.e., mandatory, voluntary, or required to obtain or retain benefit; (6) Type of respondent; (7) An estimate of the number of respondents; (8) Annual respondent burden, i.e., an estimate of the total number of hours needed to fill out the form; and (9) A brief abstract describing the proposed collection.

DATE: Last Notice published Thursday, March 8, 1984, (49 FR 8666).

FOR FURTHER INFORMATION CONTACT:

John Gross, Director, Forms Clearance and Burden Control Divison, Energy Information Administration, M.S. 1H-023, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-2308

Vartkes Broussalian, Federal Energy Regulatory Commission, Desk Officer, Office of Management and Budget, 726 Jackson Place NW., Washington, DC 20503, (202) 395-7313.

SUPPLEMENTARY INFORMATION: Copies of proposed collections and supporting documents may be obtained from Mr. Gross. Comments and questions about the items on this list should be directed to the OMB reviewer for the appropriate agency as shown above.

If you anticipate commenting on a form, but find that time to prepare these comments will prevent you from submitting comments promptly, you should advise the OMB reviewer of your intent as early as possible.

Issued in Washington, D.C. March 19, 1984.

Douglas Hale,

Acting Director, Statistical Standards, Energy Information Administration.

BILLING CODE 6450–01–M

Office of Hearings and Appeals

Issuance of Decisions and Orders; Week of February 20 Through February 24, 1984

During the week of February 20 through February 24, 1984, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also lists a submission that was dismissed by the Office of Hearings and Appeals.

APPEAL

The Seattle Times, 2/22/84, HFA–0206

The Seattle Times filed an Appeal from a partial denial by the Chief of the Resource Oversight Branch of the Bonneville Power Administration of a Request for Information which the firm had submitted under the Freedom of Information Act (the FOIA). In considering the Appeal, the DOE found that the withheld document contained opinions and recommendations which were exempt from disclosure under FOIA Exemption 5. However, the DOE also found that the document contained segregable, factual passages, the release of which would not divulge the agency's internal decisionmaking process. The DOE therefore ordered the release of the factual passages of the document. Accordingly the Appeal was granted in part.

Remedial Orders

Stephen Slevinski d.b.a. Slevinski Service Stations of Northport, Ltd. 2/23/84, BRO–1526 through BRO–1532

Stephen Slevinski d.b.a. Slevinski Service Stations of Northport, Ltd. (Slevinski) objected to seven Proposed Remedial Orders (PROs) which the Northeast District Office of Enforcement of the Economic Regulatory Administration (ERA) issued to the firm on April 22, 1980. In the PROs the ERA found that Slevinski had charged prices for motor gasoline which exceeded its maximum lawful selling prices calculated pursuant to 10 CFR 212.93. After considering Slevinski's objections, the Department of Energy determined that the remedial provisions of the seven PROs should be modified, and that the PROs, as modified, should be issued as Final Remedial Orders. The important issues considered in the Decision and Order included whether or not (i) the PROs were served on the proper party to the proceeding and (ii) the ERA established a *prima facie* case pursuant to 10 CFR 205.192A(a) and 205.192(d) as to the validity of the findings of fact and conclusions of law asserted in the PROs.

Motion for Discovery

Department of Interior/Laketon Asphalt Refining, Inc., 2/22/84, HED–0165, HEH–0165, HED–0155, HEH–0155

The Department of Interior and Laketon Asphalt Refining, Inc. filed Motions for Evidentiary Proceeding in connection with an Application for Exception submitted by the DOI which requested retroactive exception from certain DOE crude oil pricing regulations which pertained to DOI's sales of federal royalty crude oil to Laketon. On December 16, 1983, the DOE convened a conference to determine the status of the discovery requests and requested that the parties resolve contested matters through stipulations to the extent possible. On January 18, 1984, the parties filed a discovery stipulation which outlined the requests upon which they agreed, the points remaining in contention, and the areas in which material obtained through discovery in pending court litigation could be used in the exception proceeding. At a hearing held on February 10, 1984, the DOE heard oral argument on the remaining disputed discovery requests and ruled on both parties' motions. The Decision and Order sets forth the rulings of the Presiding Officer.

Requests for Modification and/or Rescission

Cities Service Company, 2/24/84, HER–0051

Cities Service Company filed an Application for Modification or Rescission of a January 4, 1983 Decision and Order issued by the Office of Hearings and Appeals to Energy Cooperative, Inc. (ECI). The January 4 Decision found that ECI was experiencing a hardship, inequity and unfair distribution of burdens as a result of the DOE regulatory program. The January 4 Decision therefore approved limited entitlements and Buy-Sell exception relief to ECI. In its Application for Modification or Rescission, Cities claimed that ECI's financial difficulties were not solely attributable to the DOE regulations, but were instead largely the result of a contract dispute between ECI and the Northern Illinois Gas Company (Ni-Gas). Cities alleged that ECI deliberately withheld information about the contract dispute from the Office of Hearings and Appeals and that the January 4 Decision should therefore be modified to deny relief to ECI. In considering Cities' application, the OHA noted that the exception relief originally awarded to ECI was narrowly focused on those aspects of ECI's overall hardship that were clearly attributable to the operation of the DOE regulations. The OHA therefore determined that while ECI should have provided information on its contract dispute with Ni-Gas, subsequent knowledge of the dispute did not undermine the findings of the January 4 Decision. Accordingly, Cities' Application for Modification or Rescission was denied.

West Coast Oil Company, 2/21/84, HRR–0077

West Coast Oil Company filed a Motion for Reconsideration of a Decision and Order issued by the Office of Hearings and Appeals on December 9, 1983. *West Coast Oil Co.*, 11 DOE ¶ 84,042 (1983). In that determination the OHA denied a Motion for Discovery filed by West Coast in connection with its Statement of Objections,to a Proposed Remedial Order issued to the firm on July 30, 1982, by the Economic Regulatory Administration. The firm's Motion for Reconsideration was denied because the firm had not shown any prejudicial error in the original determination.

Refund Applications

Palo Pinto Oil and Gas/Mississippi, Maryland, Puerto Rico, 2/23/84, RQ5–2, RQ5–44, RQ5–50

The Office of Hearings and Appeals granted refunds to the States of Mississippi and Maryland and the Territory of Puerto Rico after approving proposed plans for the utilization of a portion of the funds remitted to the DOE pursuant to a consent order entered into with Palo Pinto Oil and Gas. Mississippi plans to use its share of the consent order funds to improve its public tranportation system, and to publicize available services. Maryland plans to use its refund to train van pool drivers in defensive driving skills. Puerto Rico will use its refund money to promote a ridesharing program through various publicity measures.

Standard Oil Company (Indiana)/Bystol Oil Company 2/24/84, RF21–12282

On January 10, 1984, the Office of Hearings and Appeals received a letter from Bassman & Mitchell, Chartered, the attorneys represented Bystol Oil Company, Inc. (Bystol), in which the law firm stated that it had inadvertently submitted duplicate wholesale gasoline claims on behalf of Bystol. Both refund applications were granted on August 4, 1983. *See Standard Oil Co. (Indiana)/Leblanc Oil Company, Inc.*, 11 DOE ¶ 85,100 (1983). In order to remedy this excessive payment, Bassman & Mitchell has remitted the $489 refund granted to Bystol pursuant to its duplicate refund application. In the present Decision and Order, the OHA directed that the remitted money be credited to the Amoco excrow account at the Department of the Treasury, and that the August 4 Decision be revised accordingly.

Dismissal

The following submission was dismissed:

Name	Case No.
Village Car Wash, Inc	RF21-1640

Copies of the full text of these decisions and orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room 1E–234, Forrestal Building, 1000 Independence Avenue, SW., Washington, D.C. 20585, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., except federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

Dated: March 14, 1984.

George B. Breznay,

Director, Office of Hearings and Appeals.

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[WH-FRL-2549-7]

Proposal To Recommend Designation of the Snake River Plain Aquifer as a Sole Source Aquifer and Request for Public Comment

AGENCY: Environmental Protection Agency.

ACTION: Notice of public comment period and public hearings.

SUMMARY: The Region 10 office of the Environmental Protection Agency (EPA) is proposing to recommend that the Snake River Plain Aquifer in southeastern Idaho be designated as the sole or principal source of drinking water for the area. A draft Support Document providing the bases for this recommendation is available for review and public comments are requested. Hearings will be held if sufficient public interest is expressed.

DATES: Requests to hold a public hearing should be filed on or before April 20, 1984.

Public hearings are tentatively scheduled for May 7, 1984, in Idaho Falls at 7:30 p.m. and May 8, 1984, in Twin Falls at 7:30 p.m. One or both of the hearings will be cancelled if sufficient public interest is not expressed by April 20, 1984. The public is also encouraged to submit written comments. These must be submitted by May 25, 1984.

ADDRESSES: Persons requesting a hearing should notify Wendy Marshall, M/S 409, U.S. Environmental Protection Agency, Region 10, 1200 Sixth Avenue, Seattle, Washington 98101.

The draft Support Document is available for public inspection and copying during normal business hours at the Environmental Protection Agency, Region 10 Library, 1200 Sixth Avenue, Seattle, Washington 98101.

It is also available for inspection and copying during normal business hours at the main public library in the following cities: Aberdeen, American Falls, Arco, Ashton, Bellevue, Blackfoot, Boise, Buhl, Burley, Carey, Downey, Dubois, Fairfield, Filer, Fort Hall, Gooding, Hagerman, Hailey, Hamer, Hansen, Idaho Falls, Jerome, Ketchum, Kimberly, Lewisville, Oakley, Pocatello, Rexburg, Richfield, Rigby, Rockland, Rupert, Saint Anthony, Shelley, Shoshone, Sugar City, Twin Falls, Victor and Wilder.

The public hearings will be held at the District Seven Health Department Conference Room 254, "E" Street, Idaho Falls on May 7, 1984, from 7:30 p.m. to 9:30 p.m. and at the College of Southern Idaho, Room 118—Shields, Twin Falls, on May 8, 1984, from 7:30 p.m. to 9:30 p.m.

FOR FURTHER INFORMATION CONTACT: Wendy Marshall at (208) 442–1890 or FTS 399–1890.

SUPPLEMENTARY INFORMATION: Section 1424(e) of the Safe Drinking Water Act (Pub. L. 93–523) authorizes the Administrator to determine, on his own initiative or upon petition, that an area has an aquifer which is the sole or principal drinking water source for the area and which, if contaminated, would create a significant hazard to public health. After such a determination is made, no commitment for Federal financial assistance (through a grant, contract, loan guarantee, or otherwise) may be entered into for any project which the Adminstrator determines may contaminate such an aquifer through a recharge zone so as to create a significant hazard to public health.

On September 25, 1982, the Hagerman Valley Citizen's Alert, Inc. submitted a petition requesting that the Administrator of the EPA designate the aquifer underlying the eastern Snake River Plain as the sole drinking water source for the area. Additional information, including the petitioners' interest in the Administrator's determination and the petitioners' views as to why contamination of the aquifer would result in a significant hazard to public health, was provided to EPA on October 27, 1982. Notice of this petition was published in the **Federal Register** on February 9, 1983.

The EPA Region 10 office is proposing to recommend to the Administrator that the requested determination be made. The designated area would consist of the land overlying the aquifer itself (the recharge zone) and the area in the streamflow source zone, i.e., the upstream headwaters area which drains into the recharge zone (also referred to as the contributory drainage area). Included in the designated area would be all or part of Bannock, Bingham, Blaine, Bonneville, Butte, Camas, Cassia, Clark, Fremont, Gooding, Jefferson, Jerome, Lincoln, Madison, Minidoka, Power, Teton, and Twin Falls Counties.

A draft Support Document providing the bases for the recommendation of aquifer designation is available for public review. This document includes such information as a description of the location of petitioned area, estimate of size of area, boundaries of area, pertinent geologic and hydrologic information, information on the recharge and streamflow source zones, climate, population, existence or absence of alternate drinking water sources, and potential sources of contamination.

Hearings will be held to discuss the draft Support Document if sufficient public interest is expressed. Requests for a public hearing should include the following information: (1) Name, address, and telephone number of the individual, organization, or other entity requesting a hearing and which hearing they would be attending; and (2) a brief statement of the requesting person's interest in the proposed recommendation.

If one or both of the hearings are cancelled, those persons having expressed interest in attending the hearing will be notified by phone and by letter of the cancellation. Other persons should contact the Environmental Section of the South Central District Health Department in Twin Falls at (208) 734–5000 or the Environmental Health Section of the District Seven

Health Department in Idaho Falls at (208) 523–5382 to confirm the hearing date and time. EPA will also send notice of the hearings or of their cancellation to the local media.

Dated: February 17, 1984.

Ernesta B. Barnes,

Regional Administrator.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Submitted to the Office of Management and Budget for Clearance

The Federal Emergency Management Agency (FEMA) has submitted to the Office of Management and Budget the following information collection package for approval in accordance with the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Type: Extension of 3067–0033
Title: Notice of Interest in Applying for Federal Disaster Assistance
Abstract: Brief check list indicating disaster damage to be inspected for grant.
Type of respondents: State or Local Governments
Number of respondents: 2,500
Burden hours: 1,250

Copies of the above information collection request and supporting documentation can be obtained by calling for writing the FEMA Clearance Officer, Linda Shiley, (202) 287–9906, 500 C Street, SW., Washington, D.C. 20472.

Comments should be directed to Ken Allen, Desk Officer for FEMA, Office of Information and Regulatory Affairs, OMB, Room 3235, New Executive Office Building, Washington, D.C. 20503.

Dated: March 15, 1984.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Central Louisiana Capital Corporation, et al.; Formation of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under sections 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1) to become bank holding companies by acquiring voting shares and/or assets of a bank. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c).

The applications may be inspected at the offices of the Board of Governors, or at the Federal Reserve Bank indicated. Interested persons may express their views in writing to the address indicated for the applications. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing. Comments on these applications must be received not later than April 5, 1984.

A. Federal Reserve Bank of Dallas (Anthony J. Montelaro, Vice President) 400 South Akard Street, Dallas, Texas 74222:

1. *Central Louisiana Capital Corporation,* Ferriday, Louisiana; to become a bank holding company by acquiring 100 percent of the voting shares of Louisiana Central Bank, Ferriday, Louisiana.

2. *Schwertner Financial Corporation,* Schwertner, Texas; to become a bank holding company by acquiring 80 percent of the voting shares of Schwertner State Bank.

Board of Governors of the Federal Reserve System, March 19, 1984.

James McAfee,

Associate Secretary of the Board.

BILLING CODE 6210–01–M

Commercial Bancshares, Inc., et al.; Formations of; Acquisitions by; and Mergers of Bank Holding Companies

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (49 FR 794) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C.1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank Indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute

and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than April 13, 1984.

A. Federal Reserve Bank of New York (A. Marshall Puckett, Vice President) 33 Liberty Street, New York, New York 10045:

1. *Commercial Bancshares, Inc.*, Jersey City, New Jersey; to acquire 100 percent of the voting shares of The Wood Ridge National Bank, Wood Ridge, New Jersey.

2. *Community Bank System, Inc.*, Canton, New York; to acquire 100 percent of the voting shares of The Exchange National Bank, Olean, New York, a *de novo* bank to be formed for the purpose of acquiring three branches of the bank of New York, New York, New York, located in Olean, Allegany and Portville, New York.

3. *Hamptons Bancshares, Inc.*, East Hampton, New York; to become a bank holding company by acquiring 100 percent of the voting shares of The Bank of the Hamptons, N.A., East Hampton, New York

B. Federal Reserve Bank of Atlanta (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

1. *Citizens BancShares, Inc.*, Greensboro, Alabama; to become a bank holding company by acquiring 100 percent of the voting shares of The Citizens Bank, Greensboro, Alabama.

2. *Vista Banks, Inc.*, DeLeon Springs, Florida; to acquire 80 percent of the voting shares of bank of Belleview, Belleview, Florida.

C. Federal Reserve Bank of Chicago (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois [illegible]

1. *Blanchardville Financial Services, Inc.*, Blanchardville, Wisconsin; to acquire 94 percent of the voting shares of Highland State Bank, Highland, Wisconsin.

D. Federal Reserve Bank of St. Louis (Delmer P. Weisz, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. *Schuyler County Bancshares, Inc.*, Lancaster, Missouri; to become a bank holding company by acquiring at least 99.6 percent of the voting shares of Schuyler County State Bank, Lancaster, Missouri.

2. *Simmons First National Corporation*, Pine Bluff, Arkansas; to acquire 98 percent of the voting shares of First State Bank & Trust Company, Lake Village, Arkansas.

E. Federal Reserve Bank of Kansas City (Thomas M. Hoenig, Vice President) 925 Grand Avenue, Kansas City, Missouri 64198:

1. *First Continental Financial, Inc.*, Omaha, Nebraska; to become a bank holding company by acquiring at least 80 percent of the voting shares of First Continental National Bank, Omaha, Nebraska.

Board of Governors of the Federal Reserve System, March 16, 1984.

BILLING CODE 6210-01-M

Maryland Bancorp, Inc.; Application to Engage de Novo in Permissible Nonbanking Activities

The company listed in this notice has filed an application under § 225.23(a)(1) of the Board's Regulation Y (49 FR 794) for the Board's approval under section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and § 225.21(a) of Regulation Y (49 FR 794) to commence or to engage *de novo*, either directly or through a subsidiary, in a nonbanking activity that is listed in § 225.25 of Regulation Y as closely related to banking and permissible for bank holding companies. Unless otherwise noted, such activities will be conducted throughout the United States.

The application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether consummation of the proposal can "reasonably by expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Comments regarding the application must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 10, 1984.

A. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Maryland Bancorp, Inc.*, Lexington Park, Maryland; to engage *de novo* through its subsidiary, Maryland Bankers Life Insurance Corporation, Phoenix, Arizona, in underwriting as reinsurer certain credit life and credit accident and health insurance directly related to extensions of credit by Maryland Bank and Trust Company. These activities would be conducted in St. Marys County, and Charles County, Maryland; and the Piscataway, Surrats, Brandywine, and Oxon Hill Districts of Prince Georges County, Maryland.

Board of Governors of the Federal Reserve System, March 16, 1984.

James McAfee,

Associate Secretary of the Board.

GENERAL SERVICES ADMINISTRATION

Privacy Act of 1974; Deletion of a System of Records

AGENCY: General Services Administration.

ACTION: Notification of deletion of a system of records.

SUMMARY: The General Services Administration is deleting a system of records, Accounts Receivable Claims Files, GSA/PPFM-2, that is no longer in use.

DATE: Effective March 22, 1984.

FOR FURTHER INFORMATION CONTACT: Mr. William Hiebert, Records and Forms Management Branch, Information Management Division, (202) 535-7647.

SUPPLEMENTARY INFORMATION: On August 25, 1980, and pursuant to the provisions of the Privacy Act of 1974, there was published in the **Federal Register** (45 FR 57874) a notice of the system of records, Accounts Receivable Claims Files, GSA/PPFM-2. This notice deletes this system of records.

Dated: March 15, 1984.

Frank J. Sabatini,

Director, Information Management Division.

BILLING CODE 4160-01-M

[Docket No. 83N-0018; DESI 6514]

Oral Prescription Drugs Offered for Relief of Symptoms of Couch, Cold, or Allergy; Drug Efficacy Study Implementation; Withdrawal of Approval

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing approval of the original formulations of Tuss-Ornade Spansules and Liquid containing caramiphen edisylate, chlorpheniramine maleate, phenylpropanolamine hydrochloride, and isopropamide iodide. These products are no longer marketed. The basis for the withdrawal is that these combination drug products lack substantial evidence of effectiveness. Reformulations of Tuss-Ornade Spansules and Liquid, containing caramiphen edisylate and phenylpropanolamine hydrochloride, are currently marketed pending final determination of effectiveness.

EFFECTIVE DATE: April 23, 1984.

ADDRESS: Requests for an opinion of the applicability of this notice to a specific product should be identified with reference number DESI 6514 and directed to the Division of Drug Labeling Compliance (HFN-310), National Center for Drugs and Biologics, Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Francis J. Sasinowski, National Center for Drugs and Biologics (HFN-8), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-3650.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of September 6, 1983 (48 FR 40322), the Director of the National Center for Durgs and Biologics reclassified Tuss-Ornade Spansules and Liquid as lacking substantial evidence of effectiveness as combination drug products. The Director offered an opportunity for hearing on two proposals: (1) To withdraw approval of the original formulations of Tuss-Ornade Spansules and Liquid, and (2) to refuse approval of supplemental reformulations of the same products.

Neither the holder of the two new drug applications (NDA's) nor any other interested party requested a hearing on the proposal to withdraw approval of the original formulations of Tuss-Ornade Spansules and Liquid. Failure to file a notice of appearance and request for a hearing constitutes a waiver of the opportunity for a hearing. Accordingly, the Director of the National Center for Drugs and Biologics withdraws approval of the following new drug applications:

1. NDA 12-903; Tuss-Ornade Spansules containing caramiphen edisylate 20 milligrams (mg), chlorpheniramine maleate 8 mg, phenylpropanolamine hydrochloride 50 mg, and isopropamide iodide 2.5 mg; Smith Kline and French Laboratories, 1500 Spring Garden St., P.O. Box 7929, Philadelphia, PA 19101.

2. NDA 13-068; Tuss-Ornade Liquid containing caramiphen eidsylate 5 mg, chlorpheniramine maleate 2 mg, phenylpropanolamine hydrochloride 15 mg, and isopropamide iodide 0.75 mg; Smith Kline and French Laboratories.

Any drug product that is identical, related, or similar to the drug products named above and is not the subject of an approved new drug application is covered by the new drug application reviewed and is subject to this notice (21 CFR 310.6). Any person who wishes to determine whether a specific product is covered by this notice should write to the Division of Drug Labeling Compliance (address above).

In response to that part of the September 6, 1983 notice that proposed to refuse to approve the reformulated products (described below), two firms requested a hearing: Smith Kline and French Laboratories for its reformulated Tuss-Ornade products and National Pharmaceutical Manufacturing Company for its identical, similar, or related product, Oratuss Liquid. Those hearing requests are under review and will be the subject of a future **Federal Register** notice. The marketing status of these products is not affected by this notice. The supplements submitted by Smith Kline and French proposed to reformulate the products listed above to the following:

1. NDA 12-903: Caramiphen edisylate 40 mg and phenylpropanolamine hydrochloride 25 mg.

2. NDA 13-068: Caramiphen edisylate 6.7 mg and phenylpropanolamine hydrochloride 12.5 mg.

The Director of the National Center for Drugs and Biologics, under the Federal Food, Drug, and Cosmetic Act (sec. 505, 52 Stat. 1052–1053, as amended (21 U.S.C. 355)), and under the authority delegated to him (21 CFR 5.82) finds that, on the basis of new information before him with respect to the original drug products, evaluated together with the evidence available to him when the applications were approved, there is a lack of substantial evidence that the drug products will have the effect they purport or are represented to have under the conditions of use prescribed, recommended, or suggested in their labeling.

Therefore, pursuant to the foregoing finding, approval of NDA 12–903 and NDA 13–068 and all their previously approved amendments and supplements is withdrawn effective April 23, 1984. Shipment in interstate commerce of the original products listed above, or any identical, related, or similar product that is not the subject of an approved new drug application or pending hearing request, will then be unlawful.

Dated: March 14, 1984.

Paul Parkman,

Acting Director, National Center for Drugs and Biologics.

[FR Doc. 84–7628 Filed 3–21–84; 8:45 am]

BILLING CODE 4160–01–M

[Docket No. 77N–0203; DESI 12342]

Tranylcypromine Sulfate; Drugs for Human Use; Drug Efficacy Study Implementation, Revocation of Exemption; Announcement of Marketing Conditions; Followup Notice and Opportunity for Hearing

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is revoking the temporary exemption that has allowed tranylcypromine sulfate to remain on the market beyond the time limits scheduled for implementation of the Drug Efficacy Study. FDA announces the conditions for marketing this product for the indication now regarded as effective. Tranylcypromine sulfate is catergorized as a monoamine oxidase inhibitor.

DATES: Requests for hearings are due on or before April 23, 1984; supplements to approved new drug applications are due on or before May 21, 1984.

ADDRESSES: Communications in response to this notice should be identified with reference number DESI 12342, directed to the attention of the appropriate office named below, and addressed to the Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857.

Supplements to full new drug applications (identify with NDA number); Division of Neuropharmacological Drug Products (HFN–120) Rm. 10B–40, National Center for Drugs and Biologics.

Original abbreviated new drug applications and supplements thereto (identify as such): Division of Generic Drug Monographs (HFN–530), National Center for Drugs and Biologics.

Requests for hearing (identify with Docket No. 77N–0203): Dockets Mangement Branch (HFA–305), Rm. 4–62.

Requests for opinion of the applicability of this notice to a specific product: Division of Drug Labeling Compliance (HFN–310), National Center for Drugs and Biologics.

FOR FURTHER INFORMATION CONTACT: Francis J. Sasinowski, National Center for Drugs and Biologics (HFN–8), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–3650.

SUPPLEMENTARY INFORMATION: In a notice published in the **Federal Register** of September 1, 1970 (35 FR 13855), FDA classified tranylcypromine sulfate as probably effective for symptomatic relief in patients who have severe depression, are not candidates for electroconvulsive therapy, have failed to respond satisfactorily to other antidepressant therapy, and are hospitalized or under similar close supervision. This classification reflected the findings of the Panel on Psychiatric Drugs of the National Academy of Sciences/National Research Council as part of the Drug Efficacy Study Implementation (DESI).

In a notice published in the **Federal Register** of September 2, 1977 (42 FR 44286), tranylcypromine sulfate was added as category XX to the list of drugs that would temporarily be exempt from the time limits established for completing the DESI program. This exemption allowed this drug to remain on the market while studies were conducted to determine its effectiveness. Labeling this drug product as "probably effective for symptomatic relief of servere reactive or endogenous depression in hospitalized or closely supervised patients who have not responded to other antidepressant therapy" was required in this notice as one of the specific conditons for the continued marketing of this drug.

In a subsequent notice published in the **Federal Register** of July 14, 1978 (43 FR 30351), FDA extended the time allowed for completion of the clinical studies of effectiveness and allowed other firms to market this product under an abbreviated new drug application (ANDA).

On the basis of the agency's review of additional data and information submitted by the holder of the new drug application (NDA), the Director of the National Center for Drugs and Biologics has determined that tranylcypromine sulfate, as contained in the product covered by the NDA listed below, is effective for the management of certain types of depression and that the drug is no longer entitled to the temporary exemption announced in 1977. Accordingly, the exemption, as it pertains to tranylcypromine sulfate, is hereby revoked.

NDA 12–342; Parnate Tablets containing tranylcypromine sulfate equivalent to 10 milligrams (mg) tranylcypromine; Smith Kline & French Laboratories, 1500 Spring Garden St., P.O. Box 7929, Philadelphia, PA 19101.

This drug is regarded as a new drug (21 U.S.C. 321(p)), and an approved new drug application is required for marketing it. A supplemental new drug application is now required to revise the labeling and to update any previously approved new drug application providing for this drug.

In addition to the holder of the application specifically named above, this notice applies to any person who manufactures or distributes a drug product that is not the subject of an approved new drug application and that is identical to a drug product named above. It may also be applicable, under 21 CFR 310.6, to a related or similar drug product that is not the subject of an approved new drug application. It is the responsibility of every drug manufacturer or distributor to review this notice to determine whether it covers any drug product that the person manufactures or distributes. Any person may request an opinion of the applicability of this notice to a specific drug product by writing to the Division of Drug Labeling Compliance (address given above).

A. *Effectiveness classification.* FDA has reviewed all available evidence and concludes that tranylcypromine sulfate is effective for the indication in the labeling conditions below. The drug product lacks substantial evidence of effectiveness for other labeled indications.

B. *Conditions for approval and marketing.* FDA is prepared to approve abbreviated new drug applications for products containing tranylcypromine sulfate for the indication now regarded as effective and a supplement to the

previously approved new drug application under the conditions described herein.

1. *Form of drug.* The drug product is in tablet form for oral administration. Each tablet contains tranylcypromine sulfate equivalent to 10 mg of tranylcypromine.

2. *Labeling conditions.* a. The label bears the statement "Caution: Federal law prohibits dispensing without prescription."

b. The drug is labeled to comply with all requirements of the Federal Food, Drug, and Cosmetic Act (the act) and regulations, and the labeling bears adequate information for safe and effective use of the drug. The indication is as follows:

For the treatment of Major Depressive Episode without Melancholia.

Tranylcypromine sulfate should be used in adult patients who can be closely supervised. It should rarely be the first antidepressant drug given. Rather, the drug is suited for patients who have failed to respond to the drugs more commonly administered for depression.

The effectiveness of tranylcypromine sulfate has been established in adult outpatients, most of whom had a depressive illness which would correspond to a diagnosis of Major Depressive Episode without Melancholia. As described in the American Psychiatric Association's Diagnostic and Statistical Manual, third edition (DSM III), Major Depressive episode implies a prominent and relatively persistent (nearly every day for at least two weeks) depressed or dysphoric mood that usually interferes with daily functioning and includes at least four of the following eight symptoms: change in appetite, change in sleep, psychomotor agitation or retardation, loss of interest in usual activities or decrease in sexual drive, increased fatigability, feelings of guilt or worthlessness, slowed thinking or impaired concentration, and suicidal ideation or attempts.

The effectiveness of tranylcypromine sulfate in patients who meet the criteria for Major Depressive Episode With Melancholia (endogenous features) has not been established. (See "CLINICAL STUDIES" section.)

c. The "DOSAGE AND ADMINISTRATION" section shall include the following information.

The usual effective dosage is 30 mg per day. If there are no signs of improvement after a reasonable period (up to 2 weeks), then the dosage may be increased in 10 mg per day increments at intervals of 1 to 3 weeks. the dosage range may be extended to a maximum of 60 mg per day from the usual 30 mg per day.

3. *Marketing status.* The marketing of the drug product that is now the subject of an approved or effective new drug application may be continued provided that, on or before May 21, 1984, the holder of the application has submitted (i) a supplement for revised labeling as needed to be in accord with the labeling conditions described in this notice, and complete container labeling if current container labeling has not been submitted, and (ii) a supplement to provide current information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD–356H (21 CFR 314.1(c)(2)).

Approval of an abbreviated new drug application (21 CFR 314.2) that contains full information with respect to items 6 (components), 7 (composition), and 8 (methods, facilities, and controls) of new drug application form FD–356H (21 CFR 314.1(c)(2)) must be obtained before marketing such product. The requirement in the bioavailability regulations (21 CFR 320.21) that an application include evidence demonstrating in vivo bioavailability will not be waived for this drug, tranylcypromine sulfate (21 CFR 320.22(c)(3)). Marketing the drug product before approval of a new drug application will subject to regulatory action both the product and the person responsible for causing such product to be marketed.

C. *Notice of opportunity for hearing.* Notice is given to the holder of the new drug application and to all other interested persons that the Director of the National Center for Drugs and Biologics proposes to issue an order under section 505(e) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(e)) withdrawing approval of the new drug application and all amendments and supplements thereto providing for the indications (not referred to in paragraph B.2.b., above) that lack substantial evidence of effectiveness. The basis of the proposed action is that new information before the Director with respect to the drug product, evaluated together with the evidence available to the Director when the application was approved, shows there is a lack of substantial evidence that the drug product will have all the effects it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling. If no hearing is requested, and the application is further supplemented in accord with this notice, then the approval of the claims that lack evidence of effectiveness will be considered withdrawn, and no further order will issue.

This notice of opportunity for hearing encompasses all issues relating to the legal status of the drug product subject to it (including identical, related, or similar drug products as defined in 21 CFR 310.6), e.g., any contention that any such product is not a new drug because it is generally recognized as safe and effective within the meaning of section 201(p) of the act or because it is exempt from part or all of the new drug provisions of the act under the exemption for products marketed before June 25, 1938 in section 201(p) of the act, or under section 107(c) of the Drug Amendments of 1962, or for any other reason.

In accordance with section 505 of the act (21 U.S.C. 355) and the regulations promulgated under it (21 CFR Parts 310 and 314), the applicant and all other persons who manufacture or distribute a drug product that is identical, related, or similar to a drug product named above (21 CFR 310.6) and not the subject of a new drug application are hereby given an opportunity for a hearing to show why approval of the new drug application should not be withdrawn, and an opportunity to raise, for administrative determination, all issues relating to the legal status of the drug product named above and of all identical, related, or similar drug products not the subject of a new drug application.

The applicant or any other person subject to this notice under 21 CFR 310.6 who decides to seek a hearing shall file: (1) On or before April 23, 1984 a written notice of appearance and request for hearing, and (2) on or before May 21, 1984 the data, information, and analyses relied on to justify a hearing, as specified in 21 CFR 314.200. Any other interested person may also submit comments on this proposal to withdraw approval. The procedures and requirements governing this notice of opportunity for hearing, a notice of appearance and request for hearing, a submission of data, information, and analyses to justify a hearing, other comments, and a granting or denial of a hearing, are contained in 21 CFR 314.200.

The failure of the applicant or any other person subject to this notice under 21 CFR 310.6 to file a timely written notice of appearance and request for hearing as required by 21 CFR 314.200 constitutes an election by the person not to make use of the opportunity for a hearing concerning the action proposed and a waiver of any contentions concerning the legal status of the relevant drug product. Any such drug

product labeled for the indications referred to in this notice as lacking substantial evidence of effectiveness may not thereafter lawfully be marketed, and the Food and Drug Administration will initiate appropriate regulatory action to remove such a drug product from the market. Any new drug product marketed without an approved new drug application is subject to regulatory action at any time.

A request for a hearing may not rest upon mere allegations or denials, but must present specific facts showing that there is a genuine and substantial issue of fact that requires a hearing. If it conclusively appears from the face of the data, information, and factual analyses in the request for hearing that there is no genuine and substantial issue of fact which precludes the withdrawal of approval of the application, or when a request for hearing is not made in the required format or with the required analyses, the Commissioner of Food and Drugs will enter summary judgment against the person(s) who requests the hearing, making findings and conclusions, and denying a hearing.

All submissions pursuant to this notice are to be filed in four copies. Except for data and information prohibited from public disclosure under 21 U.S.C. 331(j) or 18 U.S.C. 1905, the submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

This notice is issued under the Federal Food, Drug, and Cosmetic Act (secs. 502, 505, 52 Stat 1050–1053 as amended (21 U.S.C. 352, 355)) and under the authority delegated to the Director of the National Center for Drugs and Biologics (21 CFR 5.70 and 5.82).

Dated: March 14, 1984.

Paul Parkman,

Acting Director, National Center for Drugs and Biologics.

BILLING CODE 4160-01-M

Health Care Financing Administration

Medicare Program; Revised Criteria for Defining a Skilled Nursing Facility When Determining Spell of Illness Status

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice of HCFA ruling.

SUMMARY: This notice announces a HCFA Ruling that establishes revised criteria for defining a skilled nursing facility under section 1861(j)(1) of the Social Security Act when determining a beneficiary's spell of illness status.

FOR FURTHER INFORMATION CONTACT: Thomas Hoyer, Office of Coverage Policy, (301) 594–9446.

SUPPLEMENTARY INFORMATION: We plan to compile and publish all HCFA Rulings in the "Health Care Financing Administration Rulings" Booklet which will be indexed for citation purposes. When this ruling is republished in the booklet, it will be known as HCFAR 83–3. The text of the HCFA ruling is as follows:

Criteria for Defining a Skilled Nursing Facility When Determining a Beneficiary's Spell of Illness Status—HCFAR 83–3

Purpose

This ruling provides public notice of the revised criteria that HCFA has established for defining a skilled nursing facility (SNF) under section 1861(j)(1) of the Social Security Act (the Act) when determining a beneficiary's spell of illness status.

Citations

Section 1812 and 1861 of the Social Security Act (42 U.S.C. 1395d and 1395x).

Pertinent History

Under the Hospital Insurance Program (Medicare—Part A), payment for covered inpatient hospital and skilled nursing facility services is available for a limited number of days during each benefit period or *spell of illness.* Once a beneficiary has exhausted that allotted number of days (90 days for inpatient hospital care plus 60 lifetime reserve days and 100 days for SNF care), no further Part A program payment is available for those services until the beneficiary ends that spell of illness and begins a new one (Section 1812(a) of the Act, 42 U.S.C. 1395d(a)). A patient's spell of illness begins on the day he or she is furnished hospital or SNF services and ends when he or she has not been an inpatient of a hospital or SNF for 60 consecutive days (Section 1861(a) of the Act, 42 U.S.C. 1395x(a)).

The material following section 1861(j)(15) of the Act (42 U.S.C. 1395x(j)(15)) specifies that for purposes of determining when a spell of illness ends under section 1861(a), an SNF is defined by section 1861(j)(1) of the Act (42 U.S.C. 1395x(j)(1)). This latter provision defines an SNF as a facility that:

(1) Is primarily engaged in providing to inpatients—

(A) Skilled nursing care and related services for patients who require medical or nursing care, or

(B) Rehabilitation services, for the rehabilitation of injured, disabled, or sick persons.

Thus, while a beneficiary is an inpatient of a nursing home which meets this definition, the beneficiary is considered an inpatient of an SNF under section 1861(a) of the Act, and cannot terminate his or her spell of illness for purposes of receiving renewed benefits.

We developed criteria early in the program that clarified the section 1861(j)(1) definition of a skilled nursing facility. These criteria are included in section 3412 of the *State Operation Manual* and in a HCFA Ruling (HCFAR 83–2) published in the **Federal Register** on December 3, 1982 (47 FR 54551). For determinations made prior to October 17, 1983, these criteria defining those SNFs where a stay could either prolong a spell of illness or constitute a patient's being in his "home" for purposes of the DME and home health benefits.

As a result of the recent court order in *Kron* v. *Heckler,* Civil Action No. 80–1332 (E.D. La., October 17, 1983), we instructed all fiscal intermediaries to start using a new set of criteria for defining section 1861(j)(1) facilities for spell of illness purposes. The new criteria, effective as of October 17, 1983 (the date the *Kron* judgment was entered), retain the previous section 1861(j)(1) criteria elements, but also provide that a section 1861(j)(1) SNF, for purposes of prolonging a Medicare spell of illness, cannot include a facility or part of a facility that is licensed by the State solely as an intermediate care facility (ICF). This Ruling utilizes the elements of the definition of spell of illness that were contained in our instruction to fiscal intermediaries and also contains further clarifying language. The Ruling is applicable to spell of illness determinations made on or after October 17, 1983 and applies only to use of the "spell of illness" concept in the context of hospital or skilled nursing facility services, coverage, and reimbursement under Medicare. HCFAR 83–2 (47 FR 54551, December 3, 1982) is modified to the extent necessary to conform to this Ruling.

Ruling

Criteria for Defining a Skilled Nursing Facility Under Section 1861(j)(1) of the Social Security Act When Determining a Beneficiary's Spell of Illness Status

An institution meets the section 1861(j)(1) definition of skilled nursing or rehabilitation facility for purposes of prolonging a spell of illness under sections 1812(a) and 1861(a)(2) of the

Social Security Act only if all the following criteria are met.

A. *Nursing Services.*—Nursing services are provided under the direction or supervision of one or more registered nurses or licensed practical or vocational nurses without regard to whether they are 'waived.' This condition will be considered met even if the nurse is also the administrator of the facility or is employed on a part-time basis.

B. *24–Hour Nursing Services.*—There are nursing personnel on duty 24 hours a day. The term 'nursing personnel' includes registered nurses, licensed practical or vocational nurses without regard to whether they are 'waived' or not, practical nurses, student nurses, nursing aides, and orderlies.

C. *Nurse-Bed Ratio.*—The number of full-time equivalent nursing personnel to the number of beds is not less than an average ratio of 1 to 15 per shift.

Note.—Generally, there will be a close equivalency between the number of beds and average number of patients in an institution. When the circumstances indicate a significant discrepancy in these factors, the ratio of nurses to the average patient census should be used in determining section 1861(j)(1) status.

A facility which has three 8-hour shifts would have to have a minimum of the equivalent of three full-time nursing personnel during a 24-hour period for each 15 beds. It is not necessary that the 1 to 15 ratio be maintained for each shift, but the average of all shifts must be at least 1 to 15. Nursing personnel include all those persons listed in paragraph B above. In determining the ratio, nurses who are also administrators should be counted as nursing personnel.

D. *Other Services.*—Bed and board are provided to inpatients in connection with the furnishing of nursing care, plus one or more medically related health services such as physicians' services, physical, occupational or speech therapy, diagnostic and laboratory services, and administration of medication. (Social, diversional, or recreational services provided by the institution would not be considered medically related health services.)

E. *Not Solely an Intermediate Care Facility.*—The facility or part of a facility which is being classified is not—

1. Certified solely as an intermediate care facility, consistent with 42 CFR Part 442, Subpart E; or

2. Licensed by the State solely at a level or levels at or below the intermediate care facility (or a comparable) level.

(Secs. 1812 and 1861 of the Social Security Act; 42 U.S.C. 1395d and 1395x)

(Catalog of Federal Domestic Assistance Program No. 13.773, Medicare-Hospital Insurance)

Dated: March 19, 1984.

Carolyne K. Davis,

Administrator, Health Care Financing Administration.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Alaska Land Use Council; Request for Items for Inclusion in Coming Year Work Program

As required by the operating procedures of the Alaska Land Use Council, which was established under the Alaska National Interest Lands Conservation Act (ANILCA), Pub. L. 96–487, the Council shall issue a call for recommended items to be included in the work program for the coming year. Each item submitted for the work program must include a brief description of the work to be accomplished, the completion date, the anticipated product, the estimated cost, a public participation statement, and the nature of the Council's involvement. The Cochairmen, after consultation with the Council's Staff Committee, will prepare a recommended work program considering the requirements of ANILCA, projected Council resources, special requests, and recommendations from the public and Council members. The proposed work program will be submitted in May to the Council for adoption. Any interested parties having a proposed work program item shall submit the information to the Cochairmen prior to April 15, 1984. Submittals should be sent to: Cochairmen, Alaska Land Use Council, P.O. Box 100120, Anchorage, Alaska 99510.

Anyone having questions regarding the Council's work program may call the Council office at (907) 272–3422 or (907) 271–5485 (FTS)

Dated: March 15, 1984.

William P. Horn,

Deputy Under Secretary.

BILLING CODE 4310–10–M

Bureau of Indian Affairs

Montana; Irrigation Operation and Maintenance Charges; Correction

Pursuant to the final rule published on June 14, 1977, in 42 FR 30361 and with authority contained in the Acts of August 1, 1914 and March 7, 1928 (38 Stat. 583, 25 U.S.C. 385; 45 Stat. 210, 25 U.S.C. 387) the operation and maintenance charges for lands under the Crow Irrigation Project, Montana, for the season of 1984 and subsequent years were fixed.

These fixed charges were published in the **Federal Register** on Friday, February 24, 1984, on Page 7002, Vol. 49, No. 38, and are corrected to read as follows:

On page 7002 the rate per acre for Two Leggins Drainage is corrected from "$125." to "$1.25".

John A. Montgomery,

Acting Superintendent, Crow Indian Agency, Crow Agency, MT 59022.

Bureau of Land Management

[AA–40838]

Alaska Native Claims Selection; Cook Inlet Area

In accordance with Departmental regulation 43 CFR 2650.7(d) notice is hereby given that a decision to issue conveyance under the provisions of Secs. 12(b)(6) of the Act of January 2, 1976 (89 Stat. 1151), and I.C.(2) of the Terms and Conditions for Land Consolidation and Management in the Cook Inlet Area, as clarified August 31, 1976 (90 Stat. 1935), will be issued to Cook Inlet Region, Inc., for approximately 1,156.68 acres. The lands involved are within the Copper River Meridian, Alaska:

T. 39 S., R. 58 E.
T. 39 S., R. 59 E.
T. 40 S., R. 59 E.

The decision to issue conveyance will be published once a week, for four (4) consecutive weeks, in the Juneau Empire upon issuance of the decision. For information on how to obtain copies, contact the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

Any party claiming a property interest in lands affected by this decision, an agency of the Federal Government, or regional corporation may appeal the decision of the Interior Board of Land Appeals, Office of Hearings and Appeals, in accordance with the regulations in 43 Code of Federal Regulations (CFR), Part 4, Subpart E, as revised.

If an appeal is taken, the notice of appeal must be filed in the Bureau of Land Management, Alaska State Office, Division of Conveyance Management (960), 701 C Street, Box 13, Anchorage,

Alaska 99513. Do not send the appeal directly to the Interior Board of Land Appeals. The appeal and copies of pertinent case files will be sent to the Board from this office. A copy of the appeal must be served upon the Regional Solicitor, 701 C Street, Box 34, Anchorage, Alaska 99513.

The time limits for filing an appeal are:

1. Parties receiving service of the decision by personal service or certified mail, return receipt requested, shall have thirty days from the receipt of the decision to file an appeal.

2. Unknown parties, parties unable to be located after reasonable efforts have been expended to locate, parties who failed or refused to sign their return receipt, and parties who received a copy of the decision by regular mail which are not certified, return receipt requested, shall have until April 23, 1984 to file an appeal.

Any party known or unknown who is adversely affected by the decision shall be deemed to have waived those rights which were adversely affected unless an appeal is timely filed with the Bureau of Land Management, Alaska State Office, Division of Conveyance Management.

To avoid summary dismissal of the appeal, there must be strict compliance with the regulations governing such appeal. Further information on the manner of and requirements for filing an appeal may be obtained from the Bureau of Land Management, Alaska State Office, 701 C Street, Box 13, Anchorage, Alaska 99513.

If an appeal is taken, the parties to be served with a copy of the notice of appeal are:

Cook Inlet Region, Inc., P.O. Drawer 4–N, Anchorage, Alaska 99509.
Retained Lands Unit—Easements, Division of Land and Water Management, Alaska Department of Natural Resources, Pouch 7–005, Anchorage, Alaska 99510.

Helen Burleson,

Acting Chief, Branch of ANCSA Adjudication.

BILLING CODE 4310–GG–M

[A–17000–T]

Arizona; Termination of Segregative Effect

1. On July 2, 1981, the State of Arizona filed application to select certain public lands in lieu of school lands that were encumbered by other rights or reservations before the State's title could attach (43 U.S.C. 851–852). Effective August 27, 1981, said lands were segregated from appropriation under the public land laws, including the mining, but not the mineral leasing laws (46 FR, No. 144; pp 38508–38509).

The State has withdrawn its application as to the following described lands:

Gila and Salt River Meridian, Arizona

T. 4 N., R. 17 W.,
Sec. 28, N½SE¼NE¼, NE¼NE¼, S½NE¼NW¼NE¼, S½NW¼NE¼, E½NE¼SE¼NW¼, SE¼SE¼ NE¼NW¼, N½SW¼NE¼.
T 4 N., R. 18 W.,
Sec. 14, S½S½SW¼, S½SE¼SW¼;
Sec. 23, N½NE¼NW¼.
T 1 S., R. 5 W.,
Sec. 3, S½N½.
T. 8 S., R. 14 W.,
Sec. 17, lots 6, 7 E½NE¼SW¼, N½SE¼ SW¼, W½NE¼NW¼SE¼, NW¼NW¼ SE¼, SW¼SE¼.

The areas described aggregated 524.74 acres in La Paz, Maricopa and Yuma Counties.

2. Subject to valid existing rights, the provisions of existing withdrawals, and the requirements of applicable law, the lands described in paragraph 1 were opened to the operation of the public land laws including the mining laws (Ch. 2, Title 30 U.S.C.) on August 27, 1983.

Appropriation of lands under the general mining laws between Augut 27, 1981 and August 26, 1983 was unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38, vested no rights against the United States. Acts required to establish a location and to initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determination in local courts.

3. The lands have been and will continue to be open to applications and offers under the mineral leasing laws.

4. Inquiries concerning the lands should be addressed to the Bureau of Land Management, Department of the Interior, 2400 Valley Bank Center, Phoenix, Arizona 85073, (602–261–4774).

Mario L. Lopez,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310–32–M

Coeur d'Alene District Office, Cottonwood Resource Area, Idaho; Camping Restriction Order

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given in accordance with Title 43, Code of Federal Regulations, 8364.1, that the following act is prohibited on all lands administered by the Bureau of Land Management, Cottonwood Resource Area:

Camping for a period longer than fourteen (14) consecutive days at one location or within one mile of that location unless expressly authorized by permit.

This restriction is effective immediately, and will remain in effect until revoked or rescinded.

This restriction does not apply to any Federal, State or local officer, or any member of an organized rescue or fire-fighting force in the performance of an official duty.

This restriction is necessary to:

(a) preclude any individual or group from camping at one location for a long period, thereby denying others an opportunity to also use the location for recreational purposes.

(b) protect the lands from the effects of long-term camping.

(c) prevent unauthorized non-recreational occupancy of the public lands from occurring under the guise of recreation.

Signed at Coeur d'Alene, Idaho, this 16th day of March 1984.

Wayne Zinne,

District Manager.

[FR Doc. 84–7751 Filed 3–21–84; 8:45 am]

BILLING CODE 4310–GG–M

Idaho; Cancellation of Survey

1. Survey of Omitted Lands, Lots 14 and 15 only, Section 1, T. 7N., R. 40 E., approved July 30, 1970, has been cancelled effective January 17, 1984.

2. Subsequent to the survey, the United States Court of the District of Idaho, in Amended Judgment, Civil No. 1–76–125, dated November 22, 1984, quieted title to portions of Lots 14 and 15 in favor of the owners as listed in the judgment. It is the intention of the Bureau of Land Management to issue a disclaimer of ownership in all of the area shown to be Lots 14 and 15.

Sharron Deroin,

Chief, Land Services Section.

BILLING CODE 4310–GG–M

[A–18971]

Public Lands Exchange; Mohave County, Arizona

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Realty Action—Exchange, Public Lands in Mohave County, Arizona.

SUMMARY: The following described lands have been determined to be suitable for disposal by exchange under Section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Gila and Salt River Meridian, Arizona

T. 25 N., R. 19 W.,
Sec. 10, S½NW¼SW¼ and SW¼SW¼.
Containing 60 acres, more or less.

In exchange for these lands, the United States will acquire the following described land from Thomas R. Reingruber of Las Vegas, Nevada.

Gila and Salt River Meridian, Arizona

T. 18 N., R. 16 W.,
Sec. 11, SW¼SW¼NW¼ and W½SE¼SW¼NW¼;
Sec. 15, N½NE¼,E½SE¼NW¼, SW¼SE¼NW¼,E½NE¼SW¼,and E½NW¼SW¼;
Sec. 17, E½NE¼SE¼.
Containing 185 acres, more or less.

The purpose of the exchange is to acquire the non-federal land that contains highly diversified wildlife habitat on the southwest slope of Wabayuma Peak, south of Kingman, Arizona. The exchange is consistent with the Bureau's land use plans and the public interest will be well served.

The above lands will be subject to an appraisal to determine the value of the lands to be exchanged. The listed lands may change to reflect equal value following the completion of the appraisal.

Lands to be transferred from the United States will be subject to the following reservations:

1. A right-of-way for ditches and canals constructed by the authority of the United States, pursuant to the Act of August 30, 1890 (26 Stat. 391: U.S.C. 945).

2. All minerals in the subject are reserved to the United States.

3. Subject to an easement to Mohave County for Pierce Ferry Road as approved by the County Board of Supervisors by Resolution No. 476, Recorded in Book 132 of Dockets, Pages 425–428 on October 24, 1968.

4. Subject to an easement to Mohave County for 7th Street as approved by the County Board of Supervisors by Resolution No. 984, Recorded in Book 266 of Official Records, Pages 98–99, on March 27, 1975.

5. Subject to an easement to Mohave County for Edgemont Drive as approved by the County Board of Supervisors by Resolution No. 947, Recorded in Book 380 of Official Records, Page 874, on March 9, 1977.

6. Reserving such rights for powerline right-of-way A–18556 as provided under the authority of the Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761).

7. Reserving such rights for telephone right-of-way A–11587 as provided under the authority of the Act of October 21, 1976 (90 Stat. 2776; 43 U.S.C. 1761).

Private lands to be acquired by the United States will be subject to the following reservations, terms and conditions:

1. All minerals in the subject are reserved to the Santa Fe Pacific Railroad Company as set forth in Book 78 of Deeds, page 348, Mohave County, Arizona.

Publication of this Notice will segregate the subject lands from all appropriations under the public land laws, including the mining laws, but not the mineral leasing laws. This segregation will terminate upon the issuance of a patent or two years from the date of this Notice, or upon publication of a Notice of Termination.

Detailed information concerning this exchange can be obtained from the Kingman Resource Area Office, 2475 Beverly Avenue, Kingman, Arizona 86401. For a period of forty-five (45) days from the date of this Notice, interested parties may submit comments to the District Manager, Phoenix District Office, 2015 West Deer Valley Road, Phoenix, Arizona 85027. Any adverse comments will be evaluated by the District Manager who may vacate or modify this Realty Action, and issue a final determination. In the absence of any action by the District Manager, this Realty Action will become the final determination of the Department of the Interior.

Dated: March 16, 1984.

Marlyn V. Jones,

District Manager.

BILLING CODE 4310–33–M

[W–87166]

Realty Action; Noncompetitive Sale of Public Lands in Sweetwater County, Wyoming¼

AGENCY: Bureau of Land Management, Interior.

ACTION: Under Section 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716), public land described as the N½NE¼NW¼SE¼, Section 34, T. 18 N., R 107 W., 6th P.M., Wyoming, containing 5.0 acres, is proposed for direct sale to Western Wyoming College at the fair market value of $20,000.00.

SUMMARY: The purpose of this sale is to provide land for construction of a new college facility in Green River, Wyoming. The land proposed for sale is presently leased to Western Wyoming College under authority of the Recreation and Public Purposes Act; however, because of area drainage problems, the College has been forced to redesign their proposed facilities in such a manner that buildings will straddle federal/private property lines thereby making a lease situation inappropriate. The Recreation and Public Purposes classification and lease would be terminated at the time of sale. The sale is consistent with Bureau and local government plans for the area. The public interest will be well served by offering these lands for direct sale to Western Wyoming College.

DATES: Interested parties may submit comments for a period of 45 days from the date of this notice. The proposed sale will not be held until 60 days after publication of this notice.

ADDRESS: Detailed information concerning the sale is available for review at: Salt Wells Resource Area Office, 79 Winston Drive, Gateway Building, P.O. Box 1170, Rock Springs, Wyoming 82902–1170, (307) 362–7350.

Comments should also be directed to this address.

SUPPLEMENTARY INFORMATION: The terms and conditions applicable to the sale are as follows:

1. All minerals in the lands will be reserved to the United States in

accordance with Section 209(a) of the Federal Land Policy and Management Act of 1976.

2. Right-of-way for ditches and canals will be reserved to the United States under 43 U.S.C. 945.

3. Patent will be issued subject to all valid existing rights and reservations of record.

All comments received will be evaluated by the District Manager who may vacate or modify this realty action. In the absence of any action by the District Manager, this realty action will be the final determination of the Department of the Interior.

Gene C. Herrin,

Associate District Manager.

Canon City District Grazing Advisory Board; Public Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Grazing Advisory Board Public Meeting.

SUMMARY: Pursuant to the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of a meeting of the Canon City District Grazing Advisory Board to be held at 10:00 a.m., Thursday, May 3, 1984 in the Community Room in the lower level of the First National Bank Building at 831 Royal Gorge Boulevard in Canon City, Colorado.

Agenda of this meeting will include; (1) election of officers, (2) expenditure of range betterment funds, (3) proposals for expenditure of range improvement funds for fiscal year 1985, (4) review of proposed Cooperative Management Agreements in the Canon City District, (5) update on current issues dealing with grazing management programs in the district. A field trip is to be held on Friday, May 4th to visit proposed Cooperative Management allotments in the Royal Gorge Resource Area, weather and accessibility permitting.

The meeting will be open to the public. Facilities and space to accommodate members of the public are limited and persons will be accommodated on a first come, first served basis. Any member of the public may file with the Board a written statement concerning matters to be discussed. A portion of the meeting time will be set aside on Thursday, May 3rd at 2:00 p.m. to hear members of the public.

Minutes of the meeting will be made available for public inspection 30 days after the meeting.

FOR FURTHER INFORMATION CONTACT: Donnie Sparks, District Manager, Bureau of Land Management, 3080 East Main Street, Canon City, Colorado 81212, (303) 275-0631.

Public Land Sale; Idaho

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Realty Action, I-19698, I-19699, I-19715, I-19716 and I-20348, Bear Lake and Caribou Counties.

SUMMARY: The following described land has been examined, and through the development of land use decisions based on public input, it has been determined that the sale of these tracts is consistent with Section 203(a) of the Federal Land Policy and Management Act of 1976. The land will be offered for sale for no less than the appraised fair market value. these parcels will be offered using competitive procedures. Only sealed bids will be accepted.

I-19698 T. 12 S., R. 43 E., Boise Meridian
Sec. 10: SW¼SE¼
I-19699 T. 13 S., R. 44 E., Boise Meridian
Sec. 18: SW¼SE¼
I-19715 T. 8 S., R. 39 E., Boise Meridian
Sec. 19: Lot 1
I-19716 T. 8 S., R. 43 E., Boise Meridian
Sec. 35: NW¼NW¼
I-20348 T. 13 S., R. 44 E., Boise Meridian
Sec. 34: SW¼SE¼
The above aggregates 180.95 acres.

The appraisals will be available at the Pocatello Resource Area Headquarters, after May 8, 1984.

Upon publication of this Notice in the **Federal Register**, the land described above will be segregated from all forms of appropriation under the public land laws, including the mining laws, but excepting the mineral leasing laws, for a period of two years, or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two-year period.

These parcels will be sold under the Government Land Office Cadastral Surveys as follows: 1876 (I-19698); 1888 (I-19699 and I-20348); 1874 (I-19715); and 1902 (I-19716).

The lands will be subject to the following reservations and conditions when patented:

1. Right-of-way reservation to the United States for ditches and canals (43 U.S.C. 945).

2. All leasable minerals, including oil and gas (43 U.S.C. 1719).

3. All existing rights as identified on the Master Title Plat on the date of publication of the Notice of Realty Action.

4. *I-19699 only*: The successful bidder agrees that the real estate is taken, subject to the grazing use occurring within grazing allotment No. 4290 by Evan Pope. The privilege to graze domestic livestock on the real estate according to the terms and conditions of grazing lease No. 3790 dated April 9, 1979, shall cease on February 28, 1989. The level of use allowed on the real estate under the above grazing lease will not exceed 5 animal unit months annually. The successful bidder is entitled to receive annual grazing fees from Evan Pope in an amount not to exceed that which would be authorized under the Federal grazing fee published annually in the **Federal Register**. If, at any time prior to the expiration date listed above, the lessee sells or leases to another person, this condition of patent is null and void.

5. a. *I-19699 only*: Pursuant to the authority contained in Sec. 4 of E.O. 11990 of May 24, 1977 and the Federal Land Policy and Management Act of 1976, Sec. 203(a), this patent is subject to a restriction which constitutes a covenant running with the land that the portion of the land lying within T. 13 S., R. 44 E., B.M. Sec. 18: SW¼SE¼ containing wetland-riparian habitat must be managed to protect and maintain the wetland/riparian habitat on a continuous basis.

b. *I-19716 only*: Pursuant to the authority contained in Sec. 4 of E.O. 11990 of May 24, 1977 and the Federal Land Policy and Management Act of 1976, Sec. 203(a), this patent is subject to a restriction which constitutes a covenant running with the land that the portion of the land lying within T. 8 S., R. 43 E., B.M., Sec. 35: NW¼NW¼ containing wetland/riparian habitat must be managed to protect and maintain the wetland/riparian habitat on a continuous basis.

c. *I-20348 only:* Pursuant to the authority contained in Sec. 4 of E.O. 11990 of May 24, 1977 and the Federal Land Policy and Management Act of 1976, Sec. 203(a), this patent is subject to a restriction which constitutes a covenant running with the land that the portion of the land lying within T. 13 S., R. 44 E., B.M., Sec. 34: SW¼SW¼ containing wetland/riparian habitat must be managed to protect and maintain the wetland/riparian habitat on a continuous basis.

6. Acceptable bids will also constitute an application for non-leasable minerals. The declared high bidder will be required to deposit a $50 non-returnable filing fee (43 CFR 2720.1–2(c)) and one-fifth of the full bid price (43 CFR 2711.3–1(d)), immediately at the sale. Failure to deposit these sums will result in disqualification as the high bidder. The Authorized Officer shall then determine whether to accept the next highest bid, withdraw the public lands from the market, or reoffer them for sale at a later date. The Bureau has determined that the mineral interests being offered have no known mineral value.

Dates and Addresses: Bids received for parcels I–19698, I–19699 and I–20348 will be opened June 5, 1984 at 10:30 a.m. at the Sheriffs Bldg. Meeting Room, 50 N. Main, Paris, Idaho.

Bids received for parcels I–19715 and I–19716 will be opened June 5, 1984, at 2 p.m. at the Caribou Courthouse Meeting Room, 159 S. Main, Soda Springs, Idaho.

If no bids are received by this date, additional bids will be accepted until, and opened on, June 26, 1984 at 11 a.m. at the Idaho Falls District BLM, 940 Lincoln Rd., Idaho Falls, Idaho.

Additional information concerning this parcel, terms and conditions of the sale, and bidding instructions may be obtained from Wallace Evans, Area Manager, at the Pocatello Resource Area Office, 250 South 4th Ave., Pocatello, ID 83201, or by calling 236–6860 during office hours.

SUPPLEMENTARY INFORMATION: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager 940 Lincoln Rd., Idaho Falls, Idaho 83401 regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: O'dell A. Frandsen, District Manager.

Dated: March 14, 1984.

O'dell A. Frandsen,

District Manager.

BILLING CODE 4310–GG–M

Public Land Sale; Idaho

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Realty Action, I–19712, Caribou Co.

SUMMARY: The following described land has been examined, and through the development of land use decisions based on public input, it has been determined that the sale of this tract is consistent with Section 203(a) of the Federal Land Policy and Management Act of 1976. The lands will be offered for sale for no less than the appraised fair market value. This parcel will be offered using direct sale procedures to Rich Livestock Company based on historic use and ownership of all lands bordering this parcel. Failure of Rich Livestock Company to submit the required amount by June 5, 1984, will result in cancellation of the sale to them.

T. 5 S., R. 40 E., Boise Meridian
Section 9: NE¼NE¼
The above aggregates 40 acres.

The appraisal will be available at the Pocatello Resource Area Headquarters, after May 6, 1984.

Upon publication of this Notice in the **Federal Register**, the land described above will be segregated from all forms of appropriation under the public land laws, including the mining laws, but excepting the mineral leasing laws, for a period of two years, or until the lands are sold. The segregative effect may otherwise be terminated by the Authorized Officer by publication of a termination notice in the **Federal Register** prior to the expiration of the two-year period.

This parcel will be sold and is described, under the Government Land Office Cadastral Survey of 1876.

The lands will be subject to the following reservations and conditions when patented:

1. Right-of-way reservation to the United States for ditches and canals (43 U.S.C. 945).

2. All leasable minerals, including oil and gas (43 U.S.C. 1719).

3. All existing rights as identified on the Master Title Plat on the date of publication of the Notice of Realty Action.

4. The successful bidder agrees that the real estate is taken, subject to the grazing use occurring within grazing allotment No. 4320 by Rich Livestock Company. The privilege to graze domestic livestock on the real estate according to the terms and conditions of grazing lease No. 3820 dated January 28, 1982, shall cease on February 28, 1992. The level of use allowed on the real estate under the above grazing lease will not exceed 4 animal unit months annually. The successful bidder is entitled to receive annual grazing fees from Rich Livestock Company in an amount not to exceed that which would be authorized under the Federal grazing fee published annually in the **Federal Register**. If, at any time prior to the expiration date listed above, the lessee sells or leases to another person, this condition of patent is null and void.

5. An acceptable bid will also constitute an application for non-leasable minerals. Rich Livestock Company will be required to deposit a $50 non-returnable filing fee (43 CFR 2720.1–2(c)) and one-fifth of the full bid price (43 CFR 2711.3–1(d)), prior to June 5, 1984. Failure to deposit these sums will result in disqualification. The Authorized Officer shall then determine whether to withdraw the public lands from the market, or reoffer them for sale at a later date. The Bureau has determined that the mineral interests being offered have no known mineral value.

Additional information concerning this parcel, terms and conditions of the sale, and bidding instructions may be obtained from Wallace Evans, Area Manager, Pocatello Resource Area Office, 250 South 4th Ave., Pocatello, ID 83201, or by calling 236–6860 during office hours.

Supplementary Information: For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, 940 Lincoln Road, Idaho Falls, Idaho 83401, regarding the proposed action. Any adverse comments will be evaluated by the District Manager who may vacate or modify this realty action and issue a final determination. In the absence of any action by the District Manager, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: O'dell A. Frandsen, District Manager.

Dated: March 14, 1984.

Realty Action; Sale of Public Lands in Beaver County, Utah U–52851

AGENCY: Bureau of Land Management, Interior.

ACTION: Under Section 203 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716) public land described as S½N½, N½S½ sec. 3, and NE¼SE¼, SE¼NW¼, sec. 4, T. 27 S., R. 14 W., SLB&M, Utah containing 400 acres, is proposed for direct sale to Wintch Livestock Company at the fair market value of $30,000.

SUMMARY: The purpose of the sale is to settle an unintentional occupancy trespass and to dispose of public land that is difficult and uneconomical to manage by a government agency.

ADDRESS: Detailed information concerning the sale is available for review at the Beaver River Resource Area Office, 444 South Main, Cedar City, Utah 84720 (telephone (801) 586–2458). Comments should also be sent to the same address.

SUPPLEMENTARY INFORMATION: The terms and conditions applicable to the sale are:

1. There is reserved to the United States a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 495).

2. The sale will be for surface estate only. Minerals will remain with the United States Government.

3. Title transfer will be subject to valid existing rights.

Any comments received during the comment period will be evaluated and the District Manager may vacate or modify this realty action. In the absence of any action by the District Manager, this realty action notice will be the final determination of the Department of the Interior.

Dated: March 14, 1984.

J. Kent Giles,

Acting District Manager.

Bureau of Reclamation

Gallup-Navajo Indian Water Supply Project, New Mexico-Arizona-Utah; Public Hearings on Planning Report/Draft Environmental Statement and on Executive Orders 11988 (Floodplain Management) and 11990 (Protection of Wetlands)

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Department of the Interior, Bureau of Reclamation, has prepared a planning-report/draft environmental statement for the Gallup-Navajo Indian Water Supply Project. This document (DES 84–3) was filed with the Environmental Protection Agency and made available to the public on January 24, 1984.

Public hearings will be held as follows: 7 p.m. April 23, 1984, in Gallup, New Mexico, at City Hall, City Council Chambers, 2nd and Aztec Streets; 10 a.m. April 24, 1984, in Window Rock Arizona, at Window Rock Civic Center; 10 a.m. April 25, 1984, in Crownpoint, New Mexico, at the Crownpoint Chapter House; 10 a.m. April 26, 1984, in Shiprock, New Mexico, at Navajo Community College, South Campus Conference Room; and 7 p.m. April 26, 1984, in Farmington, New Mexico, at City Hall, City Council Chambers, 800 Municipal Drive.

The purposes of these hearings are: (1) To receive views and comments from interested organizations and individuals relating to the environmental impacts of the project and (2) to provide the public with information on the effect this project will have on wetlands (Executive Order 11990) and flood plains (Executive Order 11988). The hearings will give the public an opportunity to participate in the decisionmaking process.

Oral statements at the hearing will be limited to 10 minutes. Speakers will not trade their time to obtain a longer oral presentation; however, the hearings officer may allow any speaker to provide additional oral comments after all persons wishing to comment have been heard. Speakers will be scheduled according to the time preference mentioned in their letter or telephone request whenever possible; and any scheduled speaker not present when called will lose his/her privilege in the scheduled order, and his/her name will be recalled at the end of the scheduled speakers. Requests for scheduled presentations will be accepted through April 18, 1984, and any subsequent requests will be handled on a first-come-first-served basis following the scheduled presentation.

Organizations or individuals desiring to present statements at the hearing should contact the Bureau of Reclamation, 714 South Tyler Street, Suite 201, Amarillo, Texas 79101, telephone (806) 378–5474 or (806) 378–5467, and announce their intention to participate. Written comments from those unable to attend and from those wishing to supplement their oral presentation at the hearing should be received by May 1, 1984, for inclusion in the hearing record.

Dated: March 16, 1984.

Robert A. Olson,

Acting Commissioner.

BILLING CODE 4310–09–M

Fish and Wildlife Service

Intent To Prepare an Environmental Impact Statement; Comprehensive Conservation Plan for the Koyukuk National Wildlife Refuge

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: This notice advises the public that the Fish and Wildlife Service intends to prepare an Environmental Impact Statement (EIS) and a comprehensive conservation plan and wilderness suitability assessment for the Koyukuk National Wildlife Refuge in Alaska. This notice is being furnished as required by National Environmental

Policy Act regulations to obtain suggestions and information from other agencies and the public on the scope of issues to be addressed in the EIS. Public meetings will also be held to solicit comments and participation in this scoping process.

DATES: Written comments should be received by June 10, 1984. Public meetings regarding the Koyukuk National Wildlife Refuge plan, assessment, and EIS will be held at:

Galena—Galena Community Hall, 7:30 p.m., April 27, 1984;

Anchorage—Central Junior High School Multi-purpose Room, 15th Avenue and E Street, 7:30 p.m., May 8, 1984;

Fairbanks—Noel Wien Public Library Auditorium, 1215 Cowles Street, 7:30 p.m., May 10, 1984.

In addition, public meetings will be held at Hughes, Huslia, Koyukuk, Kaltag and Nulato during the period April 23–May 3, 1984, weather permitting.

ADDRESSES: Comments should be addressed to: Regional Director, U.S. Fish and Wildlife Service; 1011 E. Tudor Road; Anchorage, Alaska 99503. Attention: Mike Evans.

FOR FURTHER INFORMATION CONTACT: Mike Evans, Public Affairs Specialist, Refuge Planning, U.S. Fish and Wildlife Service, 1011 E. Tudor Road, Anchorage, Alaska 99503.

SUPPLEMENTARY INFORMATION: This comprehensive conservation plan and wilderness suitability assessment is being prepared to fulfill requirements of the Alaska National Interest Lands Conservation Act of 1980, section 304(g). The environmental review of the project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, as amended (42 U.S.C. 4371 et seq.), Council on Environmental Quality regulations (40 CFR Parts 1500–1508), other appropriate Federal regulations, and Service procedures for compliance with those regulations. We estimate the Draft Environmental Impact Statement, plan, and assessment will be made available to the public by December 1985.

Dated: March 12, 1984.

Jan E. Riffe,

Acting Regional Director.

Geological Survey

Map Separates and Composites; Price Change

Notice is hereby given that effective April 1, 1984, the price of map separates and composites made by the Geological Survey will be increased. (Map separates and composites are photographic reproductions of map features.) The price increase is necessary to recover the costs of reproduction and distribution. The last price change was in September 1981.

New prices will be as follows:

STANDARD MAP SEPARATES AND COMPOSITES

	Price
7.5- and 15-Minute Maps:	
Single Feature Group	$3.50
2 Feature Group Composite	4.5
3 Feature Group Composite	5.4
Planimetric Composite	6.3
Topographic Composite	7.2
Topographic-Bathymetric Composite	10.0
1:250,000-Scale Maps:	
Single Feature Group	4.0
2 Feature Group Composite	4.9
3 Feature Group Composite	5.8
Planimetric Composite	6.7
Topographic Composite	7.6
Complete Composite	8.5
Topographic-Bathymetric Composite	11.2
1:100,000-Scale and 7.5- x 15-Minute 1:25,000-Scale Maps	
Single Feature Group	4.8
2 Feature Group Composite	5.5
3 Feature Group Composite	6.4

STANDARD MAP SEPARATES AND COMPOSITES—Continued

	Price
4 Feature Group Composite	7.3
Planimetric Composite	7.8
Togographic Composite	8.2
Complete Composite	8.6
Topographic-Bathymetric Composite	11.6

Available feature groups, as shown on the printed map:

Black—Includes grid and projection, lettering, and culture

Blue—Includes rivers, streams, and water tint

Purple—Includes all new map features determined from aerial photograph

Red—Includes road classification, fence lines, and land office lines in applicable States

Brown—Includes contours and contour numbers

Green—Includes woodland and orchards

Bathymetry—Underwater contours in offshore areas by National Ocean Service

BILLING CODE 4310–31–M

Minerals Management Service

Development Operations Coordination Document; ODECO Oil and Gas Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a Proposed Development Operations Coordination Document (DOCD).

SUMMARY: Notice is hereby given that ODECO Oil and Gas Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 3164, Block 135, Ship Shoal Area, offshore Louisiana. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from onshore bases located at Dulac and Houma, Louisiana.

DATE: The subject DOCD was deemed submitted on March 14, 1984.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Manager, Gulf of Mexico Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Mr. Mike Joseph, Minerals Management Service, Gulf of Mexico Region; Rules and Production; Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Phone (504) 838–0867.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public, pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCD's available to affected states, executives of affected local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: March 14, 1984.

John L. Rankin,

Regional Manager, Gulf of Mexico Region.

National Park Service

Western Regional Advisory Committee; Meetings

Notice is hereby given in accordance with the Federal Advisory Committee Act that the second meeting of the Western Regional Advisory Committee will be held from 9:00 a.m. to 5:00 p.m. on Friday, March 30, 1984 and from 9:00 a.m. to noon on Saturday, March 31, at Grand Canyon National Park Headquarters, Grand Canyon, Arizona.

The Western Regional Advisory Committee was established to provide for closer communication with the public on programs, policies, and other matters relating to the Western Region of the National Park Service.

Members of the Committee are:

Mr. Lewis Eaton, chairman, of California
Ms. Kathleen Caldwell of California
Mr. Roger Ernst of Arizona
Mrs. Barbara Morrow Julian of California
Mr. William Lowenberg of California

The agenda will include briefings on the termination of grazing rights, aircraft monitoring and a proposal for train service to the Grand Canyon.

The meeting is open to the public. Any members of the public may file with the Committee a written statement concerning the matter to be discussed.

Persons wishing to receive further information on this meeting or who wish to submit written statements may contact the Office of Public Affairs, National Park Service, 450 Golden Gate Avenue, Box 36063, San Francisco, California 94102, telephone (415) 556–5560.

Dated: March 14, 1984.

John Cherry,

Acting Regional Director, Western Region.

BILLING CODE 4310–70–M

Cape Cod National Seashore Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92–463, 86 Stat. 770 (5 U.S.C. App. 1 section 10), that a meeting of the Cape Cod National Seashore Advisory Commission will be held on Friday, April 13, 1984.

The Commission was established pursuant to Pub. L. 91–383 to meet and consult with the Secretary of the Interior on general policies and specific matters relating to the development of Cape Cod National Seashore.

At the 1:30 p.m. meeting the Commission will consider the following:

1. Provincetown Water Supply.
2. Dune Stabilization.
3. Concurrent Jurisdiction.

The meeting is open to the public. It is expected that 30 persons will be able to

attend the session in addition to the Commission members.

Interested persons may make oral/written presentations to the Commission or file written statements. Such requests should be made to the official listed below at least seven days prior to the meeting.

Further information concerning this meeting may be obtained from Herbert Olsen, Superintendent, Cape Cod National Seashore, South Wellfleet, MA 02663, telephone (617) 349–3785. Minutes of the meeting will be available for public information and copying two weeks after the meeting at the Office of the Superintendent, Cape Cod National Seashore, South Wellfleet, Massachusetts.

Herbert Olsen,

Superintendent, Cape Cod National Seashore.

March 16, 1984.

BILLING CODE 4310–70–M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–159]

Certain Poultry Cut Up Machines; Receipt of Initial Determination Terminating Respondents on the Basis of Consent Order Agreement

AGENCY: International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondents on the basis of a consent order agreement: Jacobus Eliza Hazenbroek, Systemate B.V., Systemate International Limited, and Numafa B.V.

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on March 16, 1984.

Copies of the initial determination, the consent order agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, telephone 202–523–0161.

Written Comments: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondents. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street, NW., Washington, D.C. 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202–523–0176.

By order of the Commission.

Issued: March 16, 1984.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020–02–M

INTERSTATE COMMERCE COMMISSION

Motor Carriers; Finance applications

The following applications seek approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control of motor carriers pursuant to 49 U.S.C. 11343 or 11344. Also, applications directly related to these motor finance applications (such as conversions, gateway eliminations, and securities issuances) may be involved.

The applications are governed by 49 CFR 1182.1 of the Commission's Rules of Practice. See Ex Parte 55 (Sub-No. 44), *Rules Governing Applications Filed By Motor Carriers Under 49 U.S.C. 11344 and 11349*, 363 I.C.C. 740 (1981). These rules provide among other things, that opposition to the granting of an application must be filed with the Commission in the form of verified statements within 45 days after the date of notice of filing of the application is published in the **Federal Register**. Failure seasonably to oppose will be construed as a waiver of opposition and participation in the proceeding. If the protest includes a request for oral hearing, the request shall meet the requirements of Rule 242 of the special rules and shall include the certification required.

Persons wishing to oppose an application must follow the rules under 49 CFR 1182.2. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00, in accordance with 49 CFR 1182.2(d).

Amendments to the request for authority will not be accepted after the date of this publication. However, the Commission may modify the operating authority involved in the application to conform to the Commission's policy of simplifying grants of operating authority.

We find, with the exception of those applications involving impediments (e.g., jurisdictional problems, unresolved fitness questions, questions involving possible unlawful control, or improper divisions of operating rights) that each applicant has demonstrated, in accordance with the applicable provisions of 49 U.S.C. 11301, 11302, 11343, 11344, and 11349, and with the Commission's rules and regulations, that the proposed transaction should be authorized as stated below. Except where specifically noted this decision is neither a major Federal action significantly affecting the quality of the human environment nor does it appear to qualify as a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests as to the finance application *or* to any application directly related thereto filed within 45 days of publication (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (unless the application involves impediments) upon compliance with certain requirements which will be set forth in a notification of effectiveness of this decision-notice.

Applicant(s) must comply with all conditions set forth in the grant or grants of authority within the time period specified in the notice of effectiveness of this decision-notice, or the application of a non-complying applicant shall stand denied.

James H. Bayne,

Acting Secretary.

Note.—Please direct status inquires to Team 1, (202) 275–7992.

Please direct status inquires to Team 1, (202) 275–7992.

Volume No. OP1–159

Decided: March 13, 1984.

By the Commission, Review Board Members Parker, Joyce, and Fortier.

MC–F–15630, filed February 10, 1984. DeCamp Bus Lines (101 Greenwood Ave., Montclair, NJ 07042)—Continuance in Control—DeCamp Bus Tours, Inc., and DeCamp Transit, Inc. (both of 101 Greenwood Ave., Montclair, NJ 07042) Representative: Edward F. Bowes, 7 Becker Farm Road, P.O. Box Y, Roseland, NJ 07068. DeCamp Bus (No. MC–109312), and in turn, Robert B. DeCamp, Sr., Lois E. DeCamp, Robert B. DeCamp, Jr., and Suzanne C. DeCamp, who control DeCamp Bus through stock ownership and management, seek to continue in control of DeCamp Tours and DeCamp Transit, upon the institution by the latter of operations, in interstate or foreign commerce, as a motor common carrier.

DeCamp Bus controls DeCamp Tours, which holds Certificate No. MC–155100 (Sub-No. 1), authorizing the transportation of passengers over irregular routes, in charter and special operations, between points in the U.S.

Notes.—(1) DeCamp Transit has filed its initial, directly related, common carrier application in No. MC–170393, which was published in the ICC Register on October 4, 1983, for authority to transport passengers, over irregular routes, in charter and special operations, between points in the U.S. (except Hawaii). (2) As a condition to a grant of that authority, DeCamp was required to file this continuance in control application or submit an affidavit indicating why such approval is unnecessary. (3) A previously submitted affidavit was found to be insufficient and rejected.

DEPARTMENT OF JUSTICE

Information Collections Under Review

March 19, 1984.

OMB has been sent for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35) since the last list was published. The list has all the entries grouped into new forms, revisions, or extensions. Each entry contains the following information:

(1) The name and telephone number of the Agency Clearance Officer (from whom a copy of the form and supporting documents is available); (2) The office of the agency issuing this form; (3) The title of the form; (4) The agency form number, if applicable; (5) How often the form must be filled out; (6) Who will be required or asked to report; (7) An estimate of the number of responses; (8) An estimate of the total number of hours needed to fill out the form; (9) An indication of whether Section 3504(H) of Pub. L. 96–511 applies; (10) The name and telephone number of the person or office responsible for OMB review. Copies of the proposed forms and supporting documents may be obtained from the Agency Clearance Officer whose name and telephone number appear under the agency name. Comments and questions about the items on this list should be directed to the reviewer listed at the end of each entry and to the Agency Clearance Officer. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the reviewer and the Agency Clearance Officer of your intent as early as possible.

DOJ Recordkeeping Regulations Pursuant to the International Energy Program

Recordkeeping

Businesses or other for-profit

Section 252(e)(2) of the Energy Policy and Conservation Act (EPCA) requires the Attorney General, in consultation with the Federal Trade Commission and the Secretary of Energy, to promulgate rules concerning the maintenance of the necessary and appropriate records related to the development and carrying out of voluntary agreements and plans of action pursuant to the Agreement on an International Energy Program (IEP). The Department of Energy (DOE), in consultation with the Attorney General, the Federal Trade Commission and the Department of State, has already promulgated regulations concerning the rules, standards, procedures and recordkeeping required by EPCA to implement the provisions of the IEP (see 10 CFR Part 209). The DOE recordkeeping requirements, which were prepared after lengthy consultation with and approval by the Department of Justice, fully meet any and all needs of the Department to maintain the necessary and appropriate records under Section 252(e)(2) of EPCA. Accordingly, the Department of Justice proposes to formally adopt the DOE regulations as its own. *See* 10 CFR §§ 209.24, 209.34. Thus, no new reporting or recordkeeping burden will be created or imposed by the proposed regulation: 0 respondents, 0 hours, not applicable under 3504(h).

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Employment and Training Administration

Wagner-Peyser Act, as amended by Pub. L. 97–300; Program Year (PY) 1984 Final Allotments for State Employment Services Under the Wagner-Peyser Act, as Amended

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: This notice announces the final allotments for PY 1984 (July 1, 1984–June 30, 1985) for State Employment Services under the Wagner-Peyser Act, as amended.

FOR FURTHER INFORMATION CONTACT: Robert J. Litman, Acting Director, Office of Planning and Review, 601 D Street, N.W., Washington, D.C. 20213, telephone number (202) 376–6650.

SUPPLEMENTARY INFORMATION: Attached are the final allotments for PY 1984 (July 1, 1984–June 30, 1985) for State Employment Services under the Wagner-Peyser Act, as amended. The

allotments are based on the funds appropriated by Pub. L. 98–139, the statutory formula contained in the Act and the latest data available to the Secretary. These allotments will not be updated for subsequent unemployment data. The PY 1984 State public employment system appropriation totals $740,398,000. In accordance with the formula criteria in section 6 of the Wagner-Peyser Act as amended, $727,698,000 is being allotted to the States as displayed in Column 5. Nationally, $12,700,000 is being held back to finance the postage costs associated with conducting public employment service business.

The final allotments to the States are based on Calendar Year 1983 average civilian labor force and unemployment data. The relative share hold-harmless as provided for under section 6(b)(2) of the Act was from the transition period allotments published in the **Federal Register** on November 25, 1983. The Secretary is authorized under section 6(b)(4) of the Act to reserve 3 percent of the total availability. Under section 6(b)(4), $21,830,940, or 3 percent has been set aside; the distribution of these funds is included in these final allotments. Of this total $8,831,987 is allocated to the 12 States whose relative share decreased from transition period 1984 to the PY 1984 basic formula allotment and which have a civilian labor force (CLF) below 1 million and are below the median CLF density. These States are held harmless at 100 percent of their transition period 1984 relative share. The remaining $12,998,953 is distributed to the remaining 17 States losing in relative share from transition period 1984 to PY 1984 basic formula amount. Ten percent of each State's total allotment (Column 5,) is to be reserved for use according to the activities described under section 7(b) of the Act.

Further information regarding the allocation methodology is available upon request.

Signed at Washington, D.C. on March 16, 1984.

Patrick J. O'Keefe,

Deputy Assistant Secretary of Labor.

BILLING CODE 4510-30-M

Mine Safety and Health Administration

[Docket No. M-84-28-C]

Betty B. Coal Co., Inc.; Petition for Modification of Application of Mandatory Safety Standard

Betty B. Coal Company, Inc., Box 1139, Coeburn, Virginia 24230 has filed a petition to modify the application of 30 CFR 75.1303 (permissible blasting devices) to its No. 4 Mine (I.D. No. 44-02136) located in Dickenson County, Virginia. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the requirement that permissible blasting devices be used, that all explosives and blasting devices be used in a permissible manner, and that permissible explosives be fired only with permissible shot firing units.

2. As an alternate method, petitioner proposes to use the nonpermissible FEMCO Ten-Shot Blasting Unit. The unit will be used by an authorized person and will be used with well-insulated blasting cable with wires no smaller than No. 18 Brown and Sharp gauge.

3. The unit will be used with not more than:

a. Ten detonators with copper leg wires not over 30 feet long;

b. Ten detonators with iron leg wires 6 and 7 feet long;

c. Nine detonators with iron leg wires 8 and 9 feet long;

d. Eight detonators with iron leg wires 10 feet long;

e. Seven detonators with iron leg wires 12 feet long;

f. Six detonators with iron leg wires 14 feet long; and

g. Five detonators with iron leg wires 16 feet long.

4. In addition, the FEMCO Ten-Shot Blasting Unit will be used only:

a. With short-delay electric detonators with designated delay periods of 25 to 500 milliseconds;

b. If the lamp, which provides an indication of readiness, lights immediately upon insertion of the firing key and extinguishes immediately upon release of the key. This will be verified prior to connecting the unit to the blasting cable;

c. With a battery pack having an open circuit voltage of at least 120 volts when installed. The pack will be replaced at intervals not to exceed 6 months.

5. Petitioner will attach the manufacturer's label specifying conditons of use for the unit and will install the manufacturer's sealing device on the housing of the unit.

6. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 23, 1984. Copies of the petition are available for inspection at that address.

Dated: March 13, 1984.

Patricia W. Silvey,

Director, Office of Standards, Regulations and Variances.

BILLING CODE 4510-43-M

[Docket No. M-84-10-C]

Cannelton Industries, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Cannelton Industries, Inc., Cannelton, West Virginia 25036 has filed a petition to modify the application of 30 CFR 75.1303 (permissible blasting devices) to its No. 3 and 4 Mine (I.D. No. 46-01403) located in McDowell County, West Virginia, its No. 130 Mine (I.D. no. 46-06051) located in Kanawha County, West Virginia, and its No. 1 Mine (I.D. No. 467-01284) and its No. 4 Mine (I.D. No. 46-02061), both located in Boone County, West Virginia. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that permissible blasting devices be used, that all explosives and blasting devices be used in a permissible manner, and that permissible explosives be fired only with permissible shot firing units.

2. As an alternate method, petitioner proposes to use the nonpermissible FEMCO Ten-Shot Blasting Unit. The unit will be used by an authorized person and will be used with well-insulated blasting cable with wires no smaller than No. 18 Brown and Sharp gauge.

3. The unit will be used with no more than:

a. Ten detonators with copper leg wires not over 30 feet long;

b. Ten detonators with iron leg wires 6 and 7 feet long;

c. Nine detonators with iron leg wires 8 and 9 feet long;

e. Seven detonators with iron leg wires 12 feet long;

f. Six detonators with iron leg wires 14 feet long; and

g. Five detonators with iron leg wires 16 feet long.

4. In addition, the FEMCO Ten-Shot Blasting Unit will be used only;

a. With short-delay electric detonators with designated delay periods of 25 to 500 milliseconds;

b. If the lamp, which provides an indication of readiness, lights immediately upon insertion of the firing key and extinguishes immediately upon release of the key. This will be verified prior to connecting the unit to the blasting cable;

c. With a battery pack having an open circuit voltage of at least 120 volts when installed. The pack will be replaced at intervals not to exceed 6 months.

5. Petitioner will attach the manufacturer's label specifying conditions of use for the unit and will install the manufacturer's sealing device on the housing of the unit.

6. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

[Docket No. M-84-17-C]

Cantrell Mining Company, Inc.; Petition for Modification of Application of Mandatory Safety Standard

Cantrell Mining Company, Inc., Box 354, Pound, Virginia 24279 has filed a petition to modify the application of 30 CFR 75.1303 (permissible blasting devices) to its No. 1 Mine (I.D. No. 44-05703) located in Wise County, Virginia. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that permissible blasting devices be used, that all explosives and blasting devices be used in a permissible manner, and that permissible explosives be fired only with permissible shot firing units.

2. As an alternate method, petitioner proposes to use the nonpermissible FEMCO Ten-Shot Blasting Unit. The unit will be used by an authorized person and will be used with well-insulated blasting cable with wires no smaller than No. 18 Brown and Sharp gauge.

3. The unit will be used with not more than:

a. Ten detonators with copper leg wires not over 30 feet long;

b. Ten detonators with iron leg wires 6 and 7 feet long;

c. Nine detonators with iron leg wires 8 and 9 feet long;

d. Eight detonators with iron leg wires 10 feet long;

e. Seven detonators with iron leg wires 12 feet long;

f. Six detonators with iron leg wires 14 feet long; and

g. Five detonators with iron leg wires 16 feet long.

4. In addition, the FEMCO Ten-Shot Blasting Unit will be used only:

a. With short-delay electric detonators with designated delay periods of 25 to 500 milliseconds;

b. If the lamp, which provides an indication of readiness, lights immediately upon insertion of the firing key and extinguishes immediately upon release of the key. This will be verified prior to connecting the unit to the blasting cable;

c. With a battery pack having an open circuit voltage of at least 120 volts when installed. The pack will be replaced at intervals not to exceed 6 months.

5. Petitioner will attach the manufacturer's label specifying conditions of use for the unit and will install the manufacturer's sealing device on the housing of the unit.

6. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

BILLING CODE 4510-43-M

[Docket No. M-83-25-C]

Deep Mine Coal Co., Inc.; Petition for Modification of Application of Mandatory Safety Standard

Deep Mine Coal Co., Inc., R.D. #2, Box 102A, Shamokin, Pennsylvania 17872 has filed a petition to modify the application of 30 CFR 75.1714 (self-contained self-rescue devices) to its No. 2 Slope (I.D. No. 36-05738) located in Northumberland County, Pennsylvania. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that each operator make available to each person who goes underground a self-contained self-rescue device or devices approved by the Secretary which is adequate to protect such person for one hour or longer.

2. The distance from the mine portal to the actual working face is less than 1,500 feet; the mine can be evacuated in less than 15 minutes.

3. The mine is always wet and there are only two pieces of electrical equipment, which are submergible pumps; therefore, the possibility of a fire is remote. However, should a fire occur anywhere on the intake side of the mine, it would be discovered immediately because one miner is always on the gangway level loading and transporting coal. If a fire should occur in the return, the miners could escape out the slope in intake air.

4. Petitioner states that the devices are too heavy, bulky and cumbersome to be worn safely in the heavily pitching anthracite mine. Sections of the mine are subjected to freezing temperatures, making constant availability of the devices questionable. The wet mine conditions make it very difficult to locate a suitable, dry storage location for the devices. The miners are equipped with filter-type self-rescue devices.

5. For these reasons, petitioner requests a modification of the standard.

Eastern Associated Coal Corp.; Petition for Modification of Application of Mandatory Safety Standard

Eastern Associated Coal Corporation, One PPG Place, Pittsburgh, Pennsylvania 15222 has filed a petition to modify the application of 30 CFR 75.1303 (permissible blasting devices) to its Federal No. 1 Mine (I.D. No. 46-01429) and Joanne Mine (I.D. No. 46-01430), both located in Marion County, West Virginia; its Federal No. 2 Mine (I.D. No. 46-01456) located in Monongalia County, West Virginia; its Keystone No. 1 Mine (I.D. No. 46-01464) located in McDowell County, West Virginia; its Keystone No. 2 Mine (I.D. No. 46-01535), Kopperston No. 1 Mine (I.D. No. 46-01537), and Kopperston No. 2 Mine (I.D. No. 46-01536), all located in Wyoming County, West Virginia; its Keystone No. 4 Mine (I.D. No. 46-01498) and Keystone No. 5 Mine (I.D. No. 46-02067), both located in Raleigh County, West Virginia; its Harris No. 1 Mine (I.D. No. 46-01271), Harris No. 2 Mine (I.D. No. 46-01270), Wharton No. 11 Mine (I.D. No. 46-04500), Wharton No. 4 Mine (I.D. No. 46-01272), Lightfoot No. 1 Mine (I.D. 46-04332), and its Lightfoot No. 2 Mine (I.D. No. 46-04955), all located in Boone County, West Virginia. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that permissible blasting devices be used, that all explosives and blasting devices be used in a permissible manner, and that permissible explosives be fired only with permissible shot firing units.

2. As an alternate method, petitioner proposed to use the nonpermissible FEMCO Ten-Shot Blasting Unit. The unit will be used by an authorized person and will be used with well-insulated blasting cables with wires no smaller than No. 18 Brown and Sharp gauge.

3. The unit will be used with not more than:

a. Ten detonators with copper leg wires not over 30 feet long;

b. Ten detonators with iron leg wires 6 and 7 feet long;

c. Nine detonators with iron leg wires 8 and 9 feet long;

d. Eight detonators with iron leg wires 10 feet long;

e. Seven detonators with iron leg wires 12 feet long;

f. Six detonators with iron leg wires 14 feet long; and

g. Five detonators with iron leg wires 16 feet long.

4. In addition, the FEMCO Ten-Shot Blasting Unit will be used only:

a. With short-delay electric detonators with designated delay periods of 25 to 500 milliseconds;

b. If the lamp, which provides and indication of readiness, lights immediately upon insertion of the firing key and extinguishes immediately upon release of the key. This will be verified prior to connecting the unit to the blasting cable;

c. With a battery pack having an open circuit voltage of at least 120 volts when installed. The pack will be replaced at intervals not to exceed 6 months.

5. Petitioner will attach the manufacturer's label specifying conditions of use for the unit and will install the manufacturer's sealing device on the housing of the unit.

6. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

BILLING CODE 4510-43-M

[Docket No. M-83-47-C]

J. J. & G. Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

J. J. & G. Coal Company, 523 E. Market Street, Williamstown, Pennsylvania 17098 has filed a petition to modify the application of 30 FR 75.1714 (self-contained self-rescue devices) to its Whites Vein Slope (I.D. No. 36-06815) located in Dauphin County, Pennsylvania. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that each operator make available to each person who goes underground a self-contained self-rescue device or devices approved by the Secretary which is adequate to protect the person for one hour or longer.

2. The mine is wet and virtually dust free. The upper area of the mine was deep and strip mined, leaving ventilation to the surface by means of abandoned slopes, cracks, fissures, and strip pits. This creates a natural draft that wold sweep noxious fumes to the surface away from the miners.

3. Petitioner states that the mine geology, undulation, thin coal and varying pitches make it impossible to wear the devices while working. Sections of the mine are subjected to freezing temperatures, making constant availability of the devices questionable. In addition, the wet conditions of the mine make it difficult to locate a suitable dry storage location for the self-rescuers.

4. Petitioner proposes to continue using the present filter-type self-rescuers as an alternative to providing self-contained self-rescuers, and states that this will provide the same measure of protection for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All comments must be postmarked or received in that office on or before April 23, 1984. Copies of the petition are available for inspection at that address.

Dated: March 14, 1984.

BILLING CODE 4510-43-M

[Docket No. M-84-22-C]

Interstate Commercial Energy Corp.; Petition for Modification of Application of Mandatory Safety Standard

Interstate Commercial Energy Corporation, P.O. Box 538, Big Stone Gap, Virginia 24219 has filed a petition to modify the application of 30 CFR 75.1303 (permissible blasting devices) to its No. 1 Mine (I.D. No. 44-05600) located in Wise County, Virginia. The petition is

filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statements follows:

1. The petition concerns the requirement that permissible blasting devices be used, that all explosives and blasting devices be used in a permissible manner, and that permissible explosives be fired only with permissible shot firing units.

2. As an alternate method, petitioner proposes to use the nonpermissible FEMCO Ten-Shot Blasting Unit. The unit will be used by an authorized person and will be used with well-insulated blasting cables with wires no smaller than No. 18 Brown and Sharp gauge.

3. The unit will be used with not more than:

a. Ten detonators with copper leg wires not over 30 feet long;

b. Ten detonators with iron leg wires 6 and 7 feet long;

c. Nine detonators with iron leg wires 8 and 9 feet long;

d. Eight detonators with iron leg wires 10 feet long;

e. Seven detonators with iron leg wires 12 feet long;

f. Six detonators with iron leg wires 14 feet long; and

g. Five detonators with iron leg wires 16 feet long.

4. In addition, the FEMCO Ten-Shot Blasting Unit will be used only:

a. With short-delay electric detonators with designated delay periods of 25 to 500 milliseconds;

b. If the lamp, which provides an indication of readiness, lights immediately upon insertion of the firing key and extinguishes immediately upon release of the key. This will be verified prior to connecting the unit to the blasting cable;

c. With a battery pack having an open circuit voltage of at least 120 volts when installed. The pack will be replaced at intervals not to exceed 6 months.

5. Petitioner will attach the manufacturer's label specifying conditions of use for the unit and will install the manufacturer's sealing device on the housing of the unit.

6. Petitioner states that the proposed alternate method will provide the same degree of safety for the miners affected as that afforded by the standard.

Request for Comments

Persons interested in this petition may furnish written comments. These comments must be filed with the Office of Standards, Regulations and Variances, Mine Safety and Health Administration, Room 627, 4015 Wilson Boulevard, Arlington, Virginia 22203. All Comments must be postmarked or received in that office on or before April 23, 1984. Copies of the petition are available for inspection at that address.

BILLING CODE 4510-43-M

[Docket No. M-82-95-C]

K. M. & K. Coal Co.; Petition for Modification of Application of Mandatory Safety Standard

K. M. & K. Coal Company, Box 40, Spring Glen, Pennsylvania 17978 has filed a petition to modify the application of 30 CFR 75.1714 (self-contained self-rescue devices) to its D and R Slope (I.D. No. 36-01821) located in Schuylkill County, Pennsylvania and its No. 14 Vein Slope (I.D. No. 36-07244) located in Northumberland County, Pennsylvania. The petition is filed under Section 101(c) of the Federal Mine Safety and Health Act of 1977.

A summary of the petitioner's statement follows:

1. The petition concerns the requirement that each operator make available to each person who goes underground a self-contained self-rescue device or devices approved by the Secretary which is adequate to protect such person for one hour or longer.

2. The distance from the mine portal to the actual working face is less than 2,000 feet; the mine can be evacuated in less than 15 minutes.

3. The mine is always damp to wet and there is only one piece of electrical equipment, which is a small pump located at the foot of the slope; therefore, the possibility of a fire is remote. However, should a fire occur anywhere on the intake side of the mine, it would be discovered immediately because one miner is always on the gangway level loading and transporting coal. If a fire should occur in the return, the miners could escape out the slope in intake air.

4. Petitioner states that the devices are too heavy, bulky and cumbersome to be worn safely in the heavily pitching anthracite mine. Sections of the mine are subjected to freezing temperatures, making constant availability of the devices questionable. The wet mine conditions make it very difficult to locate a suitable, dry storage location for the devices. The miners are equipped with filter-type self-rescue devices.

5. For these reasons, petitioner requests a modification of the standard.

BILLING CODE 4510-43-M

NATIONAL COMMISSION FOR EMPLOYMENT POLICY

Notice of Meeting

SUMMARY: Under the provisions of the Federal Advisory Committee Act (Pub. L. 92-463, as amended), notice is hereby given of the thirty-third meeting of the National Commission for Employment Policy in Washington, D.C. at the Hotel Washington, Pennsylvania Avenue at 15th Street, NW.

DATES: April 12, 9:00 a.m.-5:00 p.m.; April 13, 9:00 a.m.-5:00 p.m.

STATUS: This meeting will be open to the public.

MATTERS TO BE DISCUSSED: From 9:00 a.m. until about 12:00 m., the meeting will consist of providing orientation information for newly appointed Commissioners. During the remaining one and one-half days of the meeting, the Commissioners will discuss the final report and recommendations evolving out of the project on older workers and plan for activities under a national employment policy statement and will hear updates on research under the Job Training Partnership Act and plans for research into changes in the work place. Possible speakers include Senator Dan Quayle and Representative Augustus Hawkins. The public is encouraged to call and verify their attendance.

FOR FURTHER INFORMATION CONTACT: Ms. Patricia Hogue, Director, National Commission for Employment Policy, 1522 K Street, NW., Suite 300, Washington, D.C. 20005, (202) 724-1545.

SUPPLEMENTARY INFORMATION: The National Commission for Employment Policy was established as title V of the Comprehensive Employment and Training Act Amendments of 1978 (Pub. L. 95-524) and reauthorized under title

IV, Part F of the Job Training Partnership Act (Pub. L. 97–300). The Act gives the Commission the broad responsibility of advising the President and the Congress on national employment issues. Business meetings are open to the public. People wishing to submit written statements to the Commission that are germane to the agenda may do so, provided that such statements are in reproducible form and are submitted to the Director at least 5 days before the meeting and not more than 7 days after the meeting.

In addition, members of the general public may request to make oral presentations to the Commission, time permitting. Such statements must be applicable to the announced agenda and written application must be submitted to the director at least 5 days before the meeting. This application should include: name and address of applicant, subject of presentation, relation to agenda, amount of time needed, individual's qualifications to speak on the subject, and a statement justifying the need for an oral rather than written statement.

The Commission Chairman has the right to decide to what extent public oral presentations may be permitted at the meeting. Oral presentations will be limited to statements of fact and views and shall not include any questioning of the Commissioners or other participants unless these questions have been specifically approved by the Chairman.

Minutes of the meeting and materials prepared for it will be available for public inspection at the Commission's headquarters, 1522 K Street, NW., Suite 300, Washington, D.C. 20005.

Signed in Washington, D.C., this 16th day of March 1984.

Patricia W. Hogue,

Director.

BILLING CODE 4510–36–M

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITY

Media Arts Advisory Panel; Meeting

Pursuant to section 10(c)(2) of the Federal Advisory Committee Act (Public Law 92–463), as amended, notice is hereby given that a meeting of the Media Arts Advisory Panel (NEA/AFI Film Preservation Section) to the National Council on the Arts will be held on April 12, 1984, from 9:00 a.m.–5:00 p.m. in Room 716 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW., Washington, DC 20506.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)((4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537–01–M

NATIONAL SCIENCE FOUNDATION

Earth Sciences Proposal Review Panel of the Advisory Committee for Earth Sciences; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Earth Sciences Proposal Review Panel.

Date and time: April 11, 12, 13, and 14, 1984; 8:30 a.m. to 5:00 p.m. each day.

Place: The National Science Foundation, Room 543, 1800 G Street, NW., Washington, D.C. 20550.

Type of meeting: Closed.

Contact Person: Dr. James Fred Hays, Division Director, Earth Sciences, Room 602, National Science Foundation, Washington, D.C. 20550, Telephone: (202) 357–7958.

Purpose of Committee: To provide advice and recommendations concerning support for research in Earth Sciences.

Agenda

To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for Closing

The proposals being reviewed include information of proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority: This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

Dated: March 19, 1984.

M. Rebecca Winkler,

Committee Management Coordinator.

BILLING CODE 7555–01–M

Subcommittee for Ocean Sciences Research of the Advisory Committee for Ocean Sciences; Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92–463, the National Science Foundation announces the following meeting:

Name: Subcommittee for Ocean Science Research.

Date and time: April 10, 11, and 12, 1984, 9:00 a.m. to 6:00 pm each day.

Place: Rooms 628, 1141, 1224, and 1240, National Science Foundation, 1800 G Street, NW., Washington, D.C.

Type of meeting: Closed.

Contact Person: Dr. Robert E. Hall, Head, Ocean Science Research Section, Room 611, National Science Foundation, Washington, D.C. 20550, Telephone: (202) 357–7924.

Purpose of meeting: To provide advice and recommendations concerning support for research in Oceanography.

Agenda

To review and evaluate research proposals as part of the selection process for awards.

Reason for Closing

The proposals being reviewed include information of proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to Close Meeting

This determination was made by the Committee Management Officer pursuant to provisions of Section 10(d) of Pub. L. 92–463. The Committee Management Officer was delegated the authority to make such determination by the Director, NSF, on July 6, 1979.

Dated: March 19, 1984.

M. Rebecca Winkler,

Committee Management Coordinator.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50-329 and 50-330]

Consumers Power Co. (Midland Plant, Units 1 and 2); Receipt of Request for Action

Notice is hereby given that by letter dated February 10, 1984, Billie Pirner Garde of the Government Accountability Project, on behalf of the Lone Tree Council and others, has requested that the Commission take action with respect to the Midland Plant. The letter, which is being treated as a request for action under 10 CFR 2.206 of the Commission's regulations, has been referred to the Director of the Office of Inspection and Enforcement for consideration. As provided in 10 CFR 2.206, appropriate action will be taken on the request within a reasonable time.

Copies of the request are available for inspection in the Commission's Public Document Room, located at 1717 H Street NW., Washington, D.C. 20555 and in the local public document room for the Midland facility, located at the Grace A. Dow Memorial Library, 1910 W. St. Andrews Road, Midland, Michigan 48640.

Dated at Bethesda, Maryland this 14th day of March 1984.

For the Nuclear Regulatory Commission.

Richard C. DeYoung,

Director, Office of Inspection and Enforcement.

BILLING CODE 7590-01-M

Monthly Notice; Applications and Amendments to Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (Pub. L.) 97-415, the Nuclear Regulatory Commission (the Commission) is publishing its regular monthly notice. Pub. L. 97-415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This monthly notice includes all amendments issued, or proposed to be issued, since the date of publication of the last monthly notice which was published on February 24, 1984 (49 FR 7028) through March 13, 1984.

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

By April 23, 1984, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A

petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Branch Chief):* petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the Atomic Safety and Licensing Board designated to rule on the petition and/or request, that the petitioner has made a substantial showing of good cause for the granting of a late petition and/or request. That determination will be based upon a balancing of the factors specified in 10 CFR 2.714(a)(1) (i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the local public document room for the particular facility involved.

Alabama Power Company, Docket Nos. 50–348 and 50–364, Joseph M. Farley Nuclear Plant, Unit Nos. 1 and 2, Houston County, Alabama

Date of amendments request: December 12, 1983.

Description of amendments request: The amendments would modify the Technical Specifications to add a number of specifications required by the Commission in NUREG–0737 following the Three Mile Island accident and following certain system changes made at Farley site. The systems and the proposed changes to the Technical Specifications include: (1) Reactor vessel head vents, (2) noble gas effluent monitors, (3) containment water level monitors and (4) instrumentation for detection of inadequate core cooling.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for making a no significant hazards consideration determination by providing certain example (48 FR 14870). The licensee states that the changes are similar to "(ii) A change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications: for example, a more stringent surveillance requirement." We agree that the proposed Technical Specification adds limiting conditions of operation and surveillance requirements per the Commission request contained in Generic Letter 83–37 dated November 1, 1983. Therefore, the Commission proposes that the changes would fall into the category of a no significant hazard consideration determination.

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdenshaw Street, Dothan, Alabama 36303.

Attorney for licensee: George F. Trowbridge, Esquire, 1800 M Street, N.W., Washington, D.C. 20036.

NRC Branch Chief: Steven A. Varga.

Carolina Power & Light Company, Docket No. 50–324, Brunswick Steam Electric Plant, Unit 2, Brunswick County, North Carolina

Date of amendment request: January 10, 1984.

Desciption of amendment request: The proposed Technical Specification changes request postponement of one full flow test of the core spray pumps until the primary containment suppression chamber is restored to its operational condition.

The licensee is presently planning to shut down the Brunswick Steam Electric Plant, Unit 2 during the month of March 1984 for a 30 week outage (plus six weeks for contingencies) to refuel, performace maintenance work and modify the Mark I torus. During this outage, CP&L also plans to off-load the entire reactor core in order to perform an inservice inspection of the reactor vessel and remove the cladding on the feedwater spargers. In conjunction with the Mark I torus modifications, the suppression chamber will be drained and, therefore, it will not be possible to perform the full-flow surveillance test of the Core Spray System (CSS) wherein water is recirculated into the suppression pool.

This requirement will last be performed on approximately March 9, 1984. Due to the modifications being made to the suppression pool the maximum permissible interval between full flow tests will be exceeded. The licensee is, therefore, requesting a one time exemption to the maximum surveillance interval during the upcoming refueling outage (Reload 5) until within 48 hours after restoration of the suppression chamber to operable status, but in any case no later than November 15, 1984. Based on the present outage schedule, CP&L plans to restore the suppression chamber to operable

status and perform Surveillance Requirement 4.5.3.1.c.1 by approximately August 15, 1984. This will extend the surveillance interval from the present maximum of 115 days to approximately 159 days. The November 15, 1983 date allows for contingencies in the completion of modifications to the suppression pool making the total allowable surveillance interval 251 days.

For the majority of the outage (about 20 weeks) fuel will not be in the reactor core. During that period of time the need for the core spray system is removed.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance in the form of examples of amendments that are not considered likely to involve significant hazards considerations (48 FR 14870). The licensee's January 10, 1984 submittal included a discussion of the proposed action with respect to the no significant hazards consideration. The licensee provided a discussion regarding the proposed Technical Specification change.

The discussion has been reviewed and the Commission finds it acceptable. The licensee has determined and the NRC staff concurs that extending the surveillance interval, for a full flow test of the Core Spray System (CSS), from 92 days to a total allowable surveillance interval of 251 days does not constitute a significant reduction in the verification of operability or the availability of this system for the following reasons:

1. For the majority of the outage (approximately 20 weeks) the fuel will not be in the vessel, therefore, removing the need for the CSS System.

2. The core spray system is not required to be OPERABLE when the suppression pool is inoperable provided that the reactor vessel head is removed and the cavity is flooded, the spent fuel pool gates are removed, and the water level is maintained. The CSS will be available for operation during the relatively short interval when operability is required due to plant conditions.

3. The CSS consists of two independent subsystems, each with 100% capacity, thus providing redundant safety system subsystems.

4. Surveillance is performed every 12 hours to verify that the CSS has an operable water source (T.S. 4.5.3.1.a).

Surveillance is performed every 31 days to verify that the CSC is filled with water (T.S. 4.5.3.1.b.1).

Surveillance is performed every 31 days to verify that all valves in the CSS flow path are properly aligned (T.S. 4.5.3.1.b.2).

Surveillance is performed every 92 days to verify the operability of the core spray header differential pressure instrumentation (T.S. 4.5.3.1.c.2).

5. A review of previous CSS operability testing shows that the system is extremely reliable, as no failures have been identified since 1978.

The proposed change pertaining to specification 4.5.3.1.c.1 represents a relaxation in the surveillance requirements. However, adequate precautions have been taken to ensure the availability of other means of cooling for the reactor core. Based on the foregoing discussion, the results of this change, would not: (1) Involve significant increase in the probability or consequences of an accident previously evaluated or (2) create the possibility of a new and different kind of accident or (3) involve a significant reduction in a margin of safety. Therefore, the Commission proposes to determine that these changes do not involve a significant hazards consideration.

Local Public Document Room location: Southport, Brunswick County Library, 109 W. Moore Street, Southport, North Carolina 28461.

Attorney for licensee: George F. Trowbridge, Esquire, Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, D.C. 20036.

NRC Branch Chief: Domenic B. Vassallo.

Carolina Power and Light Company, Docket No. 50–261, H. B. Robinson Steam Electric Plant, Unit No. 2

Date of amendment request: January 9, 1984.

Description of amendment request: This amendment request proposes to change the Technical Specification (TS) regarding auxiliary feedwater (AFW) initiation. The current TS Table 3.4–1 implies that the AFW pump automatic initiation feature is required above 200°F whereas TS 3.4.1 and TS Table 3.5–5 require operability of other AFW systems components above 350°F. Therefore to correct the inconsistencies, the proposed change would revise TS Table 3.4–1 to require automatic initiation feature above 350°F and would be consistent with the Westinghouse Standard Technical Specifications NUREG–0452.

Basis for proposed no significant hazards consideration determination: The basis for the proposed amendment request is the discovering of inconsistencies and errors within the Technical Specifications when comparing TS Table 3.4–1 to other sections.

The Commission has provided guidance concerning the application of its standards set forth in 10 CFR 50.92 for no significant hazards considerations by providing certain examples published in the **Federal Register** on April 6, 1983 (48 FR 14864). One of the examples of an amendment which will likely be found to involve no significant hazards consideration is a purely administrative change to the TS; for example, a change to achieve consistency throughout the TS, correction of an error, or a change in nomenclature. The attached proposed changes fall within the Commission's example (i) of a change not likely to involve a significant hazards consideration.

Local Public Document Room location: Hartsville Memorial Library, Home and Fifth Avenues, Hartsville, South Carolina 29535.

Attorney for licensee: Shaw, Pittman, Potts, and Trowbridge, 1800 M Street, NW., Washington, D.C. 20036.

NRC Branch Chief: Steven A. Varga.

Consumers Power Company, Docket No. 50–255, Palisades Plant, Van Buren County, Michigan

Date of amendment request: August 29, 1983.

Description of amendment request: The proposed amendment would revise the descriptive material in Section 5.3.3 of the Palisades Technical Specifications. The revision to Section 5.3.3 would delete the third (spare) high pressure safety injection pump from the description of the design features of the plant because this spare pump has been adapted for auxiliary feedwater service.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of standards by providing certain examples (April 6, 1983, 48 FR 14870). One of the examples of actions likely to involve no significant hazards consideration relates to a purely administrative change to Technical Specifications: for example, a change to achieve consistency throughout the Technical Specifications, correction of an error, or a change in nomenclature. The Palisades Emergency Core Cooling System (ECCS) has two high pressure safety injection pumps; the third pump was an installed spare and was not relied on in the analysis of the performance of the ECCS. Accordingly, the deletion of the third high pressure safety injection pump from the description of the design features of the ECCS does not affect the safety of the plant. This change, therefore, would be administrative in nature and would fall within the category of the example cited above. On this basis, the staff proposes to determined that the requested action would involve a no significant hazards consideration determination.

Local Public Document Room location: Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Michigan 49006.

Attorney for licensee: Judd L. Bacon, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Branch Chief: Dennis M. Crutchfield.

Consumers Power Company, Docket No. 50–255, Palisades Plant, Van Buren County, Michigan

Date of amendment request: November 2, 1983.

Description of amendment request: The proposed license amendment would delete requirements incorporated into the license by Order dated November 9, 1979, issued by the Commission's Office of Inspection and Enforcement. Specifically, items A, B and C of Section IV of the Order, as quoted below, would be deleted:

"A. Prior to startup following the present refueling the licensee shall conduct a comprehensive review of all procedures and check lists to assure that:

(1) all valves and other controls for engineered safety features have been identified in such procedures and check lists;

(2) such procedures and check lists require that all such valve and other controls are in their proper position prior to startup after any cold shutdown; and

(3) such procedures and check lists require that after testing, maintenance or other activities which involve manipulating such valves and other controls, the valves and other controls have been returned to their proper position for operation.

B. Report to the Director of the NRC's Region III office the results of at least monthly inspections during operation of all accessible valves and other controls for engineered safety systems for compliance with the Limiting Condition for Operation (LCO) requirements of the Technical Specifications.

C. Prior to startup following the present refueling, the licensee shall explain to the Director, NRC Office of Inspection and Enforcement, in a meeting in Bethesda, Maryland, how the above requirements shall be implemented."

Basis for proposed no significant hazards consideration determination: The licensee states that Items A and C above were completed prior to startup from the 1979 refueling outage. Moreover, the licensee maintains that since Item B is a monthly requirement, and is currently ongoing, the licensee will continue the monthly surveillance of all accessible valves and contrls for engineered safety features. The licensee further states that the monthly reporting is an unnecessary function since any noncompliance discovered must be reported to the Commission in accordance with the Palisades Technical Specifications.

The Commission has provided guidance concerning the application of standards for a no significant hazards consideration determination by providing certain examples (April 6, 1983, 48 FR 14870). One of the examples (iv) of actions not likely to involve a significant hazards consideration relates to a "relief granted upon demonstration of acceptable operation from an operating restriction that was imposed because acceptable operation was not yet demonstrated. This assumes that the operating restriction and the criteria to be applied to a request for relief have been established in a prior review and that it is justified in a satisfactory way that the criteria have been met." The requested action is encompassed within this example. Based on the above discussion, and if the Commission's Region III Office confirms that the requirements of the Orders have been satisfactorily completed, the staff proposes to determine that the requested action would involve a no significant hazards consideration determination.

Local Public Document Room location: Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Michigan 49006.

Attorney for licensee: Judd L. Bacon, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Branch Chief: Dennis M. Crutchfield.

Dairyland Power Cooperative, Docket No. 50409, La Crosse Boiling Water Reactor, Vernon County, Wisconsin.

Date of amendment request: December 19, 1983.

Description of amendment request: The proposed amendment consists of four parts. (1) Add the requirement that the NRC be notified of any changes in use of two small portions of land in the exclusion area which might allow the establishment of residences; (2) Add the requirement that the plant be shut down in the event of flooding by the Mississippi River; (3) Modify to increase the stringency of requirements for reactor primary water quality; and (4) Add a requirement to inspect the containment air lock door seals evey 72 hours and to replace them periodically in accordance with manufacturer's instructions.

Basis for proposed no significant hazards consideration determination: All of the above proposed changes resulted from the Systematic Evaluation Program (SEP) review of the La Crosse Boiling Water Reactor. The basis for these changes is contained in the La Crosse Integrated Plant Safety Assessment Report, NUREG0827. Each of the four changes introduces an additional restriction or control which does not currently exist.

The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870, April 6, 1983). One of the examples (ii) of actions not likely to involve a significant hazards consideration is a change that constitutes an addition restriction or control not presently included in the Technical Specifications. The staff proposes to conclude that the four proposed changes described above would be encompassed within example (ii) and, therefore, would involve a no significant hazards consideration determination.

Local Public Document Room location: La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601.

Attorney for licensee: O. S. Heistand, Jr., Esquire, Morgan Lewis & Bockius, 1800 M Street, N.W., Washington, D.C. 20036.

NRC Banch Chief: Dennis M. Crutchfield.

Duke Power Company, Dockets Nos. 50–269, 50–270, and 50–287, Oconee Nuclear Station, Units Nos. 1, 2, and 3, Oconee County, South Carolina

Date of amendment request: February 13, 1984.

Description of amendment requests: The amendments would authorize proposed changes to the Oconee Nuclear Station (ONS) Technical Specifications (TSs) which are required to support the operation of Oconee Unit 3 at full rated power during Cycle 6. The proposed changes to the core protection safety limits (TS 2.1), the protective system maximum allowable setpoints (TS 2.3), and the rod position limits (TS 3.5.2), as well as the administrative renumbering of the figures in TS 3.5.2 are in accordance with the application.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). Example (iii) of the types of amendments not likely to

involve significant hazards considerations applies in this case as the reload is for a nuclear power reactor. Duke Power Company has provided an evaluation of the amendment requested against the standards of 10 CFR 50.92 to demonstrate the Commission's Example (iii) fits the case of this amendment request. The reload does not involve fuel assemblies significantly different from those found previously acceptable to the NRC and there are no significant changes being made to the acceptance criteria for the TSs. Moreover, the analytical method used to demonstate conformance with the TSs and regulations is not significantly changed, and the NRC has previously found the method acceptable. The Commission proposes to determine that the application does not involve a significant hazards consideration since it appears that the standards of 10 CFR 50.92 are met.

Local Public Document Room location: Oconee County Library, 501 West Southbroad Street, Walhalla, South Carolina.

Attorney for licensee: J. Michael McGarry, III, Bishop, Liberman, Cook, Purcell and Reynolds, 1200 17th Street, NW., Washington, D.C. 20036.

NRC Branch Chief: John F. Stolz.

Duke Power Company, Dockets Nos. 50–269, 50–270, and 50–287, Oconee Nuclear Station, Units Nos. 1, 2, and 3, Oconee County, South Carolina

Date of amendment request: February 13, 1984.

Description of amendment request: The amendments would authorize a proposed change to the Technical Specifications (TSs) by revising TS 3.4.5 to establish a degraded mode for the Emergency Condenser Cooling Water (ECCW) System. Such a degraded mode would allow for continued operation of the Oconee units for a limited period of time (seven days) if the ECCW System becomes inoperable. The ECCW System is a unique design feature at Oconee which allows for continued condenser circulating water flow by gravity following a loss of all station power except station batteries.

This feature provides a continuous flow of condenser cooling water as a means of removing decay heat, with backup paths that utilize the main steam relief valves, auxiliary service water system, or the safe shutdown facility. The ECCW System is a desirable feature which allows continued plant heat removal through the condensers during an extended loss of power. In order to maintain use of the condenser and not require use of backup measures to remove decay heat, it is preferable to repair an inoperable ECCW System while the plant is at power instead of requiring a plant shutdown as would presently be required. Seven days is a reasonable time to make repairs on the system.

Basis for proposed no significant hazards consideration determination: Duke Power Company's (the licensee) submittal of February 13, 1984, included a discussion of the proposed action with respect to the no significant hazards consideration standards. This discussion has been reviewed, and the Commission finds it acceptable. Each of the three standards is discussed below.

First Standard

The impact that ECCW inoperability would have on the results of the analysis for the loss of all station power case was determined. Briefly, there is no increase in the probability that this accident scenario will occur as a result of the ECCW System being inoperable. Furthermore, with the ECCW System inoperable, the consequences resulting from this accident will not be increased.

Each accident analysis addressed in the Oconee Final Safety Analysis Report (FSAR) has been reviewed with respect to the requested specification change. The review has indicated that the ECCW System is referred to in only the hypothetical case where all station power except station batteries is lost (FSAR Section 15.8.3). All other accidents evaluated in the FSAR do not address the use of the ECCW System.

The probability that this accident scenario will occur is not affected by this amendment request. The operability/inoperability of the ECCW System has no influence on events that may result in the loss of all station power.

The consequences resulting from this accident with the ECCW System inoperable have been evaluated. As addressed in the FSAR, the immediate operability of the ECCW System is not required. Additional means of decay heat removal are available, as described in the licensee's technical justification for this amendment request and the FSAR. With the turbine-driven emergency feedwater pump but without either electrical power or presence of Lake Keowee, several hours are available before exhausting the supply of stored condensate pumped into the steam generators and the steam vented to the atmosphere. When normal condensate supply is exhausted, then the auxiliary service water pumps or the standby shutdown facility (SSF) can put lake water directly into the steam generators. This feature ensures that the decay heat removal through the secondary side can continue as long as necessary.

In addition, the overall risk to the health and safety of the public is extremely low because during the time the ECCW System is inoperable there is a very low probability that a complete loss of power will occur. Furthermore, Oconee's emergency power system is provided by the two Keowee hydroelectric units instead of diesel generators, offering a high degree of reliable power for emergency situations.

Second Standard

The proposed amendments allowing for temporary inoperability of the ECCW System do not in any way create the possibility of a new or different kind of accident from any accident previously evaluated.

Third Standard

The proposed amendments specify a degraded mode of operation for the ECCW System. The ECCW System is a backup system to the Condenser Circulating Water System (CCW) which provides coolant flow to the condensers during normal and emergency plant operations. The CCW System is a heat sink for Oconee Nuclear Station during plant cooldown and hot standby.

As stated earlier, the ECCW System will maintain a source of coolant flow to the condensers in the highly unlikely event in which all station power except station batteries is lost. As detailed in FSAR Section 15.8.3, the immediate operation of the ECCW System is not required. Further, even if the CCW or the ECCW Systems cannot provide coolant flow to the condensers, then steam produced in the steam generators will be relieved to the atmosphere via the main steam relief valves. If the normal condensate supply is exhausted, then the auxiliary service water pumps or the SSF can put lake water directly into the steam generators. This feature ensures that decay heat removal through the secondary side can continue as long as necessary; therefore, the absence of a recirculation path for the steam will not compromise plant safety. Thus, the margin of safety will not be significantly reduced by the proposed amendments.

The Commission proposes to determine that the application does not involve a significant hazards consideration since it appears that the standards of 10 CFR 50.92 are met.

Local Public Document Room location: Oconee County Library, 501 West Southbroad Street, Walhalla, South Carolina.

Attorney for licensee: J. Michael McGarry, III, Bishop, Liberman, Cook, Purcell and Reynolds, 1200 17th Street, NW., Washingtoin, D.C. 20036.

NRC Branch Chief: John F. Stolz.

Florida Power and Light Company, Docket No. 50–335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of amendment request: January 10, 1984.

Description of amendment request: This proposed amendment would delete Appendix B, Part 1 of the Technical Specifications.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of these standards by providing certain examples of actions involving no significant hazards considerations. One of the examples of actions involving no significant hazards considerations (i) relates to amendments of a purely administrative change to a technical specification, correction of an error, or a change in nomenclature. The current Technical Specifications contains, in Appendix B, Part 1 radiological technical specifications that have now been included in the Technical Specifications as a part of Amendment 59 that was issued on August 18, 1983. Appendix B, Part 1 should have been deleted with the issuance of Amendment 59. In view of the above, the staff considers this to be an administrative change and proposes to determine that the proposed change does not involve a significant hazards consideration.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450.

Attorney for licensee: Harold F. Reis, Esq., Lowenstein, Newman, Reis and Axelrad, 1025 Connecticut Avenue, NW., Washington, D.C. 20036.

NRC Branch Chief: James R. Miller.

Florida Power Corporation, et al., Docket No. 50–302, Crystal River Unit No. 3 Nuclear Generating Plant, Citrus County, Florida

Date of amendment request: May 6, 1982, as supplemented on January 20, March 7, 1983 and February 6, 1984 (withheld from public disclosure).

Description of amendment request: The proposed amendment would revise the Crystal River Unit 3 Modified Amended Security Plan, Revision 2, dated November 10, 1978. The proposed changes include: a complete revision of the Plan in a format compatible with NUREG–0908; changes in security management structure; revisions in procedures and documentation relative to personnel screening, access authorization, access controls at the personnel access point, badging, escorting, vehicular access and associated controls, processing of packages and materials, construction activities, and testing of security equipment and surveillance of barriers; revision of the training and qualification requirements for Security Force personnel to assure consistency with the Security Training and Qualification Plan; updated listings and drawings of vital areas and vital area portals; deletion of security requirements concerning the Owner-Controlled Area; revision of the methods and frequency of security patrols; upgrading of search requirements for personnel, vehicles, and material; revision of control accountability measures for security keys, locks, and related equipment; upgrading of performance parameters for intrusion and detection equipment; further detail on illumination, security emergency power, the CCTV system, alarm station operation, and security communications; upgrading of requirements to be in effect during refueling and major maintenace outages; consolidation of security reporting and recordkeeping requirements; and revision of security audit commitments as required by 10 CFR 73.40(d) and 10 CFR 73.55(g)(4). Pursuant to 10 CFR 73.21, these changes are withheld from public inspection.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870). Three of these examples of guidance are: a purely administrative change to technical specifications; a change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications; and a change to make a license conform to changes in the regulations, where the licensing change results in very minor changes to facility operations clearly in keeping with the regulations. The proposed changes all fall into one of these categories. Administrative changes do not lend themselves to a significant hazards consideration based on the proposed amendment because the changes result in very minor changes to facility operations. Other changes are proposed to make the license conform to changes in the regulations since the initial submittal and approval of the Plan and add requirements to ensure compliance with regulations. Still other changes impose additional limitations, restrictions, or controls not previously submitted that improve safeguards effectiveness of the facility. Although some prior commitments have decreased in the proposed amendment, these reductions shave been instituted to conform to more recent Commission guidelines and are clearly within all applicable Commission acceptance criteria.

Furthermore, this comprehensive change, applied in its entirety, results in a more effective security program which does not decrease safeguards effectiveness. The proposed changes do not affect reactor operations or accident analyses and have no radiological consequences. Therefore, operation in accordance with the proposed amendment clearly involves no significant hazards consideration, because the changes will not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety Accordingly, the Commission proposes to determine that these changes do not involve a significant hazards consideration.

Local Public Document Room Location: Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida.

NRC Branch Chief: John F. Stolz.

GPU Nucler Corporation, Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of application for amendment: December 21, 1983 which supersedes application dated July 13, 1983.

Description of amendment request: Request for approval of Technical Specification (TS) changes which would involve changes to Section 3.1 and 4.2 concerning the scram discharge volume (SDV) modifications.

Basis for proposed no significant hazards consideration determination: On June 28, 1980, during a routine shutdown of the Browns Ferry Unit 3 reactor, a manual scram from approximately 36% power failed to insert about 40% of the control rods. Two additional manual scrams followed by an automatic scram were required before all control rods were fully inserted. The total time that elapsed from the initial scram until all rods were inserted was approximately 15 minutes.

Subsequent investigations by the licensee, General Electric Company, and the NRC staff narrowed the cause of the problem to an accumulation of water in the SDV header at the time of the first scram. It is believed that water accumulated because the SDV system venting and/or draining were obstructed. Furthermore, the accumulation of water was not detected by SDV level instruments which input to the reactor protection system. It was believed that the SDV level instrumentation was designed to scram the reactor before water accumulated in the scram discharge volume that could hinder scram. As a result, the Commission's Office of Inspection and Enforcement (I&E) issued two I&E Bulletins addressing both short and long term programs.

The long term program addressed SDV system design. In order to improve the overall design of the SDV system an NRR task force has been working with a subgroup of the BWR Owners Group to develop revised scram discharge system design and safety criteria. The NRC endorsed the criteria developed by the BWR Owners Group. The modifications being performed at Oyster Creek are in accordance with the BWR Owners Group recommendations in response to IE Bulletin 80–17 and its supplements. As a result of providing two SDV instrument volumes, the high water level scram and rod block setpoints are to be changed. The high water level setting for scram, is requested to be changed from 37 gallons to 18.36 gallons (59 inches) of water, which will permit the 137 control rods to scram by either set of level instruments. The high water level setting for rod block is requested to be changed from 18 gallons to 9 gallons (29 inches) of water which results in a rod block and an alarm at either instrument volume. In addition, the scram discharge volume drain and vent valves closure times are requested to be changed to be in agreement with the BWR Owners Group recommendations.

The proposed modification would ensure that there is sufficient volume available in the SDV to allow all 137 control rods to scram in the event that plant conditions warrant this action. The safety function of the SDV and its associated instruments have not changed. Since the modification and associated technical specifications provide the redundant instrument volumes with necessary instrumentation and appropriate setpoints, the safety of the plant will be enhanced, thereby providing a greater degree of protection for the health and safety of the public. This change would constitute an additional limitation, restriction, or control not presently included in the Technical Specifications that is, a more stringent surveillance requirement, and is, therefore, consistent with example (ii) of the Commission guidance (48 FR 14870, April 6, 1983) as a type of action which would involve a no significant hazards consideration determination. On this basis, the NRC Staff proposes to determine that this amendment does not involve significant hazards considerations.

Local Public Document Room location: 101 Washington Street, Toms River, New Jersey 08753.

Attorney for licensee: G. F. Trowbridge, Esquire, Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, D.C. 20036.

NRC Branch Chief: Dennis M. Crutchfield, Chief.

Iowa Electric Light and Power Company, Docket No. 50–331, Duane Arnold Energy Center, Linn County, Iowa

Date of amendment request: January 26, 1984.

Description of amendment request: The proposed amendment would modify the environmental Technical Specifications and delete the requirement to examine the vegetation on and around the site to determine if there is any salt drift damage from the cooling towers.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for the application of the standards for determining whether a significant hazards consideration exists by providing examples of amendments that are considered not likely to involve significant hazards considerations (48 FR 14870). One such example (iv), of actions states that a relief is granted upon demonstration of acceptable operation from an operating restriction that was imposed because acceptable operation was not demonstrated. This assumes that the operating criteria to be applied to a request for relief have been established in a prior review and that it is justified in a satisfactory way that the criteria have been met.

The proposed change deletes the requirement to examine the vegetation on and around the site to determine if there is any salt drift damage from the cooling towers. The Technical Specifications require that the vegetation damage study be done for at least two years to document any possible adverse effects. The licensee has conducted such a study for nine years and found no significant damage to any vegetation. Since the licensee has demonstrated that the cooling tower operation has been found acceptable from the point of view of its impact on surrounding vegetation, the Commission's example (iv) applies and the requested amendment is not expected to involve a significant hazards consideration.

Since the application for amendment involves a proposed change that is similar to an example for which no significant hazards consideration exists, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Cedar Rapids Public Library, 426 Third Avenue, SE., Cedar Rapids, Iowa 52401.

Attorney for licensee: Jack Newman, Harold F. Reis, Esquire, Newman and Holtzinger, 1025 Connecticut Avenue, NW., Washington, D.C. 20036.

NRC Branch Chief: Domenic B. Vassallo.

Iowa Electric Light and Power Company, Docket No. 50–331, Duane Arnold Energy Center, Linn County, Iowa

Date of amendment request: January 27, 1984.

Description of amendment request: The proposed amendment requests modification to the Technical Specifications pertaining to the requirements set forth in NUREG–0737, "Clarification of TMI Action Plan Requirements" and as requested by our Generic Letter 83–36. Technical Specification changes are requested in response to:

(1) The following TMI Action Plan Items: II.B.3—Post-Accident Sampling; II.F.1.1—Noble Gas Monitor; II.F.1.2—Iodine Particulate Sampling; II.F.1.3—Containment High-Range Monitor; II.F.1.4—Containment Pressure Monitor; II.F.1.5—Containment Water Level Monitor; II.F.1.6—Containment Hydrogen Monitor; III.D.3.4—Control Room Habitability Requirements;

(2) The new rule, "Licensed Operator staffing at Nuclear Power Plants;" and

(3) Changes to the Technical Specifications Table of Contents.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations. One of the examples relates to: "(i) A purely administrative change to Technical Specifications: For example, a change to achieve consistency throughout the Technical Specifications, correction of an error, or a change in

nomenclature. Another example (ii) of actions involving no significant hazards consideration is a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications.

(1) Technical Specification changes in response to TMI Action Items II.B.3, II.F.1.1, II.F.1.2, II.F.1.3, II.F.1.4, II.F.1.5, II.F.1.6 and III.D.3.4.

The modifications to Technical Specifications in response to the above TMI Action Items requirements constitute additional limitations, restrictions, or controls not presently included in the DAEC Technical Specifications. Therefore, the proposed changes are similar to the Commission's example (ii) above. Therefore, we expect that the requested changes will not involve significant hazards considerations.

(2) The licensee also proposes to revise the Technical Specifications to meet the staffing requirements pursuant to the new rule "Licensed Operator Staffing at Nuclear Power Plants." This requested change is similar to the Commission's example (ii) and involves additional restrictions not presently included in the Technical Specifications. Therefore, the requested change is not expected to involve significant hazards considerations.

(3) The licensee has proposed to change the Table of Contents to the Technical Specifications. This requested change is similar to the Commission's example (i) and is intended to achieve consistency of the Table of Contents with the Technical Specifications.

Since the application for amendment involves proposed changes that are similar to examples for which no significant hazards consideration exists, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Cedar Rapids Public Library, 426 Third Avenue, SE., Cedar Rapids, Iowa 52401.

NRC Branch Chief: Domenic B. Vassallo.

Maine Yankee Atomic Power Company, Docket No. 50–309, Maine Yankee Atomic Power Plant, Wiscasset, Maine

Date of amendment request: January 16, 1984.

Description of amendment request: The proposed amendment provides additional limiting conditions for operation and surveillance requirements for the alternate safe shutdown system. This technical specification implements the requirements of 10 CFR 50 Appendix R by specifying the components of the alternate safe shutdown system and the required actions to be taken if any of these components is found to be not operable.

Basis for proposed no significant hazards consideration determination: This proposed amendment represents additional restrictions not currently included in the technical specifications. It therefore fits example (iii) of the examples of amendments considered not likely to involve significant hazards considerations as given by the Commission (48 FR 14870). Therefore, the initial determination for this amendment is proposed as no significant hazards considerations.

Local Public Document Room location: Wiscasset Public Library, High Street, Wiscasset, Maine.

Attorney for licensee: John A. Ritscher, Esq., Ropes & Gray, 225 Franklin Street, Boston, Massachusetts 02210.

NRC Branch Chief: James R. Miller.

Maine Yankee Atomic Power Company, Docket No. 50–309, Maine Yankee Atomic Power Plant, Wiscasset, Maine

Date of amendment request: January 27, 1984.

Description of amendment request: This proposed amendment provides Technical Specification changes needed to support Cycle 8 operation of the Maine Yankee plant. It incorporates previous amendment requests made on February 18, 1983 and January 19, 1984. This proposed amendment would: (1) Modify Technical Specifications to reflect Cycle 8 power distributions, insertion limits, and peaking factors; (2) reflect the required fuel centerline design limit for each fuel type; (3) incorporate a reference power concept; (4) reflect changes to the auxiliary feedwater isolation system; and (5) provide for alternate methods of measuring quadrant tilt.

Basis for proposed no significant hazards consideration determination: Part (1) of this change is a reload amendment. No fuel assemblies used in the Cycle 8 design are significantly different than those previously used at Maine Yankee and found to be acceptable by the NRC. The acceptance criteria for the Technical Specifications associated with the Cycle 8 design are the same as the acceptance criteria associated with the current Technical Specifications. The methods used to demonstrate conformance of the Cycle 8 design with applicable Technical Specifications have been previously found acceptable by the NRC. These findings are consistent with example (iii) of an amendment that does not involve a significant hazards consideration as noted by the Commission in their statement of considerations associated with 10 CFR 50.92 (48 FR 14864).

Parts (2) through (5) of these changes do not involve a significant increase in the probability or consequences of an accident previously evaluated, the possibility of a new or different kind of accident from any accident previously evaluated or a significant reduction in a margin of safety. Furthermore, they do not represent significant unreviewed safety questions. Thus, these changes do not fit examples (i), (ii) or (iv), of significant hazards considerations associated with 10 CFR 50.92. Therefore, we propose to determine that the proposed amendment involves no significant hazards considerations.

Local Public Document Room location: Wiscasset Public Library, High Street, Wiscasset, Maine.

NRC Branch Chief: James R. Miller.

Niagara Mohawk Power Corporation, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 5, 1984.

Description of amendment request: The proposed amendment changes the section of the Technical Specifications pertaining to instrumentation that initiates or isolates emergency cooling and the respective bases. Currently, the emergency condensers are automatically isolated on two parameters, namely, high system flow and high radiation in the emergency cooling system shell vent. This amendment proposes to remove the automatic isolation on high radiation, leaving the high radiation signal for alarm only.

Basis for proposed no significant hazards consideration determination: The licensee has presented its determination of significant hazards considerations as follows:

The Commission has provided guidance concerning the determination of significant hazards by providing certain examples (48 FR 14870) of amendments considered not likely to involve significant hazards consideration. One of the examples (vi), relates to a change which either may result in some increase to the

probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan. The proposed change would increase the availability of the emergency condensers by reducing the likelihood of spurious isolation due to local radiation from a source other than the emergency condensers. However, relying on manual rather than automatic isolation could increase the time to isolate the emergency condensers for a leak in the emergency condenser tubing. This could result in some increase in activity to the environment. This item was addressed in a Safety Evaluation (SE) for Nine Mile Point Unit 1 dated December 15, 1981 for TMI Action Plan Item II.K.3.14, NUREG–0737. In the Safety Evaluation, Nine Mile Point Unit 1 was found acceptable, based on automatic isolation of the emergency condenser on high radiation signals. In the same SE, other units were found acceptable with manual operator action being required to isolate the emergency condensers on high radiation signal alarms. Therefore, since this change may result in some increase in the consequences of previously analyzed events but is within previously accepted staff criteria, the change is similar to example (vi).

The staff has reviewed the licensee's significant hazards considerations determinations and based upon this review, the staff has made a proposed determination that the application for amendment involves no significant hazards considerations.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue NW., Washington, D.C. 20006.

NRC Branch Chief: Domenic B. Vassallo.

Niagara Mohawk Power Corporation, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 9, 1984.

Description of amendment request: The proposed amendment changes the section of the Technical Specifications pertaining to limiting values of the Minimum Critical Power Ratio (MCPR). The limits have been changed in a conservative manner, i.e., they have been increased to values greater than the limits currently calculated. For each reload these limits will be verified by the ODYN computer code. The reason for this change is to establish limits which are sufficiently conservative and need not be corrected on a cycle by cycle basis for potential, small changes in analysis results.

Basis for proposed no significant hazards consideration determination: The licensee has presented its determination of significant hazards considerations as follows:

The Commission has provided guidance concerning the determination of significant hazards by providing certain examples (48 FR 14870) of amendments considered not likely to involve significant hazards consideration. One of the examples (ii), relates to a change which constitutes an additional limitation, restriction or control not presently in the Technical Specifications. The proposed Technical Specification change is similar to this in that it imposes a greater restriction on operation. Another example (iii), is a change resulting from core reloading if no fuel assemblies significantly different from those found previously acceptable to the Nuclear Regulatory Commission are used. This example is applicable since the fuel to be loaded is of the same design as fuel used the previous cycle.

The staff has reviewed the licensee's significant hazards considerations determinations and based upon this review, the staff has made a proposed determination that the application for amendment involves no significant hazards considerations.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue NW., Washington, D.C. 20006.

NRC Branch Chief: Domenic B. Vassallo.

Niagara Mohawk Power Corporation, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 13, 1984.

Description of amendment request: The proposed amendment changes the Limiting Condition for Operation and Surveillance Requirements sections of the Technical Specification to add requirements for the protective relaying that will be installed on the output side of the reactor protection and reactor trip bus motor generator sets during the spring 1984 refueling outage.

Basis for proposed no significant hazards consideration determination: The licensee has presented its determination of significant hazards considerations as follows:

The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870) of amendments considered not likely to involve significant hazards considerations. One of the examples (ii), cites changes that constitute an additional limitation, restriction or control not presently included in the Technical Specifications. The proposed Technical Specifications are similar to this exemple because it includes operability and surveillance requirements for monitoring the output of the motor generator sets which supply power to the reactor protection system and reactor trip buses.

The staff has reviewed the licensee's significant hazards considerations determinations and based upon this review, the staff has made a proposed determination that the application for amendment involves no significant hazards considerations.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, D.C. 20006

NRC Branch Chief: Domenic B. Vassallo.

Niagara Mohawk Power Corporation, Docket No. 50–220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 30, 1984.

Description of amendment request: The proposed amendment changes Table 4.6.2a, "Instrumentation that Initiates Scram—Surveillance Requirements" of the Technical Specifications by adding instrument channel calibration surveillance requirements for the main steamline isolation valve position and turbine stops valve closure instrumentation.

Basis for proposed no significant hazards consideration determination: The licensee has presented its determination of significant hazards considerations as follows:

The Commission has provided guidance concerning the determination of significant hazards by providing certain examples (48 FR 14870) of amendments considered not likely to involve significant hazards consideration. One of the examples (ii), relates to a change which constitutes an additional limitation, restriction, or

control not presently in the Technical Specifications. The proposed Technical Specification change is similar to this in that it imposes more stringent surveillance requirements.

The staff has reviewed the licensee's significant hazards considerations determinations and based upon this review, the staff has made a proposed determination that the application for amendment involves no significant hazards considerations.

Local Public Document Room location: State University Colege at Oswego, Penfield Library—Documents, Oswego, New York 13126.

NRC Branch Chief: Domenic B. Vassallo.

Northeast Nuclear Energy Company (NNECO), et al, Docket No. 50–245, Millstone Station, Unit No. 1, New London County, Connecticut

Date of amendment request: December 13, 1983.

Description of amendment request: The Technical Specification (TS) changes proposed by the amendment request would allow a change in the station battery testing requirements to be consistent with the Standard Technical Specifications (STS) and with Regulatory Guide 1.129, Revision 1. These proposed changes constitute NNECO's resolution of SEP Topic VIII–3.A, Station Battery Test Requirements. The proposed change requires periodic testing for determining battery capacity and for demonstrating that the batteries will provide sufficient power under accident conditions. This fulfills the commitment in Section 4.29 of NUREG–0824, Integrated Plant Safety Assessment Report for Millstone Unit 1.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of standards for a no significant hazards consideration determination by providing certain examples (April 6, 1983, 48 FR 14870). Two of the examples (ii and vii) of actions not likely to involve a significant hazards consideration relate to a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications and a change to conform to changes to the regulations, where the change results in very minor changes to facility operations. The changes proposed in the application for amendment are encompassed by these examples since the requested action would result in an additional limitation and conformance to staff guidance, i.e. battery tests in accordance with Section 5.6 of IEEE Standard 450–1975 instead of 1972 to verify adequate battery capacity for emergency leads and a new battery discharge test to verify that the battery capacity is at least 80% of manufacturer's rating. The staff, therefore, proposes to determine that the requested action would involve a no significant hazards consideration determination.

Local Public Document Room location: Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385.

Attorney for licensee: William H. Cuddy, Esquire, Day, Berry & Howard, Counselors at Law, One Constitution Plaza, Hartford, Connecticut 06103.

NRC Branch Chief: Dennis M. Crutchfield.

Northeast Nuclear Energy Company (NNECO), et al, Docket No. 50–245, Millstone Station, unit No. 1, New London County, Connecticut

Date of amendment request: December 28, 1983.

Description of amendment request: The proposed amendment would approve Appendix A Technical Specification (TS) changes which would allow a change in the reactor coolant chemistry limits to be consistent with the Standard Technical Specifications (STS) and with Regulatory Guide 1.56, Revision 1. These proposed changes constitute NNECO's resolution of Systematic Evaluation Program (SEP) Topics V–12A, Water Purity of BWR Primary Coolant, XV–16, Radiological Consequences of Failure of Small Lines Carrying Primary Coolant Outside Containment, and XV–18, Radiological Consequences of Main Steam Line Failure Outside Containment. The purpose of the proposed changes is to ensure that the reactor coolant chemistry is adequately controlled to minimize the possibility of corrosion-induced failures and to ensure that coolant iodine concentration is maintained at or below a level that would yield acceptable doses in the event of failure of a small line outside the containment. The proposed Technical Specification changes would fulfill the commitments in Sections 4.19.1, 4.35 and 4.36 of NUREG–0824, Integrated Plant Safety Assessment Report prepared under the SEP for Millstone Station, Unit 1.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of standards for a no significant hazards consideration determination by providing certain examples (April 6, 1983, 48 FR 14870). One of the examples (ii) of actions not likely to involve a significant hazards consideration relates to a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications. The changes proposed in the application for amendment are encompassed by this example since the requested action would result in additional limitation. The staff, therefore, proposes to determine that the requested action would involve a no significant hazards consideration determination.

Local Public Document Room location: Waterford Public Library, Rope Ferry Road, Route 156, Waterford, Connecticut 06385.

Attorney for licensee: William H. Cuddy, Esquire, Day, Berry & Howard, counselors at Law, One Constitution Plaza, Harford, Connecticut 06103.

NRC Branch Chief: Dennis M. Crutchfield.

Northern States Power Company, Docket No. 50–263, Monticello Nuclear Generating Plant, Wright County, Minnesota

Date of amendment request: September 10, 1982, as revised on July 29, 1983.

Description of amendment request: The proposed amendment would revise the Limiting Conditions for Operation (LCO) and surveillance requirements associated with the vent and drain valves of the scram discharge volume (SDV). The proposed changes would allow plant operation with one valve inoperable and the redundant valve operable. The proposed changes would reflect: (1) Plant modifications to the SDV system whereby it has been madified into two SDVs, each with two vent and drain valves and (2) the redundancy and diversity added to the SDV system by this modification. The existing Technical Specifications require plant shutdown if a vent or drain valve is inoperable.

Basis for proposed no significant hazards consideration determination: The licensee has presented its determination of significant hazards consideration as follow: "The safety function of the SDV vent and drair valves is to limit the loss of reactor coolant leaked past the control rod drive (CRD) seals while the scram valves are open. The scram valves remain open during the interval from scram initiation to the resetting of the scram signal. Normally this interval is between five and thirty minutes (although during

accidents this time could be longer). Failure of the vent valves should have no undesirable consequences since a check valve is also installed in the vent line which will limit leakage. Failure of the drain valves will allow flow of reactor water to the clean radwaste sytem. This potential loss of reactor water is undesirable. In order to reduce the probability of this occurrence the scram discharge valves should be operable. However, the inoperability of one of the two redundant valves will not cause a significant reduction in safety because the probability of the other valve failing, at a time when it is required to prevent the loss of reactor water, is very small and this condition is only permitted for a limited time interval. Closure of the failed or redundant vent or drain valves will contain reactor water leakage without inhibiting the functions of the scram discharge volume. For the reasons mentioned above, the licensee has determined, under the Commission's regulations in 10 CFR 50.92, that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety."

The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870). The example most similar to the amendment proposed by the licensee is one of the examples of amendments involving a significant hazards consideration * * *" (iii) A significant relaxation in Limiting Conditions for Operation not accompanied by compensatory changes, conditions or actions that maintain a commensurate level of safety. However, in this case, the licensee has proposed compensatory measures by modifying the SDV system and installing redundant vent and drain valves.

Therefore, for the reasons discussed above, the staff has made a proposed determination that the application for amendment involves no significant hazards considerations.

Local Public Document Room location: Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, D.C. 20036.

NRC Branch Chief: Domenic B. Vassallo.

Omaha Public Power District, Docket No. 50–285, Fort Calhoun Station, Unit No. 1, Washington County, Nebraska

Date of amendment requests: February 14, 1984.

Description of amendment request: The amendment would authorize proposed changes to the Fort Calhoun Station, Unit No. 1 Technical Specifications which are required to support the operation of the unit at full rated power during Cycle 9. Specifically, the following specifications are proposed to be changed: minimum departure from nucleate boiling (DNB) ratio, total unrodded planar radial peak, unrodded integrated total radial peak, lower bound of the moderator temperature coefficient, linear heat rate measurement-calculational uncertainty factor, and minimum reactor coolant system flow rate. Because these specifications are proposed to be changed, the following figures would be changed: Thermal Margin/Low Pressure Safety Limit, Thermal Margin/Low Pressure Limiting Safety System Settings, Limiting Condition for Operation for Excore Monitoring of Linear Heat Rate, Limiting Condition for Operation for DNB Monitoring, and F^T_R and F^T_N and Core Power Limitations. A steam generator differential pressure reactor protective system trip would also be added to the technical specifications. Instrument Operating Requirements and Minimum Frequencies for Checks, Calibrations, and Testing would be added for this added trip.

The amendment would also revise the Technical Specifications for the reactor coolant system pressure-temperature limits for operation to 8.5 effective full power years. The current technical specifications permit operations to 7.0 effective full power years, which will occur during cycle 9 operation. This would necessitate a change in the following figures: Heatup-Reactor Not Critical, Cooldown-Reactor Not Critical, and Predicted Radiation Induced NDTT Shift. Lastly, the amendment would delete the spent fuel inspection requirements.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of standards for determining whether license amendments involve significant hazards considerations by providing certain examples (48 FR 14870). One of the examples of actions involving no significant hazards considerations is a change resulting from a nuclear reactor core reloading, if no fuel assemblies significantly different from those found previously acceptable to the NRC for a previous core at the facility are involved (Example iii). The licensee states that the changes, except for the new pressure-temperature limits and the deletion of the spent fuel inspection requirements come under this example. The licensee's conclusion is based upon a fuel reload evaluation which was submitted as part of the application. Therefore, since this part of the application for amendment involves changes similar to an example for which no significant hazards considerations exist, the staff has made a proposed determination that this part of the application for amendment involves no significant hazards considerations.

Another example of actions involving no significant hazards considerations is a change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications (Example ii). The licensee states that the new pressure-temperature limits ensure that adequate fracture toughness is maintained through all conditions of normal operation, including anticipated operational transients and system hydrostatic tests. Therefore, since this part of the application for amendment involves changes similar to an example for which no significant hazards considerations exist, the staff has made a proposed determination that this part of the application for amendment involves no significant hazards considerations.

The licensee has presented its discussion of significant hazards considerations pursuant to 10 CFR 50.92 in regard to deleting the spent fuel inspection requirement. The licensee stated that: (1) There is no significant increase in the probability or consequences of an accident previously evaluated because no accident evaluations are affected by this change in surveillance requirements, (2) the change does not create the possibility of a new or different kind of accident from any accident previously evaluated because the deleted surveillance requirement was only applicable to fuel discharge from the core, and (3) no significant reduction in a margin of safety is involved because the completed inspection program demonstrates the adequacy of the current fuel assembly design. The staff has reviewed the licensee's significant hazards considerations determination for deletion of the spent fuel inspection requirement, and based upon this review, the staff has made a proposed

determination that this part of the application for amendment involves no significant hazards consideration.

Local Public Document Room location: W. Dale Clark Library, 215 South 15th Street, Omaha, Nebraska 68102.

Attorney for licensee: LeBoeuf, Lamb, Leiby, and MacRae, 1333 New Hampshire Avenue, NW., Washington, D.C. 20036.

NRC Branch Chief: James R. Miller.

Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Dockets Nos. 50–277 and 50–278, Peach Bottom Atomic Power Station, Units Nos. 2 and 3, York County, Pennsylvania

Date of amendment request: May 4, 1983, as supplemented November 10, 1983.

Description of amendment request: The amendment proposed by the licensees would revise the Technical Specifications (TSs) of the operating licenses to add additional restrictions, limits and controls on the amount of unidentified leakage into the primary containment as measured by the primary containment (Drywell) sump collection system. The present TSs limit leakage from unidentified sources to a total of 5 gallons per minute (gpm). The changes would add an additional limitation requiring that the unidentified leakage also be limited to an increase of not more than 2 gpm in any 24-hour period. The changes would also require that the reactor coolant system leakage be checked and recorded every 4 hours rather than once per day as is now required. These additional leakage limitations were proposed by the licensees in response to requirements of NUREG–0313, Revision 1.

In addition, the licensees requested changes to the Peach Bottom TSs pertaining to a reduction in Iodine-131 activity limits for the reactor coolant. The proposed change reduces the operating limit for Iodine-131 to 0.2 micro-curies per gram of dose equivalent I–131 from the present TS value of 2.0 micro-curies per gram. This limit may be exceeded for a 48-hour period provided it does not exceed 4.0 micro-curies per gram. In addition, the proposed change would limit reactor operation to no more than 800 hours within any 12-month period with Iodine-131 concentrations above 0.2 microcuries per gram of dose equivalent I–131. The licensees proposed these additional reactor coolant activity limitations in accordance with the BWR Standard Technical Specifications as requested by the NRC staff.

The proposed amendments would also add to the Reactor Coolant Specific Activity Sampling and Analysis Program (Table 1 of Section 3.6.B) Krypton-88 (Kr–88) as part of the offgas sample in accordance with the BWR Standard Technical Specifications (NUREG–0123, Revision 3).

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing examples of actions that are likely, and are not likely, to involve significant hazards considerations (48 FR 14870). Examples of actions not likely to involve a significant hazards consideration include: "(ii) A change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications: for example, a more stringent surveillance requirement." The restrictions, limitations and controls on unidentified primary containment leakage as measured by the primary containment (Drywell) sump system, I–131 activity limits and coolant chemistry activity sampling (Kr–88) which would be added to the present limits in the TSs are encompassed by the above example. Thus, these changes fall within example (ii) of changes that are not likely to involve significant hazards considerations and, on this basis, the Commission proposes to determine that these changes do not involve significant hazards considerations.

Finally, the proposed amendment request would delete any limiting conditions for operation, surveillance requirements, calibration frequency requirements and bases for the Drywell Air Monitoring Systems relative to detecting unidentified Drywell leakage. This request will be the subject of a separate **Federal Register** notice.

Local Public Document Room location: Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania.

Attorney for licensee: Troy B. Conner, Jr., 1747 Pennsylvania Avenue, NW., Washington, D.C. 20006.

NRC Branch Chief: John F. Stolz.

Power Authority of the State of New York, Docket No. 50–333, James A FitzPatrick Nuclear Power Plant, Oswego County, New York.

Date of amendment request: November 10, 1983.

Descriptions of amendment request: This amendment would modify the Technical Specifications to reflect the installation of nine remote, manually operated containment isolation valves in the Reactor Building Closed Loop Cooling Water System (RBCLCWS) piping, in compliance with 10 CFR Part 50, Appendix A, GDC 57. The amendment would also exclude these valves from quarterly surveillance requirements. Testing, instead, would be conducted once per operating cycle.

Basis for proposed no significant hazards consideration determination: The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The proposed revision entails a change in surveillance interval for the newly installed RBCLCWS valves and does not involve any change in operating conditions or design. Therefore, no increase in the probability of an accident previously evaluated or the creation or a new or different kind of accident will result from the proposed change. Also, since no changes in any accident analyses will result from a change in surveillance interval, no increase in the consequences of any accident previously evaluated is expected to occur. An increase in surveillance interval can, in general, result in a reduced safety margin. For the case in point, however, a continuous flow of coolant through the RBCLCWS to the drywell air and recirculation coolers is necessary. Closure of the RBCLCWS valves during normal operation to test operability quarterly would temporarily deprive these coolers of coolant flow, resulting in the drywell air and equipment temperature limits possibly being exceeded. Therefore, the proposed revision to test operability of the RBCLCWS valves once per cycle, during shutdown, does not create a reduction in safety margin.

Local Public Document Room location: Penfield Library, State University College of Oswego, Oswego, New York.

Attorney for licensee: Mr. Charles M. Pratt, Assistant General Counsel, Power Authority of the State of New York, 10 Columbus Circle, New York, New York 10019.

NRC Branch Chief: Domenic B. Vassallo.

Power Authority of the State of New York, Docket No. 50-333, James A. FitzPatrick Nuclear Power Plant, Oswego County, New York

Date of amendment request: December 28, 1983.

Description of amendment request: This amendment would modify the Technical Specifications to reflect changes in the minimum critical power ratio (MCPR) Operating Limits resulting from turbine control valve modifications completed during Reload 5. In the table entitled "MCPR Operating Limit for Incremental Cycle Core Average Exposure," the MCPR values for the 39% thru 43% rod block monitor hi-trip level settings for "EOC-1GWD/t to EOC" would be increased from 1.29 to 1.30. In addition, Figure 3.1-2, "Operating Limit MCPR Versus τ (defined in Section 3.1.B.2)—For all Fuel Types," would be revised to account for the valve modification. The subject modifications changed the turbine control valve configuration from partial to full arc admission. Prior to this modification, the main turbine's four control valves would open in sequence—two valves open simultaneously, while the remaining two valves open one after the other and only after the first two valves were fully open. At full power, this resulted in three valves fully open and the remaining valve open approximately 25-33 percent.

With full arc admission, all four valves open simultaneously. At full power, this results in all four valves open approximately 50-52 percent. Since each control valve admits steam to only one ninety degree quadrant of the turbine rotor, this modification results in full-arc steam admission. Full arc admission reduces the cyclical stresses on the turbine blades that accompany partial arc admission.

The proposed changes to the MCPR operating limits are based on an analysis of the load rejection without bypass event for the full arc configuration.

Basis for proposed no significant hazards consideration determination: The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870). The examples of actions involving no significant hazards consideration include: (vi) A change which either may result in some increase to the probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan.

The changes proposed in this amendment request are encompassed by this example. The revised MCPR Operating Limits are based on calculations of the load rejection without bypass event in the full arc configurations. The load rejection without bypass event begins with a loss of generator load. The resulting power/load imbalance closes the turbine control valves. Full stroke closure time is 150 msec. Since in full arc all the turbine control valves are only partially open, closure is more rapid than in partial arc where full stroke time is required. The effect on the reactor core of this more rapid closure is that the void collapse occurs faster relative to the insertion to negative reactivity by the scram signal, which is unaffected by the partial to full arc change. The potential consequences of a load rejection without bypass event (a previously analyzed event) are therefore more severe for the full arc configuration. However, the consequences are still within the relevant acceptance criteria because the MCPR Operating Limit has been increased accordingly, thus preserving the original safety margin. Therefore, the Commission proposes to determine that the proposed license amendment does not involve significant hazards considerations.

Local Public Document Room location: Penfield Library, State University College of Oswego, Oswego, New York.

Attorney for licensee: Mr. Charles M. Pratt, Assistant General Counsel, Power Authority of the State of New York, 10 Columbus Circle, New York, New York 10019.

NRC Branch Chief: Domenic B. Vassallo.

Power Authority of the State of New York, Docket No. 50-286, Indian Point Unit No. 3, Westchester County, New York

Date of amendment request: January 6, 1984.

Description of amendment request: The proposed amendment would incorporate into the license the Commission approved Physical Security Plan.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for a no significant hazards determination by providing certain examples (48 FR 14870). One of the examples (ii) of actions not likely to involve a significant hazards consideration related to "a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications: . . ." in that the amendment would add a license condition to incorporate the Commission approved Physical Security Plan into the license. On this basis, the Commission proposes to determine that this action does not involve a significant hazards consideration. (The Physical Security Plan consists of Safeguards Information of the type specified in 10 CFR 73.21 and accordingly is withheld from public disclosure.)

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York 10601.

Attorney for licensee: Mr. Charles M. Pratt, 10 Columbus Circle, New York, New York 10019.

NRC Branch Chief: Steven A. Varga.

South Carolina Electric & Gas Company, South Carolina Public Service Authority, Docket No. 50-395, Virgil C. Summer Nuclear Station, Unit 1, Fairfield County, South Carolina

Date of amendment request: October 21, 1983.

Description of amendment request: The amendment would change Technical Specification 3.4.9.3, "Overpressure Protection Systems," from a power operated relief valve (PORV) system to a residual heat removal (RHR) relief valve system. The associated Technical Specification bases and surveillance requirements would also be changed to reflect the RHR relief valve system.

Basis for proposed no significant hazards consideration determination: The RHR relief valve system would have a lower lift setting of 450 psig to protect against overpressure compared

to the lowest lift setting of 540 psig for the PORV system. Also, the RHR relief valve system would change the action statement to require depressurization and venting of the reactor coolant system following 7 days or 8 hours for 1 or 2 inoperable valves respectively. The present PORV system action statement only requires Commission notification and preparation of a special report for any inoperable valve(s). The coolant flowpath for overpresssure protection will remain essentially unchanged, since both the PORVs and RHR relief valves are located inside containment and discharge to the pressurizer relief tank location inside containment. Surveillance requirements and bases would reflect the new system, but essentially remain unchanged.

The Commission has provided certain examples (48 FR 14870) of actions likely to involve no significant hazards considerations. One of the examples relates to a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications. The amendment involved here is similar to this example in that it tightens the limitation on the lift setting and provides a more restrictive action statement. Accordingly, the Commission proposes to determine that this change does not involve a significant hazards consideration.

Local Public Document Room location: Fairfield County Library, Garden and Washington Streets, Winnsboro, South Carolina 29180.

Attorney for licensee: Randolph R. Mahan, P.O. Box 764, Columbia, South Carolina 29218.

NRC Branch Chief: Elinor G. Adensam.

Southern California Edison Company, Docket Nos. 50–206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of amendment request: May 7, 1981, November 30, 1983, and December 30, 1983.

Description of amendment request: The proposed amendment requested by the licensee's November 30, 1983 submittal, as supplemented December 30, 1983, would revise Section 3.7, "Auxiliary Electrical Supply," and Section 4.4, "Emergency Power System Periodic Testing." The revision to Section 4.4 includes, among other changes, substantive revisions to the surveillance requirements for the station batteries. This proposed request supersedes the licensee's October 20, 1978 request regarding surveillance requirements for the station battery which was previously noticed in the **Federal Register** (48 FR 38421, August 23, 1983). In addition, by application dated May 7, 1981, the licensee proposed certain Technical Specification modifications that included changes related to the auxiliary feedwater system. Proposed technical specification 3.4.3 would add limiting conditions for operation regarding the motor driven and steam driven auxiliary feedwater pumps. This proposed technical specification was inadvertently omitted from License Amendment No. 65 dated October 22, 1982.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of standards of no significant hazards consideration by providing certain examples (April 6, 1983, 48 FR 14870). These examples are not applicable in many cases to the proposed November 30, 1983 application. The basis for concluding that the standards are met with respect to a no significant hazards consideration is discussed below.

The licensee discussed each of the proposed changes. The portion of the licensee's discussion describing each change is presented below.

Section 3.7.I This section would be revised to include power supply requirements in Modes 1 through 4, instead of only defining requirements in Modes 1 and 2 as is presently the case. These changes would be consistent to the extent parcticable, with the Standard Technical Specifications (STS) and will formalize the existing station practice. By adding specific power supply requirements in Modes 3 and 4, the plant safety is enhanced. The remainder of the revisions in this section would be editorial in nature involving no substantive changes and including the use of standard outline format. Specification 3.7.I.A would be consistent with the definition of offsite power supply incorporated into Specification 3.7.II (revised to 3.7.III) by Amendment No. 68 to the license. Specification 3.7.I.A.3.C would be revised to include all required Vital Buses including the newly installed Vital Buses which support equipment installed as part of the TMI modifications. Specification 3.7.I.A.4 would be revised for clarity to explicitly require the operability of the battery banks associated with the DC buses.

Section 3.7.II This section would replace the previous 3.7.II (now 3.7.III) to add the Uninterruptible Power Supply (UPS) for MOV 850C which were implied by the Surveillance Requirements contained in Technical Specifications 4.4.B.1.g (now 4.4.E), 4.4.B.3 (now 4.4.F) and 4.4.D. The requirements imposed on the operability of the system would be consistent, to the extent practicable, with the STS and will formalize the existing station practice. The action requirements would allow continued operation for 72 hours with either one load sequencer inorperable or the UPS inoperable, or both, since this event would still allow one train of safety injection to be operable due to the configuration of the safety injection system at the station. By adding these specific requirements which are omitted from the existing Technical Specification, the plant safety would be enhanced.

Section 3.7.III This section (previously 3.7.II) would be revised editorially into standard outline format. Specification 3.7.III.A.3 would be revised for consistency with 3.7.I.A.4 for the DC buses and to require the operability of all Vital Buses associated with equipment required to be operable in Modes 5 and 6. A review of Sections 3.1 and 4.1 of the Technical Specifications determined that the only major instruments, components or systems supplied by the vital buses that are required in Modes 5 and 6 are: (1) RCS temperature indication (table 4.1.1–5); (2) Pressurizer pressure (Table 4.1.1–7); (3) Pressurizer level (Table 4.1.1–8); (4) Area Radiation Monitoring System (Table 4.1.1–18); (5) Nuclear Flux, 3 NIS Channels Table 3.5.1); and (6) 2 Source Range NIS Channels, Mode 6 only, (TS 3.8.A.2).

The following vital bus review includes a description of which vital buses provide power to the instruments indicated above. (1) Vital Buses 1, 2 and 3 each have one train of RCS temperature (T-cold), Pressurizer pressure (narrow range). Each vital bus has two NIS channels, one power range and one source or intermediate range. All other loads on Vital Buses 1, 2 and 3 are not required in Modes 5 or 6. (2) Vital Buses 3A, 5 and 6 have predominately post-TMI loads. None of the loads on these buses in required or necessary in Modes 5 or 6. (3) Vital Bus 4 presently has the only wide-range Pressurizer pressure indicator and cold-calibrated pressurizer level indicator. It also provides power to valves in both flow paths to the core from the charging pumps. In addition, all Area Radiation Monitors and Operational Radiation Monitors are supplied from this bus. Also, Vital Bus 4 is the alternate supply for one source range and one power range NIS channel.

Accordingly, Vital Bus 4 would be required to be operable at all times and since Vital Buses 1, 2 and 3 each have only one power range NIS channel and

two additional channels are required in addition to those associated with Vital Bus 4, two buses of the three are required. This configuration is modified to allow for the two source range channels as required in Mode 6 by specifying that Vital Bus 1 be operable.

Section 4.4 This section would be revised so that the equipment surveillance is applicable as required by the newly established mode related LCO's of Specification 3.7 as discussed above. The format would also be revised to be consistent with the new LCO's for the load sequencers and the MOV 850C UPS. Specific changes are discussed below.

Section 4.4.B.g (Deleted) This section would be deleted since the load sequencer surveillance is transferred to 4.4.E. This revision would involve no substantive changes.

Section 4.4.D The proposed Technical Specifications would revise the battery surveillance requirements consistent with the STS. The STS are based on the recommendations of Regulatory Guide 1.120, "Maintenance, Testing, and Replacement of Large Lead Storage Batteries for Nuclear Power Plants," and the Institute of Electrical and Electronics Engineers (IEEE) Standard 450–1980, "IEEE Recommended Practice of Maintenance, Testing, and Replacement of Large Lead Storage Batteries for Generating Stations and Substations."

Implementation of the STS at San Onofre Unit 1 would assure that stanby DC power supplies are maintained in an operable condition as required by the proposed mode dependent LCO's. The proposal involves significant changes to format and content. To assure all considerations are addressed, the following discussion provides background information on the safety function of San Onofre Unit 1 batteries and specific information on the actual surveillances. Item numbers correspond to the proposal.

Background Information The safety function of Battery Banks 1 and 2 is to provide continuous power to necessary plant loads in response to a loss of offsite power (LOP) event. The time period during which the batteries must supply continuous power is from LOP initiation until a diesel generator provides sufficient output to carry all necessary plant loads. In the event of a safety injection response to a loss of coliant accident (LOCA) coincident with the LOP, this time period is approximately fifteen seconds with a completely automatic plant response. In the event of LOP without a coincident LOCA, this time period has been estimated to be a maximum of seven minutes with manual operator action required. However, in situations requiring manual operator action, the NRC has established a common practice of requiring that thirty minutes be available to complete the manual action. Therefore, the limiting safety function of Battery Bank 1 and 2 is to provide continuous power to necessary plant loads for thirty minutes following a LOP event. To assure Battery Banks 1 and 2 are adequate to maintain necessary plant loads for thirty minutes, both banks are conservatively sized for a design duty cycle of ninety minutes.

The safety function of the UPS is to provide the necessary power for one operation of MOV 850C in the event of a coincident LOP, LOCA in the safety injection leg aligned to diesel generator 1 and loss of diesel generator 2. To assure the UPS has adequate capacity to perform this safety function, the UPS is sized to perform two consecutive operations (opening and closing twice) of MOV 850C.

Section 4.4.D.1 This surveillance has been retained from the current Technical Specifications to assure the standby DC power system is available if required.

Section 4.4.D.2 The San Onofre Unit 1 DC battery banks have a nominal voltage of 125 volts.

Section 4.4.D.2.a.1 While the current Technical Specifications require a pilot cell voltage greater than or equal to 2.17 volts, the proposal establishes the minumum acceptable pilot cell voltage as 2.13 volts. As discussed in IEE STD 450–1980, cell voltage is not, by itself, an indication of the state of charge of the battery. The concern is that prolonged operation of cells below 2.13 volts can reduce the life expectancy of the cells. Since IEEE and NRC have endorsed a minimum acceptable pilot cell voltage of 2.13 volts, the current requirement of 2.17 volts is considered unnecessarily restrictive.

Section 4.4.D.2.a.2 The current Technical Specifications require an overall battery bank voltage greater than or equal to 125 volts while the proposed minimum is 129 volts. The proposed minimum formalizes actual practical at San Onofre Unit 1 for maintaining a battery bank under float charge conditions. As discussed in the comments on 4.4.D.2.a.1 above, a battery cell should be maintained at a minimum of 2.13 volts. By establishing an oveall minimum voltage of 129 volts, reasonable assurance is provided on a weekly basis that each connected cell (60 cells maximum) is at a minimum of 2.13 volts.

Section 4.4.D.2.b The proposal introduces surveillance requirements in response to a battery discharge with terminal voltage below 110 volts or battery overcharge with terminal voltage above 150 volts. The current Technical Specifications lack a corresponding requirement. The proposed responses to abnormal battery conditions assure batteries are returned to the normal state within an acceptable time period.

Section 4.4.D.2.b.1 The current Technical Specifications require the voltage of each connected cell to be greater than or equal to 2.17 volts and not decreased more than .08 volts from the value observed during the original acceptance test. The proposed minimum voltage is 2.13 volts with no comparison to the original acceptance test. The comments on 4.4.D.2.a.1 above concerning a minimum voltage of 2.13 volts also applies to this item. The comparison requirement is deleted from the proposal since the STS lack a corresponding requirement and this comparison provides misleading information when determining battery bank operability.

The current Technical Specifications require the specific gravity of each connected cell to be greater than or equal to 1.20 and not decrease more than .02 from the value observed during the previous test. The proposal requires that specific gravity of each connected cell to be greater than or equal to 1.195 and the average of all conncected cells to be greater than 1.205 in accordance with the STS. The proposal eliminates the requirement for a comparision with values observed during the previous test since the STS lack a coresponding requirement and this comparison yields misleading information for determining battery bank operability.

Section 4.4.D.2.b.2 The proposal introduces a quantitative acceptance parameter for the allowable resistance of cell-to-cell and terminal connections. This criterion is absent from the current Technical Specifications. Therefore, inclusion of this criterion in the proposal provides an additional test of the battery bank condition. The value for the aceptance parameter was derived from the STS.

Section 4.4.D.2.b.3 Ten connected cells are considered to be representative of a battery bank, which is consistent with the San Onofre Unit 2 Technical Specifications. Battery Banks 1 and 2 were sized based on an electrolyte temperature of 61°F. Therefore, a minimum electrolyte temperature above 61°F provides assurance that the batteries operate in their designed intended thermal environment. The UPS is excluded from this provision since the

UPS thermal environment is controlled by atmospheric temperature and process heat. The arrangement allows electrolyte temperature to occasionally drop below 61°F, particularly during Modes 5 and 6 when no process heat is produced (the UPS is not required to be operable in Modes 4, 5 and 6). However, the UPS battery bank is adequately sized to allow reliable operation in a low temperature environment. A calculation has been performed to show that with an electrolyte temperature of 35°F, the UPS has adequate capacity for two consecutive, complete operations (open and close twice) of MOV 850C. Additionally, the UPS is only required to be operable in Modes 1, 2 and 3, during which time the reactor coolant system is greater than or equal to 350°F and process heat is produced by turbine plant systems.

Section 4.4.D.2.c.5 The proposed charger output of 200 amps DC reflects battery bank requirements based on the 8 hour charging period. The proposed charger output at 130 volts DC formalizes station practice.

Section 4.4.D.2.c.6 The proposed charger test time of 8 hour reflects battery bank requirements and establishes a consistent test duration for the UPS and Battery Banks 1 and 2.

Section 4.4.D.2.d The current Technical Specifications require a battery service test be conducted on Battery Bank 1 for eight hours, Battery Bank 2 for three hours and the UPS for two consecutive complete strokes of MOV 850C. The proposed Technical Specifications require a battery service test for each respective battery bank's design duty cycle. As discussed above under background information, the duty cycles for Battery Banks 1 and 2 are ninety minutes while the duty cycle for the UPS is two consecutive complete strokes of MOV 850C. The proposed service test demonstrates battery capability to perform as designed. The current eight (Battery Bank 1) and three (Battery Bank 2) hour test durations are eliminated for consistency with the STS and IEEE STD 450–1980. The current service test procedure consists of applying the design battery load for ninety minutes, followed by a zero load period (no load applied to the battery) of six and one-half hours (Battery Bank 1) and one and one-half hours (Battery Bank 2). As approved by the NRC, the zero load period was performed merely to comply with the test duration requirements. Since the zero load period is inconsequential to the service test and to the determination of battery acceptability, the zero load period has been eliminated in the proposal.

Section 4.4.D.2.e The current Technical Specifications require a performance discharge test every sixty months subsequent to the satisfactory completion of an eighteen month battery service test. The proposed Technical Specifications also require a once per sixty month performance discharge test, but this test can be performed in lieu of the service test, once per sixty month interval in accordance with the STS. While performance of the service test is not a prerequisite for the performance discharge test in the proposal, the performance discharge test is sufficient for determining the acceptability of the battery banks. The batteries were designed to adequately maintain plant loads (as would be demonstrated in a service test) even if the battery capacity drops to 80% of the manufacturer's rating when subjected to a performance discharge test. Since the performance test acceptance criterion is 80% capacity, reasonable assurance exists that the batteries will pass a service test if they pass a performance discharge test.

Section 4.4.D.2.f The proposal introduces surveillances to be performed in response to battery degradation or aging. The current Technical Specifications lack a corresponding requirement. The proposed requirement assures a battery bank exhibiting signs of degradation or aging is properly monitored and corrective action taken if required.

Section 4.4.E The existing requirements of 4.4.E relate to surveillance of the auxiliary feedwater pumps. New proposed changes to the auxiliary feedwater system Technical Specification will be submitted for NRC review and approval at least 90 days prior to startup from the present outage. In anticipation of submitting revised specifications, the licensee proposes to delete the current Section 4.4.E specifications. By letter dated December 22, 1983, the NRC staff informed the licensee that adequate justification for deleting the current specification had not been provided and that the NRC did not intend to act on this portion of the Technical Specification change request. By letter dated December 30, 1983, the licensee provided additional information. Based on discussions between the NRC staff and the licensee, it was agreed that the request to delete the current provisions of Section 4.4.E will not be acted on at this time. New requirements of 4.4.E consist of the surveillance requirements for the load sequencers previously included in section 4.4.B.g and do not include any substantive changes.

Section 4.4.F This new section consists of the surveillance requirements for the diesel generators and the load sequencers previously included in 4.4.B.3. The only substantive change involves the use of 18 months for the interval between tests rather than refueling cycles. This change is consistent with the STS for testing frequencies of this nature and provides improved assurance of the operability of the required system when operating fuel cycles are extended. This change would enhance plant safety.

The licensee's November 30, 1983 submittal included a discussion of the proposed action with respect to a no significant hazards consideration. The submittal addressed the three standards of 10 CFR 50.92(c). This discussion has been reviewed and the Commission finds it acceptable with the exception of the proposed deletion of current Section 4.4.E as discussed above. Each of the three standards is discussed below.

First Standard With regard to the first standard, the licensee stated, "As discussed in the Safety Analysis, all changes will result in operation of the facility in accordance with the established design basis and, therefore, will not significantly increase the probability or consequences of an accident previously evaluated."

Second Standard The licensee stated the following with regard to the second standard, "As discussed in the Safety Analysis, all changes will result in operation of the facility in accordance with the established design basis, and therefore, will not create the probability of a new or different kind of accident from any accident previously evaluated."

Third Standard The licensee's discussion of the third standard states, "As discussed in the Safety Analysis, no safety margins will be affected by the changes identified in this proposed amendment."

Addition of Proposed Technical Specification 3.4.3 One of the examples of amendments not likely to involve a significant hazards consideration is example (ii), "a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specification." The proposed change regarding the addition of Technical Specification 3.4.3 fits this category because it requires that the motor driven and turbine driven auxiliary feedwater pumps and associated flow paths for operable in Modes 1, 2, and 3 where these requirements does not exist now.

Because the submittals by the licensee appear to demonstrate that the

standards in 10 CFR 50.92 have been met, the Commission proposes to determine that the applications do not involve a significant hazards consideration.

Local Public Document Room Location: San Clemente Branch Library, 242 Avenida Del Mar, San Clemente, California 92672.

NRC Branch Chief: Dennis M. Crutchfield.

Southern California Edison Company, Docket Nos. 50-206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of amendment request: December 5, 1983.

Description of amendment request: This amendment would add limiting conditions for operation and surveillance requirements to the Technical Specifications to provide for redundancy in Decay Heat Removal Capability in all modes of operation. During startup and power operation, all three reactor coolant loops and their associated steam generators and reactor coolant pumps would be required to be in operation. Specifications regarding Decay Heat Removal Capability for Hot Standby, Hot and Cold Shutdown, and Refueling Modes are also proposed. The proposed changes supersede Sections 3.1.2, Section 3.8 and Table 4.1.2 of Proposed Change No. 96, submitted by letter dated December 1, 1980 (see 48 FR 38422, August 23, 1983).

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of standards of no significant hazard consideration determination by providing certain examples (April 6, 1983, 48 FR 14870). One of the examples of actions likely to involve no significant hazards consideration relates to a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications: for example, a more stringent surveillance requirement. The proposed amendment adds more stringent limiting conditions for operation and surveillance requirements and, therefore, falls within the category of the cited example. On this basis, the staff proposes to determine that the requested action would involve a no significant hazards consideration determination.

Local Public Document Room Location: San Clemente Branch Library, 242 Avenida Del Mar, San Clemente, California 92672.

Attorney for licensee: Charles R. Kocher, Assistant General Counsel, James Beoletto, Esquire, Southern California Edison Company, Post Office Box 800, Rosemead, California 91770.

NRC Branch Chief: Dennis M. Crutchfield.

The Toledo Edison Company and The Cleveland Electric Illuminating Company, Docket No. 50-346, Davis-Besse Nuclear Power Station, Unit No. 1, Ottawa County, Ohio

Date of amendment request: May 2, 1983 (Item 3 only).

Description of amendment request: The proposed amendment would permit conducting required surveillance testing of the Main Steam Isolation Valves (MSIVs), per paragraph 4.6.3.1.1 of the Technical Specifications, after entering Mode 4 but prior to entering Mode 3. This would replace the present requirement to test the MSIVs prior to entering Mode 4.

Basis for proposed no significant hazards consideration determination: When the plant is operating in Modes 5 or 6, the temperature of the reactor coolant does not exceed 200°F and therefore no steam is being produced. When the plant is operating in Mode 4, the temperature of the reactor coolant is between 200°F and 280°F and sufficient steam is generated to fill the main steam lines. This amendment would permit testing of the MSIVs in Mode 4 when there is sufficient steam in the main steam lines to keep the valve piston rings wet thereby avoiding damage to the valve bodies. Testing these valves when the piston rings are dry could damage the valve bodies and reduce the reliability of the valves for subsequent operation.

The purpose of the required testing is to demonstrate operability of the MSIVs which must function to provide containment isolation in the event of certain types of accidents. The intent of the current surveillance requirement is to demonstrate the operability of automatic containment isolation valves to ensure that the containment atmosphere will be isolated in the event of a release of radioactive material or pressurization of the containment. Performing the required testing prior to entering Mode 4 demonstrates valve operability before the potential for containment pressurization exists. Permitting the performance of the surveillance testing for the MSIVs in Mode 4 allows the potential for containment pressurization to exist before MSIV operability is demonstrated thereby increasing risk slightly. However, this increase in risk is offset by eliminating the potential for valve damage thereby increasing its reliability and decreasing risk of failure.

The proposed change has been reviewed against each of the criteria in 10 CFR 50.92, namely that the proposed change would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

In addressing each of the above criteria, the proposed change in required testing of the MSIVs from prior to Mode 4 to during Mode 4 would not increase the probability of an accident previously evaluated because accidents previously evaluated are normally postulated to occur when the reactor is operating. The testing of the valves with the current Technical Specifications and with the proposed Technical Specifications would be when the reactor is not operating or when the reactor is not critical but is shut down or starting up from a cold shut down. Both situations have no effect on accidents associated with the steam lines which have been previously evaluated. The proposed change would not affect the consequences of an accident previously evaluated because the postulated accidents related to the MSIV involve failure modes of the valve which produce consequences during the testing phase much less severe than if the valves would fail during times when the reactor is operating, which is when the accidents previously evaluated are postulated to occur. The proposed change would possibly involve a reduction in margin of safety as indicated above; however, because this reduction in margin of safety, which is due to the possible increase in pressure of the containment due to a postulated steam break, would be compensated by a possible increase in reliability of the valve and decrease in the risk of valve failure, the proposed change is not considered significant. On this basis, the Commission proposes to determine that the application does not involve a significant hazards consideration.

NRC Branch Chief: John F. Stolz.

Vermont Yankee Nuclear Power Corporation, Docket No. 50–271, Vermont Yankee Nuclear Power Station, Windham County, Vermont

Date of amendment request: January 23, 1984.

Description of amendment request: Modification of the Technical Specifications to reflect a change in the main steam line low pressure setpoint, when the reactor is in the run mode, from 850 to 800 psig. The change will reduce the probability of spurious low pressure trips.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for the application of standards for determining whether a significant hazards consideration exists by providing examples of amendments that are considered not likely to involve significant hazards considerations (48 FR 14870). One such amendment involves a change which either may result in some increase in the probability or consequences of a previously-analyzed accident or may reduce in some way a safety margin, but where the results of the changes are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan: for example, a change resulting from the application of a small refinement of a previously used calculational model or design method. The change proposed by the licensee would reduce the main steam line low pressure set point from 850 to 800 psig.

The main steam line low pressure isolation setpoint trip function is provided primarily to provide protection against a pressure regulator malfunction which could cause the control and/or bypass valves to open, resulting in a rapid depressurization and cooldown of the reactor vessel. According to the licensee's analysis, the 800 psig trip setpoint limits the depressurization such that no excessive vessel thermal stress occurs as a result of a pressure regulator malfunction. No other adverse effects have been identified from this change, and the reduction in setpoint should reduce spurious primary containment isolations consistent with the licensee's proposed resolution to NUREG–0737, Item II.K.3.16, Reduction in the Challenges and Failures of Relief Valves. Therefore the change is clearly within all acceptable criteria with respect to the reactor coolant system and its associated auxiliaries as contained in Section 15.3.1 of the Standard Review Plan (SRP) "Loss of Forced Reactor Coolant Flow Including Trip of Pump Motor and Flow Controller Malfunctions" which is the applicable section of the SRP for the system involved.

Therefore, since the application for amendment involves proposed changes that are similar to the examples for which no significant hazards consideration exists, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Brooks Memorial Library, 224 Main Street, Brattleboro, Vermont 05301.

Attorney for licensee: John A. Ritscher, Esquire, Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02110.

NRC Branch Chief: Domenic B. Vassallo.

Vermont Yankee Nuclear Power Corporation, Docket No. 50–271, Vermont Yankee Nuclear Power Station, Windham County, Vermont

Date of amendment request: January 23, 1984.

Description of amendment request: Technical Specifications (TS) changes to incorporate revised radiological effluent and environmental monitoring limiting conditions for operation, action statements, and surveillance requirements. The proposed changes are in response to NRC requests of July 11, 1978 and November 15, 1978 and supersede in its entirety a licensee submittal of February 13, 1979. The proposed changes are intended to implement the design objectives and requirements of 10 CFR 50.34(a), 10 CFR 50.36a, 10 CFR 20,, 10 CFR 50 Appendix A, General Design Criteria 60 and 64 and 40 CFR 190.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance for the application of standards for determining whether a significant hazards consideration exists by providing examples of amendments that are considered not likely to involve significant hazards considerations (48 FR 14870). One such amendment involves a change to make a license conform to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations.

The change proposed by the licensee is intended to implement: 10 CFR 50.34(a), which pertains to Design Objectives for equipment to control releases of radioactive materials in effluents from nuclear power reactors; 10 CFR 50.36a, which pertains to technical specifications on effluents from nuclear power reactors; 10 CFR 20, which pertains, in part, to the controlled release of radioactive materials in liquid and gaseous effluents; 10 CFR 50, Appendix A, General Design Criteria 60, which pertains to control of releases of radioactive materials to the environment and 64, which pertains to monitoring radioactivity releases; and 40 CFR 190, which pertains to radiation doses to the public from operations associated with the entire uranium fuel cycle. This amendment, therefore, reflects changes to make the Vermont Yankee license conform to changes in the regulations. Since the licensee is presently obligated by these regulations to control and limit offsite releases of radioactive materials to levels which are as low as is reasonably achievable, this license change will only result in very minor changes to facility operations which are clearly in keeping with the regulations.

Therefore, since the application for amendment involves proposed changes that are similar to the examples for which no significant hazards consideration exists, the staff has made a proposed determination that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Brooks Memorial Library, 224 Main Street, Brattleboro, Vermont 05301.

Attorney for licensee: John A. Ritscher, Esquire, Ropes and Gray, 225 Franklin Street, Boston, Massachusetts 02110.

NRC Branch Chief: Domenic B. Vassallo.

Wisconsin Electric Power Company, Docket Nos. 50–266 and 50–301, Point Beach Units 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of amendment request: December 10, 1981.

Description of amendment request: The proposed changes to the Technical Specifications would provide limiting conditions for operation and surveillance requirements related to new inverters and station batteries. Changes to the original application have been made which now require all four batteries and their associated DC systems be operable prior to taking one or both reactors critical. The original application proposed that one battery and its associated DC system be allowed to be inoperable prior to taking one or both reactors critical.

Basis for proposed no significant hazards consideration determination. The Commission has provided guidance concerning the application of these standards by providing certain examples (48 FR 14870). One of the examples of actions involving no significant hazards considerations

relates to additional limitations, restrictions or controls not presently included in the technical specifications (ii). The proposed amendments would provide limiting conditions for operation for new equipment similar to that currently in effect for similar equipment.

The licensee's original application proposed that one of the four batteries and associated DC systems be allowed to be inoperable prior to taking one or both reactors critical. While most standard technical specifications relating to limiting conditions for operation of safety related components allow such components to be inoperable for short periods of time after which action statements must be followed, it is usually contemplated that all such components be operable prior to taking a reactor critical. While the licensee could have met the intent of the technical specifications by restoring the inoperable battery and DC system to operable status within the allowable time frame, inability to do so would necessitate the need for a reactor shutdown. Therefore, the staff, during a September 2, 1983 telephone conference call with the licensee, proposed wording changes to the licensee's original December 10, 1981 application which would require all four batteries and associated DC systems be operable prior to taking one or both reactors critical. The licensee agreed to these changes. Because these changes place additional restrictions on operation of the batteries and associated DC systems, the staff proposes to determine that the changes to the original amendment application do not involve a significant hazards consideration. The original application for amendments was noticed on July 20, 1983 (48 FR 33094).

Local Public Document Room location: Joseph P. Mann Public Library, 1516 16th Street, Two Rivers, Wisconsin.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts and Trowbridge, 1800 M Street, NW., Washington, D.C. 20036.

NRC Branch Chief: James R. Miller.

Wisconsin Electric Power Company, Docket Nos. 50–266 and 50–301, Point Beach Nuclear Plant Units 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of amendment request: January 27, 1984.

Description of amendment request: The application proposes changes to the Technical Specifications concerning reporting requirements. The changes were submitted at the request of the Commission and are intended to conform to the reporting requirements of 10 CFR 50.73.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidelines concerning the application of the standards by providing certain examples (48 FR 14870). One of the examples of actions involving no significant hazards considerations is example (vii), a change to make a license conform to changes in the regulations, where the license change results in very minor changes to facility operations clearly in keeping with the regulations

The changes proposed by the licensee are intended to modify the Technical Specification reporting requirements to conform with the recently published final rule on reportability requirements, 10 CFR 50.73. The staff finds that they meet the Commission's example vii of actions likely to involve no significant hazards considerations. Therefore, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Joseph P. Mann Public Library, Two Rivers, Wisconsin.

Attorney for licensee: Gerald Charnoff, Esq., Shaw, Pittman, Potts & Trowbridge, 1800 M Street NW., Washington, D.C. 20036.

NRC Branch Chief: James R. Miller.

PREVIOUSLY PUBLISHED NOTICES OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices because time did not allow the Commission to wait for this regular monthly notice. They are repeated here because the monthly notice lists all amendments proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the **Federal Register** on the day and page cited. This notice does not extend the notice period of the original notice.

Consumers Power Company, Docket No. 50–155, Big Rock Point Plant, Charlevoix County, Michigan

Date of amendment request: December 15, 1981, as revised December 16, 1983.

Description: The amendment would approve changes which would incorporate a description of an operating requirements for the new Stack Gas Monitoring System.

Date of Publication of individual notice in "Federal Register:" March 1, 1984 (48 FR 7671).

Expiration date of individual notice: April 3, 1984.

Local Public Document Room location: Charlevoix Public Library, 107 Clinton Street, Charlevoix, Michigan 49720.

Consumers Power Company, Docket No. 50–155, Big Rock Point Plant, Charlevoix County, Michigan

Date of amendment request: December 16, 1983.

Description: The amendment would place lower, more restrictive limits on the allowable concentration of radioactive iodine in the reactor coolant than currently exist.

Date of Publication of individual notice in "Federal Register:" March 1, 1984 (48 FR 7669).

Expiration date of individual notice: April 3, 1984.

Local Public Document Room location: Charlevoix Public Library, 107 Clinton Street, Charlevoix, Michigan 49720.

Duke Power Company, Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of amendment request: December 12, 1983.

Brief Description of amendment: The proposed technical specification revisions involve changes in operating limits related to the boron injection system and control rod insertion limits. McGuire Units 1 and 2 have been operating with Westinghouse 17x17 (STD) fueled cores. It is proposed to refuel both Units 1 and 2 with Westinhouse 17x17 Optimized Fuel Assembly (OFA) regions. The major differences are the use of six intermediate (mixing vane) Zircaloy grids for the OFA fuel versus six intermediate (mixing vane) Inconel grids for STD fuel and a reduction in fuel rod diameter. As a result, future core loading would range from an approximately ⅓ OFA–⅔ STD transition core to eventually an all OFA fueled core. The OFA fuel has similar design features compared to the STD fuel which has had substantial operating experience in an number of nuclear plants. Major advantages for utilizing the OFA are: (1) Increased efficiency of the core by reducing the amount of parasitic material and (2) reduced fuel cycle costs due to an optimization of water to uranium ratio.

Regarding the deletion of boron injection system Technical Specification 3/4.5.4 for Unit 1, the proposed amendments would delete the Technical Specification requirements related to the boron injection system for Unit 1 as a result of bypass piping being installed around the boron injection tank.

In the matter of revised control rod insertion limits Technical Specification change, the proposed amendments would revise Technical Specification rod insertion limits for Units 1 and 2 as a result of hardware limitations and use of an appropriate conversion correlation.

Date of publication of individual notice in "Federal Register:" March 2, 1984 (49 FR 7893).

Expiration date of individual notice: April 2, 1984.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28242.

Florida Power and Light Company, et al., Docket No. 50-389, St. Lucie Plant, Unit No. 2, St. Lucie County, Florida

Date of amendment request: February 24, 1984.

Brief description of amendment: The amendment would modify an existing technical specification requirement for the initial inservice inspection for two mechanical snubbers to permit inspection at the first refueling outage.

Date of publication of individual notice in "Federal Register:" March 13, 1984, 49 FR 9516.

Expiration date of individual notice: April 12, 1984.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, fort Pierce, Florida 33420.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Dockets Nos. 50-321 and 50-366, Edwin I. Hatch Nuclear Plant, Units Nos. 1 and 2, Appling County, Georgia

Date of amendment request: December 14 and 20, 1983.

Brief description of amendment: The proposed amendments would add a closure time requirement for Scram Discharge Volume (SDV) vent and drain valves to the Technical Specifications for both Hatch Units 1 and 2.

Date of publication of individual notice in "Federal Register:" February 27, 1984, 49 FR 7161.

Expiration date of individual notice: March 29, 1984.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia.

Southern California Edison Company, et al., Docket Nos. 50-361 and 50-362, San Onofre Nuclear Generating Station, Units 2 and 3, San Diego, California

Date of amendment request: January 3, 1984.

Brief description of amendment: Proposed changes to the Technical Specifications limit on operation of the 8-inch containment purge system from 1,000 hours per 365 days to 3,000 hours per 365 days.

Date of publication of individual notice in "Federal Register:" February 2, 1984 (49 FR 4166).

Expiration date of individual notice: March 5, 1984.

Local Public Document Room location: San Clemente Library, 242 Avenida Del Mar, San Clemente, California.

Wisconsin Electric Power Company, Docket Nos. 50-266 and 50-301, Point Beach Nuclear Plant Unit Nos. 1 and 2, Town of Two Creeks, Manitowoc County, Wisconsin

Date of amendment request: December 23, 1983.

Brief description of amendment: The amendments would revise the surveillance interval for evaluation of the leakage integrity of post-accident recovery systems outside containment.

Date of publication of individual notice in "Federal Register:" February 16, 1984, 49 FR 6401.

Expiration date of individual notice: March 19, 1984.

Local Public Document Room location: Joseph P. Mann Public Library, 1516 Sixteenth Street, Two Rivers, Wisconsin.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the 30-day period since publication of the last monthly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the **Federal Register** as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless indicated otherwise, the Commission has determined that the issuance of the amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of the amendments. If the Commission has prepared an Environmental Impact Appraisal related to these actions, it is so indicated. If indicated, this notice constitutes a negative declaration and indicates that the Commission has concluded that an environmental impact statement is not warranted because there will be no significant effect on the quality of the human environment.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluations and/or Environmental Impact Appraisals as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Alabama Power Company, Docket No. 50-348 Joseph M. Farley Nuclear Plant, Unit No. 1, Houston County, Alabama

Date of application for amendment: May 27, 1983.

Brief description of amendment: The amendment changes the Technical Specifications to correct the listing of hydraulic and mechanical snubbers that support safety related systems. The changes are purely administrative in nature.

Date of issuance: February 29, 1984.

Effective date: February 29, 1984.

Amendment No. 43.

Facility Operating License No. NPF-2. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" January 26, 1984 (48 FR 3345). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 29, 1984.

Significant hazards consideration comments received: No.

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303.

Carolina Power & Light Company, Docket Nos. 50–325 and 50–324, Brunswick Steam Electric Plant, Unit Nos. 1 and 2, Brunswick County, North Carolina.

Date of application for amendment: September 7, 1982.

Brief description of amendment: The amendments modify the Technical Specifications to provide a clarification of certain requirements, provide editorial and/or administrative corrections of certain requirements, and provide changes to reflect consistency with the actual plant design. The revisions are described as follows: revise the monthly channel check in the surveillance requirements, for Reactor Vessel Water Level to "Not Applicable" for instruments B21–LT–NO17D–3 and B21–LSH–NO17D–3, revise the valve group number from 7 to 8 for the reactor vessel head spray isolation valves, and revise the valve group number from 8 to 2 for the RHR discharge isolation valves to radwaste and the RHR process sampling valves, revise the minimum number of flame, heat, and smoke instruments required to be operable in their defined fire zones and add additional fire zones that have been established, revised the surveillance requirement for demonstrating Safety/Relief Valve (S/RV) operability, and revise the snubber list to reflect typographical corrections, snubber additions, and snubber deletions.

This amendment request also requested changes to the Technical Specifications regarding surveillance requirements for primary containment integrity and regarding by-passing the actuation of isolation functions associated with a loss of vacuum in the main turbine condenser. This portion of the amendment request will be addressed in a separate action.

Date of issuance: March 6, 1984.

Effective date: March 6, 1984.

Amendment Nos. 66 and 92.

Facility Operating License Nos. DPR–71 and DPR–62: Amendments revised the Technical Specifications.

Date of initial notice in "Federal Register:" The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 6, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: Southport, Brunswick County Library, 109 W. Moore Street, Southport, North Carolina 28461.

Commonwealth Edison Company, Docket Nos. 50–237/249/254/265, Dresden Nuclear Power Station, Units 2 and 3, Grundy County, Illinois; Quad Cities Station, Units 1 and 2, Rock Island County, Illinois

Date of application for amendment: August 31, 1983.

Brief description of amendment: The amendments approve Technical Specification changes which provide additional limiting conditions for operation for the Class 1E RPS power monitoring systems when the number of Class 1E power monitoring systems are less than specified in the Technical Specifications. They also approve surveillance requirements which include a functional test, channel calibration and verification of trip setpoints.

Date of issuance: February 14, 1984.

Effective date: February 14, 1984.

Amendment Nos: 80, 72, 86, 81.

Operating License Nos. DPR–19, DPR–25, DPR–29, and DPR–30. The amendments revised the Technical Specifications.

Date of initial notice in "Federal Register:" November 22, 1983 (48 FR 52808). The Commission's related evaluations supporting these amendments are contained in Safety Evaluations issued by Commission letters dated June 9, 1983 (Dresden 2 and 3) and December 29, 1983 (Quad Cities 1 and 2). The Technical Evaluation Reports prepared by the staff's consultant, Lawrence Livermore Laboratory, were also issued by these letters.

No significant hazards consideration comments received: None.

Local Public Document Room locations: Morris Public Library, 604 Liberty Street, Morris, Illinois 60451 (Dresden 2/3); and Moline Public Library, 504 17th Street, Moline, Illinois 61265 (Quad Cities 1/2),

Commonwealth Edison Company, Docket Nos. 50–237/249/254/265, Dresden Nuclear Power Station, Units 2 and 3, Grundy County, Illinois; Quad Cities Station, Units 1 and 2, Rock Island County, Illinois

Date of application for amendment: *January 12, 1982.*

Brief description of amendment: The amendments approve Technical Specification changes which revise the Limiting Condition for Operation concerning safety and relief valve position indication.

Date of issuance: February 24, 1984.

Effective date: February 24, 1984.

Amendment Nos: 81, 73, 87, 82.

Provisional Operating License No. DPR–19, and Facility Operating License Nos. DPR–25, DPR–29, and DPR–30. The amendments revised the Technical Specifications.

Date of initial notice in "Federal Register:" November 22, 1983 (48 FR 52807). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 24, 1984. No public or State comments were received with respect to the Commission's proposed determination that the amendments would involve a no significant hazards consideration determination.

Local Public Document Room locations: Morris Pubic Library, 604 Liberty Street, Morris, Illinois 60451 (Dresden 2/3); and Moline Public Library, 504 17th Street, Moline, Illinois 61265 (Quad Cities 1/2).

Commonwealth Edison Company, Docket No. 50–249, Dresden Nuclear Power Station, Unit 3, Grundy County, Illinois

Date of application for amendmennt: July 18, 1983 and August 25, 1983, as supplemented by letters dated November 3, 10 and 30, 1983, two letters dated December 13, 1983 and a letter dated December 16, 1983.

Brief description of amendment: The amendment authorizes changes to the Technical Specifications to support Cycle 9 operation of Dresden 3 with reload fuel supplied by and the associated analyses performed by the Exxon Nuclear Company. The amendment also authorizes Dresden 3 to install eight lead control blades designed and built by ASEA-Atom. Specifically related to the operation with an Exxon fuel reload, the amendment authorizes (1) a revision of the MAPLHGR curves for Dresden Unit 3, Cycle 9, (2) replacement of the K_f curve with Exxon Nuclear Corporation's reduced flow MCPR limits and (3) an administrative change to the bases of the reactor coolant safety limit specification which corrects an oversight in the Dresden Unit 3, Cycle 8 submittal.

Date of issuance: March 9, 1984.

Effective date: March 9, 1984.

Amendment No.: 74.

Facility Operating License No. DPR–25: Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" November 22, 1983 (48 FR 52807 and 52808). No public comments or hearing requests were received with respect to the Commission's proposed determination that the amendment would involve a no significant hazards consideration determination. The Commission's related evaluation of the

amendment is contained in a Safety Evaluation dated March 9, 1984. A verbal comment was received by the Commission on December 5, 1983 from Mr. R. Minue, Illinois Department of Nuclear Safety. The concerns Mr. Minue expressed relating to the ASEA–Atom blade cracking issue are addressed in Section 2.5 of the aforementioned Safety Evaluation.

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60451.

Consolidated Edison Company of New York, Docket No. 50–247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of Application for amendment: February 14, 1983.

Brief description of amendment: This amendment modifies the Technical Specifications by increasing the waiting time after shutdown before fuel from the reactor core can be moved. This increased waiting time is necessary to insure that the radiological consequences following a fuel handling accident inside of containment would be within the Commission's guidelines.

Date of issuance: February 21, 1984.

Effective date: February 21, 1984.

Amendment No.: 86.

Facility Operating License No. DPR–26. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" August 23, 1983 (48 FR 38395) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 21, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Consolidated Edison Company of New York, Docket No. 50–247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of Application for amendment: February 14, 1983.

Brief description of amendment: This amendment modifies the Technical Specification by requiring a minimum of 23 feet of water above the reactor pressure vessel flange during movement of control rods or fuel assemblies. The additional depth of water is to prevent inadvertent exposure of a fuel assembly during transfer.

Date of issuance: February 29, 1984.

Effective date: February 29, 1984.

Amendment No.: 87

Facilities Operating License No. DPR–26: Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" August 23, 1983 (48 FR 38395). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 29, 1984.

No signifcant hazards consideration comments received: No.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Consolidated Edison Company of New York, Docket No. 50–247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of Application for amendment: February 14, 1983.

Brief description of amendment: The amendment is an administrative change to the Technical Specifications which moves the reactor vessel surveillance program from Section 4.2 (item 7.2) to Section 3.1. No change to the requirements of the program are made.

Date of issuance: March 7, 1984.

Effective date: March 7, 1984.

Amendment No.: 88

Facility Operating License No. DPR–26. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" August 23, 1983 (48 FR 38395) The Commission's related evaluation of the amendment is contained in a letter dated March 7, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Consumers Power Company, Docket No. 50–155, Big Rock Point Plant, Charlevoix, County, Michigan

Date of application for amendment: June 20, 1983.

Brief description of amendment: The amendment approves changes to the Guard Training and Qualification Plan.

Date of Issuance: February 17, 1984.

Effective Date: February 17, 1984.

Amendment No.: 65.

Facility Operating License No. DPR–6 Amendment revised the license.

Date of initial notice in "Federal Register": September 21, 1983 (48 FR 43135) The Commission's related evaluation and other pertinent discussion related to this amendment are contained in a Safety Evaluation and letter dated February 17, 1984. No public or State comments were received with respect to the Commission's proposed determination that the requested action would not involve a significant hazards consideration determination.

Local Public Document Room location: Charlevoix Public Library, 107 Clinton Street, Charlevoix, Michigan 49720.

Consumers Power Company Docket No. 50–255, Palisades Plant, Van Buren County, Michigan

Date of application for amendment: August 3, 1983.

Brief description of amendment: The amendment approves (1) the deletion of Capsule A–60 from the Reactor Vessel Surveillance Capsule Program, and (2) modify the Reactor Vessel Surveillance Coupon Removal Schedule (Table 4.3.3) to provide the option of removing either a primary capsule or its equivalent counterpart located on the opposite side of the reactor core.

Date of issuance: February 28, 1984.

Effective date: February 28, 1984.

Amendment No. 79.

Provisional Operating License No. DPR–20. The amendment revised the Technical Specifications.

Date of initial notice in "Federal Register": October 26, 1983 (48 FR 49583) The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 28, 1984. No comments were received with respect to the Commission's proposed determination that the requested action would involve a no significant hazards consideration determination.

Local Public Document Room location: Kalamazoo Public Library, 315 South Rose Street, Kalamazoo, Michigan 49006.

Attorney for licensee: Judd L. Bacon, Esquire, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

NRC Branch Chief: Dennis M. Crutchfield.

Duke Power Company, Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of application for amendments: August 2, 1983.

Brief description of amendments: The amendments change the Technical Specifications related to response time for steamline isolation, deletion of mechanical snubbers, inoperable steam generator instrumentation channels, surveillance requirements for sprinkler system valves, and correction of typographical errors.

Date of issuance: February 29, 1984.

Effective date: February 29, 1984.

Amendment Nos.: 29 and 10.

Facility Operating License Nos. NPF–9 and NPF–17. Amendments revised the Technical Specifications.

Date of initial notice in "Federal Register:" October 27, 1983 (48 FR 49717) The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated February 29, 1984.

No significant hazards consideration comments received. No.

Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28242.

Duke Power Company, Dockets Nos. 50–269, 50–270 and 50–287, Oconee Nuclear Station, Units Nos. 1, 2, and 3, Oconee County, South Carolina

Date of application for amendments: March 17, 1983.

Brief description of amendments: These amendments revised the Technical Specifications (TSs) to prohibit the connection of more than one generating unit load to a single startup transformer. The specific revision to the TSs incorporates a revised Limiting Condition for Operation of the plant in the event of the loss of a startup transformer and establishes allowable degraded conditions and required action statements.

Date of issuance: March 2, 1984.

Effective date: March 2, 1984.

Amendments Nos. 127, 127, 124.

Facility Operating Licenses Nos. DPR–38, DPR–47 and DPR–55. Amendments revised the Technical Specifications.

Date of initial notice in "Federal Register:" November 23, 1983, 48 FR 52811.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 2, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: Oconne County Library, 501 West Southbroad Street, Walhalla, South Carolina.

Duquesne Light Company, Docket No. 50–334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of application for amendment: July 14, 1983.

Brief description of amendment: This amendment adds six hydraulic snubbers to the surveillance list in the Beaver Valley Unit 1 Technical Specifications.

Date of issuance: February 27, 1984.

Effective date: February 27, 1984.

Amendment No. 76.

Facility Operating License No. DPR–66. Amendment revised the Technical Specifications.

Date of initial notice in Federal Register: October 26, 1983 (48 FR 49585).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 27, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: B. F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Florida Power and Light Company, et al., Docket Nos. 50–335 and 50–389, St. Lucie Plant, Units No. 1 and No. 2, St. Lucie County, Florida

Date of application for amendments: October 12, 1983.

Brief description of amendments: The amendment revised the Facility Organization chart to change the title of Watch Engineer to Assist (Nuclear) Plant Supervisor at both St. Lucie Plant Units and standardized the title of the Nuclear Plant Supervisor. It eliminated a footnote in the Unit 1 Technical Specification that applied only until Unit 2 was licensed and commenced fuel loading. The Shift Technical Advisor function definition was modified. The amendments denied the request to allow for a dual role use of a properly qualified individual as both a Senior Reactor Operator and Shift Technical Advisor.

Date of issuance: February 24, 1984.

Effective date: February 24, 1984.

Amendment Nos.: 62 and 5.

Facility Operating License Nos. DPR–67 and NPF–16. Amendments revised the Technical Specifications.

Date of initial notice in "Federal Register." December 21, 1983 (48 FR 56498 at 56503).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 24, 1984.

No significant hazards consideration comments received. No.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Fort Pierce, Florida 33450.

Florida Power and Light Company, Docket No. 50–335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of application for amendment: January 20, 1983 as supplemented February 8 and 17, March 11, April 6, May 13, June 23 and July 15, 1983.

Brief description of amendment: The amendment revised the Technical Specifications to change the shutdown margin requirements, change the moderator temperature coefficient limits, and delete the flux peaking augmentation curve for fuel Cycle 6.

Date of issuance: March 1, 1984.

Effective date: March 1, 1984.

Amendment No.: 63.

Facility Operating License No. DPR–67. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" August 23, 1983, 48 FR 38302 at 38402.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 1, 1984.

No significant hazards consideration comments received: No.

Location of Local Public Document Room: Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida.

Florida Power and Light Company, Docket Nos. 50–250 and 50–251, Turkey Point Plant Units 3 and 4, Dade County, Florida

Date of application for amendments: July 11, 1978, modified August 9, 1978, and supplemented January 4, 1983, February 15, 1983 and October 31, 1983.

Brief description for amendments: These amendments revise the Technical Specifications to add motor operated valves 863–A and 863–B to the existing list of valves required to have their power removed. These valves are installed in parallel and provide a crosstie from the discharge of the residual heat removal pumps to the system. The valves are closed during normal operation and remain closed upon initial Emergency Core Cooling System (ECCS) injection phase, the valves will have power removed from their motor operators by locking open the circuit breakers in the appropriate motor control centers. Power will be restored to the valve operators to accomplish the switchover from the ECCS injection mode to the recirculation mode. The request also includes provisions to allow restoration of power for a limited time to comply with the Technical Specification surveillance requirements.

Date of issuance: February 22, 1984.

Effective date: February 22, 1984.

Amendment Nos.: Amendment No. 101 and Amendment No. 95.

Facility Operating Licenses Nos. DPR–31 and DPR–41: Amendments revised the Technical Specifications.

Date of initial notice in "Federal Register:" August 23, 1983 (48 FR 38403).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 22, 1984.

No significant hazards consideration comments have been received.

Local Public Document Room location: Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Dockets Nos. 50–321 and 50–366, Edwin I. Hatch Nuclear Plant, Units Nos. 1 and 2, Appling County, Georgia

Date of applications for amendments: April 5, 1982; June 11, 1982, as corrected October 15, 1982; November 10, 1982; and March 31, 1983.

Brief description of amendments: The amendments revise the Technical Specifications (TSs) for Hatch Unit 2 to: (1) Extend the time allowed to restore thermal power scram and control rod block trip setpoints to within allowable limits, and (2) correct an erroneous reference to a section of the TSs.

The amendments also revise the TSs for both Hatch Unit 1 and Unit 2 to: (1) Increase the minimum shift crew composition and (2) increase the frequency of independent audits of both the emergency and security plans.

Date of issuance: February 22, 1984.

Effective date: February 22, 1984.

Amendments Nos. 98 and 35.

Facility Operating Licenses Nos. DPR–57 and NPF–5. Amendments revised the Technical Specifications.

Date of initial notices in "Federal Register:" December 21, 1983, 48 FR 56505 (April 5, 1982, application); September 21, 1983, 48 FR 43137 (June 11, 1982, and November 10, 1982, applications); and October 26, 1983, 48 FR 49586 (March 31, 1983, application).

The Commission's related evaluation of the amendments in contained in a Safety Evaluation dated February 22, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia.

Georgia Power Company, Oglethorpe Power Corporation, Municipal Electric Authority of Georgia, City of Dalton, Georgia, Docket No. 50–321, Edwin I. Hatch Nuclear Plant, Unit No. 1, Appling County, Georgia

Date of application for amendment: April 22, 1983.

Brief description of amendment: The amendment deletes the Technical Specification requirements concerning the drywell to torus differential pressure system.

Date of issuance: March 6, 1984.

Effective date: March 6, 1984.

Amendment No. 99.

Facility Operating License No. DPR–57. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" November 22, 1983, 48 FR 52812.

The Commission's related evaluation of the amendment is contained in a letter to Georgia Power Company dated March 6, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: Appling County Public Library, 301 City Hall Drive, Baxley, Georgia.

Iowa Electric Light and Power Company, Docket No. 50–331, Duane Arnold Energy Center, Linn County, Iowa

Date of application for amendment: November 10, 1981.

Brief description of amendment: Modifies the Technical Specifications pertaining to six miscellaneous matters:

(1) Section 3.2/4.2–H is added to provide a reference to Tables 3.2–H and 4.2–H

(2) Table 3.2–G is revised to reflect that the trip level setting of greater than or equal to −38.5 in. indicated level is the reactor low-low water level rater than the reactor low water level. Also, the RPT system (response time) trip level setting is provided and the note that this value would be determined by testing is removed.

(3) Sections 3.13.B.2 and 3.13.B.3.b are revised to be consistent with the wording of Sections 3.13.A.3, 3.13.C.3 and 3.13.D.3. This is also consistent with Section 6.11.

(4) In Section 6.6 the Assistant Vice President-Nuclear Generation is replaced by Director, Nuclear Generation.

(5) Section 6.9 is revised to provide a proposed alternative to the requirements of 10CFR20 Paragraph 20.203(c)(2).

(6) Section 6.11 is revised to add Specification 3.13.B.2 to the Fire Protection Systems for which Special Reports shall be submitted. This is consistent with Section 3.13.B.

Date of issuance: February 14, 1984.

Effective date: February 14, 1984.

Amendment No. 93.

Facility Operating License No. DPR–49. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" August 23, 1983, 48 FR 38406.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 14, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: Cedar Rapids Public Library, 426 Third Avenue, S.E., Cedar Rapids, Iowa 52401.

Iowa Electic Light and Power Company, Docket No. 50–331, Duane Arnold Energy Center, Linn County, Iowa

Date of application for amendment: November 30, 1976.

Brief description of amendment: Revises the Technical Specifications to include a program for verification of sensor response time in the Reactor Protection System.

Date of issuance: March 8, 1984.

Effective date: March 8, 1984.

Amendment No. 94.

Facility Operating License No. DPR–49. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" December 21, 1983, 48 FR 56506.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 8, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: Cedar Rapids Public Library, 426 Third Avenue, S.E., Cedar Rapids, Iowa 52401.

Mississippi Power and Light Company, Middle South Energy Inc., South Mississippi Electric Power Association, Docket No. 50–416, Grand Gulf Nuclear Station Unit 1, Claiborne County, Mississippi

Date of application for amendment: April 25, 1983, June 23, 1983, July 11, 1983, September 12, 1983.

Brief description of amendment: This Amendment grants changds to the Technical Specifications which involve the following sections: (a) 3.4.2.1: Revises low-low set function for relief valves (July 11, 1983), (b) Tables 3.3.2–1 and 4.3.2.1–1: Deletes automatic removal of low condenser vacuum bypass (June 23, 1983), (c) 4.3.4.2.3: Postpones the surveillance test for breaker are suppression time until first refueling outage (June 23, 1983), (d) 4.3.7.6 and Table 3.3.6–2: Lowers the minimum allowable countrate for Source Range Monitor (SRM) Operability (September 12, 1983), (e) 4.7.6.1.3: Revises surveillance procedure for fire pump diesel batteries (April 25, 1983), and (f) 4.8.2.1: Increases the load profile for Division 2 125 volt DC batteries (June 23, 1983).

Date of issuance: February 21, 1984.

Effective date: February 21, 1984.

Amendment No.: 12.

Facility Operating License No. NPF–13. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" August 10, 1983, 48 FR 36355;

November 2, 1983, 48 FR 50637 The Commission's related evaluation is contained in a Safety Evaluation dated February 21, 1984.

Northern States Power Company, Docket Nos. 50-282 and 50-306, Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2, Goodhue County, Minnesota

Date of application for amendment: July 1, 1983 as supplemented August 26, 1983.

Brief description of amendment: The amendments change the Technical Specifications (TS) in the following areas:

1. An additional restriction is included in the TS to reflect the installed hydrogen recombiners to meet the Commission's interim hydrogen rule (TS 3.6 and TS 4.4-1).

2. A change corrects an inaccuracy in the explanation of the K(z) curve for approximately the upper two thirds of the core. The K(z) is a function normalizing the limits of the height dependent heat flux hot channel factor of the fuel rods during accident conditions (TS 3.10-9).

3. An additional restriction is included in the TS to add a snubber (i.e., CVCH-166) to the existing table of safety related snubbers.

4. An additional restriction is included in the TS to reflect the addition of a chlorine detection system that was added to the control room air treatment system. The addition of the chlorine detection system is in response to the NRC requirement imposed by NUREG-0737 Item II.D.3.4 (TS 3.13 and table TS 4.1-1).

5. An administrative change deleted the operability of the diesel-generator in conjunction with the operability of the control room air treatment system (TS 3.13A). The operable status of the diesel generator is already covered by TS 3.7.B(2). This change thus eliminated a redundancy.

6. An administrative change deleted from TS table 4.1-1 the reference to the FSAR table 7.7-2.

7. An administrative change eliminated redundant or unnecessary information in TS table 4.1-1.

8. An administrative change eliminated the potential confusion as to frequency for examining the damper mating surfaces in the steam exclusion system. The change consists of replacing the words "at each reactor refueling shutdown" with the words "once each year."

9. Additional restrictions are included in the TSs to reflect the additions of containment water level, hydrogen monitoring and pressure monitoring instrumentation that were added to monitor these parameters in containment during an accident. The addition of these instruments is in response to our requirement imposed by NUREG-0737 item II.F.1.

Date of issuance: February 21, 1984.
Effective date: February 21, 1984.
Amendment Nos.: 68 and 62.
Facility Operating License Nos. DPR-42 and DPR-60. Amendment revised the Technical Specifications.
Date of initial notice in "Federal Register:" November 22, 1983, 48 FR 50804 at 52818.

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated February 21, 1984.

No significant hazards consideration comments received: No.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, 1747 Pennsylvania Avenue, Washington, D.C. 20006.

Local Public Document Room location: George M. McLendon Library, Hinds Jr. College, Raymond, Mississippi 39154.

Northeast Nuclear Energy Company, et al, Docket Nos. 50-245/336, Millstone Nuclear Power Station, Unit Nos. 1 and 2, New London County, Connecticut

Date of application for amendment: October 4, 1983.

Brief description of amendment: The amendment approves Technical Specification changes which comply with the final rule on Licensed Operator Staffing requirements of 10 CFR 50.54(m).

Date of issuance: February 16, 1984.
Effective date: February 16, 1984.
Amendment Nos.: 95 and 92.
Provisional Operating License No. DPR-21 and Facility Operating License No. DPR-65. The amendments revised the Technical Specifications.
Date of initial notice in "Federal Register:" November 28, 1983 (48 FR 53611).

The Commission's related evaluation of this action is contained in its letter transmitting the amendments dated February 16, 1984. No public or State comments were received with respect to the Commission's proposed determination that the requested action would involve a no significant hazards consideration determination.

Local Public Document Room location: Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota.

Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, Dockets Nos. 50-277 and 50-278, Peach Bottom Atomic Power Station, Units Nos. 2 and 3, York County, Pennsylvania

Date of application for amendments: February 14, 1983.

Brief description of amendments: These amendments are in partial response to the February 14, 1983 application. They delete certain Appendix B Environmental Technical Specifications (ETS) which pertain to: (1) Noise monitoring requirements and (2) nonradiological water quality-related requirements, as required by the Federal Water Pollution Control Act Amendments of 1972.

The proposed deletion of thermal discharge specifications is not being granted at this time. These specifications were adopted as a result of a March 23, 1979 Decision by the Atomic Safety and Licensing Appeal Board (ALAB-532). Other changes requested in the February 14, 1983 application are being handled separately.

Date of issuance: February 24, 1984.
Effective date: February 24, 1984.
Amendments Nos. 92 and 94.
Facility Operating Licenses Nos. DPR-44 and DPR-56. Amendments revised the Technical Specifications.
Date of initial notice in "Federal Register:" November 3, 1983, 48 FR 50808.

Sacramento Municipal Utility District, Docket No. 50–312, Rancho Seco Nuclear Generating Station, Sacramento County, California

Date of application for amendment: July 13, 1979, revised March 11, 1982 and December 7, 1982.

Brief description of amendment: The amendment permits operation with changes to the Radiological Effluent Technical Specifications that bring them into compliance with Appendix I of 10 CFR Part 50. It provides new Technical Specification sections defining limiting conditions for operations and surveillance requirements for radioactive liquid and gaseous effluent monitoring; concentration, dose and treatment of liquid, gaseous and solid wastes; total dose; radiological environmental monitoring that consists of a monitoring program, land use census, and interlaboratory comparison program. This change also incorporates into the Technical Specifications the bases that support the operation and surveillance requirements. In addition, some changes were made in administrative controls, specifically dealing with the process control program and the offsite dose calculation manual. The amendment removes the current Radiological Effluent Technical Specifications from the Appendix "B" Technical Specifications.

Date of issuance: February 22, 1984.

Effective date: February 22, 1984.

Amendment No.: 53.

Facility Operating License No. DPR–54. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" November 22, 1983, 48 FR 52825.

Tennessee Valley Authority, Docket Nos. 50–260 and 50–296, Browns Ferry Nuclear Plant, Units 2 and 3, Limestone County, Alabama

Date of application for amendment: June 2, 1983.

Brief description of amendment: Revise the Technical Specifications to allow operation of Browns Ferry Units 2 and 3 with increased core flow during the remainder of Cycle 5 for each unit.

Date of issuance: March 6, 1984.

Effective date: March 6, 1984.

Amendment Nos.: 88 and 61.

Facility Operating License Nos. DPR–52 and DPR–68: Amendments revised the Technical Specifications.

Date of initial notice in "Federal Register:" November 22, 1983, 48 FR 52834.

The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated March 6, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Athens Public Library, South and Forrest, Athens, Alabama 35611.

Virginia Electric and Power Company, et al., Docket Nos. 50–338 and 50–339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia

Date of application for amendments: October 27, 1983 supplemented December 27, 1983.

Brief description of amendments: The amendments revised the TS to reflect the addition and installation of new fire protection systems at NA–1 & 2. The newly installed fire protection systems are based on the requirements of the NRC safety evaluation for the NA–1 & 2 Fire Protection Program dated February 1979. The listing of these systems in the NA–1 & 2 TS will provide the required specificity for limiting conditions of operability and surveillance requirements.

Date of issuance: February 28, 1984.

Effective date: February 28, 1984.

Amendment Nos.: 51 and 35.

Facility Operating License Nos. NPF–4 and NPF–7: Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" November 22, 1983, 48 FR 52804 at 52840. Subsequent to the initial notice in the **Federal Register**, Virginia Electric and Power Company provided additional clarifying information by letter dated December 27, 1983 for revising the North Anna Power Station, Units No. 1 and No. 2 Technical Specifications for conformance with the NRC safety evaluation for the North Anna Power Station Fire Protection Program. This information does not affect the discussion or conclusions of the initial notice of our proposed determination in any way. The Commission's related evaluation of the amendment is contained in a safety evaluation dated February 28, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093, and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Virginia Electric and Power Company, et al., Docket Nos. 50–338 and 50–339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia

Date of application for amendment: August 24, 1983.

Brief description of amendment: The amendment provide clarification of limiting conditions for operation and surveillance testing of weight loaded check valves which are specified as Containment Isolation Valves. The changes do not result in any revision to the presently approved technical specifications for Containment Isolation Valves.

Date of issuance: March 6, 1984.

Effective date: March 6, 1984.

Amendment Nos.: 52 and 36.

Facility Operating License Nos. NPF–4 and NPF–7. Amendments revised the Technical Specifications.

Date of initial notice in "Federal Register:" November 22, 1983, 48 FR 52804 at 52838.

The Commission's related evaluation of the amendment is contained in a letter dated March 6, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room Location: Board of Supervisors Office, Louisa County Courthouse, Louisa Virginia 23093, and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Virginia Electric and Power Company and Old Dominion Electric Cooperative, Docket No. 50–338, North Anna Power Station, Unit No. 1, Louisa County, Virginia

Date of application for amendment: November 15, 1983.

Brief description of amendment: The amendment deletes from Technical Specification Table 4.3–2 the surveillance requirements in Mode 4 (Hot Standby) for the auxiliary feedwater pump actuation signals from indication for Steam Generator Water Level Low-Low and Station Blackout. The change provides consistency with the NRC approved Westinghouse Standard Technical Specifications which are appropriately applied to this facility.

Date of issuance: March 6, 1984.

Effective date: March 6, 1984.

Amendment No. 53.

Facility Operating License No. NPF–4. Amendment revised the Technical Specifications.

Date of initial notice in "Federal Register:" January 26, 1984 (48 FR 3344 at 3558).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 6, 1984.

No significant hazards consideration comments received: No.

Local Public Document Room location: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093, and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Virginia Electric and Power Company, Docket No. 50–338, North Anna Power Station, Unit No. 1, Louisa County, Virginia

Date of application for amendment: December 30, 1982 (supplemented April 25, July 6 and July 11, 1983) and September 29, 1983.

Brief description of amendment: The amendment revises the North Anna Power Stations, Unit 1 Technical Specifications to allow operation with an average reactor coolant temperature of 587.8 degrees Fahrenheit with a maximum of 5% steam generator tube plugging as opposed to the currently approved average reactor coolant temperature of 582.8 degrees Fahrenheit with a maximum of 7% steam generator tube plugging. The amendment completes the licensee's Phase 1 and Phase 2 plant upgrade which increases secondary steam pressure in concentration from 11.5% to 0% and to change the Boric Acid System boron concentration from 11.5% to 7%.

Date of issuance: February 24, 1984.

Effective date: February 24, 1984.

Amendment Nos. Amendment No. 95 and No. 94.

Facility Operating License Nos. DPR–32 and DPR–37. Amendment revised the Technical Specifications.

BILLING CODE 7590–01–M

Meeting on Siting Guidelines

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Notice of DOE/NRC Meetings of Siting Guidelines.

SUMMARY: The Nuclear Regulatory Commission (NRC) announces a series of forthcoming meetings with the U.S. Department of Energy (DOE), Office of Civilian Radioactive Waste Management.

DATE: March 21, March 28, and April 4, 1984. Each meeting will begin at 9:00 a.m.

ADDRESS: U.S. Department of Energy, Forrestal Building, Room 1E245, 1000 Independence Avenue, SW., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT: Regis Boyle, Section Leader, Regulations and Environmental Section, Repository Projects Branch, Division of Waste Management, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Phone: 301–427–4127 or FTS 427–4127.

SUPPLEMENTARY INFORMATION: The purpose of these meetings, which are open to the public as observers, is to resolve several issues concerning the DOE *General Guidelines for the Recommendation of Sites for Nuclear Waste Repositories*. These issues are set forth in the NRC's preliminary decision on the siting guidelines (49 FR 9650). The siting guidelines are required by Section 112(a) of the Nuclear Waste Policy Act of 1982 and require the concurrence of the NRC.

Dated at Bethesda, Maryland, this 20th day of March 1984.

For the Nuclear Regulatory Commission.

John Philips,

Chief, Rules and Procedures Branch, Division of Rules and Records, Office of Administration.

BILLING CODE 7590–01–M

DEPARTMENT OF STATE

Office of the Secretary

[Public Notice 901]

International Conferences; Participation of Private-Sector Representatives on U.S. Delegations

As announced in Public Notice No. 623 (43 FR 37784), August 24, 1978, the Department is submitting its January to March 1984 list of U.S. accredited Delegations which included private-sector representatives.

Publication of this list is required by Article IV (c)(4) of the guidelines published in the **Federal Register** on August 24, 1978.

Dated: March 14, 1984.

Kevin E. Carroll,

Director, Office of International Conferences.

U.S. Delegation to the World Administrative Radio Conference for Planning Allocation of the High Frequency Broadcasting Bands (HF–WARC), International Telecommunication Union (ITU), Geneva, January 10–February 10, 1984

Chairman

The Honorable Leonard H. Marks, Department of State

Vice Chairman

Rush W. Taylor, Jr., Executive Director of Delegation, Office of the Coordinator for International Communication and Information Policy, Department of State

Daniel Brenner, Assistant to the Chairman, Federal Communications Commission

William Jahn, Office of International Communications Policy, Bureau of Economic and Business Affairs, Department of State

Richard D. Parlow, Associate Director, Office of Spectrum Management, National Telecommunications and Information Administration, Department of Commerce

Walter Roberts, Executive Director, Board of International Broadcasting, Washington, D.C.

The Honorable Kenneth Tomlinson, Director, Voice of America, United States Information Agency

Jaroslav J. Verner, Special Adviser, Office of the Coordinator for International Communication and Information Policy, Department of State

Advisers

Stephen Bond, United States Mission, Geneva

Lewis Bradley, Office of Spectrum Management, National Telecommunications and Information Administration, Department of Commerce

The Honorable James L. Buckley, President, Radio Free Europe/Radio Liberty

Bohdan Bulawka, Office of Spectrum Management, National Telecommunications and Information Administration, Department of Commerce

Anna Case, Assistant Deputy for Operations, Office of Engineering and Technical Operations, Voice of America, United States Information Agency

David Cohen, Office of Spectrum Management, National Telecommunications and Information Administration, Department of Commerce

Wilson Dizard, Consultant, Department of State

[Public Notice CM-8/722]

Oceans and International Environmental and Scientific Affairs Advisory Committee; Partially Closed Meeting

The Antarctic Section of the Oceans and International Environmental and Scientific Affairs Advisory Committee will meet at 3:00 PM, Thursday, April 12, 1984, in Room 3524, Department of State, Washington, D.C.

At this meeting, officers responsible for Antarctic affairs in the Department of State will discuss key issues and problems involving the Antarctic in the context of current domestic and international developments. This session will be open to the public. The public will be admitted to the session to the limits of seating capacity and will be given the opportunity to participate in discussions according to the instructions of the Chairman. As access to the Department of State is controlled, persons wishing to attend the April 12 meeting should enter the Department through the Diplomatic ("C" Street) Entrance. Department officials will be at the Diplomatic Entrance to escort attendees to Room 3524.

The Antarctic Section of the Oceans and International Environmental and Scientific Affairs Advisory Committee will also meet on Friday, April 13, 1984, at the National Academy of Sciences, 2101 Constitution Avenue, N.W., in sessions which will not be open to the public. As these sessions will include discussion of classified material, they have been closed pursuant to Section 10(d) of the Federal Advisory Committee Act and 5 U.S.C. 552b (c)(1) and 5 U.S.C. 552b (c)(9)(B). The disclosure of classified material and revelation of considerations which go into policy development would substantially undermine and frustrate the U.S. position in future negotiations. The purpose of these discussions will be to elicit views concerning the further development of United States policy regarding Antarctic resources, particularly Antarctic mineral resources. This portion of the meeting will include classified briefings and examination and discussion of classified documents pursuant to Executive Order 12356.

Requests for further information on the meetings should be directed to R. Tucker Scully of OES/OPA, Room 5801, Department of State. He may be reached by telephone on (202) 632-3262.

James L. Malone,

Chairman.

March 5, 1984.

Shipping Coordinating Committee, National Committee for the Prevention of Marine Pollution; Meeting

The National Committee for the Prevention of Marine Pollution will conduct an open meeting at 9:30 AM on April 12 (and 13th as necessary), 1984 in Room 2417, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, D.C. The purpose of the meeting is to prepare position documents for an International Conference on Liability and Compensation for Damage in Connection with the Carriage of Certain Substances by Sea. The Conference will be held at the International Maritime Organization, London, England, April 30—May 25, 1984. The Conference will consider:

A Draft Protocol to the International Convention on Civil Liability for Oil Pollution Damage, 1969 (CLC),

A Draft Protocol to the International Convention on the Establishment of an International Fund for Compensation for Oil Pollution Damage, 1971 (FUND), and,

Draft Articles for a Convention on Liability and Compensation in Connection with the Carriage of Noxious and Hazardous Substances by Sea (HNS).

In particular the Committee will discuss, for CLC and FUND, the following topics:

—Ships to be Covered by the Conventions
—Oils to be Covered by the Conventions
—Pre-spill Preventive Measures
—Definition of Pollution Damage
—Limitation of Liability; levels in general
—Indemnification of Shipowner

For HNS:

—Liability: Shipowner only or Shipowner and Shipper
—Types of Cargoes to be Covered
—Definition of Shipowner and Shipper
—Limits of Liability of Shipowner and Shipper Supplemental Coverage
—Cargo Insurance

and for both CLC/FUND and HNS:

—Geographical Scope of the Conventions
—Limitation of Liability; Updating Limitation Amounts
—Limitation of Liability; Standard for Breaking Limitation
—Channeling, Recourse, and Position of the Charterer
—Aids to Navigation Defense.

Members of the public may attend up the seating capacity of the room.

For further information contact Captain R. Corbett, U.S. Coast Guard Headquarters (G-WER), 2100 Second Street, SW., Washington, D.C. 20593. Telephone: (202) 426-2010.

Dated: March 8, 1984.

Samuel V. Smith,

Executive Secretary, Shipping Coordinating Committee.

[Public Notice CM-8/724]

Shipping Coordinating Committee, Subcommittee on Safety of Life at Sea: Working Group on Radio Communications; Notice of Meeting

The Working Group on Radio Communications of the Subcommittee on Safety of Life at Sea will conduct an open meeting at 9:30 AM on April 19, 1984, in Room 8334–8336 of the Department of Transportation, 400 Seventh Street, SW., Washington, D.C.

The purpose of the meeting is to review the results of the Twenty-seventh Session of the Subcommittee on Radiocommunications of the International Maritime Organization held in London during March 1984. There will also be a discussion with the Radio Technical Commission for Marine

Services (RTCM) Oversight Committee for the Future Global Maritime Distress and Safety System and a discussion of the Toulouse Symposium on the Use of Satellites for Maritime Safety.

Members of the public may attend up to the seating capacity of the room.

For further information contact Mr. Richard Swanson, U.S. Coast Guard Headquarters (G-TPP-3/63), 2100 Second Street, SW., Washington, D.C. 20593. Telephone: (202) 426-1231.

Dated: March 14, 1984.

Samuel V. Smith,

Executive Secretary, Shipping Coordinating Committee.

BILLING CODE 4710-07-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Request for Public Comments: Certain Personal Computers and Components Thereof

The United States International Trade Commission has determined that there is a violation of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, and in the sale, of certain personal computers and components thereof that were found to infringe U.S. Letters Patent 4,136,359, U.S. Letters Patent 4,278,972, and Registered Copyright Nos. TX 873-203, TX 809-449, and TX 886-569. The Commission found that the infringement tended to destroy or substantially injure an industry, efficiently and economically operated, in the United States. The Commission ordered the products involved excluded from entry into the United States.

Under section 337(g), the President, for policy reasons, may disapprove the Commission's determination within sixty days following receipt of the determination and record. If disapproved the President, the determination, and any order issued under its authority, would be without force or effect. The President also may approve the determination, making it, and any order issued under its authority, final on the date the Commission receives notice. The determination, and any related order, becomes final automatically following the sixty day review period, if the President has not disapproved it.

Interested parties may submit comments concerning foreign or domestic policy issues that should be considered by the President in making his decision regarding this case. Parties commenting on issues of domestic policy should refer to the portion of the Commission's record in which that issue was discussed. Parties should provide a rationale if the domestic policy issue was not raised before the Commission.

Comments may not exceed 15 letter-sized pages, including attachments. Twenty copies of the submission must be provided. Comments must be delivered by the close of business, Friday, April 6, 1984, to the Secretary, Trade Policy Staff Committee, 600 17th Street, NW., Washington, D.C. 20506. Copies of submissions will be provided on request and additional comments will be accepted through the close of business April 13, 1984. For further information, call Alice Zalik (202) 395-3432.

Frederick L. Montgomery,

Chairman, Trade Policy Staff Committee.

[FR Doc. 84-7637 Filed 3-21-84; 8:45 am]

BILLING CODE 3190-01-M

[Docket No. 301-43]

Termination of Investigation Under Section 301: Rice Millers' Association

On October 11, 1983 the United States Trade Representative initiated an investigation on the basis of a petition filed by the Rice Millers' Association requesting relief under Section 301 of the Trade Act of 1974, as amended (19 U.S.C. 2411 et seq.). (See 48 FR 56289) The petitioner alleged that the authorities on Taiwan subsidize the export of rice in a manner which burdens or restricts U.S. commerce.

On March 9, 1984, the petitioner withdrew the petition in light of the understanding reached between representatives of the American Institute in Taiwan and the Coordination Council for North American Affairs which, inter alia, calls for a limitation on the quantity of subsidized rice exports from Taiwan. In view of the withdrawal of the petition, the 301 investigation is hereby terminated.

Jeanne S. Archibald,

Chairman, Section 301 Committee.

BILLING CODE 3190-01-M

DEPARTMENT OF TRANSPORTATION

Reports, Forms, and Recordkeeping Requirements; Submittals to OMB February 28-March 9, 1984

AGENCY: Department of Transportation (DOT), Office of the Secretary.

ACTION: Notice.

SUMMARY: This notice lists those forms, reports, and recordkeeping requirements, transmitted by the Department of Transportation, during the period Feb. 28-Mar. 9, 1984, to the Office of Management and Budget (OMB) for its approval. This notice is published in accordance with the requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35).

FOR FURTHER INFORMATION CONTACT: John Windsor, John Chandler, or Annette Wilson, Information Requirements Division, M-34, Office of the Secretary of Transportation, 400 7th Street, SW., Washington, D.C. 20590, (202) 426-1887 or Gary Waxman or Sam Fairchild, Office of Management and Budget, New Executive Office Building, Room 3228, Washington, D.C. 20503, (202) 395-7340.

SUPPLEMENTARY INFORMATION:

Background

Section 3507 of Title 44 of the United States Code, as adopted by the Paperwork Reduction Act of 1980, requires that agencies prepare a notice for publication in the **Federal Register**, listing those information collection requests submitted to the Office of Management and Budget (OMB) for approval under that Act. OMB reviews and approves agency submittals in accordance with criteria set forth in that Act. In carrying out its responsibilities, OMB also considers public comments on the proposed forms, reporting and recordkeeping requirements.

As needed, the Department of Transportation will publish in the **Federal Register** a list of those forms, reporting and recordkeeping requirements that it has submitted to OMB for review and approval under the Paperwork Reduction Act. The list will include new items imposing paperwork burdens on the public as well as revisions, renewals and reinstatements of already existing requirements. OMB approval of an information collection requirement must be renewed at least once every three years. The published list also will include the following information for each item submitted to OMB:

(1) A DOT control number.

(2) An OMB approval number if the submittal involves the renewal, reinstatement or revision of a previously approved item.

(3) The name of the DOT Operating Administration or Secretarial Office involved.

(4) The title of the information collection request.

(5) The form numbers used, if any.

(6) The frequency of required responses.

(7) The persona required to respond.

(8) A brief statement of the need for, and uses to be made of, the information collection.

Information Availability and Comments

Copies of the DOT information collection requests submitted to OMB may be obtained from the DOT officials listed in the "For Further Information Contact" paragraph set forth above.

Comments on the requests should be forwarded, as quickly as possible, directly to the OMB officials listed in the "For Further Information Contact" paragraph set forth above. If you anticipate submitting substantive comments, but find that more than 5 days from the date of publication is needed to prepare them, please notify the OMB officials of your intent immediately.

Items Submitted for Review by OMB

The following information collection requests were submitted to OMB from Feb. 28–Mar. 9, 1984:

DOT No: 2385
OMB No: New
By: Federal Railroad Administration
Title: Stencilling Reporting Mark, Car Number, etc., on Freight Cars
Forms: None
Frequency: On Occasion
Respondents: Railroads

Need/Use: The Federal Railroad Administration and the railroad industry use these markings to identify rail cars for an inventory count, in case of involvement in an accident, for locating and tracking cargoes, and for repair billing records.

DOT No: 2386
OMB No: 2130–0035
By: Federal Railroad Administration
Title: Railroad Operating Rules
Forms: None
Frequency: On Occasion
Respondents: Railroads

Need/Use: This information is needed to ensure that the operating rules and practices of the railroad are safe and that the standard instructions that railroads provide to their employees are adequate and reasonable to provide for safe working conditions and operation.

DOT No: 2387
OMB No: New
By: Federal Highway Administration
Title: Submission of Alternate Procedures for Processing Railroad Adjustments
Forms: None
Frequency: On Occasion
Respondents: State Highway Agencies

Need/Use: The "alternate procedures" process allows the State highway agencies to assist the Federal Government by reviewing and approving Federal assistance for funding railroad construction changes required because of Federal-aid highway projects which cross the railroads right-of-way.

DOT No: 2388
OMB No: New
By: Federal Highway Administration
Title: Compliance Activity Report
Forms: FHWA–86
Frequency: On Occasion
Respondents: State Highway Agencies

Need/Use: The Federal Highway Administration (FHWA) needs information from the States to ensure that the States and contractors using Federal funds comply with equal opportunity requirements. FHWA issues guidance to assist compliance by the recipients of such Federal grant funds based on the data from these reports.

DOT No: 2389
OMB No: New
By: Federal Railroad Administration
Title: Quarterly Railroad Procurement Report
Forms: None
Frequency: Quarterly
Respondents: Railroads

Need/Use: The Federal Railroad Administration uses this information to ascertain and monitor the amount of Federal financial assistance dollars to railroads which they spend for goods or services from small, disadvantaged, or minority business firms.

DOT No: 2390
OMB No: 2132–0506
By: Urban Mass Transportation Administration
Title: Description of the Public Transportation System Urbanized Area
Forms: None
Frequency: On Occasion
Respondents: State and Local Governments

Need/Use: The Urban Mass Transportation Administration Regional Offices use this submission to ensure that Federal funds are not expended in violation of the law and to rank the various proposed projects in terms of meeting broad program goals.

DOT No: 2391
OMB No: New
By: Urban Mass Transportation Administration
Title: Project Description
Forms: None
Frequency: On Occasion
Respondents: State and Local Governments

Need/Use: The Urban Mass Transportation Administration must review the project description to determine whether the project falls into one of the eligible categories, e.g. fulfills environmental, planning and other requirements to which the project eligibility is subject.

DOT No: 2392
OMB No: New
By: Urban Mass Transportation Administration
Title: Project Justification
Forms: None
Frequency: On Occasion
Respondents: State and Local Governments

Need/Use: The Urban Mass Transportation Administration reviews the project justification to determine whether proposed project will meet one of the statutory goals and the proposed project is consistent with area-wide transportation plans.

DOT No: 2393
OMB No: 2132–0500
By: Urban Mass Transportation Administration
Title: Section 16(b)(2) Semi-Annual Program Status Report
Forms: None
Frequency: Semiannually
Respondents: State and Local Governments

Need/Use: The information is used by the Regional Offices to determine whether: (a) grantees are operating within the approved budget; (b) approaching an overrun condition within that budget; or (c) the project activities are falling behind schedule or becoming inactive; and (d) the requisitions for funds are supportable.

DOT No: 2394
OMB No: 2132–0529
By: Urban Mass Transportation Administration
Title: Transportation Improvement Program/Annual Element and Transportation Plan (TIP/AE and Plan)
Forms: N/A
Frequency: Annually/Biennially or on Occasion
Respondents: State and Local Governments

Need/Use: The TIP/AE and Plan is used by State and Metropolitan Planning Organizations as the basis for making investment decisions and as a management tool regarding the use of Federal and Non-Federal capital funds.

DOT No: 2395
OMB No: New
By: Urban Mass Transportation Administration
Title: Relocation and Real Property Acquisition Assurances

Forms: None
Frequency: On Occasion
Respondents: State and Local Governments

Need/Use: The information is used by Urban Mass Transportation Administration's Regional Administrators to obtain assurances from grantees that there is nothing in State or local law to prevent them from fully implementing the provisions of the Uniform Relocation Assistance and Real Property Acquisitions Act of 1970.
DOT No: 2396
OMB No: New
By: Urban Mass Transportation Administration
Title: Designated Recipients
Form: None
Frequency: On Occasion
Respondents: State and Local Governments

Need/Use: This information is used by Urban Mass Transportation Administration's Regional Offices to determine whether new applicants have the legal capacity to become designated recipients and to assume the following responsibilities; (1) receive and dispense Federal funds for transit purposes, (2) submit a progress report of project applications, (3) enter into formal project agreements with Urban Mass Transportation Administration, and (4) certify that a public hearing has been conducted.

DOT No: 2397
OMB No: New
By: Urban Mass Transportation Administration
Title: Assurance of Compliance with 5(i)(3) Urban Mass Transportation Act of 1964 (Public notice and/or hearings before fare raise and before significant change in service).
Form: None
Frequency: On Occasion
Respondents: State and Local Governments

Need/Use: This information is used by Urban Mass Transportation Administration's Regional Offices in determining that the grantee is complying with the Congressional intent of the Urban Mass Transportation Act of 1964, requiring adequate public notices and/or hearing before any fare increases and before any changes in service levels; that recognition and action has been taken on public comments regarding the above changes.

Issued in Washington, D.C. on March 15, 1984.

Jon H. Seymour,
Deputy Assistant Secretary for Administration.

BILLING CODE 4910-62-M

[OST Docket No. 22; Notice 84-3]

Standard Time Zone Boundaries; Operating Exception for the Burlington Northern Railroad

AGENCY: Office of the Secretary, DOT.

ACTION: Notice; correction.

SUMMARY: In the Federal Register of March 6, 1984 (49 FR 8320), the Burlington Northern Railroad was granted an exception from the standard time of the time zones created by Congress. It was mistakenly stated that the exception permits operation under "*central time*" from the Montana-Idaho boundary to Sandpoint Junction, Idaho, despite the fact that the affected area is in the Pacific time zone. The exception actually permits operation under "mountain time."

FOR FURTHER INFORMATION CONTACT: Robert I. Ross, Office of the General Counsel, (202) 426-4723.

Authority: Act of March 19, 1918, as amended by the Uniform Time Act of 1966 and Pub. L. 97-449, 15 U.S.C. 260-64; 49 CFR 1.59(a).

Issued in Washington, DC, on March 19, 1984.

Rosalind A. Knapp,
Deputy General Counsel.

Petitions for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before April 11, 1984.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. ——, 800 Independence Avenue, SW., Washington, D.C. 20591.

FOR FURTHER INFORMATION: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination of the Rules Docket (AGC-204), Room 916, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11).

Issued in Washington, D.C. on March 16, 1984.

John H. Cassady,
Assistant Chief Counsel, Regulations and Enforcement Division.

PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought
[illegible]	Bolivar Aviation	14 CFR 141.65	To permit petitioner to hold examining authority and to recommend graduates of the schools certification courses for a pilot certificate and ratings for flight instructor, instrument flight instructor, and airline transport pilot, without taking the FAA written test.
23906	Eagle Aviation, Inc	14 CFR 121.61(c)(1)	To permit petitioner to use Mr. T. Belote as director of maintenance although he does not fully meet the experience requirements.

PETITIONS FOR EXEMPTION—Continued

Docket No.	Petitioner	Regulations affected	Description of relief sought
[illegible]	Mobil Oil Exploration & Producing Southeast Inc	14 CFR 91.23(a)(3)	To extend Exemption 3472 which permits petitioner to operate its helicopters under IFR conditions with a 30-minute fuel reserve instead of the specified 45-minute fuel reserve.
[illegible]	Executive Air Fleet	14 CFR 135.297(a)	To extend Exemption 3202A which permits petitioner to use pilots in command who have completed an instrument proficiency check within the preceding 12-calendar months and, in addition, who have satisfactorily completed either an instrument proficiency check or training to proficiency in an approved aircraft simulator within the preceding 6 months.
19946	Trans World Airlines	14 CFR Portions of Parts 92 & 121	To extend Exemption 2914A to permit petitioner to operate its Boeing 747SP aircraft above flight level 410 without one pilot at the controls of the airplane wearing and using an oxygen mask secured, sealed, and supplying oxygen.
[illegible]	Int'l. Business Machines Corp	14 CFR 21.181	To permit petitioner to operate four Learjet Model 55 aircrafts using an FAA-approved minimum equipment list.
23921	Flight Safety Int'l	14 CFR 61.57 (c) & (d)	To permit petitioner to use an approved Phase II simulator to meet the currency requirements.
[illegible]	Type Rating Training J. R. Haley, Owners	14 CFR 61.157(d)(1) & 61.63(d) (2) and (3)	To amend and extend Exemption 3217A which permits trainees of Type Rating Training (TRT) to complete a practical test for the issuance of a type rating to be added to any grade of certificate that includes the items and procedures for testing in an airplane simulator as set forth in Appendix A of Part 61, although TRT does not have an operating certificate issued under Part 121. Petitioner requests that the exemption be amended to include McDonnell Douglas DC–8 airplane simulators.
21760	Civil Air Patrol (CAP)	14 CFR 61.118	To permit petitioner's members who hold pilot certificates to be reimbursed for fuel, oil, and maintenance while serving on official CAP missions.
23926	Dept. of Natural Resources, State of Wisconsin	14 CFR 91.73 (a) & (d)	To permit the operation of aircraft at night without lighted position lights and anti-collision lights.
23920	KLS Television	14 CFR 47.27 & 45.29	To allow petitioner to use its Bell Jet Range Helicopter displaying 3-inch registration markings on the side of the fuselage and 20-inch bottom markings instead of 12" side marks.
23703	Republic Airlines	14 CFR 63.39(b)(1)	To amend Exemption 3907 to revise condition 4 of the exemption to require each flight engineer to acquire 12 hours rather than 25 hours of operating experience under the supervision of a check airman.
[illegible]	Gulfstream Aerospace Corp	14 CFR 23.49(b)(1)	To permit type certification of the Gulfstream Model 1500 single engine pressurized Fan Jet airplanes with a stall speed greater than 61 knots.
22531	Pyramid Airlines	14 CFR Portions of Parts 21 & 91	To extend Exemption 3532 to permit petitioner to operate certain leased, U.S.-registered aircraft using FAA-approved minimum equipment lists.

DISPOSITIONS OF PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought disposition
23848	Greater Rockford Aviation, August C. Hohl	14 CFR 141.35 (b)(4), (c)(5), & (d)(4)	To permit petitioner to be eligible for designation as a chief flight instructor without meeting the required recency experience. *Denied 2/29/84.*
23707	Ford Motor Company	14 CFR 21.181, 91.29, & 91.165	To amend Exemption 3696 which allows petitioner to operate four Convair (CV-580) aircraft, N300K, N301K, N302K, and N303K, and two Grumman (G–1159 aircraft, N327K & N329K, using an FAA-approved minimum equipment list. The amendment would allow petitioner to add two Hawker Siddeley 125–700A (HS–125 aircraft, N324K & N326K, to its exemption. *Granted 2/29/84.*
13418	Sierra Academy of Aeronautics (Sierra)	14 CFR 63.39(b)(2)	To extend Exemption 2095D which permits petitioner and any similarly situated flight engineer school or operator to allow applicants being trained in preparation for the flight engineer practical test to take the normal procedures portion of the practical test in an appropriate simulator in lieu of taking that portion of the test in an airplane in flight. *Granted 2/29/84.*
23812	Sven A. Akesson	14 CFR 61.161(b)	To permit petitioner to apply for an airline transport pilot certificate with a rotorcraft rating without meeting the recency of experience requirement. *Granted 2/29/84.*
22282	Regional Airline Assn.	14 CFR 135.261	To extend Exemption 3535B to the extent necessary to allow a certificate holder to assign a flight crewmember and to allow a flight crewmember to accept an assignment for duty during flight time if that assignment provides for at least 8, rather than 10, consecutive hours of rest during the 24-hour period preceding the planned completion of the assignment. *Granted 2/28/84.*
[illegible]	Braniff Int'l	14 CFR Portion of Appendix H Part 121	To extend Exemption 3147A which allows petitioner to conduct training and checking as permitted in a Phase II simulator without meeting the minimum visual field-of-view requirement subject to certain conditions. *Granted 2/28/84.*
20314	Flight Training Devices	14 CFR 61.63(d) (2), & (3), 61.157(d)(1) & Appendix A of Part 61.	To extend Exemption 3022A which permits petitioner's trainees to complete a portion of the practical test for the issuance of an airline transport pilot certificate or a type rating to be added to any grade of pilot certificate by substituting the flight test requirements of § 61.157(a) for those of § 61.63(d) (2) and (3), limited to the items and procedures for testing in an airplane simulator as set forth in Appendix A of Part 61. *Granted 2/27/84.*
23818	United States Gypsum Co. (USGC)	14 CFR Portions of Parts 21 & 91	To permit petitioner to operate one Gulfstream G–1159 (G–II) aircraft, N510US, and one Falcon 20 (DA–20) aircraft, N414OUS, using an FAA-approved minimum equipment list. *Granted 2/27/84.*
16343	Scenic Airlines, Inc.	14 CFR 135.113	To extend Exemption 2631D which grants petitioner relief from § 135.113 to permit a passenger to occupy the copilot seat in Cessna 404 type airplanes operated by petitioner subject to certain conditions and limitations. *Granted 2/24/84.*

BILLING CODE 4910–13–M

Federal Highway Administration

Environmental Impact Statement; Marion County, Oregon

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Marion County, Oregon.

FOR FURTHER INFORMATION CONTACT: Richard R. Arnold, Environmental Coordinator and Safety Programs Engineer, Federal Highway Administration, Equitable Center, Suite 100, 530 Center NE, Salem, Oregon 97301, Telephone: (503) 399–5749.

SUPPLEMENTARY INFORMATION: The FHWA in cooperation with the Oregon Department of Transportation will prepare an environmental impact statement (EIS) on a proposal to construct a beltline road through southeast Salem, Oregon, in Marion County. The proposal consists of an extension of Kuebler Boulevard from S. Commercial Street to Turner Road and an extension of Cordon Road from the Santiam Highway to Turner Road. An interchange with I–5 and an interchange with Santiam Highway are included in the proposal.

The project will provide improved circulation for the southeast quadrant of the city and will provide northbound access to I–5. The project will also complete the beltline which has been under construction in phases for several years.

The project has potential for land use impacts, noise increases at abutting residences, significant changes in traffic patterns, and reduction in wildlife habitat. The interchange at the Santiam Highway is expected to support industrial development and the interchange at I–5 may encourage commercial development at the interchange.

Information describing the proposed action will be sent to the appropriate Federal, State, and local agencies, and to private organizations and citizens who have previoulsy expressed interest in this proposal. Public meetings will be held, as may be necessary, and a public hearing will be held. No formal scoping meeting is planned at this time.

Comments or questions concerning this proposed action, and the EIS, should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The provisions of Executive Order 12372, "Intergovernmental Review of Federal Programs" apply to this program)

Issued: March 15, 1984.

Richard R. Arnold,

Environment Coordinator, Safety Programs Engineer, Oregon Division, Salem, Oregon.

Research and Special Programs Administration

Grants and Denials of Applications for Exemptions

AGENCY: Materials Transportation Bureau, DOT.

ACTION: Notice of grants and denials of applications for exemptions.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, exemptions from the Department of Transportation's Hazardous Materials Regulations (49 CFR Part 107, Subpart B), notice is hereby given of the exemptions granted in February 1984. The modes of transportation involved are identified by a number in the "Nature of Exemption Thereof" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo-only aircraft, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Exemptions.

SUPPLEMENTARY INFORMATION:

RENEWAL AND PARTY TO EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
4460–X	DOT–E 4460	Ethyl Corp., Baton Rouge, LA	49 CFR 173.29, 176.74(c), 176.76(g)(3)	To authorize special stowage limits for DOT Specification 51 portable tanks containing metallic sodium. (Mode 3.)
4661–X	DOT–E 4661	Foote Mineral Co., Exton, PA	49 CFR 173.34(e)(1)	To authorize transport of butyl lithium in petroleum solvent in DOT Specification 4BA240 cylinders with alternative retest procedures. (Modes 1, 2, and 3.)
5243–X	DOT–E 5243	Austin Powder Co., Cleveland, OH	49 CFR 173.103(a), 173.66(g)(1), 177.835(g).	To authorize modified DOT specification packaging for transportation of Class C or Class A explosives. (Modes 1, 2, and 3.)
5891–X	DOT–E 5891	U.S. Department of Energy, Washington, DC.	49 CFR 173.64(a)(4)	To authorize transport of high explosives in quantities greater than those authorized in 49 CFR, in DOT Specification 15A wooden boxes. (Mode 1.)
6530–X	DOT–E 6530	Liquid Air Corp., San Francisco, CA	49 CFR 173.302(c)	To authorize shipment of hydrogen and mixtures of hydrogen with helium, argon or nitrogen in DOT Specification 3A, 3AA, 3AX or 3AAX steel cylinders. (Modes 1, 2.)
6530–X	DOT–E 6530	Airco Industrial Gases, Murray Hill, NJ	49 CFR 173.302(c)	To authorize shipment of hydrogen and mixtures of hydrogen with helium, argon or nitrogen in DOT Specification 3A, 3AA, 3AX or 3AAX steel cylinders. (Modes 1, 2.)
6530–X	DOT–E 6530	Tri-State Supply Co., Bismarck, ND	49 CFR 173.302(c)	To authorize shipment of hydrogen and mixtures of hydrogen with helium, argon or nitrogen in DOT Specification 3A, 3AA, 3AX or 3AAX steel cylinders. (Modes 1, 2.)
6691–X	DOT–E 6691	Union Carbide Corp., Danbury, CT	49 CFR 173.34(e)(15)(i), Part 107, Appendix B.	To authorize use of DOT Specification 3A or 3AA cylinders over 35 years old which may be retested every 10 years, for transportation of certain flammable and nonflammable compressed gases. (Modes 1, 2, 3, 4, and 5.)
6731–X	DOT–E 6731	U.S. Department of Defense, Washington, DC.	49 CFR 173.266(b), 175.3	To authorize small vials and ampules not currently specified for transportation of an M72E1 simulant chemical agent identification training set, containing a Class B poison, corrosive liquids, and non-hazardous articles. (Modes 1, 4.)
6735–X	DOT–E 6735	Great Lakes Chemical Corp., El Dorado, AR.	49 CFR 173.252	To authorize transport of bromine in a non-DOT specification cylinder constructed in accordance with all requirements of DOT Specification 4B, 4BA or 4BW except that the cylinder shall be marked "DOT–E 6735" in lieu of the DOT specification marking. (Modes 1, 2, and 3.)
6861–X	DOT–E 6861	Teledyne McCormick Selph, Hollister, CA	49 CFR 173.65(a)	To authorize use of DOT Specification 21P fiber drums with DOT Specification 2SL or 2U polyethylene liners, for transportation of certain Class A explosives. (Mode 1.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
8006-X	DOT-E 8006	U.S. Department of Defense, Washington, DC.	49 CFR 173.302(a)(1), 175.3, 178.65	To authorize certain variances from the specifications for DOT Specification 39 cylinders, for shipment of certain nonflammable gases. (Modes 1, 2, 3, and 4.)
8065-X	DOT-E 8065	U.S. Department of Energy, Washington, DC.	49 CFR 173.154(a)(6), 173.86(a)	To authorize shipment of diallyl phthalate-pyrotechnic materials in various DOT Specification wooden boxes. (Mode 1.)
8099-X	DOT-E 8099	U.S. Department of Defense, Washington, DC.	49 CFR 176.120(b)	To authorize cargo loading hatches of vessels being loaded with military explosives to remain open overnight under certain conditions. (Mode 3.)
7465-X	DOT-E 7465	State of Alaska, Department of Transportation, Juneau, AK.	49 CFR 173.304, 176.83, 176.905(1), Part 172, Part 176, Subpart H.	To authorize stowage of transport motor vehicles and liquefied petroleum gases aboard passenger vessels. (Mode 3.)
7607-X	DOT-E 7607	Ecology and Environment, Inc., Buffalo, NY.	49 CFR 172.101, 175.3	To authorize shipment of hydrogen in certain non-DOT specification seamless stainless steel cylinders. (Mode 5.)
7636-X	DOT-E 7636	Minnesota Valley Engineering, Inc., New Prague, MN.	49 CFR 173.304(a), 175.3	To authorize use of an additional model DOT-4L cylinder, having water capacity of 550 pounds, for liquefied carbon dioxide, and nitrous oxide. (Modes 1, 2, 3, and 4.)
7668-X	DOT-E 7668	Foster Wheeler Energy Corp., Livingston, NJ.	49 CFR 173.304(a)	To authorize use of non-DOT specification nonrefillable steel tubes welded closed at both ends, for transport of a nonflammable compressed gas. (Mode 1.)
7963-X	DOT-E 7963	Stauffer Chemical Co., Westport, CT	49 CFR 173.245, 173.356, 173.360(a)(5)	To authorize transport of perchloromethyl mercaptan and thiophene-2-acetyl chloride, in monel tanks constructed in accordance with DOT Specification 51, with certain exceptions. (Modes 1, 2, and 3.)
8051-X	DOT-E 8051	Mauser-Werke GmbH, Brul, West Germany.	49 CFR 178.19, Part 173, Subpart D, F, H.	To authorize hydrobromic acid solutions, corrosive material as an additional commodity. (Modes 1, 2, and 3.)
8264-X	DOT-E 8264	Hercules, Inc., Wilmington, DE.	49 CFR 173.93	To authorize shipment of certain solid propellant explosives (Class B) and smokeless powders for small arms (flammable solids), in non-DOT specification fiber cans or tubes packed in fiberboard boxes. (Modes 1, 2.)
8265-X	DOT-E 8265	do	49 CFR 173.197a, 173.93, 177.838(g)	To authorize transport of certain solid propellant explosives in non-DOT specification fiber tubes packed in telescoping DOT Specification 12B fiberboard boxes, and certain smokeless powders for small arms, in DOT Specification 21C fiber drums packed in fiberboard boxes. (Modes 1, 2.)
8306-P	DOT-E 8306	American Priority Enterprises, Inc., Rahway, NJ.	49 CFR 177.842(a), 177.842(b)	To become a party to Exemption 8306. (Mode 1.)
8324-X	DOT-E 8324	Rexnord, Inc., Milwaukee, WI.	49 CFR 173.245(a)(17), 175.3, 178.131	To authorize shipment of certain corrosive liquids, n.o.s., in a one-gallon tin can, placed in a molded polyethylene liner, overpacked in a modified 26 gage, untined DOT Specification 37A 5 gallon steel drum containing a non-hazardous resin mix. (Modes 1, 2, 3, and 4.)
8339-X	DOT-E 8339	Eastern Steel Barrel Corp., Piscataway, NJ.	49 CFR 173.119(a), (b), 173.245(a)(26), 173.245(b)(6), 173.249(a)(1), 173.250a(a)(1), 173.257(a)(1), 173.263(a)(28), 173.265(d)(6), 173.266(b)(8), 173.271, 173.272(i)(9), 173.277(a)(6), 173.287(c)(1), 173.289(a)(1), 173.292(a)(1), 173.357(b), 178.19.	To authorize manufacture, marking and sale of non-DOT specification 55-gallon polyethylene Specification 34 type container, for transportation of certain oxidizers, corrosive liquids, Class B poison, flammable liquids and a corrosive solid. (Modes 1, 2, and 3.)
8489-P	DOT-E 8489	Ciba-Geigy Corp., Greensboro, NC	49 CFR 173.154, 173.182, 173.217, 173.245b.	To become a party to Exemption 8489. (Modes 1, 2, and 3.)
8525-X	DOT-E 8525	Associated Container Transportation (USA), New York, NY	49 CFR 173.389(o)(1), 173.392(c), 176.700(h)(1), 176.700(h)(2).	To authorize shipment of mineral monazite sand, classed as radioactive material, low specific activity, n.o.s. under modified exclusive use provisions. (Modes 1, 2, and 3.)
8647-X	DOT-E 8647	Marine Technical Services, Inc., Stafford, TX.	49 CFR 172.101 column 6(b), 173.304(a)(2), 175.30.	To authorize shipment by cargo-only aircraft of pressurized liquid oxygen in DOT Specification 4L cylinders. (Mode 4.)
8716-P	DOT-E 8716	GTE Products Corp., Waltham, MA	49 CFR 173.28(m)	To become a party to Exemption 8716. (Mode 1.)
8722-X	DOT-E 8722	Northrop Corp., Hawthorne, CA	49 CFR 172.101, 173.276, 174.3, 175.3, 175.30, 176.3.	To renew; to authorize use of 304L stainless steel for container construction and redesignate assembly name from F-5G to F-20. (Modes 1, 2, 3, and 4.)
8732-X	DOT-E 8732	Dow Chemical Co., Midland, MI	49 CFR 173.245	To authorize use of a DOT Specification MC-303 and MC-306 cargo tanks, made of aluminum or steel for transportation of a corrosive material. (Mode 1.)
8753-X	DOT-E 8753	Union Carbide Corp., Danbury, CT	49 CFR 173.315	To renew, to increase the water capacity of the LTM-1600 tank from 1500 to 1670 and the LTM 2000 tank from 1950 to 2100 gallons, and to increase the 2 year retest period to 5 years. (Mode 1.)
8764-P	DOT-E 8764	Redding Air Service, Inc., Redding, CA	49 CFR 173.286, 175.3, 175.85	To become a party to Exemption 8764. (Mode 4.)
8770-X	DOT-E 8770	Eastman Kodak Co., Rochester, NY	49 CFR 172.402, 173.286(c)	To authorize shipment of a corrosive liquid and minute quantity of a flammable, poisonous solid in DOT Specification 12A, 12B or 15A fiberboard or wooden boxes with inside glass bottles. (Mode 1, 2, and 3.)
8772-X	DOT-E 8772	Armak Co., Chicago, IL	49 CFR 172.101, column 6(b)	To authorize an increase in the net quantity limitation, not exceeding five gallons per package, for shipment of certain corrosive liquids and flammable liquids that are corrosive, when shipped via cargo-only aircraft. (Mode 4.)
8901-P	DOT-E 8901	Great Lakes Chemical Corp., West Lafayette, IN.	49 CFR 173.357	To become a party to Exemption 8901. (Mode 1.)
8901-P	DOT-E 8901	Hopkins Agricultural Chem. Co., Madison, WI.	49 CFR 173.357	To become a party to Exemption 8901. (Mode 1.)
9052-X	DOT-E 9052	Chemical Handling Equipment Co., Inc., Detroit, MI	49 CFR 173.119, 173.125, 178.19, 178.253, Part 173, Subpart F.	To authorize an alternate steel frame to surround the polyethylene portable tank for shipment of various corrosives, flammable and oxidizers. (Modes 1, 2, and 3.)
9061-X	DOT-E 9061	The S. S. I. Group Ltd., Fairdale, KY	49 CFR 172.504, 173.178	To authorize rail as an additional mode of transportation, and to allow more than 10 lbs. of calcium carbide per transport vehicle (Modes 1, 2.)
9061-P	DOT-E 9061	Allied Chemical, Morristown, NJ	49 CFR 173.164(a)(6)	To become a party to Exemption 9061. (Modes 1, 2.)
9116-X	DOT-E 9116	Hoover Universal, Inc., Beatrice, NE	49 CFR 173.119, 173.256, 173.266, 178.19, 178.253, Part 173 Subpart F.	To authorize additional portable tanks of 300 gallon capacity identical (except for size) to the 400 gallon capacity presently authorized. (Modes 1, 2, and 3.)

RENEWAL AND PARTY TO EXEMPTIONS—Continued

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9163–X	DOT–E 6906	The Garret Corp., Tempe, AZ	49 CFR 173.302(a)(1), 175.3, 178.65	To authorize manufacture, marking and sale of non-DOT specification nonrefillable steel aperical pressure vessels, for shipment of nitrogen with traces of helium, classed as nonflammable gas. (Modes 1, 2, 3, and 4.)
9174–P	DOT–E 9174	McDonnell Douglas Corp., St. Louis, MO	49 CFR 173.302(a)	To become a party to Exemption 9174. (Mode 1.)

NEW EXEMPTIONS

Application No.	Exemption No.	Applicant	Regulation(s) affected	Nature of exemption thereof
9066–N	DOT–E 9066	Bayern-Chemie GmbH, Ottobrunn, West Germany.	49 CFR 173.154, 175.3	To authorize transport of an airbag gas generator as flammable solid, in a box constructed of single wall corrugated fiberboard with an inside styropor container insert for shock absorption. (Modes 1, 2, 3, and 4.)
[illegible]–N	DOT–E 9089	Fabricated Metals, Inc., San Leandro, CA	49 CFR 178.251	to authorize manufacture, marking and sale of DOT Specification 56 portable tanks, with one specification deviation compensated by additional structural features, for transportation of oxidizers. (Modes 1, 2.)
9119–N	DOT–E 9119	Bennett Industries, Pacoima, CA	49 CFR 173.125	To authorize manufacture, marking and sale of DOT Specification 34 drums, for shipment of certain flammable liquids. (Modes 1, 2, 3.)
9125–N	DOT–E 9125	Tri-Wall Containers (Israel) Ltd., Tel-Aviv, Israel	49 CFR 173.252(a)(1), 178.168, 178.169	To authorize manufacture, marking and sale of wooden boxes comparable to DOT Specification 15A or 15B, except they are constructed of mediterranean pine, for shipment of liquid bromine. (Modes 1, 3.)
9130–N	DOT–E 9130	Hydrotech Chemical Corp., Marietta, GA	49 CFR 173.154	To authorize shipment of an oxidizer, n.o.s., in polyethylene containers of not over 10 pounds capacity each, overpacked in a non-DOT specification corrugated fiberboard box as prescribed in 49 CFR 173.217(c). (Modes 1, 2.)

Fiscal Service

[Dept. Circ. 570, 1983 Rev., Supp. No. 15]

Surety Companies Acceptable on Federal Bonds

A certificate of authority as an acceptable surety on Federal bonds is hereby issued to the following company under Sections 9304 to 9308 Title 31 of the United States Code. An underwriting limitation of $1,000,000 has been established for the company.

Name of Company: Hawaiian Insurance & Guaranty Company, Limited
Business Address: P.O. Box 2255, Honolulu, HI 96804
State of Incorporation: Hawaii.

Certificates of authority expire on June 30 each year, unless renewed prior to that date or sooner revoked. The certificates are subject to subsequent annual renewal so long as the companies remain qualified (31 CFR Part 223). A list of qualified companies is published annually as of July 1 in Department Circular 570, with details as to underwriting limitations, areas in which licensed to transact surety business and other information. Federal bond-approving officers should annotate their reference copies of the Treasury Circular 570, 1983 Revision, at page 30543 to reflect this addition. Copies of the circular, when issued, may be obtained from the Operations Staff, Banking and Cash Management, Department of the Treasury, Washington, DC 20226.

Dated: March 13, 1984.

W. E. Douglas,

Commissioner.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported for Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and the Delegation of Authority from the Director, USIA (47 FR 57600, December 27, 1982), I hereby determine that the object in the exhibit, "Titian: The Flaying of Marsyas", imported from abroad for the temporary exhibition without profit within the United States is of cultural significance. This object is imported pursuant to a loan agreement between the National Gallery of Art and foreign lenders. I also determine that the temporary exhibition or display of the exhibit object at the National Gallery of Art, beginning on or about March 23, 1984, to on or about September 3, 1984, is in the national interest. Public notice of this determination is ordered to be published in the **Federal Register.**

Dated: March 19, 1984.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that the Federal Deposit Insurance Corporation's Board of Directors will meet in open session at 2:00 p.m. on Monday, March 26, 1984, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Disposition of minutes of previous meetings.

Application for Federal deposit insurance:

Intermountain Thrift and Loan, Salt Lake City, Utah, an operating noninsured industrial bank.

Request for reconsideration of a previous denial of an application for consent to purchase assets and assume liabilities and establish one branch:

Farmers and Merchants Bank and Trust of Watertown, Watertown, South Dakota, an insured State nonmember bank, for consent to purchase certain assets of and assume the liability to pay deposits made in the Rosholt Branch of United National Bank, Sioux Falls, South Dakota, and for consent to establish that branch as a branch of Farmers and Merchants Bank and Trust of Watertown.

Applications for consent to establish a branch:

Hazen First State Bank, Hazen, Arkansas, for consent to establish a branch on Highway 70, Biscoe, Arkansas.

The Howard Savings Bank, Newark, New Jersey, for consent to establish a branch within the Acme Shopping Center on the grounds of the Rockaway Townsquare Mall, Mt. Hope and Mt. Pleasant Avenues, Rockaway Township, New Jersey.

The Howard Savings Bank, Newark, New Jersey, for consent to establish a branch at the west side of Pompton Avenue, between Claremont and Bloomfield Avenues, Verona, New Jersey.

First Commercial Bank, Asheville, North Carolina, for consent to establish a branch in the Ingles Supermarket at 915 Merrimon Avenue, Asheville, North Carolina.

Recommendation regarding the liquidation of a bank's assets acquired by the Corporation in its capacity as receiver, liquidator, or liquidating agent of those assets:

Memorandum and Resolution re: First National Bank of Oak Lawn Oak Lawn, Illinois.

Memorandum and resolution re: Withdrawal of proposed amendments to Parts 332 and 337 of the Corporation's rules and regulations, entitled "Powers Inconsistent with Purposes of Federal Deposit Insurance Law" and "Unsafe and Unsound Banking Practices," respectively, which would have specifically authorized nonmember insured banks to conduct check-guaranty and credit-card sponsorship programs, subject to fixed limitations on risk.

Memorandum re: Budget Year 1984 Liquidation Expense Budget.

Reports of committees and officers:

Minutes of actions approved by the standing committees of the Corporation pursuant to authority delegated by the Board of Directors.

Reports of the Division of Bank Supervision with respect to applications, requests, or actions involving administrative enforcement proceedings approved by the Director or an Associate Director of the Division of Bank Supervision and the various Regional Directors pursuant to authority delegated by the Board of Directors.

Report of the Director, Office of Corporate Audits and Internal Investigations:

Memorandum re: Status of Auditee Corrective Actions.

Discussion Agenda:

Memorandum and resolution re: Final amendments to the Corporation's rules and regulations to implement section 906 of the International Lending Supervision Act of 1983 which amendments establish uniform requirements for the accounting for fees associated with restructuring of international lending arrangements and nonrefundable fees charged by banking institutions in connection with other international loans.

Memorandum and resolution re: Final amendments to Part 330 of the Corporation's rules and regulations, entitled "Clarification and Definition of Deposit Insurance Coverage" which concern insurance coverage of brokered deposits.

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550 17th Street, NW., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: March 19, 1984.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

7

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Meeting

Pursuant to the provisions of the "Government in the Sunshine Act" (5 U.S.C. 552b), notice is hereby given that at 2:30 p.m. on Monday, March 26, 1984, the Federal Deposit Insurance Corporation's Board of Directors will meet in closed session, by vote of the Board of Directors, pursuant to sections 552b (c)(2), (c)(6), (c)(8), and (c)(9)(A)(ii) of Title 5, United States Code, to consider the following matters:

Summary Agenda: No substantive discussion of the following items is anticipated. These matters will be resolved with a single vote unless a member of the Board of Directors requests that an item be moved to the discussion agenda.

Recommendations with respect to the initiation, termination, or conduct of administrative enforcement proceedings (cease-and-desist proceedings, termination-of-insurance proceedings, suspension or removal proceedings, or assessment of civil money penalties) against certain insured banks or officers, directors, employees, agents or other persons participating in the conduct of the affairs thereof:

Names of persons and names and locations of banks authorized to be exempt from disclosure pursuant to the provisions of subsections (c)(6), (c)(8), and (c)(9)(A)(ii) of

the "Government in the Sunshine Act" [5 U.S.C. 552b (c)(6), (c)(8), and (c)(9)(A)(ii)).

Note.—Some matters falling within the category may be placed on the discussion agenda without further public notice if it becomes likely that substantive discussion of those matters will occur at the meeting.

Discussion Agenda:

Application for Federal deposit insurance for a United States branch of a foreign bank:

Bank Hapoalim B.M., Tel Aviv, Israel, for Federal deposit insurance of deposits received at and recorded for the accounts of its United States branch to be located on the fourth floor, 10 Rockfeller Plaza, New York City (Manhattan), New York.

Personnel actions regarding appointments, promotions, administrative pay increases, reassignments, retirements, separations, removals, etc.:

Names of employees authorized to be exempt from disclosure pursuant to the provisions of subsection (c)(2) and (c)(6) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(2) and (c)(6)).

The meeting will be held in the Board Room on the sixth floor of the FDIC Building located at 550—17th Street, N.W., Washington, D.C.

Requests for further information concerning the meeting may be directed to Mr. Hoyle L. Robinson, Executive Secretary of the Corporation, at (202) 389–4425.

Dated: March 19, 1984.

Federal Deposit Insurance Corporation.

8

FEDERAL DEPOSIT INSURANCE CORPORATION

Changes in Subject Matter of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at its closed meeting held at 2:30 p.m. on Monday, March 19, 1984, the Corporation's Board of Directors determined, on motion of Chairman William M. Isaac, seconded by Director Irvine H. Sprague (Appointive), concurred in by Director C. T. Conover (Comptroller of the Currency), that Corporation business required the withdrawal from the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Request of Universal Trust Company, San Juan, Puerto Rico, an operating noninsured bank, for modification of a previous Order granting Federal deposit insurance.

The Board further determined, by the same majority vote, that Corporation business required the addition to the agenda for consideration at the meeting, on less than seven days' notice to the public, of the following matter:

Resolution re: Heritage Bank, Anaheim, California

The Board further determined, by the same majority vote, that no earlier notice of these changes in the subject matter of the meeting was practicable; that the public interest did not require consideration of the matter added to the agenda in a meeting open to public observation; and that the matter added to the agenda could be considered in a closed meeting by authority of subsections (c)(8), (c)(9)(A)(ii), and (c)(9)(B) of the "Government in the Sunshine Act" (5 U.S.C. 552b (c)(8), (c)(9)(A)(ii), and (c)(9)(B)).

Dated: March 19, 1984.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

SECURITIES AND EXCHANGE COMMISSION

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meetings during the week of March 26, 1984, at 450 Fifth Street, NW., Washington, D.C.

Open meetings will be held on Monday, March 26, 1984, at 3:00 p.m., and on Thursday, March 29, 1984, at 10:00 a.m. in Room 1C30. A closed meeting will be held on Tuesday, March 27, 1984, at 9:30 a.m.

The Commissioners, Counsel to the Commissioners, the Secretary of the Commission, and recording secretaries will attend the closed meeting. Certain staff members who are responsible for the calendared matters may be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, the items to be considered at the closed meeting may be considered pursuant to one or more of the exemptions set forth in 5 U.S.C. 552b(c) (4), (8), (9)(A) and (10) and 17 CFR 200.402(a) (4), (8), (9)(i) and (10).

Chairman Shad and Commissioners Treadway and Cox voted to consider the items listed for the closed meeting in closed session.

The subject matter of the open meeting scheduled for Monday, March 26, 1984, at 3:00 p.m., will be:

The Commission will meet with representatives of the International Accounting Standards Committee to exchange views on recent activities regarding the development of international accounting and reporting standards, including efforts to harmonize such standards. For further information, please contact Clarence Staubs at (202) 272–2130.

The subject matter of the closed meeting scheduled for Tuesday, March 27, 1984, at 9:30 a.m., will be:

Reports of investigation.
Institution of injunctive actions.
Formal order of investigation.
Institution and settlement of administrative proceedings on an enforcement nature.
Opinions.

The subject matter of the open meeting scheduled for Thursday, March 29, 1984, at 10:00 a.m., will be:

1. Consideration of whether to: (1) Amend the Commission's rules relating to general organization and information requests, to delegate to the General Counsel the authority to decide Privacy Act appeals; and (2) issue a release announcing the amendment. For further information, please contact W. Robert Gray at (202) 272–2419.

2. Consideration of whether to adopt amendments to Rule 10b–4 under the Securities Exchange Act of 1934 that would prohibit hedged and multiple tendering and narrow the types of offers to which Rule 10b–4 applies. For further information, please contact M. Blair Corkran, Jr. at (202) 272–2853.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Bruce Kohn at (202) 272–3195.

George A. Fitzsimmons,

Secretary.

March 16, 1984.

49 CFR Parts 172, 173, 174, 176, 177, 178, and 179

Shipment of Hazardous Materials; Proposed Miscellaneous Amendments

DEPARTMENT OF TRANSPORTATION

Research and Special Programs Administration

49 CFR Parts 172, 173, 174, 176, 177, 178, and 179

[Docket No. HM-166R; Notice No. 84-3]

Shipment of Hazardous Materials; Proposed Miscellaneous Amendments

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Materials Transportation Bureau (MTB) is proposing to make several miscellaneous amendments to the regulations pertaining to the shipment of hazardous materials. This action is necessary to update the regulations and to reduce MTB's backlog of rulemaking petitions. Approximately twenty petitions would be eliminated by this rulemaking.

DATE: Comments must be received by June 29, 1984.

ADDRESS: Address comments to the Dockets Branch, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590. Comments should identify the docket and notice number and be submitted in five copies. Persons wishing to receive confirmation of receipt of their comments should include a self-addressed stamped post card. The Dockets Branch is located in room 8426 of the Nassif Building, 400 7th Street SW., Washington, D.C. Public dockets may be reviewed between the hours of 8:30 a.m. and 5:00 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Darrell L. Raines, Chief, Exemptions and Regulations Termination Branch, Office of Hazardous Materials Regulation, Materials Transportation Bureau, Washington, D.C. 20590 (202) 426-2075.

SUPPLEMENTARY INFORMATION: This document is primarily designed to reduce regulatory burdens by incorporating changes in the Hazardous Materials Regulations based on either petitions for rulemaking submitted in accordance with 49 CFR 106.31 or on MTB's own initiative. These proposed amendments are in keeping with Executive Order 12291 and are designed to simplify existing regulations.

In Part 172, these proposed amendments would (1) change the word "may" to "must" in § 172.101(i)(1), (i)(2) and (i)(3) to be consistent with § 172.102(L) and § 176.63. Also, a new paragraph would be added to § 172.101(i) to explain the meaning of "1,2" as shown in § 172.102(L); (2) revise the last sentence of the first paragraph of the introduction to the CERCLA List (§ 172.101) for clarity; (3) add "Aluminum chloride, anhydrous" as a corrosive material to the § 172.101 table; (4) add Ammonium persulfate as a proper shipping name in the § 172.101 table; (5) delete the entry "Cartridge cases, empty, primed" from § 172.101 and § 173.107; (6) add "Diacetone alcohol" as a combustible liquid to the § 172.101 table; (7) add "Fluosilicic acid" and "Hydrofluosilicic acid" to the § 172.101 table and § 173.265; (8) change the hazard class of "Hexamethyleneimine" from a corrosive material to a flammable liquid in the § 172.101 table; (9) add Methyl cyanide to the § 172.101 table; (10) add Potassium persulfate, Sodium persulfate, Sodium sulfide, anhydrous *or* Sodium sulfide *with less than 30 percent water of crystallization;* Sodium sulfide, hydrated *with not less than 30 percent water* and Trichloroisocyanuric acid, dry *containing over 39 percent available chlorine* to the § 172.101 table; (11) revise § 172.504(c) to make the placarding requirements consistent for Table 2 materials when transported by motor vehicle, rail car, or a freight container when transported by highway or by rail car.

In Part 173, these proposed amendments would (1) amend § 173.7(a) to include a reference to a joint Department of Defense (DOD) publication which prescribes policies and procedures for the issuance of a Certification of Equivalency (COE) by the DOD; (2) revise § 173.31(a)(2) to delete obsolete tank car references; (3) revise § 173.31(c)(9) regarding retesting and to authorize additional type of linings for tank cars; (4) revise § 173.31(c)(10) to require stenciling of the test due date for the tank car, safety relief valve and heater system; (5) revise the retest table in § 173.31(c)(13) by deleting obsolete references; and adding two footnotes; (6) revise § 173.32(a) to eliminate the need for the owner of DOT Specification 56 and 57 portable tanks to keep on file a copy of the manufacturers data report; (7) delete § 173.32a(e) because the requirement for compliance expired October 1, 1981; (8) revise § 173.33(d)(13) to eliminate the need for operators of certain DOT Specification MC 330 or MC 331 cargo tanks to file a copy of the retest report with the Director of the Bureau of Motor Carrier Safety, Federal Highway Administration, Department of Transportation, Washington, D.C. 20590; (9) delete paragraph (c)(4) of § 173.34; (10) amend the Table in § 173.34(e)(10) by adding DOT Specification 3 AA for argon, helium, nitrogen, oxygen, breathing air, and dry compressed air; (11) amend § 173.53(h) to include the Bureau of Mines, U.S. Department of the Interior as an authorized agency to examine Type 8 explosives; (12) remove references to obsolete tank car references in § 173.119(a)(12); (13) authorize the use of DOT Specification MC 310, MC 311, or MC 312 cargo tanks in § 173.119(a)(17) for the Transporation of flammable liquids; (14) revise § 173.119(a)(18) and (e)(2) by deleting the reference to obsolete tank cars; (15) revise § 173.119(e)(3), (e)(3)(i), and (f)(5) to authorize the use of DOT Specification MC 310, MC 311 or MC 312 cargo tanks for the transportation of flammable liquids; (16) correct (see Note 2) in § 173.119(f) to read (see Note 1); (17) amend § 173.119(f)(3) and (f)(4) to remove the reference to obsolete tank cars; (18) remove and reserve paragraphs (g) and (h) of § 173.119; (19) revise § 173.123(a)(5) by deleting the reference to ARA-IV-A [1] tank cars and to Note 1; (20) eliminate the need for a heat retardant paint to be examined by the Bureau of Explosives and approved by the Associate Director for HMR in § 173.124(a)(1) and (a)(2); (21) eliminate the need for certain inside metal containers to be examined by the Bureau of Explosives and approved by the Associate Director for HMR in § 173.202(a)(1); (22) delete the net weight restriction in § 173.206(c)(2); (23) remove the entire § 173.238 as it pertains to commercial aircraft rocket engines and/or aircraft rocket engine igniters; (24) revise § 173.245(a)(25) to eliminate the need for inside aluminum containers to be examined by the Bureau of Explosives and approved by the Associate director for HMR; (25 revise § 173.252(g)(1) to eliminate the need for the gasket material to be examined by the Bureau of Explosives and approved by the Associate Director for HMR; (26) revise § 173.256(a)(3) to eliminate the need for a molded liner to be examined by the Bureau of Explosives and approved by the Associate Director for HMR; (27) amend § 173.263(a)(9) to authorize the use of a safety relief valve on DOT Specification 103BW and 111A100W5 tank cars; (28) clarify § 173.289(a)(2)(i) regarding marking requirements; (29) delete reference to ARA-V tank cars in Note 12 of the § 173.314(c) table. Also, for the entry Chlorotrifluoromethane (R-13), DOT-106A500X, 110A500W and Note 25 would be removed; (30) amend the

[1] The use of existing tank cars authorized but new construction not authorized.

heading in column 4 of Table in § 173.315(b) to show that "See Note 1" applies to all of the entries; (31) revise § 173.354(a)(5) and (a)(6) to authorize the use of a frangible disc in series with a spring-loaded safety relief valve on DOT Specification 51 portable tanks and DOT Specification MC 331 cargo tanks which are used to transport motor fuel antiknock compound; (32) add a paragraph (c)(5) to § 173.860 to provide an exception for minute quantities of metallic mercury in electron and vapor tubes.

In Part 174, these proposed amendments would (1) revise § 174.63(d) to specify the criteria for approving DOT Specifications IM 101 and IM 102 protable tanks for trailer-on-flat-car (TOFC) and container-on-flat-car (COFC) service and (2) revise § 174.104(a) to specifically state that cushioned underframe rail cars are authorized for the transportation of explosives; also, paragraph (b)(6) would be amended to require the carrier to check for the presence of flammable or other potential hazardous residues that may have permeated the car floor or walls.

In Part 176, § 176.305(c)(5) would be revised to clarify that flammable liquids having a flash point above 73° and in excess of one ton may be transported in any hold or compartment that is fitted with a gooseneck type of vent head.

In Part 177, § 177.817 (a) and (d) would be revised to make the shipping paper requirements consistent with those in Part 172.

In Part 178, (1) § 178.24–7(a), 178.27–3(a), and 178.35a–3(a) would be revised to clarify that testing may be done at a location other than at the manufacturing location; (2) relocate Note 2 in § 178.37–5(a) of the end of the first table; (3) revise § 178.46–4(d)(12) by eliminating the need for a copy of the inspectors report to be filed with the Associate Director for HMR; (4) correct Part III to read Part II in § 178.46–8(e)(2); (5) amend §§ 178.47–8(a), 178.50–8(b), 178.51–8(d), 178.53–8(b), 178.54–8(a)(2), 178.55–8(d), 178.56–8(d), 178.57–8(e), 178.58–8(a), 178.59–7(a), 178.60–7(b), 178.61–8(d), and 178.65–6(d) to require all DOT Specifications for welded steel cylinders to reference CGA Pamphlet C–3 for consistenty; (6) add the word "stress" after the word "wall" in § 178.57–10(a)(5); (7) revise § 178.61–15(a) to specify lot size and frequency of test; (8) amend § 178.65–5(b) to authorize the use of aluminum alloy identified as "1060" for DOT Specifications 39 cylinders; (9) revise § 178.80–11; (10) eliminate the minimum marking size for metal drums in §§ 178.80–12(a), 178.81–12(a), 178.82–12(a), 178.83–12(a), 178.88–11(a), 178.89–10(a), 178.90–11(a), 178.92–12(a), 178.98–10(a), 178.99–10(a), 178.100–10(a), 178.102–4(a), 178.107–10(a), 178.109–10(a), 178.115–11(a), 178.116–11(a), 178.117–12(a), 178.118–11(a), 178.130–9(a), 178.131–10(a), 178.132–10(a), 178.133–10(a), 178.134–4(a), 178.135–9(a), 178.137–6(a), 178.140–7(a), and 178.141–7(a); (11) revise § 178.102–4(a) to allow embossment on either permanent head of a new DOT Specification 6D drum or on the side of a drum which has been altered to a DOT Specification 6D; (12) revise § 178.117–9 to authorize the use of a performance type of closure for DOT Specification 17F steel drums; (13) revise § 178.134–2(c) to allow two weep holes in a DOT Specification 37M cylindrical steel overpack immediately below the top chime; (14) correct the introductory text of § 178.137–7(b) to reference paragraphs (1) and (2) instead of paragraphs (a)(1) and (2); (15) revise § 178.251–3(d) to reduce the number of size of specimens which are required to be tested for DOT Specification 56 and 57 portable tanks. Also, the test interval would be increased from six months to twelve months; (16) revise § 178.255–8 to eliminate the need for safety devices on DOT Specification 60 portable tanks to be approved by the Associate Director for HMR; (17 revise § 178.255–15(a) to eliminate the need for a copy of the manufacturers data report and registration of each DOT Specification 60 portable tank to be filed with the Associate Director for HMR; (18) revise §§ 178.337–17(a) and 178.340–10(b) by requiring the metal certification plate to be on the left side of the cargo tank near the front on all DOT Specification MC 306, MC 307, MC 312, MC 331, and MC 331, and MC 338 cargo tanks constructed after September 30, 1984.

In Part 179, (1) § 179.200–15(a) would be revised by deleting the reference to § 179.202–1; (2) amend the § 179.201–1(a) table by deleting the reference to 179.202–1 each time it appears in the line entry "Special references"; (3) remove § 179.202–1 because the same requirement is contained in § 179.201–6(a) and, (4) amend the table to authorize a safety relief valve on DOT Specification 103BW and 111A100W5 tank cars.

These proposed regulations are considered to be non-major under Executive Order 12291 and nonsignificant under the DOT regulatory policies and procedures (44 FR 11034; February 26, 1979).

The economic impact of this proposal has been found to be so minimal that further evaluation is unnecessary. These proposed regulations are considered to be noncontroversial and are intended to ease the burden on manufacturers, shippers, carriers and users of hazardous materials.

Since the impact of this proposal is expected to be minimal, the MTB certifies that it will not have a significant economic impact on a substantial number of small entities.

List of Subjects

49 CFR Part 178

Hazardous materials transportation. Packaging and containers.

49 CFR Part 179

Hazardous materials transportation. Railroad safety.

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 172.101(i) (1), (2), and (3).	The use of the word "may" is not consistent with § 172.102(i) and § 176.63. Also, a new paragraph would be added to § 172.101(i) to explain what "1, 2," means regarding stowage.	To amend paragraphs (i) (1), (2), and (3) of § 172.101 by changing the word "may" to "must" and add a new paragraph to read as follow: "1, 2" means the material must be stowed either "on deck" or "under deck"; however, "under deck stowage should be used if available".

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 172.101 (CERCLA List).	Question for clarity	In § 172.101, the last sentence of the first paragraph preceding the CERCLA List would be revised to read as follows: NOTE— * * * With respect to other materials in the following list, those that are not forbidden materials or do not fall within a hazard class defined in this subchapter are not subject to the requirements of this subchapter.
§ 172.101	To add Aluminum chloride, anhydrous as a corrosive material to the § 172.101 Table. This material will react with moisture or water and releases hydrogen chloride gas and heat. The UN Recommendation for Transport of Dangerous Goods, IMO and ICAO list anhydrous aluminum chloride as a corrosive.	See § 172.101 Table for proposed entry.
§ 172.101	To add Methyl cyanide to the § 172.101 Table. Methyl cyanide is the international description for Acetonitrile, NA 1648, which is in the Table. Because of the "UN" vs "NA" prefix to the identification number, methyl cyanide would be added as a complete entry instead of a "See" reference to acetonitrile.	Do
§ 172.101, § 173.107.	The Sporting Arms and Ammunition Manufacturers' Institute, Inc. has requested that all references to Cartridge cases, empty, primed be removed for clarity. The petitioner points out that this product is not listed and defined in § 173.100 and that in § 173.55 cartridge cases containing only a primer are exempt from Parts 170–189.	In 172.101, the Table would be amended by removing the entire entry for "Cartridge cases, empty, primed." Also, in § 173.107 all references to cartridge cases, empty primed would be removed.
§ 172.101, § 173.265.	To add the proper shipping name "Fluosilicic acid" and "Hydrofluosilicic acid" to the § 172.101 Table and § 173.265. The United Nations Recommendations on the Transport of Dangerous Goods do not list hydrofluorosilicic acid or hydrofluosilicac acid as proper shipping names; only "Fluosilicic acid" is listed. This change will facilitate international shipments.	See § 172.101 Table for proposed entries. Also, § 173.265 would be amended to include "Fluosilicic acid" and "Hydrofluosilicic acid".
§ 172.101	To add a new entry in the Hazardous Materials Table for "Diacetone alcohol" classed as Combustible liquid. Flash point of Diacetone alcohol range from 48° F. to 148° F. (closed cup) depending on the grade of diacetone alcohol. At present, diacetone alcohol which has a flash point of 100 ° F. or higher and is classed as Combustible liquid must be described as Combustible liquid, n.o.s. and NA 1993 must be used.	See § 172.101 Table for proposed entry
§ 172.101	To change the hazard class of Hexamethylenediamine from corrosive material to flammable liquid. In addition to being corrosive to skin, hexamethylenediamine has a closed cup flash point of 65° F. (18° C) and meets the definition of the flammable liquid hazard class.	Do

	Trichloro-s-triazine-trione dry, *containing over 39% available chlorine.*	Oxidizer	NA1479	Oxidizer	173.153	173.217	50 pounds	100 pounds	1, 2	1, 2	Shade from radiant heat. Keep dry. Stow separated from nitrogen compounds

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 172.504(c)	To make the placarding requirements consistent for Table 2 materials when transported by motor vehicle, freight container or rail car.	In § 172.504, paragraph (c) would be revised to read as follows: (c) Except for a transport vehicle or freight container that contains a hazardous material covered by Table 1; when the gross weight of all hazardous materials covered by Table 2 is less than 1000 pounds, no placard is required on a motor vehicle rail car, or freight container. This paragraph does not apply to a portable tank, cargo tank, tank car, or to transportation by aircraft or vessel.
§ 173.7(a)	To add a reference to a joint Department of Defense (DOD) publication which states the policies and procedures for the issuance of a Certification of Equivalency (COE) by the DOD.	In § 173.7 paragraph (a) would be revised to read as follows: (a) Hazardous materials offered for transportation by, for, or to the Department of Defense (DOD) of the U.S. Government, including commercial shipments pursuant to a DOD contract, must be packaged in accordance with the regulations in this subchapter or in packagings of equal or greater strength and efficiency as certified by DOD pursuant to the "Policies and Procedures for Hazardous Materials Packaging Certification, AFLCR 800-29/AFSCR 800-29/DARCOM-R 700-103NAVMATINST 4030.11/DLAR 4145.37. Hazardous materials offered for transportation by DOD under this provision may be reshipped by any shipper to any consignee provided the original packaging has not been damaged or altered in any manner.
§ 173.31(a)(2)	The Association of American Railroads (AAR) has petitioned for several changes to § 173.31 in order to delete unnecessary text and reference to obsolete tank car specifications. The MTB concurs with these proposed changes.	In § 173.31, paragraph (a)(2) would be revised to read as follows: (2) Tanks prescribed in the following table are authorized for service provided they comply with all of the other safety requirements of this subchapter:

Specifications prescribed in current regulations	Other specifications permitted (subject to the notes)	Notes
105A200W	105A100W	1
105A200A LW	105A100A LW	1
105A300W	ICC-105, 105A300	
105A400W	105A400	
105A500W	105A500	
105A600W	105A600	
106A500X	ICC-27, BE-27, 106A500	
106A800X	106A800	
107A***		2

Note 1.—Tanks built as Spec. DOT-105A100-W or 105A100AL-W may be altered and reclassified as Spec. DOT 105A200W or 105A200ALW, respectively, by installing safety relief valves, retesting and stenciling in accordance with the applicable specification.

Note 2.—The test pressures of tanks built in the United States prior to January 1, 1956, may be increased to comply with current Spec. DOT-107A except that tanks built prior to 1941 are not authorized. Original and revised test pressure must be indicated and may be shown on a plate attached to the bulkhead of the car.

§ 173.31(c)(9)	To clarify that a tank car must be retested at time of repair and that the reference to Table 1 is for retest pressure only. Also, to clarify that lined tanks must be retested after a lining is removed prior to being replaced in service as an unlined tank or prior to receiving a new lining. In addition, two other tank car linings, elastomeric and polyvinyl chloride, are being proposed	In § 173.31, paragraph (c)(9) would be revised to read as follows: (9) After repairs requiring welding, riveting, caulking of rivets, or hot or cold forming to restore tank contour, tanks must be retested at the pressure specified in Retest Table 1 of this paragraph before return to service. Glass, lead, rubber, elastomeric or polyvinyl chloride lined tanks must be retested before lining is renewed or after lining is removed. Interior heater systems must be retested before return to service after repairs or renewals of any part of the system.

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 173.31(c)(10)	To require stenciling of the test due date for the tank, safety relief valve and interior heater system so that the carrier and shipper personnel can quickly tell if a tank car is in compliance.	In § 173.31, paragraph (c)(10) would be revised to read as follows: (10) The year of the test of any tank, tank safety relief valve, and interior heating system, and the pressure to which it was tested and the test due dates must be stenciled on the tank or on the jacket if insulated, except that if a retest is required specifically by the regulations during the calendar month the retest falls due, the month and year must be so stenciled. On existing cars, the test due date stencil must be applied at the next test date or tank painting whichever comes first. Any safety relief valve from a stock which has been tested within six months of installation may be considered as having been tested or retested in the month in which installed, providing the valve has been protected from deterioration during this period.
§ 173.31(c)(13) Table 1.	To update the Table by deleting the reference to obsolete tank car specifications and footnotes thereto, deleting obsolete references in the column marked "Up to 10 years", adding footnotes "u" and "v", and changing "95" to read "92" in the last column for Specification 112A175W.	In § 173.31, the Retest Table following paragraph (c)(13) would be amended by revising or deleting the following entries:

RETEST TABLE 1

Specification	Car age and retest interval (years)[1]			Pressure relief valve	Tank	Retest pressure—p.s.i.	
	Tank and interior heater systems					Pressure relief valve	
	Up to 10 years old	Over 10 to 22 years old	Over 22 years old			Start to discharge	Vapor tight
REVISE

DELETE							
DOT-103CAL		2	1	(7)	60	[illegible]	28
EMERG. USG- A, B, and C		10	10	10	60	25	
ARA-III		10	10	[illegible]	[illegible]	[illegible]	
ARA-III acid (unlined)			1	None	60		
ARA-III (rubber lined)			(7)	None	[illegible]		
ARA-IV			10	10	[illegible]	[illegible]	[illegible]
ARA-IV-A			10	5	[illegible]	35	[illegible]
ARA-V			[10]	[5]	300	[225]	[illegible]

[1] Class 103 and 104 tank cars built before January 1, 1959 and equipped with 25 psi safety relief valves may remain in service with start-to-discharge retested at 25 psi, vapor tight at 20 psig.

[2] Nickel clad tanks in bromine service and any glass, rubber, lead, or elastomeric lined tank need not be periodically retested, but the interior heater systems and safety relief valves must be retested at the prescribed interval. For testing requirements for glass, rubber or other lined tanks see paragraphs (c)(9), (c)(11), and (c)(12) of this section.

[3] When the retest interval changes due to the age of the tank, the new retest interval must be measured from the last retest date but in no case shall the time between retests exceed the interval specified in Table 1 for the age of the tank. The retest of a tank because of repairs may alter the normal retest schedule specified in the table.

[6] Tanks must be retested at the time they are converted from existing pressure type tanks to a non-pressure specification. When tanks are converted to DOT 103A-ALW from DOT 103ALW or AAR 201A70W, the tank must be retested at the time of conversion if welding on the tank is performed. For future retests of converted tanks, the retest interval must be selected from the table based on the age of the tank computed from the date converted instead of the date built. The conversion date must be stenciled on the tank below the built date.

[8] When tanks are converted to DOT-103AW from existing DOT-103W or 103BW tanks, the tank must be retested at time of conversion if welding on the tank is performed. Lined tanks must be retested before or after the lining is removed. For future retests, the retest interval must be selected from the Table as though the tank were 10 years old at time of conversion. The conversion date must be stenciled on the tank below the built date.

[9] Tank cars stenciled 112S, 112T, 112J, 114S, 114T or 114J have the same retest requirements as 112A or 114A, respectively.

[11] Pressure tank cars authorized for corrosive materials service must have tank and safety relief valve retested when removed from the service and prior to return to compressed gas service.

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 173.32(a)	To clarify that it is not necessary for the owner of DOT Specification 56 and 57 portable tanks to keep on file a copy of the manufacturer's data report during the time the tanks are in service.	In § 173.32 paragraph (a) would be revised to read as follows: (a) Except as otherwise provided in this section, every portable tank container used for the transportation of dangerous articles shall fulfill the requirements of the specification and regulations for the transportation of the particular commodity. Except for Specification 56 and 57 portable tanks, a manufacturer's data report of the portable tank container shall be procured and retained in the files of the owner during the time that such portable tank container is used for [illegible].
§ 173.32a(e)	To remove the entire paragraph (e) because the owner of manufacturer of the IM portable tanks was required to advice the Associate Director for HMR before October 1, 1981 if the tanks could not be certified as a DOT Specification IM 101 or IM 102. Paragraph (e) has served its purpose and is no longer needed.	In § 173.32a, paragraph (e) would be removed and reserved.
§ 173.33(d)(12)	To eliminate the need for the inspection/test report to be prepared in duplicate. See § 173.33(d)(13) for further explanation.	To amend the introductory text of paragraph (d)(12) of § 173.33 by deleting the words "in duplicate".
§ 173.33(d)(13)	To eliminate the need for motor carriers operating certain DOT Specification MC 330 or MC 331 cargo tanks to file a copy of the retest report with the Director of the Bureau of Motor Carrier Safety, Federal Highway Administration, Department of Transportation, Washington, D.C. 20590. This change should result in a savings of over 3,000 hours pe year just for the motor carrier industry.	To revise paragraph (d)(13) of § 173.33 to read as follows: (13) *Report retention.* A copy of the report required by this section must be retained by the carrier at its principal place of business during the period the tank is in the carrier's service and for 1 year thereafter. However, upon a written request to, and with the approval of the Director, Regional Motor Carrier Safety Office, for the region in which a motor carrier has his principal place of business, the carrier may maintain the reports at a regional or terminal office.
• • •	• • •	• • •
§ 173.34(c)(4)	To delete paragraph (c)(4) because it is a duplicate of paragraph (c)(2).	In § 173.34 paragraph (c)(4) would be removed.
§ 173.34(e)(10)	To add DOT Specification 3AA for argon, helium, nitrogen, oxygen, breathing air, and dry compressed air which is commercially free from corroding components to the Table in paragraph (e)(10). The addition of these noncorrosive laboratory gases to the table will make it practical to reduce the number of high pressure stresses on the cylinders during hydrostatic tests.	To amend the table in paragraph (e)(10) of § 173.34 by adding the following to the end thereof: DOT–3AA —— argon, helium, nitrogen, oxygen, breathing air, and dry compressed air which is commercially free from corroding components.
§173.53(h)	To add the Bureau of Mines, U.S. Department of the Interior as an authorized agency to examine Type 8 explosives. The Bureau of Mines was added to § 173.86(b) under Docket No. HM–163E on April 16, 1981	In § 173.53, paragraph (h) would be revised to read as follows. (h) Type 8. Any solid or liquid compound, mixture or device which is not specifically included in any of the above types, and which under special conditions may be so designated and examined by the Bureau of Explosives or the Bureau of Mines, U.S. Department of the Interior and approved by the Associate Director for HMR. Example: Shaped charges, commercial
§173.91 (a)(6) and (a)(6)(i)	To eliminate the need for DOT approval of blocking and bracing methods prescribed by the military departments.	In §173.91, paragraphs (a)(6) and (a)(6)(i) would be amended by deleting the words "and approved by the Department"
§ 173.119(a)(12)	To remove the reference to obsolete tank car specifications	In § 173.119, paragraphs (a)(12) would be amended by deleting Specification ARA–III,[2] ARA–IV,[2] or ARA–IV–A.[2]
§173 119(a)(17)	To authorize the use of DOT Specification MC 310 MC311 and MC312 cargo tanks for transportation of flammable liquids. Subject cargo tanks are authorized in § 173.119(m)(12) for flammable liquids which are also oxidizers, corrosive liquids or Poison B liquids. The restriction against the use of MC 310, MC 311 or MC 312 cargo tanks for a product which is only a flammable liquid appears to be unreasonable.	To revise § 173.119(a)(17) to read as follows: (17) Specification MC 300, MC 301, MC 302, MC 303, MC 304, MC 305, MC 306, MC 307, MC 310, MC 311, MC 312, MC 330,[3] or MC 331,[3] (§§ 178.340, 178.341, 178.342, 178.343, 178.337). Tank motor vehicles. Bottom outlets on Spec. MC 304 cargo tanks must be equipped with valves conforming with § 178.342–5(a). If Spec. MC 310, MC 311 or MC 312 cargo tanks are constructed with bottom outlets, they must conform with §§ 178.342–5(a) and 178.343–5. Bottom outlets on Spec. MC 300 and MC 331 cargo tanks must be equipped with valves conforming with § 178.337–11(c).
§173.119(a)(18)	To remove reference to obsolete tank car specifications	In § 173.119, paragraph (a)(18) would be removed and reserved. Also, footnote 4 would be removed.
§ 173.119(e)(2)	To remove the reference to obsolete tank car specifications	§ 173.119, (e)(2) would be amended by deleting Specification ARA–III,[2] ARA–IV,[2] or ARA–IV–A.[2] Also, the last two lines which reads "(See Note 1 of paragraph (f)(3) of this section)" would be removed.
§173 119(e)(3), (e)(3)(i), and (f)(5)	To authorize the use of DOT Specification MC 310, MC 311, and MC 312 cargo tanks for shipment of flammable liquids. See § 173.119(a)(17) for proposed change.	In § 173.119, paragraph (e)(3), (e)(3)(i) and (f)(5) would be amended to include Specification MC 310, MC 311, and MC 312 and provide for bottom outlets. See § 173.119(a)(17)
§173.119(f)	Reference to "(see Note (2)" would be changed to "(see Note 1)" because the present Note 1 applies to obsolete tank cars.	In § 173.119, the introductory text of paragraph (f) would be amended by changing "(see Note 2)" to read "(see Note 1)".
§173.119(f)(3)	To remove the reference to obsolete tank car specification, remove reference to paragraphs (g) and (h) and change the reference of "Note 3" to read "Note 2"	In § 173.119, paragraph (f)(3) would be amended by (1) deleting Specifications ARA–IV–A[2] and ARA–IV[2]; (2) deleting (see Note 1 of this paragraph); (3) deleting reference to paragraphs (g) and (h) and (4) changing reference to "Note 3" to read "Note 2".
§ 173.119(f)(4)	To remove the reference to obsolete tank car specifications and (1) delete the third and fourth sentence, (2) delete all of Note 1, and (3) change Note 2 and Note 3 to read Note 1 and Note 2	In § 173.119, paragraph (f)(4) would be revised to read as follows. (4) Specification 103[2], 103W, 103ALW, 104[2], 104W, 111A60ALW1 111A60F1, 111A60W1, 115A60W1, 115A60W6 or 115A60ALW (§§ 179.200, 179.201, 179.220, 179.221 of this subchapter). Tank [illegible] Note 1 would be deleted and Note 2 and Note 3 would be renumbered Note 1 and Note 2 respectively
§ 173.119 (g) and (h)	To remove the requirement for obsolete manhole closure identification mark and dome placards. The ARA tank cars which required the above are no longer in service.	In 173.119, paragraphs (g) and (h) would be removed and reserved.
§ 173 123(a)(5)	To remove the reference to obsolete tank car specification ARA–IV–A and the reference to an obsolete Note 1	In § 173.123, paragraph (a)(5) would be revised to read as follows: (5) Specification 105A100,[3] 105A100W, 111A100W4, 112A200W, 112A400F, or 114A340W (§§ 179.100, 179.101, 179.200, 179.201 of this subchapter). Tank cars. Specification 114A340W tank cars must not be equipped with any bottom outlet. Bottom washout permitted. (See § 173.10 for shipping instructions)
§ 173 124 (a)(1) and (a)(2)	To eliminate the need for the inside metal containers prescribed in paragraph (a)(1) and the cylinders prescribed in paragraph (a)(2) of § 173.124 to be coated with a heat-retardant paint. The MTB will appreciate receiving comments from shippers of ethylene oxide who have information regarding benefits of heat-retardant paint and whether standards exist for specifying such paints.	In § 173.124, paragraphs (a)(1) and (a)(2) would be amended by deleting that portion of the paragraph that pertains to heat-retardant paint and examined by the Bureau of Explosives and approved by the Associate Director for HMR"

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 173.202(a)(1)	To eliminate the need for inside metal containers to be examined by the Bureau of Explosives and approved by the Associate Director for HMR. The MTB believes that the examination and approval of the inside metal can is no longer necessary because of the wording in §§ 173.21 and 173.24.	In § 173.202, paragraph (a)(1) would be revised to read as follows: (1) Specification 15A, 15B, or 19B (§§ 178.168, 178.169, 178.191 of this subchapter). Wooden boxes with inside metal containers. Inside packaging must be cushioned with incombustible cushioning material. Each container must have been tested hydrostatically to a pressure of not less than 60 pounds per square inch without rupture. Closing devices must be protected from injury. Not more than 300 pounds of sodium or potassium liquid alloy may be shipped in one outside container.
§ 173.206(c)(2)	To remove the net weight restriction of 300 pounds for DOT Specification 17C drums and the 30 pounds restriction for DOT Specification 17H, 37A and 37B drums. This restrictrion appears to be unnecessary.	To delete the last sentence of paragraph (c)(2) in § 173.206.
§ 173.238	The MTB is considering the removal of the entire section regarding "Aircraft rocket engines (commercial) and/or aircraft rocket engine igniters (commercial)" from 49 CFR. Note 1 of the referenced section states that "For purposes of § 173.238, aircraft rocket engines (commercial) are standby aircraft propulsion engines which are for civil aircraft installation only, comprising a metal case containing a solid composite fuel other than one classified as an explosive and containing no explosive material or element". According to our information, the MTB is not aware of any aircraft rocket engines (commercial) that do not contain some explosive material. For this reason, this section serves no useful purpose. Jet thrust unit (*jato*) appears to be the proper shipping name.	In § 173.238 the section would be reissued and reserved: § 173.238 [Reserved]
§ 173.245(a)(25)	To eliminate the need for the inside aluminum containers to be examined by the Bureau of Explosives (B of E) and approved by the Associate Director for HMR. The MTB believes that the examination and approval of the inside aluminum container is unnecessary because of the wording in §§ 173.21 and 173.24. This section was added to the regulations several years ago for the shipment of diethyl pyrocarbonate.	In § 173.245, paragraph (a)(25) would be revised to read as follows: (25) Specification 12A or 12B (§§ 178.210, 178.205 of this subchapter). Fiberboard boxes with inside aluminum packagings.
§ 173.252(g)(1)	To eliminate the need for gasket material used on Spec. 5K or 5M drums for bromine to be examined by the Bureau of Explosives and approved by the Associate Director for HMR. The wording in § 173.24 should be adequate.	In § 173.252, the last sentence in paragraph (g)(1) would be revised to read as follows: (1) * * * Each drum must be completely emptied and dried before reuse.
§ 173.256(a)(3)	To eliminate the need for the Molded liner to be examined by the Bureau of Explosives and approved by the Associate Director for HMR. Referenced paragraph was added several years ago when a shipper wanted to switch from a rubber liner to a polyethylene liner.	In § 173.256, paragraph (a)(3) would be revised to read as follows: (3) Specification 22B (§ 178.197 of this subchapter). Plywood drums equipped with a liner of rubber, polyethylene or other material impervious to the solution.
§ 173.263(a)(9)	To authorize the use of a safety relief valve or safety vent. Release of hazardous material through the vent has caused human injuries. DOT-E 8509 authorizes the use of a safety relief valve on DOT Specification 103BW and 111A100W5.	In § 173.263, paragraph (a)(9) would be amended by changing the introductory text of the fourth sentence to read * * * A safety relief valve or a safety vent of approved design * * *.
§ 173.289(a)(2)(i)	To clarify the marking requirements in § 173.289(a)(2)(i) also applies to the tank cars that could be used under the provisions of paragraph (a)(1) of § 173.289.	In § 173.289, paragraph (a)(2)(i) would be revised to read as follows: (i) Each tank car authorized under this section must be marked "FORMIC ACID" in accordance with the requirements in § 172.330 of this subchapter.
§ 173.314(c) Table	To delete reference to DOT-106A500X, 110A500W, Note 25 for chlorotrifluoromethane (R-13) because these tanks are not suitable for this product.	In column 3 of the Table in § 173.314(c) for the entry chlorotrifluoromethane (R-13) DOT-106A500X, 110A500W, Note 25, would be removed.
§ 173.314(c) Table Note 12	To remove the reference to obsolete tank car specification ARA-V.	In § 173.314(c), Note 12 following the Table would be amended by deleting reference to ARA-V tank cars.
§ 173.315(b) Table	At present, the Table infers that "See Note 1." in the fourth column applies to only two entries instead of the entire table. Apparently, the 1976 edition of 49 CFR was the last issue in which the Table was published correctly.	To amend the Table in paragraph (b) of § 173.315 by adding "See Note 1" in the same block as the heading in the fourth column.
§ 173.354(a)(5) and § 173.354(a)(6)	To authorize the use of a frangible disc in series with a spring-loaded safety relief valve on DOT Specification 51 portable tanks and DOT Specification MC 331 cargo tanks which are used to transport motor fuel antiknock compound. This action is necessary in order to protect the relief valve from possible corrosion which could result in a faulty operation.	To add a sentence at the end of paragraphs (a)(5) and (a)(6) of § 173.354 to read as follows: * * * A frangible disc may be used in series with and inboard of the safety relief valve. The relief valve and the frangible disc must be set to function in a range of no less than 100 percent and no greater than 110 percent of the maximum allowable working pressure.
§ 173.860(c)	To provide an exception for minute quantities of metallic mercury (contained in electron tubes and vapor tubes) which do not pose a transportation hazard.	To add paragraph (c)(5) to § 173.860 to read as follows: (5) In manufacturer's original packaging if each item does not contain more than 100 milligrams of mercury per tube and if the outside package does not contain more than one gram total net quantity. Packages complying with these quantity limitations are not subject to any other requirements of this subchapter.
§ 174.63(d)	To specify the criteria for approving DOT Specifications IM 101 and IM 102 portable tanks for Trailer-on-flat-car (TOFC) and Container-on-flat-car (COFC) service. At present, approval is granted under conditions approved by the Associate Administrator for Safety, FRA.	In § 174.63, paragraph (d) would be revised to read as follows: (d) An IM 101 or IM 102 portable tank may be transported in trailer-on-flat-car (TOFC) or container-on-flat-car (COFC) service only on cushioned underframe rail cars—. (1) *General requirements.* (i) IM portable tanks when used for TOFC shipments must be equipped to be securely mated to a container trailer chassis. The tie-downs on each chassis trailer must be the standard ISO twist-lock pins and corner casting. (ii) IM portable tanks when used for COFC shipments must be equipped to be securely attached to a railroad container car equipped with an ISO standard COFC basic pedestal system designed for container support and securement. (2) *Under DOT Exemption*—IM portable tanks which were constructed before October 1, 1981 are approved for TOFC/COFC service in accordance with § 174.63(d) provided the general requirements and the following requirements have been met: (i) The IM portable tanks have been approved for TOFC or COFC service by the provisions of a DOT exemption; and (ii)The owner or manufacturer has certified to the Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau, DOT, that the IM portable tanks meet either the IM 101 or the IM 102 DOT specification.

Regulation affected	Reason(s) for proposed change	Proposed amendment
		(3) *New Construction*—IM portable tanks which were constructed after May 1, 1981 are approved for TOFC/COFC service in accordance with 174.63(d) provided the general requiremetns are met and the Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau, DOT has received an approval certificate, as required in § 173.32a(b) certifying the IM portable tanks meet either the IM 101 or the IM 102 DOT Specification, from a designated approval agency for DOT Specification IM 101 and IM 102 portable [illegible].
		(4) *Existing Tanks Not Authorized by Exemption*—IM portable tanks which were constructed before May 1, 1981 that have not been authorized for service by the provisions of DOT exemptions are approved for TOFC/COFC service in accordance with § 174.63(d) provided the general requirements are met and the Associate Director for Hazardous Materials Regulations, Materials Transportation Bureau, DOT has received an approval certificate, as required in § 173.32a(b) certifying that the IM portable tanks meet either the IM 101 or the IM 102 DOT Specification from a designated approval agency for DOT Specification 101 and 102 portable tanks.
§ 174.104(a)	The Department of Defense requested an amendment to specifically state that cushioned underframe rail cars are authorized for the shipment of Class A explosives. These cars give a smoother ride and reduce shock loads during coupling operations.	In § 174.104, paragraph (a) would be revised to read as follows: (a) Except as provided in § 174.101 (b), (n), and (o), Class A explosives being transported by rail may only be transported in a certified and properly placarded closed car of not less than 80,000 pounds capacity, with steel underframes and friction draft gear or cushioned underframe, except that on a narrow-gauge railroad they may be transported in a car of less capacity so long as the car of greatest capacity and strength available is used.
§ 174.104(b)(6)	The Department of Defense requested an amendment to require the carrier to check munitions rail cars prior to loading for the presence of flammable or otherwise potentially hazardous residues or other contaminants that may have permeated the car floor or interior structure from previous cargoes.	In § 174.104, paragraph (b)(6) would be amended by adding the following sentence to the end: (6) * * * If evidence of potential hazardous contamination is apparent after the floor has been swept the carrier must either decontaminate the car or provide a suitable substitute car
§ 176.305(c)(5)	To clarify that flammable liquids having a flashpoint above 73° F. and in excess of one ton may be transported in any hold or compartment that is fitted with a gooseneck type of vent head.	To revise paragraph (c)(5) of § 176.305 to read as follows: (5) Flammable liquids in excess of one ton, except flammable liquids with a flashpoint above 73° F., may not be transported in any hold or compartment that is fitted with a gooseneck type of vent head
§ 177.817 (a) and (d)	To make the shipping paper requirements in § 177.817 consistent with those in Part 172	In § 177.817 paragraphs (a) and (d) would be revised to read as follows:
		(a) General requirements. A carrier may not transport a hazardous material unless it is accompanied by a shipping paper that is prepared in accordance with §§ 172.200, 172.201, 172.202, and 172.203 of this subchapter.
. . .	. . .	. . .
		(d) This section does not apply to any material, other than a hazardous substance or a hazardous waste, that is classed as an ORM- A, B, C or D (See § 172.200 of this subchapter).
§ 178.24-7(a), § 178.27-3(a), and § 178.35a-3(a)	Present wording infers that the required testing be done at the same manufacturing location where the container is made. A change is needed to specifically state that the testing may be performed at a location other than at manufacturing location.	To revise the introductory text of §§ 178.24-7(a), 178.27-3(a), and 178.35a-3(a) to read as follows: (a) Samples taken at random shall withstand prescribed test without breakage or leakage. Test shall be made on each type and size produced at each manufacturing location starting production and shall be repeated every four months. Testing may be performed at a location other than at the manufacturing location. The type of tests are as follows:
. . .	. . .	. . .
§ 178.37-5(a), § 178.44-5(a), Note 1	Note 2 following the second table should follow Note 1 after the first table. Reference to Note 2 is only mentioned in the heading of the first table. Also, the last part of Note 1 which reads "except as approved by the Department" would be removed. These same words would be removed in Note 1 of § 178.44-5(a).	In § 178.37-5(a), Note 2 would be relocated at the end of the first [illegible]
§ 178.46-4(d)(12)	To eliminate the need for a copy of the inspector's report to be filed with the Associate Director for HMR. The proposed wording would be the same as required in § 178.37-4(d) for DOT Specifications 3AA and 3AAX cylinders.	To revise paragraph (d)(12) of § 178.46-4 to read as follows: (d) Furnish complete test reports required by this specification to the maker of the cylinder and, upon request, to the purchaser. The test report must be retained by the inspector for fifteen years from the original test date of the cylinder.
§ 178.46-8(e)(2)	To correct the reference to "Part III" to read "Part II" in § 178.46-8(e)(2).	To amend paragraph (e)(2) of 178.46-8 by changing "Part III" to read "Part II".
§ 178.47-8(a), § 178.50-8(b), § 178.51-8(d), § 178.53-8(b), § 178.54-8(a)(2), § 178.55-8(d), § 178.56-8(d), § 178.57-8(e), § 178.58-8(a), § 178.59-7(a), § 178.60-7(b), § 178.61-8(d), and § 178.65-6(d).	To have all DOT specifications for welded steel cylinders to reference CGA Pamphlet C-3 for consistency.	In 178.47-8(a), third sentence, 178.54-8(a)(2), last sentence, 178.58-8(a), last sentence, and 178.61-8 (d) would all be revised to read "Welding procedures and operators must be qualified in accordance with the sections CGA Pamphlet C-3 that apply"
		Sections 178.50-8(b), 178.51-8(d), 178.53-8(b), 178.55-8(d), 178.56-8(d), 178.57-8(e), 178.59-9(b), 178.60-7(b), and 178.65-6(d) would all be added to read: "Welding procedures and operators must be qualified in accordance with the sections of CGA Pamphlet C-3 that apply"
		In addition to the change in § 178.57-8(e), an additional sentence would be added to read: "In addition, impact test of the weld shall be performed in accordance with § 178.57-17(d) as part of the qualification of each welding procedure and operator"
§ 178.57-10(a)(5)	To add the word "stress" after the word "wall"	To revise paragraph (a)(5) in § 178.57-10 to read as follows: (5) Further provided that wall stress for cylinders having longitudinal seams must not exceed 85 percent of the above value, whichever applies.
§ 178.61.-15(a)	To specify lot size and resultant frequency of test	To revise paragraph (a) of § 178.61-15 to read as follows: (a) To determine yield strength, tensile strength, elongation, and reduction of area material specimens must be cut from one cylinder taken at random out of each lot of 200 or less after heat treatment as follows:
		(1) One specimen shall be taken longitudinally from the body section at least 90 degrees away from the weld and one other specimen from either of the heads. If the two heads are of differing materials, a specimen shall be taken from each head.

Regulation affected	Reason(s) for proposed change	Proposed amendment
		(2) If due to welded attachments there is insufficient space to obtain the specimen from the top head, the specimen may be taken from a representative head subjected to the same heat treatment as the test cylinder.
§ 178.65–5(b)	To authorize the use of aluminum alloy identified as 1060. Essentially alloy 1060 is very similar to alloy 1170. The final product performance of cylinders manufactured with 1060 alloy yield very slightly improved mechanical characteristics.	To amend paragraph (c) of § 178.65–5 to include alloy "1060"
§ 178.61–11, § 178.61–12(a), § 178.62–12(a), § 178.63–12(a), § 178.68–11(a), § 178.89–10(a), § 178.90–11(a), § 178.92–12(a)(4), § 178.98–10(a), § 178.99–10(a), § 178.100–10(a), § 178.102–4(a), § 178.107–10(a), § 178.109–10(a), § 178.115–11(a), § 178.116–11(a), § 178.117–12(a), § 178.118–11(a), § 178.130–9(a), § 178.131–10(a), § 178.132–10(a), § 178.133–10(a), § 178.134–4(a), § 178.135–9(a), § 178.137–6(a), § 178.140–7(a), and § 178.141–7(a)(3).	To eliminate the minimum marking sizes for metal drums. The Steel Shipping Container Institute (SSCI) has requested this change so that the embossed markings will be consistent with international standards. Because of the limited space for embossment, these proposed changes should eliminate manufacturing marking problems without affecting safety. Note.—Instead of repeating all of the information proposed in § 178.80–11 for each specification affected, the MTB is planning to revise all of the affected sections by referring the reader to the § 179.80–11 section.	In § 178.80–11 the entire text would be revised to read as follows: § 178.80–11 Marking. (a) Each container shall be marked by embossing on a permanent head with clearly legible raised characters as follows: (1) DOT–(Spec. No.) (where applicable, STC; indicating a single trip container, or NRC; indicating a nonreusable container). (2) If manufactured of stainless steel, the type of steel used in body and head sheets as identified by the American Iron and Steel Institute type number (for example, 304, 316, 304HT). This mark should be near the DOT mark. (3) Name or symbol of person making the mark specified in paragraph (a)(1) of this section. Symbol, if used, must be registered with the Associate Director for HMR. (4) Gauge of metal in thinnest part, rated capacity in gallons, and year of manufacture (for example, 18–55–83). When gauge of metal in body differs from that in heads, both must be indicated with a slanting line between and with gauge of body indicated first. (for example, 18/16–55–83 for body 18 gauge and head 16 gauge) (b) For the purpose of this subchapter, the minimum character size specified in § 173.24(c)(1)(iv) is waived.
§ 178.24–7, § 178.35e–3, § 178.80–13(a), § 178.81–13(a), § 178.82–13(a), § 178.83–13(a), § 178.88–12(a), § 178.89–11(a), § 178.90–12(a), § 178.92–13(a), § 178.98–11(a), § 178.99–11(a), § 178.100–11(a), § 178.107–11(a), § 178.109–11(a), § 178.115–12(a), § 178.116–12(a), § 178.117–13(a), § 178.118–12(a), § 178.130–10(a), § 178.131–11(a), § 178.132–11(a), § 178.133–11(a), § 178.135–10(a), § 178.137–7(b), § 178.140(a), and § 178.141–8(c).	In addition to the proposed marking changes, the "SSCI has also requested that the "type and size" in the test requirements for metal drums be amended to eliminate unnecessary testing of smaller drums when the taller drum of the smae design, size, material, thickness and construction has already passed of the required tests. This would be consistent with UN recommendations and Docket HM–181, Advance Notice. Note.—For the purpose of this notice, the proposed amendment will only be listed once. However, in the final rulemaking the proposed wording would be inserted in each of the referenced sections.	In § 178.80–13, the second sentence of the introductory text of paragraph (a) would be amended to read as follows: (a) Tests shall be successfully performed on each packaging design type before such packaging is used. A packaging design type is defined by the design, size, material, thickness and manner of construction but may include various surface treatments. It also includes packagings which differ from the design type only in their lesser design heights
§ 178.102–4	To allow embossment on either permanent head of a new DOT Specification 6D drum or in the case where a drum has been altered to Specification 6D from an all 18-gauge tight head drum, the markings may be embossed on the body of the drum, no more than six inches from top curl. See § 178.118–10 for similar marking requirements for DOT Specification 17H drums.	To revise the introductory text of paragraph (a) of § 178.102–4 to read as follows: (a) Marking requirements for new or altered drums are as follows: *New drums.* Marking on each drum by embossing on the permanent head, with raised marks not less than ⅛ inch. *Altered drums.* Drums which have been altered to Specification 6D from an all 18-gauge tight head drum may be embossed on the body of the drum, no more than six inches from top curl.
§ 178.117–9	To authorize the use of a performance type of closure for DOT Specification 17F steel drums as authorized for DOT Specifications 5A, 5B, 5C, 17E and 17H drums.	To add paragraph (e) to § 178.117–9 to read as follows: (e) Other types of closures are authorized if they perform without failure under the tests required by this section and a record of the tests is retained during the period the closure is in use.
§ 178.134–2(c)	To authorize two weep holes in the overpack body (DOT Specification 37M) immediately below the top chime as authorized for DOT Specificaton 6D	To revise the introductory text of paragraph (c) of § 178.134–2 to read as follows: (c) Two holes not exceeding ¼ inch each are permitted diametrically opposite each other in the overpack body immediately below the top chime or immediately above the double seam of the boom chime or three holes not exceeding 5/16 inch in diameter on centers 120 degrees apart in the botoom head.
§ 178.137–7(b)	Paragraph (b) incorrectly states that samples of drums must be tested as prescribed in paragraphs (a) (1) and (2) of this section. Since there is no paragraphs (a) (1) and (2) the introductory text of paragraph (b) would be amended by correcting the reference to paragraph (b).	In § 178.137–7, the introductory text of paragraph (b) would be revised to read as follows: (b) Samples which are taken at random and closed as for use must be tested as prescribed in paragraphs (1) and (2) of this section without leakage.
§ 178.251–3(d)	To reduce the number and size of specimens which are required to be tested for DOT Specification 56 and 57 portable tanks. Also, the test interval would be increased from six months to twelve months. The present wording of § 178.251–3(d) is more appropriate for DOT Specification MC 306, MC 307 and MC 312 cargo tanks. Fabrication of several different types and sizes of portable tanks by a single manufacturer could become expensive. The proposed change would reduce the cost of testing without reducing safety.	To revise § 178.251–3(d) to read as follows: (d) *Compliance test.* Compliance with the requirements contained in paragraph (b) or (c) of this section for the welded joints must be determined by preparing two test specimens from materials and fabrication techniques representative of those to be used in each tank. Each specimen must be tested to failure under tension. Each test specimen must be prepared and tested in accordance with ASTM Standard E8–81 for metallic materials and ASTM Standard B557–81 aluminum and magnesium alloy products. As a minimum, one pair of representative test specimens, consisting of the minimum and maximum thickness for each type of material used, may represent all the related tanks manufactured in the same shop within 12 months after the tests on the samples have been completed. The butt welded specimens tested may be considered as qualifying other types or combinations of types of welds using the same filler material and welding process as long as parent metals are of the same types of materials.
§ 178.255–8	To eliminate the need for safety devices on DOT Specification 60 portable tanks to be approved by the Associate Director for HMR. The MTB believes that this approval should not be any different than that specified in § 178.337–9 for a MC 331 cargo tank.	To revise § 178.255–8 to read as follows: See § 173.315(i) of this subchapter.
§ 178.255–15	To eliminate the need for a copy of the manufacturer's data report and registration of each tank with the Associate Director for HMR.	To revise § 178.255–15(a) to read as follows: (a) A copy of the manufacturer's data report required by the Code (See § 178.245–1(a) under which the tank is fabricated shall be furnished to the owner for each new tank.

Regulation affected	Reason(s) for proposed change	Proposed amendment
§ 178.337–17(a) and § 178.340–10(b)	To change the requirement for the metal certification plate to be on the left side of the cargo tank near the front, instead of the right side near the front, on all DOT Specification MC 306, MC 307, MC 312, MC 331, and MC 338 cargo tanks constructed after September 30, 1984. Also, this requirement would apply to future cargo tanks such as the proposed hazardous waste tanks. The Truck Trailer Manufacturer Association (TTMA) has further requested a change to authorize a single certification plate combining all mandatory DOT data. These changes are considered necessary in order to have a uniform location for this information. At present, 49 CFR 178.340–10 and NHTSA Certification regulations 49 CFR Part 567 require this data to be located on opposite sides of the cargo tank.	To revise § 178.337–17(a) and § 178.340–10(b) and by changing the words "on the right side near the front" to read "on the left side near the front". In addition, § 178.337–17(a) and § 178.340–10(b) would be revised to authorize a combination ASME/DOT/NHTSA certification plate.
§ 179.200–15(a)	To delete the reference to § 179.202–1 because it pertains in part to obsolete tank cars and § 179.201–6(a) covers the required information for manway closures.	In § 179.200–15, paragraph (a) would be revised to read as follows: (a) Manway covers shall be of approved type.
§ 179.201(a)–1 Table	In the Table, the line entry "Special references", 179.202–1 is referenced for DOT Specification tank cars 103ALW, 103DW, 103W, 104W, 111A60ALW1, 111A100W1 [1], 111A100W3, 111A100W4 and 111A100W6. Since 179.202–1 is not necessary because of 179.201–6(a), the reference would be removed for the above referenced tank cars.	In § 179.201–1, the Table would be amended by removing 179.202–1 each time it appears under DOT Specifications 103ALW, 103DW, 103W, 104W, 111A60ALW1, 111A100W1 [1], 111A100W3, 111A100W4 and 111A100W6
§ 179.201–1(a)	To authorize the use of a safety relief valve instead of a safety vent on DOT Specification 103BW and 111A100W5 tank cars. See proposed change to § 173.263(a)(9).	In § 179.201–1, the Table would be amended by adding the word "valve" on the line "safety relief devices (see § 179.200–18)" for DOT Specification 103BW and 111A100W5 tank cars.
§ 179.202–1	Under § 179.201–6(a), manway covers must be designed to prevent removal while the tank is under pressure; therefore, § 179.202–1 is redundant.	In § 179.202–1 the entire text would be removed and the section would be marked [Reserved]".

(49 U.S.C. 1803, 1804, 1808; 49 CFR 1.53, App. A to Part 1 and paragraph (a)(3) of Appendix A to Part 106)

Issued in Washington D.C. on March 14, 1984.

Alan I. Roberts,

Associate Director for Hazardous Materials Regulation, Materials Transportation Bureau.

Part III

General Services Administration

48 CFR Ch. 5

Establishing the General Services Administration Acquisition Regulation (GSAR); Final Rule

GENERAL SERVICES ADMINISTRATION

48 CFR Ch. 5

[APD 2800.12]

Establishing the General Services Administration Acquisition Regulation (GSAR)

AGENCY: Office of Acquisition Policy, GSA.

ACTION: Final rule.

SUMMARY: The General Services Administration Acquisition Regulation (GSAR) is established to implement and supplement the Federal Acquisition Regulation. The GSAR replaces the General Services Administration Procurement Regulation (GSPR), 41 CFR Ch. 5 for solicitations issued on or after April 1, 1984. The GSPR will continue to apply to contracts awarded based on solicitations issued before April 1, 1984.

EFFECTIVE DATE: April 1, 1984.

FOR FURTHER INFORMATION CONTACT: Ida Ustad, Office of GSA Acquisition Policy and Regulations, Office Acquisition Policy, (202) 523-4754.

SUPPLEMENTARY INFORMATION:

1. *Background.*

A notice of availability of each proposed GSAR Part was published in the **Federal Register.** Interested persons were afforded the opportunity to obtain copies of the proposed parts and to submit comments. All comments received were reviewed and appropriate changes were made to incorporate the comments.

2. *Statutory and regulatory requirements.*

The Director, Office of Management and Budget (OMB), by memorandum dated October 4, 1982 exempted agency procurement regulations form Executive Order 12291. The General Services Administration (GSA) certifies that this document will not have a significant economic effect on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). All information collection requirements which require approval by OMB under 44 U.S.C. 3501 et seq. have been submitted to OMB. In those cases where an OMB Control number has been assigned, the control number is included in the regulation along with the information collection or recordkeeping requirement.

List of Subjects in 48 CFR Chapter 5

Government procurement.

For the reasons set out in the preamble, there is established in the Code of Federal Regulations Title 48—Federal Acquisition Regulations System, Chapter 5—General Services Administration Acquisition Regulation, consisting of Parts 501 through 570 to read as set forth below.

This edition is the initial publication of the GSAR. It is effective on April 1, 1984, in accordance with procedures to be established by the undersigned.

Dated: March 9, 1984.

Allan W. Beres,

Assistant Administrator for Acquisition Policy.

Title 48 of the CFR is amended by establishing Chapter 5 as follows:

CHAPTER 5—GENERAL SERVICES ADMINISTRATION

General Structure

SUBCHAPTER A—GENERAL

Part 501—General Services Administration Acquisition Regulations system
Part 502—Definitions of words and terms
Part 503—Improper business practices and personal conflicts of interest
Part 504—Administrative matters
Part 505—Publicizing contract actions

SUBCHAPTER B—ACQUISITION PLANNING

Part 507—Acquisition planning
Part 508—Required sources of supplies and services
Part 509—Contractor qualifications
Part 510—Specifications, standards, and other purchase descriptions
Part 511—Acquisition and distribution of commercial products
Part 512—Contract delivery or performance

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

Part 513—Small purchase and other simplified purchase procedures
Part 514—Formal advertising
Part 515—Contracting by negotiation
Part 516—Types of contracts
Part 517—Special contracting methods—[Reserved]

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

Part 519—Small business and small disadvantaged business concerns
Part 520—Labor surplus area concerns—[Reserved]
Part 522—Application of labor laws to Government acquisitions
Part 523—Environment, conservation, and occupational safety
Part 524—Protection of privacy and freedom of information
Part 525—Foreign acquisition

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

Part 527—Patents, data, and copyrights—[Reserved]
Part 528—Bonds and insurance
Part 529—Taxes
Part 530—Cost accounting standards

SUBCHAPTER A—GENERAL

PART 501—GENERAL SERVICES ACQUISITION REGULATIONS SYSTEM

Sec.
501.000 Scope of part.

Subpart 501.1—Purpose, Authority, Issuance.

501.101 Purpose.
501.102 Authority.
501.103 Applicability.
501.104 Issuance.
501.104-1 Publication and code arrangement.
501.104-2 Arrangement of regulations.
501.104-3 Copies.
501.170 The General Services Acquisition Regulation (GSAR).
501.170-1 General.
501.170-2 Exclusions.
501.170-3 Amendments.
501.170-4 Acquisition circulars.
501.171 Other GSA publications.
501.171-1 GSA orders and handbooks.
501.171-2 Acquisition letters (AL).

Subpart 501.4—Deviations From the FAR and GSAR

501.401 Definition.
501.402 Policy.
501.403 Individual deviations.
501.404 Class deviations.

Subpart 501.6—Contracting Authority and Responsibilities

501.600–70 Scope of subpart.
501.601 General.
501.601–70 Responsibility for region administration of Contracting Officer Warrant Program (COWP).
501.602 Contracting officers.
501.602–1 Authority.
501.602–2 Responsibilities.
501.603 Selection, appointment, and termination of appointment.
501.603–1 General.
501.603–2 Selection.
501.603–3 Appointment.
501.603–4 Termination.
501.603–70 Changes or suspensions of contracting officer appointments.
501.603–71 Interim appointment provisions.
501.603–72 Contracting Officer Warrant Boards.
501.603–73 Post appointment maintenance of warrants.
501.670 Legal review and assistance.
501.670–1 Applicability.
501.670–2 Definitions.
501.670–3 Responsibilities.
501.670–4 Legal review.
501.670–5 Legal assistance.
501.670–6 Waivers.
501.671 Audit of contractor's records.
501.671–1 General.
501.671–2 Purpose of audit.
501.671–3 Types of contracts subject to audit.
501.672 Payments under contracts subject to audit.
501.672–1 General.
501.672–2 Submission and processing of invoices or vouchers.
501.672–3 Action upon receipt of an audit report.
501.672–4 Suspensions and disapprovals of amounts claimed.
501.673 Additional internal controls.
501.674 Releasing or withholding of audit reports.

Authority: 40 U.S.C. 486(c).

501.000 Scope of part.

This part sets forth introductory information concerning the General services Administration Acquisition Regulation (GSAR), describes the methods by which the General Services Administration implements and supplements the Federal Acquisition regulation (FAR), and contains policies and procedures that implement and supplement Part 1 of the FAR.

Subpart 501.1—Purpose, Authority, Issuance

501.101 Purpose.

This subpart establishes Chapter 5 of the Federal Acquisition Regulations System, and describes the relationship of Chapter 5 to the FAR.

501.102 Authority.

The General Services Administration Acquisition Regulation (GSAR 5) is prescribed by the Assistant Administrator for Acquisition Policy in Chapter 5, Title 48, Code of Federal Regulations, under the authority of the Federal Property and Administrative Services Act of 1949, as amended.

501.103 Applicability

(a) The GSAR applies to all GSA contracts for supplies or services (including construction) for the use of the Federal Government through purchase or lease.

(b) Part 570 of the GSAR contains policies and procedures on the acquisition of leasehold interest in real property. Parts 501, 502, 503, 505, 533, 543, 552, 553, and Subparts 504.70, 509.4, 515.1, 515.2, and 532.8 include policies and procedures which have general application to all contracts including leases of real property. Other GSAR provisions do not apply to leases of real property unless a specific cross reference is made to the provision in Part 570.

(c) The GSAR apply to sales of real and personal property only to the extent explicity stated in specific GSAR provisions. The portions of Subpart 501.6 regarding the Contracting Officer Warranty Program and legal review and assistance and Subpart 504.70 on the uniform procurement instrument identification system apply to sales of real or personal property.

(d) Regulations in the GSAR may deviate from the FAR when a deviation has been explicitly authorized. (See FAR Part 1.4 and GSAR Subpart 501.4.) When the GSAR contains no regulation that implements the FAR, the FAR alone will govern.

501.104 Issuance.

501.104–1 Publication and code arrangement.

(a) The GSAR is published in: (1) The daily issue of the **Federal Register**, (2) cumulated form in the Code of Federal Regulations (CFR), and (3) a separate looseleaf edition on buff colored paper stock.

(b) The GSAR is issued as Chapter 5 of Title 48, Code of Federal Regulations.

(c) Each numbered unit or segment (e.g., part, subpart, section, etc.) begins with the CFR chapter number.

501.104–2 Arrangement of regulations.

(a) *General.* The GSAR is divided into subchapters, parts, subparts, sections, subsections, and further subdivisions as necessary.

(b) *Numbering.* (1) The numbering system used in GSAR conforms to the FAR System. (See FAR 1.104–2.) A particular policy or procedure is identified by the same number in both the FAR and GSAR except that the chapter number assigned to the FAR (Chapter 1) in not included in the FAR.

(2) When the GSAR 5 implements a subchapter, part, subpart, section, or subsection of the FAR, the implementing subchapter, part, subpart, section, or subsection of GSAR is numbered (and captioned) to correspond to the FAR subchapter, part, subpart, section, or subsection.

(3) When the GSAR 5 supplements the FAR and thus deals with subject matter not contained in the FAR, numbers beginning with 70 are assigned to the supplementing part, subpart, section, or subsection.

(4) When the subject matter contained in the FAR subchapter, part, subpart, section, or subsection requires no implementation, the GSAR will not contain a corresponding subchapter, part, section, or subsection. This will result in some gaps in the GSAR series of subchapter, part, subpart, section or subsection numbers. In such cases, reference must be made to the FAR for applicable policies and procedures.

(c) *References and citations.* (1) In the GSAR, cross-reference to the FAR are made in the same manner as in the FAR. (See FAR 1.104–2(c) for information on FAR numbering.)

(2) In the GSAR cross-references to parts, subparts, and sections of the GSAR are made in the same manner as in the FAR. For example, this paragraph would be identified as "GSAR 501.104–2(c)."

(3) Any section of the GSAR, for purpose of brevity, may be informally identified as "GSAR" followed by the section number. For example, this paragraph would be identified as "GSAR 501.104–2(c)."

(4) In formal documents, such as legal briefs, citations of GSAR material shall include an appropriate reference to Title 48 of the Code of Federal Regulations: e.g., "48 CFR ———."

501.104–3 Copies.

Copies of the GSAR in the Code of Federal Regulations form may be purchased from the Superintendent of Documents, Government Printing Office (GPO), Washington, DC 20402.

501.170 The General Services Administration Acquisition Regulation (GSAR).

501.170–1 General.

The General Services Administration Acquisition Regulation (GSAR) implements and supplements the FAR. The GSAR also prescribes policies, procedures, contract clauses, and solicitation provisions that govern the acquisition process or otherwise control the relationship between the agency, including its suborganizations, and contractors or prospective contractors. Nonregulatory internal agency guidance, as described in the the FAR, may be issued in accordance with 501.171.

501.170–2 Exclusions.

Certain GSA procurement policies and procedures which would otherwise fall within the scope of this GSAR may be excluded when justified. These exclusions may include the following categories:

(a) Subject matter that bears a security classification.

(b) Policies or procedures that are expected to be effective for a period of less than 6 months.

(c) Policies or procedures that are expected to be effective on an experimental basis for a reasonable period.

(d) Policies and procedures pertaining to other functions of GSA as well as to procurements functions, and for which there is need to make the directive available simultaneously to all GSA employees concerned.

501.170–3 Amendments.

The GSAR may be amended from time to time by the Assistant Administrator for Acquisition Policy, with appropriate concurrences from other GSA officials (e.g., counsel and other appropriate offices).

501.170–4 Acquisition circulars.

(a) Acquisition Circulars (AC) shall be issued by the Assistant Administrator for Acquisition Policy as often as may be necessary to provide coverage on an interim basis, pending subsequent incorporation of material in this regulation by amendment. The use of Acquisition Circulars to supplement the GSAR is appropriate when speed of issuance is essential, numerous changes are required and all necessary changes cannot be made promptly. Acquisition Circulars shall be considered canceled after six months and therefore must be incorporated in the GSAR within this time period.

(b) Acquisition Circulars will be identified by the prefix "AC" followed by the last two digits of the calendar year in which issued and will be numbered consecutively. For example, the first circular issued in calendar year 1984 will be identified as AC–84–1.

501.171 Other GSA publications.

501.171–1 GSA orders and handbooks.

Internal agency guidance, as described in the FAR, shall be issued in the form of a GSA Order or handbook. "Internal agency guidance" is defined as designations and delegations of authority, assignments of delegations of authority, assignments of responsibility, work-flow procedures, internal reporting requirements, detailed operating procedures, etc. GSA Orders and handbooks shall not unnecessarily repeat, paraphrase, or otherwise restate the FAR and GSAR. GSA Orders and handbooks dealing with procurement may be issued by the heads of contracting activities or their designees. Policies and procedures for drafting, formatting, and numbering GSA Orders and handbooks are contained in the Writing GSA Internal Directives Handbook (OAD P 1832.3).

501.171–2 Acquisition letters (AL).

(a) Acquisition Letters may be issued as often as may be necessary to provide coverage on an interim basis, pending subsequent incorporation of material in GSA Orders or handbooks. The use of Acquisition Letters to amend GSA Orders or handbooks is appropriate when speed of issuance is essential, numerous changes are required, and all necessary changes cannot be made promptly. Acquisition Letters shall be considered canceled after six months and therefore must be incorporated into the applicable order or handbook within that time period.

(b) The Assistant Administrator for Acquisition Policy, and heads of contracting activities or their designees may issue Acquisition Letters. No more than two officials within a contracting activity, as appropriate, may be designated to issue Acquisition Letters.

(c) The Assistant Administrator for Acquisition Policy or his designee shall coordinate ALs with the heads of central office contracting activities, counsel, and the Inspector General. The heads of central office contracting activities or their designees shall coordinate ALs with the Office of Acquisition Policy, counsel and the Inspector General. Regional offices shall coordinate ALs with the regional counsel, and the regional Office of Project Control and Oversight (OPCO). When time permits, regional offices should also coordinate ALs with their Central Office counterpart and the Office of Acquisition Policy.

(d) ALs shall be identified by a number which shall be assigned by the issuing activity. The number shall begin with the correspondence symbol of the issuing office, shall be followed by the last two digits of the calendar year in which it is issued and shall be numbered consecutively beginning with 1. For example, the number of the first letter issued by the Commissioner, Public Buildings Service in calendar year 1984 will be P–84–1. If the Commissioner, PBS, authorized the Assistant Commissioner for the Office of Contracts (PP) and the Assistant Commissioner for the Office of Space Management (PR) to issue ALs on his behalf the ALs would be numbered PP–84–1 respectively. If the Commissioner authorizes the Assistant Commissioners to issue ALs on his behalf, but elects to sign a particular letter, the AL letter should be numbered using the correspondence symbol of the office that prepared the AL. Regional numbers will be preceded by the region number.

(e) ALs shall conform to the format for instructional letters outlined in Appendix D of the Writing GSA Internal Directives Handbook (OAD P 1832.3). In addition, each AL shall be numbered, dated, and include a subject line which cites the order or handbook reference. The body of the AL shall contain the following paragraphs, as appropriate.

(1) Purpose.

(2) Background.

(3) Cancellation.

(4) Coverage (who does AL apply to).

(5) Reference to regulations (FAR or GSAR), handbooks, Orders.

(6) Instructions/procedures.

(f) ALs issued by the heads of Central Office contracting activities, other than the Office of Acquisition Policy, shall be signed by the head of the contracting activity or his/her designee and by the Assistant Administrator for Acquisition Policy or his/her designee to indicate his/her concurrence.

(g) ALs shall be printed on colored paper in accordance with the following color designations:

Blue—Office of Acquisition Policy
Salmon—Office of Federal Supply and Services
Yellow—Office of Information Resource Management
Pink—Federal Property Resources Service
Buff—National Archives and Records Service
Green—Public Buildings Service
White—Regional Offices and other Central Office Contracting Activities not listed above

(h) The issuing office shall be responsible for distribution of their ALs

in accordance with the guidelines outlined below:

Issuing office	Distribution
Office of Acquisition Policy.	All GSA contracting activities, regional Offices of Project Control and Oversight (OPCO), Assistant General Counsels and regional counsels, and the Directives and Reports Management Branch (ATRAI).
Central Offices Heads of Services and Staff Offices.	Office of Acquisition Policy, Service/office contracting activities or segment thereof, regional OPCOs, Assistant General Counsels and regional counsels, and the Directives and Reports Management Branch (ATRAI).
Regional Office	Office of Acquisition Policy, appropriate Central Office contracting activities, regional OPCO, regional counsel, regional contracting activities or segment thereof and the Directives and Reports Management Branch (ATRAI)

(i) Each issuing office shall submit a report of ALs issued and canceled to the Office of GSA Acquisition Policy and Regulations (VP) on a quarterly basis. The Office of Acquisition Policy shall issue a consolidated index of all AL's issued or canceled on a quarterly basis. This index shall be distributed to all GSA contracting activites.

Subpart 501.4—Deviations From the FAR and GSAR

501.401 Definition.

The term "deviation" as used in the GSAR has the same meaning as in the FAR 1.401.

501.402 Policy.

In order to maintain maximum uniformity, deviations from the GSAR and the FAR shall be kept to a minimum.

501.403 Individual deviations.

(a) Deviations by GSA activities from the GSAR or the FAR in individual cases may be approved at a level not lower than the head of the contracting activity. The file shall disclose the nature of the deviation and the reasons for the action. A copy of the deviation approval and disclosure shall be furnished to the Office of Acquisition Policy (V).

(b) The deviation procedure shall not be used to defeat the approval requirements contained in the FAR and GSAR.

501.404 Class deviations.

(a) Deviations by GSA activities from the FAR in classes of cases may be approved only by the Assistant Administrator for Acquisition Policy (V).

(b) Deviations by GSA activities from the GSAR in classes of cases may be approved only by the Assistant Administrator for Acquisition Policy (V). These deviations will expire in 12 months if not extended. They may be rescinded earlier without prejudice to any action previously taken.

(c) Class deviation request shall be supported by statements which fully disclose the need for and the nature of the deviation.

(d) When a deviation from a form prescribed in the GSAR or the FAR is authorized, physical changes may not be made in the printed form (except as otherwise authorized). Changes shall be made by appropriate provisions in the schedule, specifications, or on a continuation sheet, as appropriate.

Subpart 501.6—Contracting Authority and Responsibilities

501.600-70 Scope of subpart.

This subpart sets forth policy and procedures for the GSA-wide contracting officer warrant program (COWP) and delineates the responsibilities of contracting officers and the heads of contracting activities (HCA).

501.601 General.

(a) The Assistant Administrator for Acquisition Policy is the Procurement Executive for GSA and is responsible for:

(1) Managment direction of the procurement system of the agency, including implementation of the unique procurement policies, regulations and standards of the agency;

(2) Developing and maintaining a procurement career management program to ensure an adequate professional workforce; and

(3) Delegating contracting officer authority in accordance with the Contracting Officer Warrant Program.

(b) Head of contracting activities, (HCA) (see 502.170) have unlimited contracting authority which may not be redelegated and are responsible for:

(1) Implementing and maintaining an effective and efficient program for the procurement of personal property and non-personal services (including construction and leasing) assigned to the activity;

(2) Establishing adequate controls to ensure compliance with applicable laws, regulations, procedures, and good management practices;

(3) Recommending highly qualified, well trained candidates to the Assistant Administrator for Acquisition Policy for designation as contracting officers with the limitations prescribed by the warrant boards and based on a vaild organizational need;

(4) Monitoring the performance of warranted contracting officers with regard to actions that may require suspension or termination of the appointment and recommending to the Assistant Administrator for Acquisition Policy the suspension or termination of appointment of contracting officers; and

(5) Establishing and approving acquisition/contracting training plans to satisfy COWP training requirements and ensuring the availability of required training funds for implementation of these plans.

501.601-70 Responsibility for administration of Contracting Officer Warrant Program (COWP).

(a) *Regional offices.* (1) *Regional Administrator.* The regional Administrator or his/her deputy, as the recommending official, shall recommend to the designating official the appointment or termination of appointment of contracting officers.

(2) *Contracting Officer Warrant Board.* The Contracting Officer Warrant Board shall receive, evaluate and process to the Office of Project Control and Oversight (OPCO) requests for appointment of contracting officers. (See 501.603-72.)

(3) *Office of Project Control and Oversight.* The regional administration of the contracting Officer Warrant Program has been assigned to the Office of Project Control and Oversight (OPCO). OPCO shall:

(i) Administer the Contracting Officer Warrant Program (COWP);

(ii) Ensure that the warrant board evaluates and recommends acceptance or rejection of applicants according to the requirements of the COWP;

(iii) Recommend appropriate additional training and the level of warrant certifications as required by the warrant board;

(iv) Issue procedures with approval of the Office of Acquisition Policy for the operation of the program at the regional level;

(v) Recommend program changes to the Office of Acquisition Policy;

(vi) Analyze proposed regional courses and training materials for procurement personnel and recommend them to the Office of Acquisition Policy, as appropriate, for fulfilling the requirements of COWP; and

(vii) Maintain detailed training records for each contracting officer.

(viii) Ensure that a GSA Form 19, Designation of Authorized Representative, is submitted to the Regional Finance Division when each contracting officer warrant is issued and that the Regional Finance Division is

notified promptly when a contracting officers authority changes, is suspended or terminated.

(b) *Central Office.* The head of a contracting activity, as recommending official, shall recommend to the designating official the appointment or termination of appointment of contracting officers. The head of a contracting activity, shall also act as the warrant board.

501.602 Contracting officers.

501.602-1 Authority.

Contracting officers designated by name on Standard Form 1402, Certificates of Appointment, are authorized to exercise contracting officer authority, subject to all requirements and limitations set forth in the certificate of appointment (501.603-3(b)(2)) and existing delegations of authority. Contracting officers shall exercise reasonable care, skill and judgement in all actions.

501.602-2 Responsibilities.

(a) *GSA revolving funds.* Unless otherwise notified, contracting officers may assume that sufficient funds are available for purchases payable from GSA revolving funds upon the receipt of a requisition signed by an authorized individual citing funds. Requisitions for requirement contracts which provide for a guaranteed minimum must cite funds in an amount adequate to cover the guaranteed minimum quantities.

(b) *GSA funds, other than revolving funds.* (1) The receipt of a requisition signed by an authorized individual shall be considered as evidence that the amount of funds cited is available for purchases payable from GSA funds other than revolving funds. Clearance as to the availability of additional funds shall be obtained from the requisitioning activity prior to issuance of a contract or purchase order when the purchase exceeds (by 10 percent or $50, whichever is greater) the amount cited on the purchase requisition.

(2) In cases where a requisition is not used, e.g., leases of real property, the contracting officer shall take the necessary action to ensure funds are available before executing their contract.

(c) *Other Federal agencies' funds.* On purchases for direct delivery to Federal agencies other than GSA, the receipt of a properly signed/approved purchase request shall be considered as sufficient evidence that funds are available. Where, however, the agency's purchase request indicates that a specific dollar amount has been set aside for the acquisition, as in the case of a Project Implementation Order/Commodities (PIO/C) from the Agency for International Development, the buying activity shall not exceed the fund limitation except to the extent authorized in supply support agreements. When the funds stated on the purchase request appear to be or are insufficient to cover all applicable costs for the acquisition, transportation, export surcharge, and any other expense involved in the delivery of material to designated consignees, additional funds shall be requested and received from the requiring agency before the acquisition is completed by the activity indicated below:

(1) When requirements are submitted by agencies directly to a contracting division in the Central Office (whether the procurement is actually made by the appropriate contracting division in the Central office or subsequently transmitted, in whole or in part, to one or more regions for acquisition) the request for additional funds shall be made by the appropriate Central Office contracting division.

(2) When requirements are submitted to a regional contracting division (whether acquisition is made by that region, forwarded in whole or in part to another regional contracting division or to a contracting division in the Central Office) the request for additional funds shall be made by the order processing and control activity in the region initially receiving the requirement.

501.603 Selection, appointment, and termination of appointment.

(a) *General.* This section establishes the uniform policy and procedure for warranting contracting officers (CO). The objective of the COWP is to appoint as contracting officers only those officials who are fully qualified to obligate the Government to the expenditure of public funds for the acquisition of property or services, based on a valid organizational need and appropriate workload. In order to enable the Finance Division to check signatures on obligating documents to ensure such documents have been signed by warranted contracting officers, a GSA Form 19, Designation of Authorized Representative, shall be submitted to the Finance Division upon receipt of a Standard Form 1402, Certificate of Appointment. In the event of a change, suspension, or termination of a contracting officers appointment, the Finance Division shall be promptly notified. No obligation or authorization for the expenditure of funds will be accepted by the Finance Division unless a GSA Form 19 is on file.

(b) *Applicability.* (1) The GSA Contracting Officer Warrant Program applies to all services, staff offices, and regions of the General Services Administration, except for those contracting officers appointed pursuant to the Inspector General Act (Pub. L. 95-452).

(2) A warrant is not required for:

(i) The execution of individual purchases under $150, regardless of the method of procurement;

(ii) Any imprest fund transaction;

(iii) The signing of training authorizations for public course offerings;

(iv) The signing of travel related documents;

(v) The authorizations or orders for printing and duplicating services;

(vi) The ordering of supplies from GSA store stock via a Standard Form 344, FEDSTRIP;

(vii) The signing of Government Bills of Lading;

(viii) Transactions issued under NARS Trust Funds including Number 320X—National Archives Gift Funds and Number 355X—National Archives Trust Funds;

(ix) The processing/procuring of a telephone service authorization or a communication service authorization issued to regulated/public utility common carriers. Emergency communications coordinators shall be authorized in their warrants to procure emergency communications equipment and services during Presidentially declared emergency or disasters;

(x) The ordering by inventory managers of stock replenishment under established source contracts that are machine loaded. Current GSA Form 19 signature cards must be on file in the Office of Finance;

(xi) Delivery orders (machine generated) for motor vehicle procurements that are written against definite quality contracts need not be signed as the contract is the obligating document in this case;

(xii) Entering into a Memorandum of Agreement with another Federal agency and to authorize the transfer of funds to that agency for services rendered; and

(xiii) The authorization of interagency transfers of funds via a GSA 2957, Work Authorization.

(c) *Definitions.* The following definitions apply to the material in this section:

(1) "Recommending official" means the head of the contracting activity who has been authorized to recommend candidates for designation as contracting officers to the designating official subject to the requirements and

recommendations of the warrant boards and this 501.603. A Regional Administrator may redelegate this authority to his/her deputy.

(2) "Designating official" means the Administrator or Assistant Administrator for Acquisition Policy, who is authorized to appoint contracting officers in GSA.

(3) "GSA Contracting Officer Representative" (COR) means a Government employee, designated in writing by the CO, by name and position title, who is authorized to take action for the CO with specified limitations. A CO may not authorize a COR to issue change orders or otherwise modify a contract unless the COR is a warranted CO.

(4) "Delivery order" means the placement of an order for supplies and/or nonpersonal services against an already established contract in accordance with the terms and conditions of such contract.

(5) "Warrant Limitations" means limitations which in addition to the FAR, GSAR, laws, Executive Orders, GSA Orders and other applicable regulations are imposed on the authority of contracting officers either by delegation or actions of the designating official and which will be set forth in the Certificate of Appointment (Standard Form 1402). Warrant limitations may include but are not limited to requirements for prior reviews, approvals and other controls.

501.603-1 General.

The authority to appoint contracting officers is delegated from the Administrator to the Assistant Administrator for Acquisition Policy. See the Delegations of Authority Manual (ADM P 5450.39B) for specific delegations of authority.

501.603-2 Selection.

(a) Contracting officers (CO) shall be designated only in those instances in which a valid organizational need for warranted personnel can be demonstrated. Factors to be considered in assessing the need for a contracting officer designation include volume of actions, complexity of work and organizational structure.

(b) To certify organizational needs and assure that the candidate meets minimum CO qualifications, a completed GSA Form 3410, Request for Appointment, shall be signed by the candidate's immediate supervisor and submitted to the appropriate warrant board along with a statement of fact. The Request for Appointment shall be accompanied by GSA Form 3409, Personal Qualifications Statement for Appointment as a Contracting Officer, prepared and signed by the candidate.

(c) Warrant boards will evaluate condidates for CO warrants based on supervisory recommendations, experience, education, training, business acumen, judgment, character, ethics and reputation. Warrant boards may establish additional qualification requirements, as appropriate. Minimum qualifications of contracting officers (purchasing contracting officers (PCO) and administrative contracting officers (ACO)) are based on a combination of training and experience with consideration of relevant academic credit or degrees earned. The following warrant levels are equated with dollar value of individual transactions (e.g., contract, modification, supplemental agreement, etc.) and not the aggregate contract value.

Basic—up to and including $25,000 per open market purchase or the maximum order limitation for orders placed against established contracts;
Intermediate—up to and including $100,000;
Senior—unlimited.

(1) *Knowledge and skill.* Written statements of fact must be presented by supervisors of CO candidates to the warrant board, covering the knowledge and abilities of each candidate and their specific level of skill which is appropriate to the activity in the following areas:

(i) Contract Placement.
(ii) Contract Administration.
(iii) Contract Termination.
(iv) Real Property Leasing.
(v) Sales

(2) *Experience requirements for contracting officer candidates.* Warrant boards shall consider contracting experience in terms of basic, intermediate, and senior levels.

(i) *Basic experience.* Candidates must have a least one year of current (within last 5 years) experience with progressive work assignments and orientation.

(ii) *Intermediate experience.* Candidates must have at least two years of current (within last 5 years) experience with progressive assignments leading to broader technical ability.

(iii) *Senior experience.* Candidates must have at least three years of current (within last 5 years) experience with progressive assignments and broad technical ability.

(3) *Mandatory training requirements for contracting officer candidates.* Training standards have been implemented by the GSA Acquisition/Contracting Career Management Board. A candidate must have completed the minimum core training required for each warrant level as described below. Supervisors are responsible for providing their employees with advice and assistance necessary to complete this required training. Mandatory training must have included the following general topics as a minimum:

(i) *Basic level* (Does not apply to realty leasing and sales personnel.)

(A) Small Purchases and Federal supply schedules—40 hours,

(B) Basic Acquisition—40 hours,

(C) Contract Administration for Program Personnel—40 hours, (Applicable to GSA Buildings Managers only.)

(ii) *Intermediate level* (Does not apply to realty leasing and sales personnel.)

(A) Contract Law—60–80 hours,

(B) Negotiated Contracts and Negotiation Techniques—40 hours,

(C) Formal Advertising—40 hours,

(D) Contract Administration—40 hours,

(E) Cost and Price Analysis—40 hours,

(F) Government ADP Resource Acquisition—40 hours (Applicable to ADP acquisition personnel only.)

(G) Termination Settlements—40 hours,

(H) Services Contracting—40 hours, and

(I) Public Utility Contracts—40 hours (Applicable to personnel handling public utility procurements.)

(J) Architect-Engineer Contracting—40 hours (Applicable to personnel handling procurement by Architect services.)

(K) Construction Contracts—40 hours. (Applicable to personnel handling procurement of construction.)

(iii) Senior level (over $100,000). (Do not apply to leasing and sales).

(A) Executive Seminar in Acquisition—24–40 hours,

(B) Advanced Procurement Managment—40 hours, and

(C) Advanced Contract Administration—40 hours.

(iv) *Non-1102 COs.* COs not classified as 1102 employees and who do not make open market purchases greater than small purchases will not be required to take the Basic Acquisition course.

(v) *Realty leasing personnel.*

(A) Real Property Leasing/Law of Leasing—40–60 hours.

(B) Negotiated Contracts and Negotiation Techniques—40 hours, and

(C) Cost and Price Analysis—40 hours.

(vi) Sales contracting personnel.

(A) Basic Acquisition—40 hours,

(B) Contract Law—40 hours,

(C) Formal Advertising—40 hours,

(D) Negotiated Contracts and Negotiation Techniques—40 hours, and

(E) Sales and Disposal of Government Property—40 hours.

(vii) *Construction contracting officer representatives (CORs).* Individuals nominated for warrants limited to the issuance of change orders up to $25,000 may be required by warrant boards to complete the Basic Acquisition course and the Construction Contracting course.

(4) *Substitution of experience for training.* Individuals currently serving in and classified as 1102 positions for an uninterrupted period of three years will not be required to take the basic level courses under the COWP if they are proposed for intermediate or senior level warrants.

(5) *Substitute courses.* Training courses of equivalent content will be allowable substitutes to acquisition/contracting training plan courses. Courses from the following sources are considered to be equivalent by the Office of Acquisition Policy, provided the training meets the minimum hours required in (c) of this section:

(i) Training from a Government-sponsored source such as U.S. Army Logistics Management Center (ALMC).

(ii) Training from a source listed in the Defense Management Education and Training (DMET) Catalog or the Federal Acquisition Institute (FAI) Catalog.

(6) *Tests.* Tests administered either by the GSA Office of Civil Rights, Organization, and Training or by DOD training facilities may be taken as an alternative to training to demonstrate career knowledge. The GSA training office may be contacted for referral to DOD testing facilities such as Fort Lee, VA. Other tests may be considered on a case by case basis.

501.603-3 Appointment.

(a) The recommending official may recommend candidates for contracting officer warrants to the designating official subject to the approval of the warrant board. Only the Administrator or the Assistant Administrator for Acquisition Policy, as designating officials, are authorized to sign the Standard Form 1402, Certificate of Appointment.

(b) Specific warrant limitations imposed upon the authority of contracting officers either by delegation or by actions of the warrant boards shall be set forth in certificates of appointment or otherwise conveyed in writing to designated contracting officers.

(c) As a condition of continuing designation all warranted COs, except those on interim appointments, shall complete 40 hours of formal procurement training, at least once every 3 years, beyond the minimum core requirements in order to maintain competency.

(d) As a part of the acquisition management reviews conducted by the Office of Acquisition Policy, Office of Acquisition Management and Contract Clearance (VC), applicable appointment documents will be reviewed periodically to determine the adequacy of local procedures, practices, and appointments. (See GSA Acquisition Management Assistance Review Program (ADM 2851.4)).

501.603-4 Termination.

(a) The appointment of a contracting officer may be revoked at any time by the designating official. Contracting officer appointments shall be revoked and the warrant certificate shall be returned to VC when:

(1) The appointee no longer meets required qualifications;

(2) There is no longer a clear and convincing need for the appointment;

(3) The effective period of the appointment has expired; or

(4) There exists evidence of malfeasance or gross incompetence.

(b) Contracting officer appointments terminate when the appointee is reassigned from the position or activity held at the time of appointment.

(c) Contracting officers whose appointments are revoked or terminated, shall be provided a written notice by the designating official stating the reasons therefor.

(d) Warranted personnel shall be reassessed by each appropriate warrant board when any organization change occurs which alters the procurement function.

(1) VC shall be notified briefly, in writing, by each affected organization as soon as personnel actions are completed that reassign warranted personnel from one service/office or Region to another.

(2) Existing warrants remain in effect until they can be reconsidered in light of new organizational structures.

(3) Reassessement of warrant needs should be delayed until movement of functions and personnel is completed.

(e) When warranted COs transfer within an organization, the warrant certificate shall be terminated and returned to VC. This restriction does not apply to GSA buildings managers that are reassigned from one field office to another provided the individual occupies a similar position and VC is notified of the change in location. A copy of the termination notice shall be provided to the CO, the previously assigned duty station and VC.

(f) The provisions of FAR 1.603-4 apply to this section.

501.603-70 Changes or suspensions of contracting officer appointments.

(a) *Changes.* When a designating official determines to change or limit the appointment of a contracting officer without revocation, a new Certificate of Appointment shall be issued. When the change involves responsibility in a new functional area wherein the contracting officer has not demonstrated minimum qualifications, the proposed change may be requested by the recommending official, but must be approved by the appropriate warrant board and the Assistant Administrator for Acquisition Policy.

(b) *Suspension of designation.* Warrant boards or HCAs, pursuant to their responsibilities as set forth under 501.601-70, may suspend a CO's warrant for a temporary period not to exceed 30 days for failing to exercise sound business judgment in placing or administering procurements or for other minor improprieties in the execution of contracting officer responsibilities. Within the 30 day suspension period the Warrant Board or HCA shall either lift the suspension or recommend the Assistant Administrator for Acquisition Policy terminate the warrant.

501.603-71 Interim appointment provisions.

(a) Individuals who do not meet minimum qualifications as described in 501.603-2, may be appointed on an interim basis if warrant boards consider experience and past performance and make recommendations for interim appointments. All minimum training requirements shall be scheduled and met within a reasonable period of time. At least two of the required courses or equivalency tests shall be successfully completed each year after the date of appointment to avoid losing the warrant.

(b) Failure to successfully complete minimum training requirements within this timeframe may result in the loss of the warrant. Prior to revoking any warrant, the Office of Acquisition Policy will periodically review training records of warranted personnel and determine whether specific individuals are making adequate progress towards program completion.

(c) Instances that may require the use of interim appointments may include, but are not limited to the following:

(1) Organizational changes;

(2) Reduction in Force proceedings; or

(3) Sudden extreme increases in the number of procurement requests.

501.603–72 Contracting Officer Warrant Boards.

(a) Separate contracting officer warrant boards shall be established for each region. Within the Central Office the head of each service of staff office shall perform the function of the warrant board.

(b) The purpose of the contracting officer warrant boards is to receive, evaluate, and process requests for appointment of Contracting Officers under the GSA-wide Contracting Officer Warrant Program prescribed in this Subpart.

(c) Warrant boards shall consist of supervisory personnel at the SES or GM/GS–14/15 levels representing contracting offices in each region and, in an advisory capacity, representatives of the Office of Personnel and Office of General Counsel.

(1) A minimum of four members constitute a quorum for a warrant board.

(2) Personnel from the Office of Acquisition Policy shall participate randomly in the actions of each warrant board, as appropriate.

(3) Assistant Regional Administrators shall chair regional warrant boards.

(4) Except for Office of Acquisition Policy personnel, all warrant board members and chairpersons shall be appointed by the Regional Administrators on an ad hoc basis.

(d) The suggested (optional) composition of regional warrant boards may include:

Deputy Regional Administrator, Chairperson
Director, OPCO
Senior Procurement Analyst, OPCO
Regional Controller
Assistant Regional Administrator, Office of Information Resource Management
Assistant Regional Administrator, Office of Federal Supply and Services
Assistant Regional Administrator, Office of Public Buildings and Real Property
Regional Personnel Office (Advisory)
Regional Counsel (Advisory)

501.603–73 Post appointment maintenance of warrants.

(a) The original Certificate of Appointment shall be provided to the appointed contracting officer and displayed at the contracting officer's duty station. The designating official shall have three copies of the signed original Certificate of Appointment reproduced and numbered for distribution.

(1) Copy 1 shall be distributed to and maintained by the cognizant headquarters office for each affected service/office or the regional Office of Project Control and Oversight (OPCO).

(2) Copy 2 shall be provided to and maintained by the Office of Acquisition Policy, Office of Acquisition Management and Contract Clearance (VC).

(3) Copy 3 shall be provided to and maintained by the Office of Finance (BCGP).

(b) Certificates of Appointment shall be serially numbered for each Central Office service/office and for each region.

(c) The Privacy Act of 1974 applies to the information collected during selection, designation and appointment of contracting officers.

501.670 Legal review and assistance.

This section sets forth the responsibilities of contracting personnel and assigned legal counsel in obtaining and providing legal review and assistance.

501.670–1 Applicability.

The provisions of the section apply to all GSA organizational elements having contracting responsibility, as defined in 501.670–2.

501.670–2 Definitions.

(a) *Contracting.* For the purpose of this subpart, the term "contracting" includes the procurement or disposal by contract or lease of any interest in real or personal property, or services. To the extent that specific language herein reflects terminology used in procurement, it is understood that counterpart disposal terminology is intended for matters involving disposals; likewise, to the extent that specific language herein reflects terminology involving contracts, it is understood that counterpart leasing language is intended for matters involving leases.

(b) *Legal review.* Legal review is a formal process whereby assigned counsel analyzes a matter to ensure legal sufficiency (i.e., that the proposed action is in compliance with applicable laws, regulations, and directives). During this process, counsel is also required to bring to the attention of appropriate contracting officials any problems concerning the matter under review and should object on policy or other grounds where such action appears warranted, notwithstanding approval for legal sufficiency.

(c) *Legal assistance.* Legal assistance is a process whereby assigned counsel provides legal guidance with respect to questions or problems that arise during the contracting process. Assistance need not be limited to matters of legal sufficiency.

501.670–3 Responsibilities.

(a) *Contracting officials.* (1) Contracting officials are expected to exercise sound judgment in obtaining legal review or assistance before taking any action that would affect the rights or obligations of the Government, a contractor, an offeror, or a potential offeror. Contracting officials should seek legal assistance throughout the contracting cycle, particularly when there is doubt or controversy as to the propriety or legal sufficiency of an action, or the interpretation or application of existing statutes, policies, regulations, and directives.

(2) When legal review or assistance is requested by a contracting official, the official shall provide assigned counsel with all pertinent information. When appropriate, the official shall brief assigned counsel regarding the facts and points at issue and provide a detailed rationale for the proposed action. Legal review or assistance should be requested in a timely fashion in order to allow assigned counsel sufficient time to respond to the matter in issue. Counsel's approval, comments, or objections should be documented and retained as part of the contract file.

(b) *Legal counsel.* It is the responsibility of assigned counsel to provide timely assistance with respect to a broad range of legal and business problems arising during the contracting process and to ensure that proposed contractual actions comply with applicable laws, regulations, and directives. When legal review is required on any contract-related matter, the approval of counsel shall attest to the legal sufficiency of the action or document.

501.670–4 Legal review.

The following matters shall be submitted to assigned counsel, before action being taken thereon, for legal review and, where appropriate, written approval. Heads of contracting activities, in conjunction with assigned counsel, are encouraged to establish more stringent supplemental criteria for legal review when available resources make such supplemental requirements practicable. Copies of supplemental directives shall be forwarded to the Assistant Administrator for Acquisition Policy and to the General Counsel.

(a) Solicitations which deviate from standard terms or conditions provided for by regulation or other appropriate authority.

(b) Alleged mistakes in bid.

(c) Protests (including small business size protests).

(d) Determinations and findings required by FAR and GSAR, or other appropriate authority to be reviewed by counsel.

(e) Offers indicating that contingent fee has been, or may be, paid.

(f) Matters involving the disclosure of offers prior to opening and determinations as to whether such disclosure was made with collusive intent.

(g) Decisions involving the nonapplication of, or any exemptions proposed to be taken from, the subcontracting plan requirements of Pub. L. 95–507.

(h) Questions regarding the proper use of appropriations or other funds.

(i) Proposed awards to other than low offerors.

(j) Proposed no-awards for reasons other than excessive prices.

(k) Proposed letter contracts.

(l) Proposed contract awards subject to the requirements of GSA Order, Contract Clearance (APD 2800.1B).

(m) Termination actions, including pretermination (i.e., "cure") letters.

(n) Contract disputes of any nature.

(o) Waivers of material contract terms, conditions or specifications.

(p) Assignments of claims or rents, and change of name and novation agreements.

(q) Contract claims, actions taken under the disputes clause (including final decision letters), and memorandums of position and appeal files in case appealed to the General Service Board of Contract Appeals or U.S. Claims Court.

(r) Recommendations relative to suspending or debarring a concern or individual.

(s) Freedom of Information Act (5 U.S.C. 552) and Privacy Act (5 U.S.C. 552a) matters.

(t) Proposed responses to Congressional inquiries, and to General Accounting Office (GAO) and Inspector General audit reports which pertain to the legality of proposed or past actions.

(u) Deviations from the FAR, GSAR, or other directives.

(v) Matters relating to litigation before the courts or the General Services Board of Contract Appeals.

(w) Late bids, offers, and modifications.

501.670–5 Legal assistance.

The following matters illustrate areas in which legal issues are likely to arise; accordingly, contracting officials are encouraged to pay special attention to these areas and to present problems or questions to assigned counsel for assistance, as appropriate, in a timely manner.

(a) Preliminary questions or problems relating to matters requiring legal review.

(b) Meetings scheduled with legal representatives of private parties or meetings where legal issues are likely to be discussed.

(c) Solicitations involving repurchase actions against the account of a defaulted contractor.

(d) Matters concerning nonresponsiveness or nonresponsibility.

(e) Matters involving the application of the Buy American Act (41 U.S.C. 10 et seq.) or related provisions of law.

(f) Matters involving the application of labor statutes (e.g., Walsh-Healey Act, Service Contract Act, etc.).

(g) Matters involving small business or labor surplus areas concerns.

(h) Matters involving the consideration of subcontracting plans as required by Pub. L. 95–507.

(i) Matters involving the withholding of payments to contractors for Department of Labor wage/rate violations.

(j) Matters involving the adequacy of bid guarantees and payment or performance bonds.

(k) Matters relating to contractor indebtedness, bankruptcy, or financing.

(l) Matters involving the utilization of special and directed sources of supply, e.g., procurement of supplies and services from Federal Prision Industries or from workshops for the blind and other severely handicapped.

(m) Matters involving eligibility to use GSA supply sources.

501.670–6 Waivers.

The General Counsel may waive the legal review requirements. Waivers may be granted either on a case-by-case basis or in classes of cases. A request for waiver may be made in writing by an Assistant General Counsel or regional counsel in conjunction with the head of a contracting activity. Under circumstances of extreme urgency, requests for waiver may be made and granted orally but written documentation of the waiver shall be made as soon as time permits.

501.671 Audit of contractor's records.

501.671–1 General.

The Assistant Inspector General-Auditing and the Field Audit Offices conduct contract audits of contractors' records to the extent that such audits are required by law, regulation, or sound business judgment. These audits include the conduct of periodic or special request audits of contractors deemed warranted because of such matters as the financial condition, integrity, and reliability of the contractor and prior audit experience, adequacy of the accounting system, and the amount of unaudited claims. So that the Government can benefit to the maximum extent from these audits, a coordinated and cooperative effort shall be made by contracting officers, technical specialists, and finance and audit personnel. It is the responsibility of the contracting officer to have an audit clause inserted in all contracts subject to audit pursuant to 501.671–3.

501.671–2 Purpose of audit.

Audits are conducted to advise and make recommendations to the contracting officer concerning the following:

(a) Propriety of amounts paid, or to be paid, by GSA to contractors when such amounts are based on a cost or time determination or on variable features related to the results of contractors' operations;

(b) Adequacy of measures taken by contractors regarding the use and safeguarding of Government assets under their custody or control;

(c) Compliance by contractors with contractual provisions having financial implications such as progress payments, advance payments, guaranteed loans, cash return provisions, and price adjustments. The adequacy of a contractor's accounting system and controls shall be evaluated by contract audit before inclusion of a Progress Payments clause. A similar evaluation shall be made prior to the making of any advance payments or guaranteed loans pursuant to FAR Part 32 and GSAR Part 32.

(d) Reasonableness of contractor's settlement proposals in termination of contracts;

(e) Compliance with contract provisions; and

(f) Contractor's financial condition and ability to perform or to continue to perform under Government contracts.

501.671–3 Types of contracts subject to audit.

(a) The following types of contracts in excess of $10,000 include the Examination of Records by GSA clause prescribed in 514.201–6(e) and 515.106–1 and are subject to audit by GSA.

(1) Cost-reimbursement type contracts;

(2) Contracts involving the use or disposition of Government-furnished property;

(3) When advance payments, progress payments based on costs, or guaranteed loans are to be made;

(4) Contracts containing a price warranty or price reduction clause;

(5) Contracts or leases involving income to the Government when the

income is based on operations that are under the control of the contractor or lessee;

(6) Fixed-price contracts with economic price adjustment, with incentives and with price redetermination;

(7) Requirements and indefinite quantity (call-type) contracts;

(8) Time-and-material, labor-hour, and letter contracts; and

(9) Leases when the rental is subject to adjustment based on negotiated operating cost escalation.

(b) Inclusion of the contract clause in 552.215–70 (whether or not modified) in contracts does not affect in any way the requirements for use of the Examination of Records clause permitting review of contractor books and records by the Comptroller General or the clauses on audit and records pertaining to the verification of cost or pricing data.

(c) A copy of each contract or modification of the types described in 542.672 subject to audit shall be furnished to the Assistant Inspector General for Auditing (JA), General Services Administration, Washington, DC 20405, or to the Field Audit Office, as appropriate, simultaneously with distribution of other copies of the contract.

501.672 Payments under contracts subject to audit.

501.672–1 General.

(a) The contracting officer shall not approve the initial payment invoice or voucher until he has consulted with the Assistant Inspector General—Auditing or the Field Audit Office regarding cost or other supporting data as required under:

(1) Cost-reimbursement type contracts;

(2) The cost-reimbursement portion of fixed-price type contracts;

(3) Time and materials or labor-hour contracts; or

(4) Fixed-price contracts providing for: (i) Progress payments based on costs, (ii) advance payments, (iii) guaranteed loans, or (iv) incentives or redetermination.

(b) The contracting officer shall not approve the final payment invoice or voucher for such contracts, nor for the final payment of settlement of other contracts subject to audit prior to the: (1) Receipt and review of the contract audit report or (2) consultation with the Assistant Inspector General for Auditing or the Field Audit Office if no audit is to be conducted; provided, that this paragraph (b) shall not apply to fixed-price contracts with escalation where no price revision (upward or downward) is to be made.

501.672–2 Submission and processing of invoices or vouchers.

(a) Contractors shall be required to submit invoices or vouchers to the contracting officer. The processing of invoices or vouchers prior to payment for work or services rendered shall include a review by the contracting officer, or his designated representative, to determine that the nature of items and amounts claimed are in consonance with the contract terms, represent prudent business transactions within any stipulated contractual limitations. The contracting officer must ensure that these payments are commensurate with physical and technical progress under the contract. If the contractor has not deducted from his claim amounts which are questionable or which are required to be withheld, the contracting officer shall make the required deduction, except as provided in 501.672–3.

(b) Subject to the provisions of 501.672–1, approval by the contracting officer of any payment, including any specific approval as to the nature or amount of the cost, shall be noted on (or attached to) the invoice or voucher. The invoice or voucher shall be forwarded to the appropriate accounting center and retained therein after certification and scheduling for payment to a disbursing office.

501.672–3 Action upon receipt of an audit report.

Audit reports shall be furnished to the contracting officer, with a copy to the appropriate accounting center. Upon receipt of an audit report, the contracting officer shall, pursuant to contract terms, determine the allowability of all costs covered by audit, giving full consideration to the auditor's recommendations. When the contracting officer is in doubt or questions the recommendations of the auditor, deductions need not be made from invoices or vouchers for provisional payments. In these cases, the contracting officer shall confer with the auditor and other appropriate Government personnel (such as a price specialist of legal counsel) to determine what further action should be taken regarding the items of cost in question. If the contracting officer disagrees with the auditor's recommendations, the contracting officer shall prepare a statement for the contract file to support and justify his decision and shall furnish the auditor with a copy of the statement.

501.672–4 Suspensions and disapprovals of amounts claimed.

The contracting officer shall notify the appropriate accounting center in writing when amounts claimed for payment are: (a) Suspended, (b) disapproved as not being allowable according to contract terms, or (c) not reasonably incident or allocable to performance of the contract. This notice by the contracting officer shall be the basis for the issuance by the accounting center of GSA Form 533, Administrative Difference Statement. A copy of GSA Form 533 shall be attached to each copy of the invoice or voucher from which the deduction has been made, including an explanation of the deduction. Control over the issuance of GSA Form 533 shall be maintained by the accounting center.

501.673 Additional internal controls.

As supplement to the contractual right to audit contractor records in cost-reimbursement type, time and materials, labor-hour, requirements and indefinite quantity (call-type) contracts, the contracting officer (with the assistance of the Assistant Inspector General-Auditing or the Field Audit Office) shall establish appropriate internal controls or procedures prior to the performance of those contracts with respect to any flexible or variable features. For example, if a time and materials or labor-hour contract is performed (on a Government facility or elsewhere) subject to observation or overall supervision by Government personnel approval of time records may be provided for as incidental to the Government supervision. Any reasonable and reliable method or procedure may be established to account for such matters as the time spent on the job and materials or supplies received which will assist the contract auditor and the contracting officer to determine the correctness of the charges to the contract.

501.674 Releasing or withholding of audit reports.

The Freedom of Information Act generally requires the disclosure of Government records subject to certain exceptions. It may be to the benefit or detriment of the Government to release contract audit reports or portions of them depending upon the circumstances. However, because of the complexity of the matter, contracting officers shall consult with both the Assistant Inspector General-Auditing and the Office of General Counsel, prior to the release or withholding of such information.

PART 502—DEFINITION OF WORDS AND TERMS

Sec.
502.000 Scope of part.

Subpart 502.1—Definitions

502.170 Head of the contracting activity.
502.171 Contracting director.

Authority: 40 U.S.C. 486(c).

502.000 Scope of part.

This part defines words and terms commonly used throughout the General Services Administration Acquisition Regulation (GSAR). Other terms are defined in the part or subpart with which they are particularly associated.

Subpart 502.1—Definitions

502.170 Head of the contracting activity.

"Head of the contracting activity" means Assistant Administrators, Associate Administrators, or Commissioners of Central Office organizational units which perform contracting functions; the Archivist of the United States; or Regional Administrators.

502.171 Contracting director.

"Contracting director" means directors of Central Office or regional office divisions that are responsible for performing contracting and/or contract administration functions.

Part 503—IMPROPER BUSINESS PRACTICES AND PERSONAL CONFLICTS OF INTEREST

Sec.

Subpart 503.1—Safeguards

503.101–3 Agency regulations.

Subpart 503.2—Contractor Gratuities to Government Personnel

503.203 Reporting suspected violations of the gratuities clause.
503.204 Treatment of violations.

Subpart 503.3—Reports of Identical Bids and Suspected Antitrust Violations

503.303 Reporting suspected antitrust violations.

Subpart 503.4—Contingent Fees

503.408 Evaluation of the SF 119.
503.408–1 Responsibilities.
503.409 Misrepresentations or violations of the covenant against contingent fees.

Subpart 503.5—Other Improper Business Practices

503.502 Subcontractor kickbacks.
503.570 Advertising of awards.

Subpart 503.6—Contracts With Government Employees or Organizations Owned or Controlled by Them

503.602 Exceptions.
503.603 Responsibilities of the contracting officer.

Authority: 40 U.S.C. 486(c).

SUBPART 503.1—SAFEGUARDS

503.101–3 Agency regulations.

(a) GSA Standards of Conduct are issued as 41 CFR Part 105–735 of the General Services Administration Property Management Regulations (GSPMR), ADM 7900.9. The agency authorized exceptions to FAR 3.101–2 are outlined in 503.101–2 and in 41 CFR 105–735.202(e) of the GSPMR. The procedures for enforcement of the standards are outlined in 41 CFR 105–735.101 of the GSPMR.

(b) The requirements for employee financial disclosure and restrictions on private employment for former Government employees are contained in the GSA Standards of Conduct. See 41 CFR 105–735.4 and 105–735.6 of the GSPMR.

Subpart 503.2—Contractor Gratuities to Government Personnel

503.203 Reporting suspected violations of the Gratuities clause.

It is the obligation of GSA employees to report immediately any apparent or suspected violation of the Gratuities clause in connection with any operation of GSA. The report shall be made to the contracting officer and to the Assistant Inspector General for Investigations in the Central Office or to the Regional Inspector General for Investigation. GSA employees shall also report suspected violations of the Gratuities clause to the Deputy Standards of Conduct Counselor in accordance with 105–735.202(e)(4) of the GSPMR. The report shall outline the events, acts, or conditions which indicate the Gratuities clause has been violated and shall include all pertinent documents, if any. The Office of Inspector General (OIG), shall conduct such investigation as is deemed necessary and, if appropriate, forward a report and recommendation, together with all pertinent documentation, to the Department of Justice and/or the Office of Acquisition Policy.

503.204 Treatment of violations.

The Assistant Administrator for Acquisition Policy shall act as the Administrator's designee and be responsible for determining whether the contractor offered or gave a gratuity and intended by the gratuity to obtain a contract or favorable treatment under a contract.

Subpart 503.3—Reports of Identical Bids and Suspected Antitrust Violations

503.303 Reporting suspected antitrust violations.

(a) When contracting officers become aware of circumstances that may indicate violations of antitrust laws, they shall report the circumstances to the Assistant Inspector General for Investigation in the Central Office or to the Regional Inspector General for Investigations. The Office of Inspector General (OIG), shall conduct such investigation as may be necessary and prepare formal documents and statements for submission to the Department of Justice and/or the Office of Acquisition Policy for suspension or debarment consideration.

(b) If the Inspector General finds that violations of antitrust laws may have been committed, the Inspector General will refer the matter to the Department of Justice, in accordance with section 4(d) of the Inspector General Act of 1978, 5 U.S.C. Appendix, and notify the General Counsel, when appropriate, of the referral.

Subpart 503.4—Contingent Fees

503.408 Evaluation of the SF 119.

503.408–1 Responsibilities.

Upon receipt of Standard Form 119, Statement of Contingent or Other Fees, the contracting officer shall obtain advice of legal counsel as to the legality and general propriety of the relationship disclosed thereon. Also, the contracting officer may request the Assistant Inspector General for Investigation in the Central Office or the Regional Inspector General for Investigation to develop further information if the facts available are deemed insufficient for a proper decision. After careful review and evaluation of all the information obtained, the contracting officer shall render a decision in writing which shall be made a part of the contract file.

503.409 Misrepresentations or violations of the covenant against contingent fees.

(a) The name of successful offerors who fail or refuse to furnish the representation and agreement after opportunity therefor has been afforded, shall be submitted, with a statement of the pertinent circumstances, to the Assistant Inspector General for Investigation in the Central Office or the Regional Inspector General for Investigation for such further action as may be appropriate.

(b) The names of offerors who fail or refuse to furnish a complete Standard

Form 119 (or a statement in lieu thereof as provided in FAR 3.405) shall be submitted, together with pertinent information, to the Assistant Inspector General for Investigation in the Central Office or the Regional Inspector General for Investigation for appropriate action. If the contract has been awarded, consideration shall be given to the feasibility of terminating the contract. If the contract has been awarded the eligibility of the offeror should be questioned.

(c) If an award has been made, any action to enforce the terms of the covenant shall be taken only upon the recommendation of legal counsel. Whether or not an award has been made, a suspected misrepresentation or anticipatory violation of the covenant against contingent fees shall be reported to the Assistant Inspector General for Investigation in the Central Office or the Regional Inspector General for Investigation.

Subpart 503.5—Other Improper Business Practices

503.502 Subcontractor kickbacks.

(a) When contracting officers become aware of circumstances that may indicate violations of the Anti-Kickback Act, they shall report the circumstances to the Assistant Inspector General for Investigation in the Central Office or to the Regional Inspector General for Investigation.

(b) If the Inspector General finds that violations of the Anti-Kickback law may have been committed, the Inspector General will refer the matter to the Department of Justice, in accordance with section 4(d) of the Inspector General Act of 1978, 5 U.S.C. Appendix and notify the General Counsel, when appropriate, of the referral.

503.570 Advertising of award.

The contracting officer shall insert the clause at 552.203–1, Advertising of Award, in solicitations and contracts for supplies and services when the contract amount is expected to exceed the small purchase limitation.

Subpart 503.6—Contracts With Government Employees or Organizations Owned or Controlled by Them

503.602 Exceptions.

Offers submitted by Government employees on solicitations issued pursuant to the Office of Management and Budget (OBM) Circular A–76 may be considered provided the contracting officer has complied with the requirements outlined in 503.603 before making an award. Normally when Government employees bid on A–76 solicitations, they do so with the knowledge that if the contract is awarded, their Government employment will be terminated. They are merely competing for the right to continue to provide a service to GSA. While they are Government employees at the time the bid is submitted, they will not be Government employees during the performance period. The implementation of OMB Circular A–76 presents a unique situation which may be considered to be an authorized exception to the policy in FAR 3.601. Contracts between the Government and its employees are not expressly prohibited by statute except, where the employee acts for both the Government and the contractor in a particular transaction or where the service to be rendered is such as could be required of the contractor in his/her capacity as a Government employee, 18 U.S.C. 208 (1976); Hugh Moher B–187841, March 31, 1977, 77–1 CPD 204.

503.603 Responsibilities of the contracting officer.

Before awarding a contract to a GSA employee who responded to an A–76 solicitation, the contracting officer shall:

(a) Obtain a written certification from the employee's supervisor that: The individual was not involved in the development of the solicitation or specifications, or in the preparation of the independent Government cost estimate or in-house cost comparison; had no advance knowledge of the details of the contents of the solicitation package; and was not otherwise involved in the contracting process.

(b) Refer the proposed award to the appropriate Assistant General Counsel for review and approval.

(c) Ascertain whether a reduction in force notice has been issued to the employee.

PART 504—ADMINISTRATIVE MATTERS

Subpart 504.4—Safeguarding Classified Information Within Industry

Sec.
504.402 General.
504.470 Requests for release of classified information.
504.470–1 Authorization for release.
504.470–2 Termination of authorization for release.
504.471 Processing security requirements checklist (DD Form 254).
504.472 Periodic review.
504.473 Recurring procurement.
504.474 Control of classified information.
504.474–1 Records.
504.474–2 Markings.
504.475 Return of classified information to GSA.
504.475–1 Return from prospective contractors.
504.475–2 Return from contractors.
504.475–3 Termination, revocation, or inactivation of facility security clearance.
504.476 Breaches of security.

Subpart 504.6—Contract Reporting

504.601 Federal Procurement Data System.
504.670 Notification of proposed substantial awards and awards involving Congressional interest.
504.671 Reporting taxpayer identification numbers.

Subpart 504.8—Contract Files

504.800 Scope of subpart.
504.802 Contract files.
504.803 Contents of contract files.

Subpart 504.70—Uniform Procurement Instrument Identification

504.7001 Uniform procurement instrument identification.
504.7001–1 Policy.
504.7001–2 Basic procurement instrument identification number.
504.7001–3 Orders and calls instrument identification number.
504.7001–4 Supplemental procurement instrument identification number.
504.7002 Procurement contract register.

Authority: 40 U.S.C. 486(c).

Subpart 504.4—Safeguarding Classified Information Within Industry

504.402 General.

(a) This subpart prescribes procedures for safeguarding classified information required to be disclosed to contractors in connection with the solicitation of bids and offers, and the award, performance, and termination of contracts. As used in this subpart, the term "contractor(s)" includes prospective contractors, contractors, subcontractors, vendors, and suppliers of any tier.

(b) The provisions of this subpart implement the requirements of the Department of Defense Industrial Security Regulations and the Department of Defense Industrial Security Manual for Safeguarding Classified Information. By agreement, the Department of Defense will act for and in behalf of General Services Administration (GSA) in rendering security services required for safeguarding classified information released by GSA to United States (U.S.) industry.

(c) As used in this subpart, the term "U.S. industry" pertains to those industries (including educational and research institutions) located within the United States, its possessions, and the Commonwealth of Puerto Rico.

504.470 Requests for release of classified information.

Prior to entering into discussion, negotiation, or solicitation of bids for contracts involving the disclosure of classified information, the contracting officer shall prepare, in triplicate, section I of GSA Form 1720, Request for Release of Classified Information to U.S. Industry (illustrated in 553.2). After signing as requesting officer and obtaining approval from his/her immediate supervisor, the contracting officer shall forward all copies to the Office of Internal Security (ATOI), Office of Oversight.

504.470–1 Authorization for release.

ATOI, after determining that the contractor has been issued a Department of Defense facility security clearance, will complete the appropriate parts of section II, of GSA Form 1720, and return the original and one copy to the contracting officer. Under no circumstances will classified information be disclosed or made accessible to any contractor until the completed form has been received from ATOI. Where only Item 14b, section II, of the form has been checked, the contracting officer will be guided in his/her actions by the instructions on the reverse side of the form. In the event that a contractor is found to be ineligible for a security clearance, ATOI shall advise the contracting officer.

504.470–2 Termination of authorization for release.

When it develops that a clearance should be withdrawn or revoked, ATOI will advise the contracting officer of the termination of authorization to release classified information. This will include instructions concerning actions required to safeguard, withhold, or obtain the return of classified information. Reasons for such termination may include:

(a) Failure of the contractor to maintain the physical standards required by the Industrial Security Manual for Safeguarding Classified Information.

(b) Information indicating the contractor should no longer be eligible for clearance.

(c) The contractor no longer requires access to classified information.

504.471 Processing security requirements checklist (DD Form 254).

(a) Contracts involving access to classified information by the contractor require preparation of DD Form 254, Contract Security Classification specification (illustrated in FAR 53.303–DD–254), to identify and indicate to Department of Defense (DOD) and contractors the areas of classified information involved. In the case of contracts for research, consultant services, graphic arts services, or other procurements of services, written notice of classification may be used in lieu thereof.

(b) Below are instructions for completing each item on the DD Form 254. The GSA contracting officer is responsible only for the preparation of DD Forms 254 that are issued to the prime contractor. Those issued to subcontractors are the responsibility of the prime contractor. Since GSA has the review and distribution responsibility for DD Forms 254 that are issued to subcontractors, instructions for completing those items on the DD Form 254 as they apply to subcontractors are also included. Each item of the DD Form 254 is to be completed; N/A should be shown for items that are not applicable.

(1) *Item 1:* Enter the appropriate clearance: Top Secret, Secret, or Confidential.

(2) *Item 2:* Check item 2a, 2b, 2c, as applicable.

(3) *Item 3:* Enter the complete identifying number and the completion date in 3a or 3b. If item 3c is used, enter the appropriate data identifying the type of solicitation (i.e., Request for Proposal (RFP), Request for Quotation (RFQ), or Invitation for Bid (IFB)).

(4) *Item 4:* Furnish date in block 4a, 4b, or 4c, as applicable.

(5) *Item 5:* If the DD Form 254 is not for a follow-on contract, annotate block "Does Not Apply." If the DD Form 254 is for a follow-on contract, enter the preceding contract identification number from which this contract evolved and its completion date.

(6) *Item 6:* If there is a prime contract, complete items 6a and 6b, showing the complete name and address of the prime contractor's facility that will receive classified information in the performance of the prime contract identified in item 3a along with the responsible security office of that facility. If there is no prime contract and item 3c is completed, enter instead in items 6a and 6b the name and address of the contractor's facility to which the DD Form 254 is to be sent in connection with the RFP, RFQ, or IFB, or GSA program as described in 553.401, and the responsible security office of that facility. The identity of the responsible security office is obtainable from section II of the GSA Form 1720.

(7) *Item 7:* If there is a first tier subcontract, complete items 7a and 7b showing the complete name and address of the subcontractor's facility that will receive classified information in performance of the subcontract listed in item 3b. If there is no first tier subcontract and item 3c is completed, enter instead the name and address of the subcontractor's facility to which the DD Form 254 is to be sent in connection with RFP, RFQ, IFB, and the responsible security office of that facility.

(8) *Item 8:* List in the proper order of succession beginning with the second tier, the subcontract's identification number and the complete name and address of the subcontractor of each successive tier, down to and including the subcontractor's facility for which the DD Form 254 is being provided, and the responsible security office of such last facility. If item 3c is completed, the last entry should be the name and address of the subcontractor's facility to which the particular DD Form 254 is to be sent in connection with the RFP, RFQ, or IFB, and the responsible security office of such facility.

(9) *Item 9:* Under item 9a, include a brief unclassified statement or notation of sufficient information to identify the nature of the procurement or program. If an unclassified notation cannot be made, enter the word "classified."

Usually, item 9b is checked "no." If a case arises where the contracting officer believes item 9b should be checked "yes," the Director, Office of Internal Security should be contacted for further guidance.

(10) *Item 10:* Check the appropriate box for each item listed. Use the "Remarks" column to elaborate as necessary. When either the RESTRICTED Data, Cryptographic Information, or Communication Analysis Information block is checked "yes," identify the applicable classification guide(s) pertinent to the contract or attach them to the DD Form 254. If these extracts are classified, forward them by separate correspondence. If it is necessary to check "yes" to the Defense Documentation Center of Defense Information Analysis Center services, coordination should be effected with the GSA office of Internal Security (ATOI), Office of Oversight.

(11) *Item 11:* Enter the name, address, telephone number, and office symbol of the GSA official to whom inquiries pertaining to classification guidance determinations or interpretations for the subcontract are to be directed. (This item must be completed even if the official is the same as the official identified in item 14.) In first tier subcontracting situations, show the name, address, and telephone number of the responsible official in the facility of the prime contractor listed in item 6a. In subcontracting situations beyond the

first tier, show the name, address, and telephone number of the responsible official in the subcontractor's facility listed in item 3b or item 8, as appropriate to whom inquiries pertaining to classification guidance determinations or interpretations for the subcontract are to be directed.

(12) *Item 12:* Strike through "Direct" and "Through" boxes and enter "To: Director, Office of Internal Security (ATOI), General Services Administration, Washington, DC 20405."

(13) *Item 13:*

(i) This item provides the necessary security classification specifications for the contract. The specification must elaborate and explain sufficiently to clearly identify the areas and specific information within those areas that require classification. The guidance must be accompanied by either of the following statements: "Subject to General Declassification Schedule" or "Exempt from General Declassification Schedule." When all the specific information is not subject to the General Declassification Schedule or when all the information is not exempt from the Schedule, then the applicable identifying statement must appear next to each item of information.

(ii) Classified contracts in GSA are awarded for reasons that fall into the following broad categories: Release of classified information to the contractor; services by the contractor at classified or sensitive locations; and guard service contracts.

(c) In addition to the distribution set forth on the DD Form 254, the GSA Office of Internal Security (ATOI), Office of Oversight shall receive two copies.

504.472 Periodic reviews.

Contracting officers shall review DD Form 254 whenever a change in the phase of performance occurs or at their own discretion, but in any event at least once a year, to determine whether the classified information can be downgraded or declassified. The contractor shall be informed of the results of the review by issuance of a revised specification, or by written instructions in lieu of DD Form 254 (where authorized), or if the review results in no change in the classification specifications, by written notification to that effect. Upon termination or completion of the contract, a final checklist shall be prepared.

504.473 Recurring procurement.

When procurement is of a recurring nature, a new DD Form 254 is not required if the end item is not changed and there is no change from the previous security classification.

504.474 Control of classified information.

(a) Classified information shall be transmitted to the contractor in the manner required by the HB, Information Security, Chapter 1–7 (ADM P 1025.2B).

(b) Classified information shall be addressed and delivered to the contractor so that it may be secured and recorded at the control stations established at the contractor's facility in accordance with the requirements of the Industrial Security Manual for Safeguarding Classified Information. Classified material may be delivered or made available to an employee of the contractor if the employee has security clearance for access to classified information at the required level and the contractor has given GSA advance written notification of the name (in full) of the employee, his official position, and his current clearance status.

(c) The "need to know" principle must be enforced at all times. "Need to know" means that the knowledge or the possession of classified material is permitted only to persons whose official duties require such access in the interests of promoting national security. The contracting officer is responsible for determining who is permitted access to classified material.

(d) When classified information is originated by another agency, the consent of the originating agency shall be obtained prior to releasing the classified information to the contractor.

504.474–1 Records.

Contracting officers shall ensure that a record is maintained of classified information released to contractors.

504.474–2 Markings.

Classified material furnished to a contractor shall be marked in accordance with the provisions of the HB, Information Security, Chapter 1–4 (ADM P 1025.2B).

504.475 Return of classified information to GSA.

Unless the classified information has been destroyed as provided in paragraph 19 of the Industrial Security Manual for Safeguarding Classified Information, the contracting officer shall obtain the return of this information. Where classified information is furnished to a GSA contractor by another Government agency, the return of such information is the responsibility of that agency.

504.475–1 Return from prospective contractors.

When a bid or proposal is not submitted, any classified information furnished shall be required to be returned prior to or immediately after the time set for bid opening or the closing date for receipt of proposals. For unsuccessful bidders or offerors, any classified information shall be required to be returned within 15 days after contracts have been awarded.

504.475–2 Return from contractors.

All classified information furnished a contractor shall be required to be returned at the termination or completion of the contract or when otherwise directed by the contracting officer.

504.475–3 Termination, revocation, or inactivation of facility security clearance.

(a) When a contracting officer has been advised by the GSA Office of Internal Security that authorization to release classified information has been withdrawn, or by the responsible security officer that the facility's security clearances have been revoked or inactivated, immediate action shall be taken to obtain the return of classified information.

(b) If the contracting officer is advised that a facility does not have adequate means for safeguarding classified information in its possession, additional classified information shall not be furnished. Any classified information previously furnished shall be required to be returned as in (a), above, until the facility meets the standards required by the Industrial Security Manual for Safeguarding Classified Information.

504.476 Breaches of security.

When an unauthorized disclosure of classified information is discovered, the GSA contracting officer or other GSA employee responsible for the information shall promptly refer the facts of such breach or compromise to the GSA Office of Internal Security for appropriate remedial action.

Subpart 504.6—Contract Reporting

504.601 Federal Procurement Data System.

GSA guidance, procedures, and instructions on reporting procurements to the Federal Procurement Data System are contained in the GSA Procurement Management Information Reporting System Manual (ADM P 2800.16).

504.670 Notification of proposed substantial awards and awards involving Congressional interest.

(a) *Applicability.* This section applies to notification of proposed awards resulting from either advertised or negotiated solicitations, including contract modifications exercising options: When a supply contract is involved and the dollar value exceeds or is estimated to exceed $500,000 (except for products whose points of origin are not readily identifiable or which involve foreign production points); when a design (Architect/Engineer) contract or construction contract is involved and the dollar value exceeds or is estimated to exceed $100,000; or when there is Congressional interest any contract for supplies or services regardless of dollar value.

(1) When Congressional interest is involved, GSA Form 2932, Proposed Substantial Contract Awards or a facsimile message shall be prepared for transmittal to the Director of Congressional Affairs (EG) containing the following information:

"Congressional Interest—*Name of Congressman or Senator)*———— (State)—Control No.———— *In behalf of (Name of firm and complete address)—If award is not proposed to the bidder, explain why)*————."

(2) In addition to the requirement in (a)(1) above, when a Congressional inquiry is made orally with a contracting officer, and award or other information has been promised to a Congressman or Senator, GSA Form 2932, or the facsimile message shall contain the following statements:

Unless notified to the contrary, we will assume that the (*Congressman or Senator*) has been advised by EG.

(b) *Codes.* The following codes shall be used in the appropriate columns of GSA Form 2932 or in the facsimile message, as applicable.

(1) *DQ* for definite quantity contract;

(2) *SC* for schedule contract;

(3) *TC* for term contract other than schedule;

(4) *S* for small business concern;

(5) *O* for other than a small business concern;

(6) *NLS* for not labor surplus area; and

(7) *LS* for labor surplus area.

(c) *Notification procedure.* (1) The contracting director shall be responsible for submitting directly to the Director of Congressional Affairs (EG) complete and factual data pertinent to any proposed award of the type described in paragraph (a) of this section.

(2) Regional offices (except Region W) shall prepare GSA Form 2932 and transmit the notification directly to the Director of Congressional Affairs (EG), by facsimile machine except as shown in paragraph (c)(4) of this section.

(3) Central Office and Region W contracting activities shall prepare GSA Form 2932 and transmit the notification (original only) directly to the Director of Congressional Affairs (EG). The notifications(s) shall be placed in a messenger envelope and addressed as follows: PLEASE HAND-CARRY Attention: EG, GS Bldg.

(4) The following additional information shall be furnished on the GSA Form 2932 as applicable.

(i) Under Type of Contract insert "A" for advertised and "N" for negotiated, including the applicable negotiation authority in parentheses; i.e., N(2) for negotiated public exigency.

(ii) Under Point of Production show the name (plant or operational unit), address (including county), and the dollar value for each production point. When the name of the supplier (subcontractor) is different from the contractor, show the supplier's or subcontractor's name, address (including county), and applicable dollar value for each point of production. When the offer does not clearly indicate a specific production point for the item(s); i.e., several sources shown for one item, the word "undeterminable" shall be stated in the Point of Production column, and the various production points (name, address, and county will be listed). When there are multiple production points and specific items and their points of production are not shown, or when the number of production points exceed 10, show the word multiple and indicate immediately after, in parentheses, the total number of production points.

(iii) For definite quantity awards, show: (A) The quantity and unit, in parentheses, under each production point, (B) the name of the requisitioning activity next to the applicable quantity, and (C) the requirement or portion thereof for overseas use.

(iv) The contracting officer's name and telephone number shall be typed or printed at the bottom of each report in the event additional information is required by the Director of Congressional Affairs (EG).

(d) *Release of awards.* (1) Unless notified to the contrary contracting activities may release awards of the type described in (c) (2) and (3) of this section, or information pertinent thereto, upon the expiration of two full workdays (48 hours) after the time and date of transmittal of the GSA Form 2932 or the facsimile message to the Director of Congressional Affairs (EG).

(2) Preaward inquiries from offerors shall be processed in accordance with FAR 14.408 and 15.1001.

(e) Proposed exigency or emergency awards and cases when the acceptance time in an offer is about to expire.

(1) The contracting activities shall transmit notifications as determined by their director directly to the Director of Congressional Affairs (EG), by telephone, followed by a completed GSA Form 2932 to confirm the oral notification.

(2) Release of notifications which require priority processing by the Director of Congressional Affairs (EG), shall be completed at the time and date specified by EG.

504.671 Reporting taxpayer identification numbers.

(a) *General.* Contracting officers shall obtain and report contractors' taxpayers identification numbers (TIN) to the Office of Finance. The Office of Finance in turn will record and report this information on Internal Revenue Service Form NEC 1099 in compliance with IRS directives regarding the reporting of income.

(b) *Procedures.* (1) This procedure pertains only to contractors who are not incorporated and who receive payments from GSA totaling $600 or more in any calendar year. If the contracting officer anticipates that payments to the contractor will equal or exceed the $600 amount for the year, he shall report the TIN.

(2) Contracting officers shall obtain and report contractor's TIN to their designated Office of Finance.

(3) The TIN is either the employer identification number or social security number.

(4) Contracting officers shall make the request for the TIN a part of the solicitation. A copy of the contract (containing the TIN) shall be forwarded to the Office of Finance for payment.

(5) The TIN shall also appear on the face of any orders placed against a contract, copies of which are forwarded to the Office of Finance for payment.

(6) If written solicitations/orders are not used, the TIN should appear on the invoice certified by an authorized Government official and forwarded to the Office of Finance for payment.

(7) When a prospective contractor fails to provide the TIN in an offer, it shall be handled as a minor informality.

(8) If a contractor refuses to furnish the TIN to the contracting officer, the contracting officer shall so notify the Office of Finance.

Subpart 504.8—Contract Files

504.800 Scope of subpart.

This subpart prescribes requirements for use of a standard contract file format for all contracts except leases of real property which exceed the small purchase limitation. The application of this subpart to small purchases is optional.

504.802 Contract files.

Professionalism in acquisition dictates that contract files be complete and able to stand on their own. To achieve this goal and to make easier the processing and administration of contracts at all levels, contract files are to be organized in a standardized manner throughout the agency. Therefore, all contracts over $25,000 in value shall be supported with an official contract file containing all necessary information and documentation in accordance with the requirements outlined in FAR 4.802 and 4.803. The documents shall be organized in accordance with the standard contract file format in 504.803.

504.803 Contents of contract files.

(a) The items listed therein shall be placed in the contract file in reverse order, i.e., item (1) should be placed on the bottom of the file, item (2) on top of item (1),.etc.

(1) Requisition or request for contractual action.

(2) Specifications, drawings and other technical document.

(3) Acquisiton plan, including where applicable, the determination required by OMB Circular A–76.

(4) Determination and findings required by Part 15 of the FAR. Any associated administrative approvals required, such as approval of sole source solicitations should be included under this tab.

(5) Department of Labor Wage Determination.

(6) Small business and labor surplus area determinations.

(7) Source list.

(8) Statement as to synopsis of proposed procurement pursuant to FAR 5.2 or other required advertisements.

(9) Pre-invitation notice (PIN).

(10) IFP/RFP and amendments.

(11) Abstract of bids/proposals including identification of the low bidder/offeror, discounted price, etc.

(12) Cost or pricing data. Where the requirement for submission of cost or pricing data is waived as provided in FAR 15.804–3 the waiver and documentation supporting the waiver shall be filed under this tab.

(13) Audit report. Where the requirement for an audit of a price proposal is waived per FAR 15.805–5, the waiver and documentation supporting the waiver shall be filed under this tab.

(14) Price or cost analysis report prepared pursuant to FAR 15.608. Supporting technical analyses, other than those supporting an audit report, shall be filed under this tab. The profit of fee analysis required by FAR 15.9 shall be made a part of the price or cost analysis report. In those cases where an independent Government estimate is prepared, it also shall be made a part of the price or cost analysis report.

(15) A price negotiation memorandum as required by FAR 15.808 must be written so as to permit reconstruction of all the major events of the acquisition and placed under this tab.

(16) Certificate of current cost or pricing data.

(17) Pre-award survey.

(18) EEO compliance review. Subcontract plan.

(19) No bid or no proposal correspondence.

(20) Unsuccessful bids or proposals. A copy of each rejected bid or each unacceptable proposal also must be included in the file under this tab.

(21) Mistakes in bids and protests. This includes all correspondence and determinations relating to mistakes in bids disclosed prior to award and/or protest.

(22) Actions taken on late bids or proposals.

(23) Successful bid or proposal and all pertinent correspondence applicable to the contractual action.

(24) Contractual action. Where an award is to be accomplished by use of the award portion of the SF 33, or similar forms, the contract document shall be included in TAB 23.

(25) Status of overall requirement. A summary should be provided on the disposition of all items solicited; e.g., items 1 to 10 no offers received, item 11 in the total amount of $100,000 to ABC Company, items 12 and 13 to XYZ Company, value of award $350,000 (Item 12 $200,000 and item 13 $150,000). For negotiated action, this information shall be included in the Price Negotiation Memorandum.

(26) Evidence of concurrence for legal sufficiency of the appropriate counsel.

(27) Any required approvals—GSA Form 1535, Recommendation for Award (if applicable).

(28) GSA Form 2932, Proposed Substantial Contract Award (if applicable).

(29) Standard Form 99, Notice of Award of Contract, (if applicable).

(30) GSA Form 3439, GSA/FPDS Individual Contract Action Report.

(b) The contract file shall be numerically tabbed pursuant to the format outlined in 504.803(a). Documents within the tab should be filed chronologically with the most recent document on top. If any of the documents are too voluminous to be placed under the applicable tab, they should be included in a separate file and the tab annotated with the location of the file. All of the items described will not always be needed for each contract action. Unneeded items, therefore, will be self deleting. If a tab is not required for a particular action, it should be omitted from that contract file.

(c) An index of the file tabs should be prepared and placed on top of the file. Items which are not applicable should be so marked and if necessary, a brief explanation included. In order to make easier preparation of the index, each service/office shall prepare a standard contract file checklist based on the requirements of 504.803(a) appropriate to that particular service/office. The requirements of a particular service/office may make appropriate the inclusion of sub-headings under a tab or, if deemed necessary, additional items.

(d) The contracting officer shall be responsible for the official file. All documents pertaining to the contract should be forwarded by those initiating them to the contracting officer for inclusion in this file.

Subpart 504.70—Uniform Procurement Instrument Identification

504.7001 Uniform procurement instrument identification.

This section is effective October 1, 1984, and prescribes procedures for the identification of all GSA contracts, orders, and other procurement instruments regardless of the dollar threshold.

504.7001–1 Policy.

(a) The uniform procurement instrument identification system shall be used for procurement instruments listed in paragraph (f) of 504.7001–2.

(b) Identification shall be placed in spaces provided on the applicable procurement forms, with major elements separated by hyphens. If a space is not reserved for the prescribed number, it shall be placed in the upper right-hand corner of the form.

(c) Each contracting office shall maintain records to ensure continuity and control of procurement instrument identification numbers.

504.7001–2 Basic procurement instrument identification number.

The basic procurement instrument identification number shall remain unchanged for the life of the particular instrument and shall consist of 14 alphanumeric characters as follows:

(a) The basic procurement instrument identification number shall use characters 1 and 2 for the symbol "GS."

(b) The third and fourth characters shall be assigned to the region preparing the instrument as follows.

00 Central Office
01 Region 1
02 Region 2
03 Region 3
04 Region 4
05 Region 5
06 Region 6
07 Region 7
08 Region 8
09 Region 9
10 Region 10
11 National Capital Region

(c) The fifth character shall be a capital letter assigned to the service/office preparing the instrument as follows:

A Office of the Administrator
B Office of Comptroller
D Federal Property Resources Services
F Office of Federal Supply and Services
G Board of Contract Appeals
H Office of Civil Rights, Organization and Training
J Office of Inspector General
K Office of Information Resource Management
L Office of General Counsel
N National Archives and Records Service
P Public Buildings Service

(d) The sixth and seventh characters shall be the last two digits of the fiscal year in which the number is assigned.

(e) The eight and ninth characters shall be an alpha or alpha/numeric code identifying the contracting office preparing the instrument. (These codes will be assigned to each GSA organization where a warranted contracting officer is assigned.) See Appendix A for code assignment.

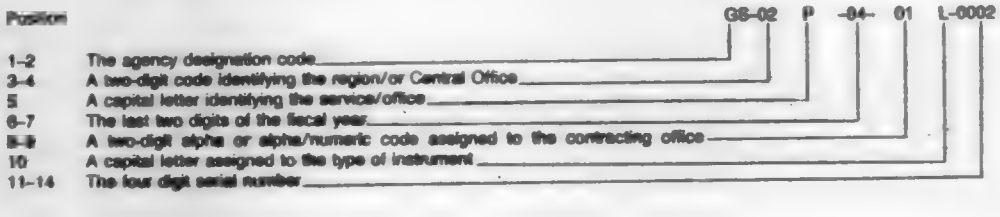
(f) The tenth character shall be a capital letter assigned to indicate the type of procurement instrument code as follows:

A Agreements, including basic agreements, basic ordering agreements, and blanket purchase agreements.
B Reserved
C Contracts, including letter contracts, contracts referencing basic agreements, and contracts providing subsequent provisions, excluding indefinite delivery type contracts.
D Indefinite delivery requirements type contracts.
E Sales contracts.
F–K Reserved.
L Leases of real property.
M Purchase orders (open market small purchases)—manual.
N Notice of intent to purchase.
P Purchase orders—(open market small purchases)—automated.
Q Reserved.
R Reserved.
S Schedule contract.
T–Z Reserved.

(g) The eleventh through fourteenth characters shall be the serial number of the instrument. A separate series of numbers, maintained at the contracting office level, may be used for each type of instrument listed in paragraph (f) of this 504.7001–2, depending upon procurement document volume. At the beginning of each fiscal year, these serial numbers shall commence with the number 0001. Alphanumeric characters shall be serially assigned, after all the numeric series are exhausted, i.e., 0001 through 9999, with an alpha as the first character, followed by three character numeric serial number. Each issuing office shall be responsible for the control of the serial number assignments. The following numeric and alphanumeric sequences, excluding alpha I and O, shall be used:

0001 through 9999,
A001 through A999, B001 through B999.
And so to Z001 through Z999.

(h) An example of this procurement instrument identification number is:



504.7001–3 Orders and calls instrument identification number.

Delivery orders under type contracts (orders), orders under basic ordering agreements (orders), calls under blanket purchase agreements (calls), and orders under schedule contracts shall be identified by an "11" character alphanumeric identification number.

(a) The first character shall be a capital letter assigned to the service/office issuing the order. This code will be identical to those assigned in paragraph (d) of 504.7001–2.

(b) The second and third characters shall be assigned to the Region issuing the order. These identification codes will be identical to the codes assigned in paragraph (b) of 504.7001–2.

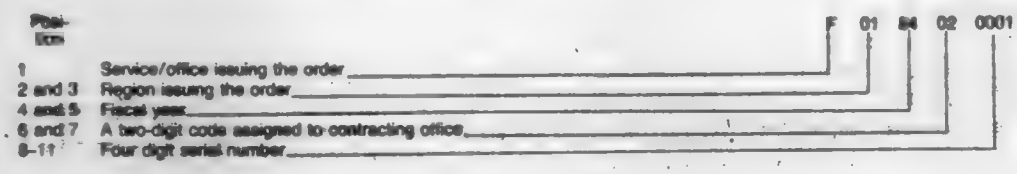
(c) The fourth and fifth characters shall be the last two digits of the fiscal year in which the number is assigned.

(d) The sixth and seventh characters shall be assigned to the contracting office preparing the order. These identification codes will be the same as the codes assigned in paragraph (e) of 504.7001–2.

(e) The eighth through the eleventh characters shall be the serial number of the order. Each contracting office shall maintain their own serial number. Alphanumeric numbers shall be used when more than 9999 numbers are required. Alphanumeric numbers shall be serially assigned with an alpha in the first position followed by the numeric serial number. The following sequences, excluding alpha I and O shall be used:

0001 through 9999,
A001 through A999,
And so on to Z001 through Z999.

(f) An example of a delivery order number is:



504.7001–4 Supplemental procurement instrument identification number.

Modifications to the basic contract instrument and to call/order against contracts shall be numbered by use of a four character alphanumeric number. The supplemental identification numbering system shall apply to all modifications to contracts and to call/orders against contracts.

(a) The first character shall be a capital letter identifying the office

issuing the modification, as indicated below:

A Contract administration office modification (Administrative Components), or
P Purchasing office modification.

(b) The second character shall be a capital letter identifying the type of instrument, as follows:

C Change order.
E Exercise of an option provision.
S Supplemental agreement (bilateral signatures).
T Termination action.
Z For a definitized letter contract, the letter Z shall be used only for that modification which represents the definitized contract.

(c) The third and fourth characters shall be the serial number. Alphanumeric numbers shall be used when more than 99 numbers are required. Alphanumeric numbers shall be serially assigned with an alpha in the first position followed by a numeric number. The following sequences, excluding alpha I and O, shall be used:

01 through 99, A1 through A9, and so on to Z1 through Z9.

(d) An example of the supplemental procurement instrument identification number is:

Positions		Example: A S 0 1
1	Identifying office A or P	
2	Type action	
3 and 4	The two-digit serial number	

504.7002 Procurement contract register.

GSA Form 2728, Procurement Contract Register, or an automated register shall be used to ensure continuity and control of procurement instrument identification numbers.

PART 505—PUBLICIZING CONTRACT ACTIONS

Sec.
505.000 Scope of part.
505.001 Policy.

Subpart 505.1—Dissemination of Information

505.101 Methods of disseminating information.

Subpart 505.2—Synopses of Proposed Contracts

505.201 General.
505.202 Exceptions.
505.203 Time of synopsizing.
505.205 Special situations.
505.205-70 Synopses of special notices used in connection with market searches for competitive sources.
505.207 Preparation and transmittal of synopses.
505.270 Synopses of amendments to solicitations.

Subpart 505.3—Synopses of Contract Awards

505.301 General.
505.302 Preparation and transmittal of synopses of awards.

Subpart 505.5—Paid Advertisements

505.502 Authority.
505.504 Use of advertising agencies.

Authority: 40 U.S.C. 486(c).

505.000 Scope of part.

This part prescribes policies and procedures for publicizing contract opportunities and award information.

505.001 Policy.

In addition to the publicizing requirements of FAR 5.001, market searches for competitive sources shall be publicized when required by this Subpart for the purpose of enhancing competition and reducing the number of noncompetitive procurements.

Subpart 505.1—Dissemination of Information

505.101 Methods of disseminating information.

(a) The appropriate Business Service Center shall be furnished a copy of solicitation documents (except solicitations for leases of real property) when the estimated contract amount is expected to exceed the small purchase limitation. The Business Service Centers shall display the solicitation documents so they are readily available and accessible for public examination.

(b) All proposed leases of real property for 10,000 or more square feet of space shall be publicized in newspapers and/or periodicals unless the contracting officer determines that such advertising will not serve to promote competition.

Subpart 505.2—Synopses of Proposed Contracts

505.201 General.

(a) In accordance with Section 8 of the Small Business Act, as amended by Pub. L. 98-72, all proposed competitive and noncompetitive procurement actions of $10,000 and above shall be publicized in the Commerce Business Daily (CBD) immediately after the necessity for the procurement is established. Exceptions to the publication requirement are outlined in 505.202.

(b) All synopsis messages (single or consolidated) for proposed procurements shall be forwarded to the appropriate Business Service Center (BSC). Procuring activities shall ensure that internal procedures for forwarding messages to BSC provide for maximum compliance with 505.203, Time of Synopsizing. Business Service Centers will arrange for prompt submission of information concerning proposed procurements for publication in the Commerce Business Daily. Submission to the Commerce Department shall be in accordance with FAR 5.207.

505.202 Exceptions.

(a) Synopsizing is not required when the contracting officer determines, in writing, on a case-by-case basis that:

(1) The procurement is of a classified nature where the information necessary to be included or referenced in the solicitation (invitation for bids or request for proposals) is in itself of a classified nature and the public disclosure of this information would violate security requirements. All other classified procurements shall be published in the Department of Commerce Synopsis if sufficient information of an unclassified nature can be provided in the solicitation to enable a prospective contractor to submit a bid or proposal.

(2) The need for the property, supplies, or services is of such an unusual and compelling urgency that the Government would be seriously injured if the time periods set forth in 505.203 were complied with;

(3) A foreign government reimburses GSA the cost of the procurement of the property, supplies, or services for such government and only one source is available, or the terms of an international agreement or treaty between the United States and a foreign government authorize or require that all such procurement shall be from sources specified within such international agreement or treaty;

(4) The procurement is made from another Government agency, or a mandatory source of supply;

(5) The procurement is for utility services and only one source is available;

(6) The procurement is made against an order placed under a requirements or similar contract, including orders for perishable subsistence supplies. (This exemption may be used in cases where an order is placed against an existing contract except for non-mandatory schedule contracts for automatic data processing equipment).

(7) The procurement results from acceptance of a proposal pursuant to the Small Business Innovation Development Act of 1982 (Pub. L. 97–219), or an unsolicited proposal that demonstrates a unique or innovative research concept and publication of such unsolicited proposal would improperly disclose the originallity of thought or innovativeness of the proposed research.

(b) Synopsizing is not required when the Administrator determines, with the concurrences of the Administrator of the Small Business Administration, that advance notice is not appropriate or reasonable. (These determinations may cover classes of cases.)

(c) The Administrator has determined in accordance with exception (10) of 15 U.S.C. 637(e), that advance publicity in the Commerce Business Daily for the acquisition of space by a lease of real property (except when lease construction is required) is not appropriate or reasonable. The Administrator of the Small Business Administration has concurred in this determination. Therefore, a requirement for the acquisition of space by a lease for real property, except when lease construction is required, need not be synopsized in the Commerce Business Daily. However, all lease awards over $25,000 are subject to the post award synopsizing requirements in 505.302.

505.203 Time of synopsizing.

Whenever a proposed procurement is required to be synopsized under 505.201, contracting officers shall proceed as follows:

(a) A proper notice of the procurement action shall be published in the Commerce Business Daily (CBD) at least 15 days before issuance of a solicitation, except when the solicitation is for procurement of requirements categorized as research or development effort, in which case the CBD notice shall be published at least 30 days before a solicitation is issued.

(b) Allow at least 30 days response time from:

(1) the date of issuance of the solicitation,

(2) the date of a proper notice of intention to contract for architect-engineer services, or

(3) in the case of orders under a basic ordering agreement, or similar arrangement, the date of publication of a proper notice of intent to place the order.

(c) Contracting officer shall allow at least 30 days response time from the date of publication of a proper notice of intent to contract before commencing negotiations for the award of a sole-source contract. Nothing in this paragraph prohibits officers or employees of agencies from responding to requests for information.

505.205 Special situations.

505.205–70 Synopses of special notices used in connection with market searches for competitives sources.

(a) *General.* The term "sources-sought synopsis" means the type of Commerce Business Daily (CBD) notice designed to identify potential sources for procurements. The sources-sought synopsis provides an opportunity for the marketplace to indicate its interest in submitting bids, offers proposals, or quotations for future procurement. It is normally used to discover if more than one firm is interested and qualified to provide a particular product or service, although a solicitation is not yet available. This type of synopsis has particular application when one contractor is thought to be uniquely capable of meeting the Goverment's minimum requirements and verification of this opinion is needed.

(b) *Property and services.* Sources-sought notices publicizing the Government's interest in anticipated property or service procurements may be published in the CBD, using the general format outlined in 505.207, except where security considerations prohibit such publication. A sources-sought synopsis may be published in connection with market searches for sources of property or services, other than those discussed in FAR 5.205, when a sources-sought synopsis is required to test the marketplace for competitive sources. If one or more potential contractors are identified as a result of such a market search, they shall be solicited. In conjunction with that solicitation, the specific procurement of the property or service shall be publicized in the CBD as required by 505.201 unless: (1) One of the exceptions stated in 505.202 is applicable, or (2) a sources-sought synopsis had been published in the CBD, and such notice was sufficiently specific to permit potential sources to identify an interest in the forthcoming procurement, and was provided for them to request solicitations for the procurement.

505.207 Preparation and transmittal of synopses.

(a) Normally, synopsis messages shall be prepared on informal letterhead stationery and mailed to the Commerce Business Daily. However, when time is of the essence synopsis messages may be prepared on a Standard Form 14, Telegraphic Message and transmitted electronically via teletype.

(b) Texts of synopsis messages shall be prepared as prescribed in FAR 5.207, except that the name and address of the contracting office (see FAR 5.207) shall be construed to mean the appropriate BSC.

(c) Notices described in 505.205–70 as sources-sought snyopses shall be headed, "Property Sources Sought" or "Service Sources Sought." This shall be followed by a statement similar to the following (modifications may be made to suit agency needs):

Concerns having the ability to furnish the following property (services) are requested to give written notification (including the telephone number for a point of contact) to the procuring office listed in this notice within —— calendar days (no less than 30 days should be entered) from the date of this synopsis:

(Describe the requirement so as to furnish a complete property (service) description, and a condensation of other essential information, to provide concerns with an intelligible basis for judging whether they have an interest in the procurement. Such information may include a statement regarding the Government's belief that the property or service may be available only from a sole source and the reasons for such belief.)

This is not a formal solicitation. However, concerns that respond should furnish detailed data concerning their capabilities and may request to receive a copy of the solicitation when it becomes available. This notice may represent the only official notice of such a solicitation.

505.270 Synopses of amendments to solicitations.

All amendments to solicitations for offers shall be published in the Commerce Business Daily when the amendment increases the anticipated dollar amount of the contract above the dollar threshold requiring synopsis of the proposed procurement or the amendment alters the scope of the proposed contract in a manner which would generate the interest of contractors who may not have had an interest in the procurement as originally synopsized.

Subpart 505.3—Synopses of Contract Awards

505.301 General.

A notice announcing awards of all unclassified contracts exceeding $25,000 shall be published in the Commerce Business Daily. The publicizing of smaller dollar awards is not prohibited when it would be advantageous to industry or the Government.

505.302 Preparation and transmittal of synopses of awards.

The provisions of 505.201 and 505.207 regarding preaward synopses messages are equally applicable to contract award synopses messages, except that the text shall be prepared as prescribed in FAR 5.302.

Subpart 505.5—Paid Advertisements

505.502 Authority.

(a) *Newspapers.* The head of the contracting activity or his/her designee may approve the publication of paid advertisements in newspapers. Written approval is required for paid newspaper advertisements, except, when such publication is required by FAR or GSAR (see 505.101(b)). The contracting officer shall document the case file with the regulatory citation or written approval to support the use of paid newspaper advertisements.

(b) *Other media.* Advance approval is not required to place paid advertisements in media other than newspapers.

505.504 Use of advertising agencies.

It is the policy of GSA to make use of the services of commercial advertising agencies whenever it is determined that the services rendered by such agencies can increase competition for GSA contracts and improve the effectiveness of GSA advertising and marketing programs.

SUBCHAPTER B—ACQUISITION PLANNING

PART 507—ACQUISITION PLANNING

Subpart 507.3—Contractor Versus Government Performance

507.305 Solicitation provisions and contract clauses.

The contracting officer shall insert the clause to 552.207–70, Report of Employment Under Commercial Activities, in solicitations issued for the purpose of making a cost comparison covering work currently being performed by the Government and in contracts that result from the solicitations.

(40 U.S.C. 486(c))

PART 508—REQUIRED SOURCES OF SUPPLIES AND SERVICES

Sec.

508.002 Use of other Government supply sources.
508.002–70 Department of Defense contracts.
508.002–71 District of Columbia Government—Department of Corrections.
508.002–72 District of Columbia Government indefinite delivery contracts.

Subpart 508.6—Acquisition From Federal Prison Industries, Inc.

508.604 Ordering procedures.
508.604–70 Delinquent delivery orders.
508.605 Clearances.
508.605–70 Federal Prison Industries clearance numbers.

Subpart 508.7—Acquisition From the Blind and Other Severely Handicapped

508.705 Procedures.
508.705–70 Adding items to the procurement list.
508.705–71 Workshop performance capability.
508.705–72 Allocations and orders.
508.705–73 Delinquent delivery orders.
508.706 Purchase exceptions.
508.706–70 Citations of purchase exception number.

Subpart 508.8—Acquisition of Printing and Related Supplies

508.870 Government Printing Office (GPO).

Authority: 40 U.S.C. 486(c).

508.002 Use of other Government supply source.

508.002–70 Department of Defense contracts.

The Defense Logistics Agency, Defense Fuel Supply Center, Cameron Station, Alexandria, VA 22314, and the Defense General Supply Center, Richmond, VA 22319, prepare annual contracts for lubricating oils, greases, gear lubricants, packaged petroleum products, gasoline, fuel oil (diesel and burner), kerosene, solvents, and coal. Electronic items are available from the Defense Electronic Supply Center, Dayton, OH 45444. Except as otherwise provided by FPMR 41 CFR 101–26.602 of the FPMR, the supply sources listed below are mandatory.

(a) Lubricating oils, greases, and gear lubricants. See FPMR 41 CFR 101–26.602–1.

(b) Packaged petroleum products. See FPMR 41 CFR 101–26.602–2.

(c) Gasoline, fuel oil (diesel and burner), kerosene, and solvents. See FPMR 41 CFR 101–26.602–3.

(d) Coal. See FPMR 41 CFR 101–26.602–4.

(e) Electronic items. See FPMR 41 CFR 101–26.603.

508.002–71 District of Columbia Government—Department of Corrections.

(a) The District of Columbia is authorized, under Pub. L. 88–622, to sell industrial products and services to Federal agencies. A listing of the commercial products and services is available from:

DISTRICT OF COLUMBIA
DEPARTMENT OF CORRECTIONS
INDUSTRIES DIVISION
LORTON, VA 22079

Except as otherwise provided in paragraphs (b) and (c) of this 508.002–71, these supplies and services may be procured on an optional basis.

(b) Laundry services for Federal agencies in the Washington, DC, metropolitan area should be obtained from the Department of Corrections except when the department approves procurement from another source.

(c) Official U.S. Government tags for use on motor vehicles shall be acquired under FPMR 41 CFR 101–38.3.

508.002–72 District of Columbia Government indefinite delivery contracts.

The District of Columbia places indefinite delivery contracts for sand, gravel, premixed concrete, Portland cement, slag and slag screenings, and road salt that may be used as needed in the Washington, DC, area. Details of these contracts may be obtained from the Purchasing Officer, DC Government, 613 G St. NW, Room 1002, Washington, DC 20001.

Subpart 508.6—Acquisition From Federal Prison Industries, Inc.

508.604 Ordering procedures.

508.604–70 Delinquent delivery orders.

(a) Contracting officers shall establish delivery schedules based on the leadtime required by Federal Prison Industries (FPI) to prevent avoidable delinquent orders.

(b) Should delivery orders become delinquent, the contracting officer shall monitor progress until all deliveries are complete.

(c) Contracting officers' efforts to negotiate an adjustment to the delivery schedule shall not include a request for price adjustment.

(d) Delinquent orders may indicate the need to request clearance to procure from other sources until FPI can make deliveries on time.

(e) If FPI cannot furnish the supplies on time, and the items can be obtained from commercial sources in much less time than from FPI, clearance for buying them from another source shall be obtained under FAR 8.605.

508.605 Clearances.

508.605-70 Federal Prison Industries clearance numbers.

When FPI items are bought from a source other than FPI, permission to make the purchase shall be obtained from FPI in the form of a clearance number. This number shall be cited in the solicitation for offers and all subsequent award documents.

Subpart 508.7—Acquisition From the Blind and Other Severely Handicapped

508.705 Procedures.

508.705 Adding items to the procurement list.

(a) When a central non-profit agency (CNA) expresses an interest in a particular commodity or service being added to the procurement list, the contracting officer shall provide the CNA with the most recent solicitations issued for the supply or service involved and the price(s) at which the item was awarded.

(b) The Committee for Purchase from the Blind and Other Severely Handicapped (The Committee), if requested by the CNA, may assign the supply or service to the CNA for development by a workshop and will list the item in the Committee Assignment Register. A copy of the register, updated monthly, is maintained by the Office of Small and Disadvantaged Business Utilization (AU).

(c) Prior to issuing a solicitation, contracting officers shall request from the CNA, the status of any item previously identified as one in which the Committee has expressed interest.

(d) The Committee may request that a procurement be delayed pending Committee action. The contracting activity shall consult with AU prior to rejecting such a request.

508.705-71 Workshop performance capability.

In addition to the annual requirement, the purchase document shall include an estimated monthly requirement. The contracting officer may verify the workshop's ability to satisfy the Government's anticipated requirement by requesting a preaward survey. If it is determined that the Government's estimated monthly requirement exceeds the workshop's ability to perform, a purchase exception may be requested only for those quantities which cannot be provided in a timely manner by the workshop.

508.705-72 Allocations and orders.

In addition to the requirements set forth in FAR 8.706, requests for allocations and orders shall indicate the packaging, packing, or marking required if it differs from the specification cited, or otherwise provided in the Procurement List. Pricing of nonstandard requirements is covered in FAR 8.707.

508.705-73 Delinquent delivery orders.

(a) Contracting officers shall take appropriate action on delinquent delivery orders until all deliveries are made. Procedures shall follow FAR 8.705 and the regulations of the Committee for Purchase from the Blind and Other Severely Handicapped (see 41 CFR 51-5.2 and 51-5.7).

(1) Contracting officers' efforts to negotiate an adjustment to the delivery schedule shall not include a request for price adjustment.

(2) Records of delinquent delivery orders shall be maintained whether or not the delivery schedule is adjusted.

(b) If the CNA delays acting on the request or refuses to grant a purchase exception, the matter shall be referred through the contracting director, to the head of the contracting activity for expeditious resolution of the problem with the Committee.

508.706 Purchase exceptions.

508.706-70 Citation of purchase exception number.

Purchases from commercial sources under FAR 8.706 shall cite the purchase exception number issued by the CNA in the solicitation for offers and all later award documents.

Subpart 508.8—Acquisition of Printing and Related Supplies

508.870 Government Printing Office (GPO).

Procurement of items for use within the District of Columbia which are listed in the GPO Catalog and Price List shall be from GPO. Procurement of these items from commercial sources is prohibited unless a waiver is granted by the Public Printer through the Printing and Distribution Branch, National Capital Region, authorizing such purchases. When so authorized, the GPO waiver number shall be shown in the contract and/or purchase order. Acquisition from GPO of such items for use outside the District of Columbia is not mandatory. See FPMR 41 CFR 101-26.703 regarding marginally punched continuous forms.

PART 509—CONTRACTOR QUALIFICATIONS

Subpart 509.1—Responsible Prospective Contractors

Sec.
509.104 Standards.
509.104-4 Subcontractor responsibility.
509.105 Procedures.
509.105-1 Obtaining information.
509.105-3 Disclosure of preaward information.
509.105-70 Contractor certification of responsibility.
509.106 Preawards surveys.
509.106-1 Conditions for preaward surveys.
509.106-70 Disagreement with preaward survey recommendations.

Subpart 509.2—Qualified Products

509.206 Acquiring qualified products.
509.206-2 Solicitation provisions and contract clauses.
509.270 Waiver of qualification requirement.

Subpart 509.4—Debarment, Suspension, and Ineligibility

509.400 Scope of subpart.
509.403 Definitions.
509.404 Consolidated List of Debarred, Suspended, and Ineligible Contractors.
509.404-70 Agency records.
509.405 Effect of listing.
509.405-1 Continuation of current contracts.
509.406 Debarment.
509.406-3 Procedures.
509.407 Suspension.
509.407-3 Procedures.

Authority: 40 U.S.C. 486(c).

Subpart 509.1—Responsible Prospective Contractors

509.104 Standards.

509.104-4 Subcontractor responsibility.

(a) Before authorizing a contractor to change a designated source of supply or any designated inspection or production point, the contracting officer shall determine that such change will not be detrimental to the ability of the contractor to fulfill his obligations under the terms of the contract.

(b) In making an evaluation of the requested change, contracting officers shall exercise precautions with regard to new sources similar to those taken in determining the acceptability of the initial supply source. If the contracting officer approves a change of supply source, inspection point, or production point, he/she shall issue an appropriate contract modification specifying the nature of the change and the effective date. Where feasible, the modification shall provide that delivery orders placed prior to the effective date, will remain in effect as written. In determining the effective date, contracting officers shall take into consideration the time

necessary for offices concerned to take required actions thereunder.

(c) The contracting officer shall insert the clause at 552.209–70, Subcontractor Eligibility, in solicitations and contracts when a construction contract, or a contract for dismantling, demolition or removal of improvements is contemplated and the contract amount is expected to exceed the small purchase limitation.

509.105 Procedures.

509.105–1 Obtaining information.

(a) The GSA Form 527, Contractor's Qualifications and Financial Information, may be used to obtain information regarding prospective contractors financial capability.

(b) Advice and assistance should be obtained from all appropriate activities, including legal counsel, quality control, and finance, in arriving at a determination that an offeror qualifies as responsible under the standards set forth in FAR 9.105.

(c) Preaward surveys shall be conducted in accordance with FAR 9.105 and 9.106 and this subpart. The contracting officer or his/her designee shall forward a preaward survey request to the surveying activity(ies) using Standard Form 1403, Preaward Survey of Prospective Contractor (General), accompanied by the appropriate subparts of the preaward survey (Standard Forms 1404 through 1408).

(d) For the purposes of this subpart, the "auditor" in FAR 9.105–1(b)(2)(ii) is the Assistant Inspector General for Audits in the Central Office and the Regional Inspector General for Audits in the regions except for the evalation of a prospective contractor's financial competence and credit needs, for which it is the Chief, Credit and Finance Branch, Region 2.

509.105–3 Disclosure of preaward information.

When an offer is rejected because of a determination by the contracting officer that the prospective contractor is not responsible, the contracting officer shall notify the prospective contractor by letter, setting forth the basis for the rejection. This will provide the offeror with the opportunity, where applicable, to cure the factors that lead to the nonresponsibility determination.

509.105–70 Contractor certification of responsibility.

(a) The contracting officer shall insert the certification provision at 552.209–71, Certification Regarding Previous Crimes, Debarments, Suspensions, and Defaults, in solicitations when the resulting contract is expected to exceed the small purchase limitation.

(b) When an offeror's certification indicates an indictment for or conviction of a specified offense, debarment or suspension, or default of a contract, the contracting officer shall:

(1) Request such additional information from the low, responsive offeror as the contracting officer deems necessary in order to make a determination of the offeror's responsibility, and

(2) Notify the Office of Inspector General (OIG) in the case of a criminal indictment or conviction.

(c) Information furnished by offerors shall be used by contracting officers:

(1) When making the determination of an offeror's responsibility, and

(2) When deciding in accordance with 509.4, whether debarment or suspension action should be recommended.

(d) Offerors who do not furnish the certification shall be given an opportunity to remedy the deficiency. Failure to furnish the certification by time of contract award renders the offeror nonresponsible.

(e) The contract clause at 552.209–72, Termination—Erroneous Representation Concerning Crimes, Debarments, Suspensions, and Defaults, shall be included in solicitations and contracts when the contract amount is expected to exceed the small purchase limitation.

509.106 Preaward surveys.

509.106–1 Conditions for preaward surveys.

(a) The contracting officer, in evaluating whether to initiate a preaward survey, shall consider:

(1) The experience and past performance record of the offeror and the dollar value of the procurement;

(2) The extent and currency of previous preaward surveys;

(3) Whether a bid guarantee is submitted and the type of guarantee submitted (i.e., corporate surety, individual surety, letter of credit);

(4) Information as to the offeror's prior performance; and

(5) The adequacy of financial information submitted by the offeror (i.e., certified balance sheets and income statements, audited annual reports). Should a financial analysis be determined necessary, it should include a credit report to identify delinquent debts, especially those owed to the Federal Government.

(b) The preaward survey may be limited in scope pursuant to FAR 9.106–2(e) to those aspects of the responsibility determination for which the contracting officer is lacking information.

(c) Notwithstanding the other provisions of this subpart, the contracting officer shall obtain a preaward survey, consistent with FAR 9.106–1(a) and 509.106–1(a) of this chapter, when the contracting officer has doubts as to the offeror's responsibility.

509.106–70 Disagreement with preaward survey recommendation.

When the contracting officer does not concur with the preaward survey recommendation, the contract file shall be documented as to the basis of the determination of contractor responsibility. The concurrence of the head of the contracting activity shall be obtained prior to award of a contract to a firm which reveived an unfavorable preaward survey. If the contracting officer finds a small business non-responsible, the certificate of competency procedures in FAR Subpart 19.6 shall be used. The activity that prepared the preaward survey shall be furnished with a copy of the contracting officer's justification for overriding the preaward survey recommendation.

Subpart 509.2—Qualified Products

509.206 Acquiring qualified products.

509.206–2 Solicitation provisions and contract clauses.

The contracting officer shall insert one of the clauses at 552.209–73, Product Removal from Qualified Products List, in solicitations and contracts, when appropriate. These clauses supplement the clause at FAR 52.209–2.

509.270 Waiver of qualification requirement.

(a) When a contracting activity has a requirement for a product to be procured under a specification which includes a qualification requirement and the contracting officer has evidence to support a conclusion that it is likely that a solicitation for a Qualified Products List (QPL) product would not produce acceptable offers or adequate competition, a request for a waiver from the qualification requirement of the specification shall be submitted by the contracting director to the Director, Commodity Management Division (FCM). The reasons why the waiver is being requested shall be stated in the request.

(b) If a waiver is granted, it shall be stated in the solicitation that the qualification requirement of the specification does not apply. Unless a notification of waiver states otherwise,

each waiver granted shall apply only to the specific procurement for which the waiver was requested, and shall not be construed as authorizing a waiver with respect to any other procurement.

Subpart 509.4—Debarment, Suspension, and Ineligibility

509.400 Scope of subpart.

This subpart implements and supplements FAR Subpart 9.4 with respect to the debarment and suspension of contractors and the maintenance, distribution, and use of a consolidated list of debarred, suspended, and ineligible contractors. The subpart is applicable to all elements of GSA with respect to the procurement of personal property and nonpersonal services, including construction and leases of real property.

509.403 Definitions.

In addition to the definitions set forth in FAR 9.403, the following terms have special meaning as indicated:

(a) The "debarring official" and the "suspending official" for GSA is the Assistant Administrator for Acquisition Policy. The authority to act in these capacities may be delegated to his/her deputy.

(b) "Notice" means a written communication sent by certified mail, return receipt requested, to the last known address of a party, its identified counsel, or agent for service of process. In the case of a business, such notice may be sent to any partner, principal officer, director, owner or co-owner, or joint venturer. If no return receipt is received within 10 calendar days of mailing, receipt shall then be presumed.

(c) The "fact-finding official" for GSA is the Chairman of the General Services Administration Suspension and Debarment Board within the GSA Board of Contract Appeals or his/her designee(s).

509.404 Consolidated List of Debarred, Suspended, and Ineligible Contractors.

(a) The debarring and suspending official shall be responsible for the compilation, maintenance, revision, and distribution of the Consolidated List, including distribution to GSA contracting activities.

(b) Heads of contracting activities and other interested officials shall notify the debarring and suspending official of their distribution needs and shall ensure that the list is used effectively by agency contracting officers.

509.404–70 Agency records.

The debarring and suspending official shall maintain records containing the information required by FAR 9.404, in accordance with agency practies.

509.405 Effect of listing.

509.405–1 Continuation of current contracts.

(a) Notwithstanding the debarment or suspension of a contractor, contracting officers may continue contracts or subcontracts in existence at the time of the debarment or suspension. However, termination of current contracts should be considered under the circumstances set forth in (b), (c), and (d) below.

(b) Termination for default under a contract's "Default" clause is appropriate where the circumstances giving rise to the debarment or suspension also constitites a default in the contractor's performance of the contract. Debarment or suspension of the contractor for reasons unrelated to the performance of the contract will not support a termination for default.

(c) Termination for convenience or cancellation under appropriate contract provisions should be considered where the contractor presents a significant risk to the Government in completing a current contract and such action is determined to be in the Government's best interest. In making this determination the contracting officer should consider such factors as the:

(1) Seriousness of the cause of debarment or suspension;

(2) Extent of contract performance;

(3) Potential costs of termination and reprocurement;

(4) Urgency of the requirement and the impact of the delay of reprocurement;

(5) Availability of other safeguards to protect the Government's interest until completion of the contract.

(d) A decision to terminate an existing contract with a debarred or suspended contractor under a "Termination for Convenience" or "Cancellation" clause must be concurred in by assigned legal counsel and approved at a level above the contracting officer.

§ 509.406 Debarment.

§ 509.406–3 Procedures.

(a) *Investigation and referral.* (1) Any constituent element of GSA that becomes aware of circumstances which may serve as the basis for a debarment shall refer those circumstances to the debarring official through appropriate channels for consideration of debarment action. However, circumstances that involve possible criminal or fraudulent activities shall first be reported to the Office of the Inspector General (OIG), for investigative consideration in accordance with GSA Standards of Conduct (ADM 7900.9) 41 CFR 105.735–216, Reporting Suspected irregularities. If appropriate, the Office of Inspector General shall make a referral to the debarring official.

(2) Referrals for consideration of debarment action at a minimum should include:

(i) The cause for debarment (see FAR 9.406);

(ii) A statement of facts;

(iii) Copies of supporting documentary evidence and a list of all necessary or probable witnesses, including addresses and telephone numbers, together with a statement concerning their availability to appear at a fact finding proceeding and the subject matter of their testimony;

(iv) A list of all contractors involved, either as principals or as affiliates (including current or last known home and business addresses and zip codes);

(v) A statement of GSA's procurement history with such contractors, including any recent experience under a GSA contract;

(vi) A statement concerning any known pertinent active or potential criminal investigation, criminal or civil court proceeding, or administrative claim before Boards of Contract Appeals; and

(vii) A statement from the cognizant contracting activity as to the impact of the debarment action on GSA programs for debarment referrals not transmitted by the Inspector General.

(3) Referrals may be returned to the originator for further information, investigation, or development.

(b) *Notice of proposal to debar.* (1) Upon receipt of a completed referral, the debarring official shall decide whether to initiate debarment action, after coordinating the matter with assigned legal counsel.

(2) Where a determination is made to initiate action, affected contractors and any specifically named affiliates shall be given written notice of the information required by FAR 9.406–3 and contained in 509.406–3.

(3) A copy of the notice shall be given to affected agency components.

(4) Where a determination is made not to initiate action, notice shall be given to the agency official who made the referral.

(c) *Decision-making process.* (1) Contractors shall be given an opportunity to submit, in person, in writing, or through a representative, information and arguments in opposition to a proposed debarment. However, if a response to the debarment notice is not received by the debarring official within 30 calendar days of receipt of the notice, the debarment shall become final.

(2) If, in response to the debarment notice, the contractor, or a representative, desires to present information and arguments in person to the debarring official, an oral presentation will be held within 20 calendar days of receipt of the request, unless a longer period of time is requested by the contractor. The oral presentation shall be informally conducted and a transcript need not be made. The contractor may, however, supplement the oral presentation with written information and arguments for inclusion in the administrative record.

(3) In actions not based upon a conviction or civil judgment and where the contractor disputes facts relating to the proposed debarment, the contractor may also request, and shall be entitled to, a hearing before the agency fact-finding official. The hearing will be conducted within 20 calendar days of receipt of the contractor's response, unless a longer period of time is requested by the contractor.

(4) The purpose of a hearing is to: (i) Afford the affected contractor the opportunity to dispute facts relating to the proposed debarment through the submission of oral and written evidence; (ii) provide the debarring official with findings of fact based on a preponderance of evidence; and (iii) provide the debarring official with a determination as to whether a cause for debarment exists, based on the facts as found.

(5) Hearings will be conducted by the fact-finding official in accordance with rules promulgated by that official. The rules shall be as informal as is practicable, consistent with principles of fundamental fairness and FAR 9.4 and 509.4; they shall provide an opportunity for the affected contractor to appear with counsel, submit documentary evidence, present witnesses, and cross-examine any witness GSA presents. The fact-finding official shall make a transcribed record of the hearing and make it available at cost to the affected contractor upon request, unless the contractor and GSA, by mutual agreement, waive the requirement for a transcript.

(6) The hearing shall be initiated by a formal written transfer of the matter by the debarring official to the fact-finding official.

(7) Upon receipt of such a transfer, the fact-finding official shall notify the affected contractor, schedule a hearing date, and provide the contractor an opportunity to present written evidence and oral testimony and to cross examine opposing witnesses. The fact-finding official shall deliver written findings to the debarring official (together with a transcription of the proceeding, if made) within 10 calendar days after the hearing. The findings shall resolve any facts in dispute based on a preponderance of the evidence presented and determine whether a cause for debarment exists.

(d) *Debarring official's decision.* The debarring official's final decision shall be made in writing in accordance with FAR 9.406–3 and notice of the decision will be given in accordance with FAR 9.406–3. A copy of the notice shall be given to affected agency components.

509.407 Suspension.

509.407–3 Procedures.

(a) The provisions of 509.406–3(a) apply to investigations and referrals for suspensions as if for debarments.

(b) *Notice of suspension.* (1) Upon receipt of a completed referral, the suspending official shall decide whether to suspend, after coordinating the matter with assigned legal counsel.

(2) In cases not based on an indictment the suspending official shall, in appropriate cases, obtain through OIG the written advice of the Department of Justice or state prosecutorial authority as to whether substantial interests of the Federal or state government in pending or contemplated legal proceedings based on the same facts as the suspension would be prejudiced by the conduct of a hearing before the agency fact-finding official. If, on the basis of advice received, the suspending official determines that substantial interests of the Federal or a state government would be impaired he/she shall so advise the contractor in the notice.

(3) Notice shall be furnished as provided in 509.407–3 except that the notice to the contractor shall contain the information required by FAR 9.407–3 and contained in 509.407–3.

(c) *Decision-making process.* (1) Contractors shall be given an opportunity to submit, in person, in writing, or through a representative, information and arguments in opposition to a suspension. However, to be considered, a response must be received by the suspending official within 30 calendar days of receipt of the suspension notice.

(2) When requested, an oral presentation before the suspending official shall be conducted as outlined in 509.406–3.

(3) In actions not based on an indictment or a suspension by another agency, and where the contractor disputes facts relating to the suspension, the contractor may also request, and shall be entitled to, a hearing before the agency fact-finding official, unless a determination has been made that substantial interests of the Government would be prejudiced by a hearing. The hearing will be conducted within 20 calendar days of receipt of the contractor's response, unless a longer period of time is requested by the contractor.

(4) The purpose of a hearing is to: (i) Afford the affected contractor the opportunity to dispute facts relating to the suspension action through the submission of oral and written evidence, and (ii) provide the suspending official with a determination as to whether adequate evidence exists to support the cause for suspension. Hearings shall be conducted as outlined in 509.406–3.

(d) The suspending official's decision shall be made in writing and notice shall be given in accordance with FAR 9.406.

PART 510—SPECIFICATIONS, STANDARDS, AND OTHER PURCHASE DESCRIPTIONS

Sec.

510.001 Definitions.
510.004 Selecting specifications or descriptions for use.
510.004–70 Brand name products or equal.
510.004–71 Limitations on the use of brand name or equal pruchase descriptions.
510.004–72 Solicitations, brand name or equal descriptions.
510.004–73 Offer evaluation and award, brand name or equal descriptions.
510.007 Deviations.
510.007–70 Responsibilities of the contracting officer.
510.007–71 Notice of determination.
510.011 Solicitation provisions and contracts clauses.
510.070 Specifications.
510.070–1 Exceptions to mandatory use of Federal specifications.
510.070–2 Optional use of interim Federal specifications.
510.070–3 Use of Federal of interim Federal specifications and standards.
510.070–4 Other than Federal and interim Federal specifications.
510.007–5 Deviations from GSA stock or Federal supply schedules.
510.071 Standards.

Authority: 40 U.S.C. 486(c).

510.001 Definitions.

"Specification Manager" means an official (within the Office of Federal Supply and Services for Federal or Interim Federal Specifications or the program office for other than Federal specifications) responsible for reviewing a contracting officer's referral of a request for deviation from a specification.

510.004 Selecting specifications or descriptions for use.

510.004–70 Brand name products or equal.

(a) *Citing brand name products.* Brand name or equal purchase descriptions shall cite all brand name products known to be acceptable and of current manufacture. If the use of a brand name or equal purchase description results in the purchase of an acceptable brand name product which was not listed as an "equal" product, a reference to that brand name product should be included in the purchase description for later procurements. If a brand name product is no longer applicable, the reference thereto shall be deleted from the purchase description. Information on additions and deletions shall be immediately communicated to the specification manager.

(b) *Specifying essential characteristics.* (1) It is imperative that brand name or equal purchase descriptions specify each physical or functional characteristic of the product that is essential to the intended use. Failure to do so may result in a defective solicitation and the necessity to readvertise the requirements. (See 510.004–73.) Care must be taken to avoid specifying characteristics that cannot be shown to materially affect the intended end use and which unnecessarily restrict competition.

(2) When describing essential characteristics, permissible tolerances should be indicated. Avoid specifying a characteristic (e.g., a specific dimension) of a brand name product unless it is essential to the Government's need. The contracting officer must be able to justify the requirement.

510.004–71 Limits on the use of brand name or equal purchase descriptions.

(a) *General.* The use of brand name or equal purchase descriptions in solicitations is intended to promote competition by encouraging the offering of products that are equal in all material respects to brand name products cited in such descriptions. Identification by brand name does not indicate a preference for the products mentioned but indicates the quality and characteristics of products that will meet the Government's needs. Where a component of an item is described in the solicitation by a brand name or equal purchase description and the contracting officer determines that application of the clause at 552.210–74 would be impracticable, the requirement to include the entry described in 510.004–72(a), shall not apply. If the clause is included in the solicitation for other reasons, there also shall be included in the solicitation a statement to identify either the component parts (described by brand name or equal descriptions) to which the clause applies or those to which it does not apply. This also applies to accessories related to an end item where a brand name or equal purchase description of the accessories is a part of the description of an end item. Brand name or equal descriptions shall not be used to procure a particular product under the guise of competitive procurement to the exclusion of other products that would meet the actual needs.

(b) In small purchases within the open market limitations, brand name policies and procedures shall be applicable to the extent practical.

(c) *Approval required.* A brand name or equal purchase description shall not be used unless it has been approved by the contracting director.

510.004–72 Solicitations, brand name or equal descriptions.

(a) An entry substantially as follows shall be prominently inserted in the item listing after each item or component part of an end item to which a brand name or equal purchase description applies.

Bidding on:
Manufacturer's Name————————.
Brand————————.
No.————————.

(b) Because offerors frequently overlook the requirements of the clause at 552.210–74, Brand Name or Equal, the following note shall be inserted in the item listing after each brand name or equal item (or component part), or at the bottom of each page listing several such items, or in a manner that may otherwise direct the offeror's attention to this clause:

OFFERORS OFFERING OTHER THAN BRAND NAME ITEMS IDENTIFIED HEREIN SHOULD FURNISH WITH THEIR OFFERS ADEQUATE INFORMATION TO ENSURE THAT A DETERMINATION CAN BE MADE AS TO EQUALITY OF THE PRODUCT(S) OFFERED (SEE THE CLAUSE ENTITLED BRAND NAME OR EQUAL SET FORTH IN SECTION 552.210–74 OF THE GSA ACQUISITION REGULATION.)

(c) If offer samples are requested for brand name or equal procurements the above notice shall not be included in the solicitation.

510.004–73 Offer evaluation and award, brand name or equal descriptions.

An offer may not be rejected for failure of the offered product to equal a characteristic of a brand name product if it was not specified in the brand name or equal description. However, if it is clearly established that the unspecified characteristic is essential to the intended end use, the solicitation is defective and no award may be made. In such cases, the contracting officer should readvertise the requirements, using a purchase description that sets forth the essential characteristics.

510.007 Deviations.

The head of the contracting activity shall ensure that the requirements of FAR 10.007 and this subpart are complied with.

510.007–70 Responsibilities of the contracting officer.

(a) The procuring contracting officer shall obtain the concurrence of the specification manager in the Office of Federal Supply and Services (FSS) to deviate from a Federal specification before it is used in a solicitation, amendment, or contract modification. Prior to requesting a deviation, the contracting officer shall reject any deviation request that is similar to a deviation which formed the basis for the rejection of an otherwise low bid under the solicitation. The contracting officer shall consider the following factors prior to forwarding a deviation request for evaluation:

(1) The impact that it might have on the ability of other offerors to furnish the item.

(2) The impact that it might have on future solicitations to be issued by the procuring contracting officer (PCO).

(3) Whether the item is the subject of a protest, is under litigation, or is sensitive or controversial.

(4) The timeliness of the deviation request.

(5) The urgency of the requirement.

(6) Alternatives available to the Government other than accepting nonconforming supplies, (e.g., extending due dates upon receipt of adequate consideration, terminating the contract and reprocuring).

(b) A contracting officer's request to deviate from a Federal specification shall include the following information:

(1) A statement describing the deviation.

(2) A justification.

(3) A recommendation for revising or amending the specification, if appropriate.

(4) The effect of the deviation on the form, fit, or function of the contract item, if known.

(5) The contractor's written submission advising the Government of the cost savings that would accrue to the contractor and to the Government if the request is granted.

(c) The procuring contracting officer (PCO) is responsible for authorizing or rejecting the deviation request after obtaining appropriate input. The administrative contracting officer (ACO) may be delegated the responsibility of coordinating the review of the request and making a recommendation to the PCO. The PCO's determination shall be based upon the following:

(1) The specification manager's evaluation of the request, including:

(i) The effect granting the deviation would have on the form, fit or function of the item.

(ii) The adequacy of the proposed monetary consideration.

(iii) The contractor's cost savings accruing as a result of the deviation.

(2) A conclusion that granting the request is clearly advantageous to the Government.

(3) Whether conforming supplies can be obtained without jeopardizing the Government's supply position.

510.007-71 Notice of determination.

(a) The contracting officer submitting the request shall be promptly advised in writing by the ACO/specification manager as to the acceptability of the request.

(b) Any resultant amendment of the terms of solicitation shall be accomplished using Standard Form 30, Amendment of Solicitation/Modification of Contract, and shall be sent to all offerors.

(c) Any resultant modification of the terms of the contract shall be made by using SF 30, Amendment of Solicitation/Modification of Contract.

510.011 Solicitation provisions and contract clauses.

(a) The contracting officer shall insert the clause at 552.210-70, Standard References, in solicitations and contracts for construction services that:

(1) Cite documents or publications that are not furnished with the solicitation, or

(2) Incorporate documents or publications by reference.

(b) The contracting officer shall insert the clause at 552.210-71, Reference to Specifications in Drawings, in solicitations and contracts if Federal specifications which involve drawings are cited.

(c) The contracting officer shall insert the clause at 552.210-72, Acceptable Age of Shelf-Life Items, in solicitations and contracts when contractors are required to furnish shelf-life items within a specified time from the date of manufacture or production of the supplies to the time supplies are offered for inspection in accordance with 41 CFR 101-27.206-2 of the Federal Property Management Regulation.

(d) The contracting officer shall insert the clause at 552.210-73, Age on Delivery, in solicitations and contracts when contractors are required to furnish shelf-life items within a specified time from the date of manufacture or production of the supplies to the time of shipment or delivery in accordance with 41 CFR 101-27.206-2 of the Federal Property Management Regulation.

(e) The contracting officer shall include the provision at 552.210-74, Brand Name or Equal, in solicitations for which a brand name or equal purchase is used.

(f) The contracting officer shall include the clause at 552.210-75, Marking, in solicitations and contracts for supplies when the contract amount is expected to exceed the small purchase limitation.

(g) The contracting officers shall insert the clause at 552.210-76, Charges for Marking, in solicitations and contracts that include the clause in 552.210-75 or a similar clause.

(h) The contracting officer shall include the clause at 552.210-77, Preservation, Packaging and Packing, in solicitations and contracts for supplies when the contract amount is expected to exceed the small purchase limitation. The contracting officer may include the clause in contracts awarded through small purchase procedures when appropriate.

(i) The contracting officer shall insert a clause substantially the same as the clause at 552.210-78, Charges for Packaging and Packing, in solicitations and contracts for supplies that are to be delivered to GSA supply distribution facilities.

(j) The contracting officer shall include the clause a 552.210-79, Packing List, in solicitations and contracts for supplies including small purchases.

510.070 Specifications.

510.070-1 Exceptions to mandatory use of Federal specifications.

When an interim Federal specification exists for an item that is also in a Federal specification, contracting activities shall use the interim Federal specification if it is more suitable in the absence of a Federal specification, an interim Federal specification, if any, shall be used.

510.070-2 Optional use of interim Federal specifications.

Buying offices shall use interim Federal specifications instead of Federal specifications whenever practical, under 510.070-1. When a contracting activity finds an interim Federal specification is not practical, or that changes are desirable, the specification manager shall be notified in writing of the recommended changes.

510.070-3 Use Federal or interim Federal specifications and standards.

(a) Federal or interim Federal specifications and standards shall be incorporated by reference in solicitations. The reference shall identify the specifications or standard by series, i.e., Federal, military, or departmental (e.g., Forest Service), followed by the number and date. (The specification number includes the revision indicator.) Amendments shall be identified, e.g., Federal Specification PPP-B-636C, dated February 17, 1972, and Interim Amendment 1, dated August 30, 1972.

(b) Canceled or superseded specifications, or standards shall not be used.

(c) When Federal or interim Federal specifications and standards are cited in the solicitation, the provision(s) and/or clause(s) prescribed in FAR 10.011 and 510.011 of this chapter shall be used.

510.070-4 Other than Federal and interim Federal specifications.

(a) When the services or staff offices issue guide specifications that apply to the contracting offices within an organization, the head of the service or staff office may establish the review procedures for deviation requests.

(b) The contracting officer shall analyze requests for deviations in accordance with the requirements outlined in 510.007-71.

510.070-5 Deviations from GSA stock or Federal Supply Schedules.

41 CFR 101-26.100-2 of the Federal Property Management Regulations (FPMR) instructs agencies on submitting requests to deviate from the requirement to use items available from GSA stock or from Federal Supply Schedules and provides that such requests be submitted to the Assistant Administrator, Office of Federal Supply and Services (F), for approval.

510.071 Standards.

The provisions of 510.070-1 and 510.070-2 relating to mandatory use of Federal specifications and requests to deviate from Federal specifications also apply to Federal standards.

PART 511—ACQUISITION AND DISTRIBUTION OF COMMERCIAL PRODUCTS

Sec.

511.001 Definitions.
511.003 General.

Sec.
511.070 Solicitation provision and contract clause.
511.070–1 Solicitation provision.

Authority: 40 U.S.C. 486(c).

511.001 Definitions.

"Commercial item description" (CID) is a simplified product description that describes by design, function, and/or performance the characteristics of available, acceptable, commercial supplies.

511.003 General.

(a) The specification manager with advice from the contracting officer, if necessary, shall determine if inclusion of a CID in a solicitation is the most appropriate way of describing the Government's needs.

(b) When the CID consists of only the minimum salient characteristics of the commercially available supplies (e.g., general requirements, test procedures), a commercial item certification shall be included in the solicitation. (See 511.070–1.) Because the certification provision supplements and replaces the quality assurance provisions, the certification must be obtained to represent that the supplies being offered are of standard commercial quality.

(c) For CID's that incorporate specific salient characteristics including performance standards, packaging and packing requirements, quality assurance provisions (e.g., visual examination, sampling plans, test methods) the commercial item certification is not required. In this instance, the CID is the sole basis of determining whether the item meets the Government's needs.

511.070 Solicitation provision and contract clause.

511.070–1 Solicitation provision.

The contracting officer shall include the certification provision at 552.211–70, Commercial Item Certification, in solicitations for supplies when a basic or broad description of a standard commercially available product is used to describe the requirement.

PART 512—CONTRACT DELIVERY OR PERFORMANCE

Subpart 512.1—Delivery or Performance Schedules

Sec.
512.101 General.
512.102 Factors to consider in establishing schedules.
512.103 Supplies or services.
512.104 Contract clauses.

Authority: 40 U.S.C. 486(c).

Subpart 512.1—Delivery or Performance Schedules

512.101 General.

(a) Normally, time of delivery provisions in solicitations and resultant contracts, except multiple-award schedules, shall be stated as "required" time of delivery (or shipment), expressed in specific periods from receipt by the contractor of a notice of award (or receipt of a delivery order under indefinite delivery type contracts). In multiple-award schedule solicitations delivery times shall usually be stated as "desired" time of delivery, and offerors shall indicate in the solicitation a definite number of days within which delivery will be made.

(b) Information shall be included in the contract file to justify unusually short time of delivery requirements. This is particularly important where the time specified is so short that it may limit competition and possibly result in higher prices. Examples of circumstances providing such justification are:

(1) Furniture is required in a short time to outfit quarters scheduled for occupancy on a specific early date,

(2) Construction material is required to meet predetermined job progress schedules, and

(3) Supplies are required at a port to meet scheduled ship sailings for overseas destinations. The contracting officer must be satisfied that the requisitioning office has justified such unusually short time of delivery.

(c) When a portion of the total delivery is needed early, consideration should be given to requiring that portion by the required date and the balance later. Determine whether the portion required early and the balance should be included as separate items in the same solicitation or whether the two portions should be procured under separate solicitations.

(d) Delivery times for indefinite delivery type contract solicitations shall be carefully calculated to ensure that they reflect the most advantageous terms to the Government without imposing an unreasonable burden on potential contractors.

(e) When a particular solicitation contains a mixture of items that require substantially different times for delivery, the delivery periods should be set forth separately and items with similar delivery time requirements should be grouped according to delivery times in the solicitation.

(f) In negotiations for multiple awards, secure the best possible delivery time regardless of the "desired" delivery time(s) in the solicitation. For example, some offers comply with the Government's desired delivery time but others cite delivery times which are substantially shorter. The former should be questioned and negotiated to bring them closer in line with the latter. Variable delivery time offers (e.g., 30–90 days) should be negotiated to keep the timespan to a munimum. If the span applies to several items or several quantity breaks for one item, the items or item quantity breaks should be segregated into smaller groups which can be assigned more specific delivery times.

512.102 Factors to consider in establishing schedules.

(a) In addition to the requirements of FAR 12.102, the contracting officer shall, when determining time of delivery or performance, consider the circumstance where lengthy testing is involved and the time for completion of tests cannot be properly estimated.

(b) In making a determination, the contracting officer should also consider use of the contract clauses prescribed by FAR 12.104.

512.103 Supplies or services.

When the contract delivery date is contingent upon the date the contractor received notice of award, one of the following methods, as appropriate, shall be used to provide evidence of the actual date the notice of award was received:

(a) Mail the notice of award using certified mail with return receipt requested (see FAR 12.103(d)).

(b) Hand deliver the notice of award to the contractor (for example by contracting officer quality control representative) and obtain a dated receipt therefor.

512.104 Contract clauses.

(a) The contracting officer may insert one of the time of delivery clauses at 552.212–1, Time of Delivery, in solicitations and contracts, or may develop a clause substantially as shown to set forth a required delivery schedule.

(b) The contracting officer may insert one of time of shipment clauses at 552.212–70, Time of Shipment, in solicitations and contracts, or may develop a clause substantially as shown to set forth a required time of shipment.

(c) The contracting officer shall insert one of the clauses at 552.212–71, Notice of Shipment, in solicitations and contracts, when contractors are required to furnish notice of shipment.

(d) The contracting officer shall insert one of the clauses at 552.212–72, Availability for Inspection and Testing and Shipment/Delivery, in solicitations

and contracts for supplies when lengthy testing is involved and the time required for completion of these tests cannot be predetermined.

(e) The contracting officer shall insert one or both of the clauses at 552.212–73, Parts and Services, in solicitations and contracts whenever an AID requisition (P10/c, P10/t, PA/PR) specifies the need for assembling, servicing, and maintenance of equipment to be performed by the contractor.

(f) The contracting officer shall insert the clause at 552.212–74, Non Compliance with Contract Requirements, in solicitations and contracts for construction services when the contract amount is expected to exceed the small purchase limitation.

SUBCHAPTER C—CONTRACTING METHODS AND CONTRACT TYPES

PART 513—SMALL PURCHASE AND OTHER SIMPLIFIED PURCHASE PROCEDURES

Sec.

Subpart 513.1—General

513.106 Competition and price reasonableness.
513.106–70 Exigency procurement.
513.107 Solicitation and evaluation of quotations.

Subpart 513.2—Blanket Purchase Agreements

513.203 Establishment of Blanket Purchase Agreements (BPA).
513.203–1 General.
513.204 Purchases under Blanket Purchase Agreements.

Subpart 513.3—Fast Payment Procedure

513.301 General.

Subpart 513.4—Imprest Fund

513.403 Agency responsibilities.

Subpart 513.5—Purchase Orders

513.501 General.
513.505 Purchase order and related forms.
513.505–2 Agency order forms in lieu of Optional Forms 347 and 348.
513.505–3 Standard Form 44, Purchase Order-Invoice-Voucher.

Subpart 513.70—Certified Invoice Procedure

513.7001 Certified invoice procedure.

Authority: 40 U.S.C. 486(c).

Subpart 513.1—General

513.106 Competition and price reasonableness.

(a) *Purchases not over $1000.* Purchases not over $1000 may be accomplished in accordance with 513.70 using the certified invoice procedure.

(b) *Purchases over $1000.* When procuring similar items or services for which there are many qualified sources in active competition, the firms solicited shall be rotated or the number solicited should be increased to include the additional sources to the extent commensurate with the value of the purchase, the potential for additional price savings, and the additional administrative costs involved.

(b) *Purchases over $1000.* When procuring similar items or services for which there are many qualified sources in active competition, the firms solicited shall be rotated or the number solicited should be increased to include the additional sources to the extent commensurate with the value of the purchase, the potential for additional price savings, and the additional administrative costs involved.

(c) *Oral solicitation.* Quotations may be solicited orally under the circumstances described in FAR 13.106(b)(2) unless:

(1) A service contract which will include a wage determination issued by the Department of Labor under the Service Contract Act is involved; or

(2) The proposed procurement is estimated to exceed $10,000 and must be publicized in the Commerce Business Daily.

(d) *Source lists.* Contracting activities may supplement small purchase source lists established in accordance with FAR 13.106(b)(4), through the use of trade publications, *Thomas Register*, and other comparable publications.

(e) *Data to support small purchases.*

(1) When other than the lowest quotation is accepted, the reason(s) for rejecting any lower quotation shall be entered in the purchase case file.

(2) The GSA Form 2010, Small Purchases Tabulation Source List/Abstract, shall be used to document small purchases.

513.106–70 Exigency procurement.

When an item or service that requires the use of a written solicitation is needed in an emergency situation, competition may be solicited by having prospective sources visit the site and by orally informing them, together, of the exact requirements, to enable the sources to prepare estimates for submitting quotations while the written solicitation is being prepared by the Government. The written solicitation must be issued before written quotations are received to allow prospective offerors to effect any necessary changes in the event that there has been any misunderstanding of the oral description of the work encompassed. Emergencies, for the purpose of this subsection, include situations which, if not corrected promptly, will result in unnecessary expenditure of funds, property damage, personal injury, serious loss of agency efficiency in operations, or interruption of agency functions, any of which could be avoided by immediate corrective action.

513.107 Solicitation and evaluation of quotations.

GSA Form 3186, Request for Quotation, is authorized for use by the Office of Federal Supply and Services with the FSS–19 system in lieu of the Standard Form 18, Request for Quotations.

Subpart 513.2—Blanket Purchase Agreements

513.203 Establishment of Blanket Purchase Agreements (BPA).

513.203–1 General.

(a) *Authority citation and numbering of BPAs.* Each blanket purchase agreement shall be numbered or otherwise identified and shall cite as the negotiation authority, 41 U.S.C. 252(c)(3) except that 41 U.S.C. 252(c)(15) shall be cited when the agreement is made consistent with Pub. L. 95–507 as a small purchase-small business set-aside.

(b) *Provisions required.* Blanket purchase agreements (BPAs) normally shall be documented on a purchase order form or on a GSA Form 1821, Blanket Purchase Agreement. In addition to the requirements of FAR 13.203–1(j), each blanket purchase agreement shall, when appropriate, specify the geographic area to be served under the BPA.

(c) *Requesting deliveries.* Only the contracting officer (CO) and officials authorized by a CO and designated in the blanket purchase agreement shall be permitted to request deliveries. Delivery (call) orders shall usually be made by telephone or in person. Prior to placing calls against the blanket purchase agreement, each requirement shall be screened for availability from mandatory sources of supply. Necessary controls shall be maintained by the person placing call orders under the blanket purchase agreement to ensure that any limitation stated therein is not exceeded. The blanket purchase agreement identification, and requisition number, if any, should be specified each time a delivery is requested.

(d) *Delivery tickets.* When deliveries are made, the receiving activity will retain one copy of the related delivery ticket and return the remaining copies to the supplier; one copy of which is to be signed and dated. Each delivery ticket in addition to the requirements of FAR 13.203–1(j)(6), must contain the

requisition number, if any, and the name of the person placing the call.

(e) *Invoices.* When the GSA Form 1821, Blanket Purchase Agreement, is used, invoices may be submitted by the vendor for each delivery. The office placing the order shall forward each invoice to the appropriate Finance Division for payment. The invoice should be marked to indicate that the pruchase was made under a BPA.

513.204 Purchases Under Blanket Purchase Agreements.

Individual call orders against such agreements shall not exceed $5,000.

Subpart 513.3—Fast Payment Procedure

513.301 General.

The fast payment procedures outlined in FAR Subpart 13.3 shall not be used by GSA contracting activities.

Subpart 513.4—Imprest Fund

513.403 Agency responsibilities.

Imprest fund cashiers shall be designated and shall function in accordance with GSA Order, Establishment and use of imprest funds, (MPB 1210.1), and the requirements of FAR Subpart 13.4.

Subpart 513.5—Purchase Orders

513.501 General.

The Office of Finance (B) will not accept facsimile signatures on machine-produced purchase orders to obligate funds. An original (carbon copy but not photocopied) handwritten signature is required for obligation purposes on individual purchase orders or an original handwritten signature on a listing that references individual machine-produced purchase orders and dollar amounts.

513.505 Purchase order and related forms.

513.505–2 Agency order forms in lieu of Optional Forms 347 and 348.

(a) Either the GSA Form 300, Order for Supplies and Services, or the GSA Form 3186, Order for Supplies or Services, shall be used in lieu of OF 347. The GSA Form 3186 is used in connection with the FSS–19 System.

(B) GSA Form 3025, NEAR Receiving Report, shall be used to certify the receipt of supplies or services ordered using GSA Form 300.

513.505–3 Standard Form 44, Purchase Order-Invoice-Voucher.

(a) *General.* Use of the Standard Form 44, Purchase Order-Invoice-Voucher, will not serve the best interest of either the Government or business when the accounting system of the seller requires production of an invoice as a matter of routine. In these cases, whichever of the other authorized methods of making small purchases is most appropriate shall be used. Whenever possible, within the dollar value limitations of each method, preference shall be given to the use of imprest funds and blanket purchase agreements. (See FAR Subpart 13.4 and GSAR Subpart 513.2 of this chapter.)

(b) *Authorization for using the form.* Where necessary, designated employees may be authorized to make small purchases under $150 using Standard Form 44 in accordance with this subpart. Purchases over $ 150 using SF 44 may be made only by contracting officers.

(c) *Issuance of books from stock.* Issuance of books of SF 44 from stock shall be made only to contracting directors or to their designees. These officials shall be responsible for the custody and issuance of the books to the users and shall maintain a simple card record for each book issued.

Subpart 513.70—Certified Invoice Procedure

513.7001 Certified invoice procedure.

(a) When advantageous to the Government, supplies or services may be procured from local suppliers at the site of work or use point, or by a supply distribution facility when authorized, using vendors' invoices in lieu of purchase orders.

(b) Such purchases shall be effected only in accordance with FAR Part 13 and GSAR Part 513 of this chapter, subject to the following:

(1) The amount of any one purchase in $1000 or less (see AFR 13.106(a));

(2) A purchase order is not required by either the supplier or the Government and

(3) Appropriate invoices are obtainable from the suplier.

(c) The items to be purchased shall be domestic source end products, except as provided in FAR Subpart 25.1. For special rules governing purchases of hand and measuring tools and stainless steel flatware see 525.105–70, 525.105–71, and 525.105–72.

(d) Use of the certified invoice procedure does not eliminate the requirements in FAR Part 13 and GSAR Part 513 of this chaper to:

(1) Reserve small purchases for small business in accordance with Pub. L. 95–507, or document the file.

(2) Cite the negotiation authority on GSA Form 2010, Small Purchase Tabulation Source List/Abstract.

(3) Certify that the quality and quantity of items/services furnished are in accordance with the verbal agreement made with the vendor.

(e) Quotations shall be documented on GSA Form 2010, Small Purchase Tabulation Source List/Abstract. The solicitation of quotations may be performed by authorized personnel without contracting officer (CO) warrants, however, the placement of the order shall be approved in advance by a warranted CO, in writing, in the "Remarks" block of the GSA 2010, Purchase Tabulation/Source List/Abstract.

(f) Each contracting officer using this purchasing technique shall require the supplier to immediately submit properly prepared invoices which itemize property or services furnished.

PART 514—FORMAL ADVERTISING

Subpart 514.2—Solicitation of Bids

Sec.
514.201 Preparation of invitation for bids.
514.201–1 Uniform contract format.
514.201–6 Solicitation provisions.
514.201–70 Request for brand name information—limitation.
514.201–71 Fire or casualty hazards, or safety or health requirements.
514.201–72 Distribution of bidding documents.
514.201–73 Grouping of items for aggregate award.
514.202 General rules for solicitation of bids.
514.202–1 Bidding time.
514.202–4 Bid samples.
514.202–70 Bid samples (Supply contracts).
514.203 Methods of soliciting bids.
514.203–1 Mailing or delivery to prospective bidders.
514.203–70 Telegraphic solicitation.
514.204 Records of invitations for bids and records of bids.
514.205 Solicitation mailing lists.
514.205–1 Establishment of lists.
514.205–2 Removal of names from computerized solicitation mailing lists (SML).
514.208 Amendment of invitation for bids.

Subpart 514.3—Submission of Bids

514.301 Responsiveness of bids.
514.301–70 Telecopier bids.
514.302 Bid submission.
514.303 Modification or withdrawal of bids.
514.304 Late bids, late modifications of bids, or late withdrawal of bids.
514.304–1 General.
514.370 Copies of bids required in submission.

Subpart 514.4—Opening of Bids and Award of Contract

514.401 Receipt and safeguarding of bids.
514.402 Opening of bids.
514.402–1 Unclassified bids.
514.402–3 Postponement of bid openings.
514.403 Recording of bids.
514.404 Rejection of bids.

Sec.
514.404–2 Rejection of individual bids (Supplies and services).
514.404–5 All or none qualifications.
514.405 Minor informalities or irregularities in bids.
514.406 Mistakes in bids.
514.406–3 Other mistakes disclosed before award.
514.406–4 Mistakes after award.
514.406–70 Submissions to the Comptroller General.
514.407 Award.
514.407–1 General.
514.407–2 Responsible bidder—Reasonableness of price.
514.407–3 Prompt payment discounts.
514.407–6 Equal low bids.
514.407–7 Documentation of award.
514.407–8 Protests against award.
514.407–71 Awards involving related cases referred to higher authority.
514.407–72 Extension of time for bid acceptance.
514.407–73 Forms for recommending award(s) (Supplies and services).
514.407–74 Preparation of documents for acceptance.
514.407–75 Notification of contract award.
514.408 Information to bidders.
514.408–1 Award of unclassified contracts.
514.408–70 Restriction on disclosure of inspection or test data.
514.470 Advance notices of contract award.
514.470–1 Circumstances which warrant advance notice.
514.470–2 Telegraphic notices.
514.470–3 Oral notices.
514.470–4 Content of notices.
514.471 Multiple bidding.

Authority: 40 U.S.C. 486(c).

Subpart 514.2—Solicitation of Bids

514.201 Preparation of invitation for bids.

514.201–1 Uniform contract format.

All solicitations shall include the following notice on the first page of the solicitation:

> The information collection requirements contained in this solicitation/contract, that are not required by regulation have been approved by the Office of Management and Budget pursuant to the Paperwork Reduction Act and assigned OMB Control No. 3090–0163.

514.201–689 Solicitation provisions.

(a) A special minimum bid acceptance time requirement as authorized in FAR 14.201–6(j) shall only be used when based on experience with previous procurements of the same or similar items, the contracting officer is relatively certain that either: (1) More than 60 days bid acceptance time will be needed, or (2) a bid acceptance time of less than 60 days (e.g., 30 or 45 days) will be adequate.

(b) The contracting officer shall insert the following provisions in all solicitations for offers:

(1) 552.214–71 Telecopier Submissions, Modifications or Withdrawals of Bids.

(2) 552.214–72 Telegraphic Submissions, Modifications, or Withdrawals of Bids Received at the GSA Communication Center.

(c) The contracting officer shall insert the clause at 552.214–73, "All-or-None" Offers, in solicitations when all-or-none offers will be considered.

(d) The contracting officer shall insert a clause substantially the same as the clause at 552.214–75, Progressive Awards and Monthly Quantity Allocations, in solicitations for supplies when progressive awards might be made.

(e) The contracting officer shall insert a clause at 552.215–70; Examination of Records by GSA, in solicitations and contracts which involve the disposition of Government furnished property or advance payments and in requirements or indefinite quantity contracts.

514.201–70 Request for brand name information—limitation.

(a) When an item is described in a solicitation by a formal specification or a detailed purchases description (other than a brand name or equal purchase description), the solicitation shall not require or request that bidders specify the brand names of the products they propose to furnish. However, brand name information may be requested in the following situations:

(1) Items for which descriptive literature is requested in accordance with FAR 14.202–5.

(2) Items for which preproduction samples or test are required.

(3) Procurements of qualified products.

(b) This limitation also applies to procurements using "restricted advertising" techniques as described in FAR 19.502–4 (Procurements set aside for small business and FAR Subpart 25.3 Balance of Payments Program).

514.201–71 Fire or casualty hazards, or safety or health requirements.

(a) Specifications covering electrical equipment, building materials, etc., which involve fire or casualty hazards, or safety or health requirements, normally contain a provision requiring conformance to the standards of nationally recognized technical societies, associations, or laboratories, or other GSA-approved testing laboratories, regarding fire and casualty hazards, explosion protection, or safety or health requirements.

(b) When a specification is not available, or the specification to be used does not include a provision such as that described in (a) of this 514.201–71 and it is believed that such a provision should be included in the current procurement, technical advice shall be obtained from the appropriate program or technical office. If the contracting officer then determines that the matter should be covered, an appropriate provision shall be included in the solicitation. The provision shall cite the nationally recognized standards requiring compliance. If several such standards are available, the provision shall cite all standards that are acceptable. Since compliance with such standards is normally objectively determined under regular acceptance inspection and test procedures, no requirement for bidders to submit proof of compliance with the standard shall be included in the provision.

514.201–72 Distribution of bidding documents.

(a) Principal construction subcontractors may obtain copies of bid doucments by: (1) Requesting in writing and (2) paying the required bid document charges or deposits, as provided in 536.302–70.

(b) When copies are not available, subcontractors shall be informed where bid documents may be reviewed.

514.201–73 Grouping of items for aggregate award.

(a) Contract awards shall be made on an individual items basis, except that aggregate awards of grouped items may at times best serve the Government's interest. This may occur when furniture or fixtures are required for a single project, when uniformity of design is desirable, when the articles required will be assembled and used as a unit, or when factors such as carload shipments, production runs, and quantity discounts, are involved.

(b) Items should not be grouped for aggregate award if it will unduly restrict competition or place a significant portion or class (e.g., small business concerns) of prospective bidders at a competitive disadvantage.

(1) Only items of a related character, normally handled by the majority of interested bidders, should be included in a single group. The grouping of nonrelated items tends to limit competition, provides inequitable treatment to bidders who cannot bid on all items, and may increase Government costs.

(2) Avoid grouping (for aggregate award) requirements for two or more widely dispersed geographic locations when it may restrict competition and result in higher bid prices. (Some prospective bidders may not be able to offer competitive prices on requirements for some of the locations within the

group.) Item grouping may be justified when: (i) One location has a large requirement and another location has a requirement too small to individually attract competitive bids, or (ii) it is industry practice to serve outlying locations on a route basis and complete coverage of all locations can only be obtained economically by grouping them for aggregate award.

(c) When considering aggregate awards, the solicitation shall clearly state the basis on which awards will be made and require bidders to insert unit prices for each item.

514.202 General rules for solicitation of bids.

514.202-1 Bidding time.

(a) *Factors to be considered.* The urgency of the Government's need for the items or services, the complexity of the invitation, the extent of subcontracting anticipated, the use of pre-invitation notices, the geographic distribution of bidders, the normal time for mail transmission of both invitations and bids, and other related factors, must be considered in establishing bidding time. For example, a bidding time of more than the statutory minimum of 30 days may be necessary when bidders are required to prepare special drawings, designs, and samples, or to obtain quotation from several suppliers and subcontractors, as frequently is the case in construction and production contracts. Conversely, a bidding time of 30 days may be adequate when bids would reasonably be expected to be based on stock-on-hand, or current regular production, or service personnel and facilities regularly available (as in the case of maintenance and repair of structures, and similar work).

(b) *Minimum bidding time.* Bidding time shall be at least 30 days (see Small Business Act, 15 U.S.C. 637) from the date of issuance of the invitation for bids whenever the proposed procurement is required to be published in the Commerce Business Daily (CBD). This rule need not be observed if the need for the property, supplies, or services is of such unusual and compelling urgency that the Government would be seriously injured if statutory publicizing and response times were complied with, or if any of the other statutory exceptions to the requirement for publicizing in the CBD apply. Contracting officers shall ensure that adequate bidding time is allowed when procurements are exempt from the statutory publicizing requirement.

514.202-4 Bid samples.

(a) Bid samples shall be received and safeguarded in either a sample room or the Business Service Center. The term "sample custodian" as used herein refers to both Business Sevice Center personnel or sample room personnel, as appropriate.

(b) Bid samples submitted in response to a solicitation requirement must be received before bid opening to be considered for award. Samples are to be promptly time-stamped upon receipt by the sample custodian indicating the date and hour received. The sample custodian shall record whether the samples were sent by regular, registered, or certified mail, or by other delivery methods. Each sample container is to be accompanied by GSA Form 434, Sample Record Sheet, included as part of the solicitation. The regulations concerning late bids (FAR 14.304) also apply to samples received after the time set for receipt of bids.

(c) Bid samples shall be carefully protected against loss, damage, or pilferage. Each sample shall be recorded and tagged showing the firm's name and address, solicitation number, noun name, national stock number (NSN), and date of receipt. If samples or their containers arrive damaged, the sample custodian shall note the condition of the container upon receipt and request a quality assurance specialist (QAS) to verify the actual condition of the samples involved.

(d) *Approved samples.* (1) Upon award of a contract, the contracting officer shall forward a copy of GSA Form 6419, Transmittal of Contract Award Data, to the sample custodian who shall tag the approved samples showing the contract number and the contract period. When there is only one sample, it shall be hand-carried or sent by an appropriate means of transportation to the manufacturing plant marked to the attention of the QAS. If there are two identical samples, one sample shall be retained in the bid sample room until performance is completed and the other shall be forwarded as stated above. The sample shall normally have the tag secured by wire with a lead seal except when other means of identification are more appropriate. The sample custodian shall notifiy the Quality Assurance Branch of sample shipment by furnishing a copy of GSA Form 6334, Transmittal of Approved Samples of Items Under Contract.

(2) Upon completion of all deliveries/shipments and inspections under the contract, the samples shall be returned to the supplier at the supplier's expense if so indicated on GSA Form 434, Sample Record Sheet. Other samples are to be treated as Government property for use or disposal. In those instances when the contracting officer has indicated that they may be reapplied to a succeeding solicitation, the sample shall be retained in the bid sample room.

(3) When the CO anticipates that there may be a future claim regarding a contract, the bid samples shall be retained until the claim is resolved.

(e) *Disposition of other samples.* (1) Bid samples rejected or untested shall be returned to the supplier at the supplier's expense, if so indicated on GSA Form 434, Sample Record Sheet. The others will be treated as Government property for use or disposal. (See FAR 14.202-4(h).)

(2) Bid samples determined to be received late in accordance with FAR 14.304 shall be held until awards are made and returned to the offeror, freight collect, unless other disposition is requested or agreed to by the bidder.

514.202-70 Bid samples (supply contracts).

(a) Normally only subjective characteristics of bid samples will be listed in the solicitation. Objective characteristics may be listed when it has been determined, on the basis of past procurement experience or other valid considerations, that examination of such characteristics is essential in the procurement of an acceptable product. When characteristics are listed in the solicitation, the listed characteristics shall be separately shown under the headings of Subjective Characteristics, and Objective Characteristics. Products furnished under any resultant contract shall strictly comply with the listed subjective characteristics of the approved bid sample and shall conform to the specifications as to all other characteristics whether or not listed.

(b) Samples received with bids being considered for award must be from the production of the manufacturer whose product is to be supplied and shall be evaluated with respect to the characteristics listed in the solicitation by the buying activity and the appropriate quality control activity. A written record of the evaluation findings shall be made.

(c) Bid samples will not normally be inspected until the bidder is being considered for award on the item(s) represented by the sample. Bid samples received by the National Tools Center shall be evaluated in the Central Office by a team consisting of representatives from the procurement, quality control,

and specification management activities. When laboratory support is required, the QAS will arrange for the testing and the samples shall be hand-carried or sent by another method.

(d) If the samples meet the listed characteristics but there is doubt that the sample meets all of the characteristics required by the specifications, arrangements shall be made for technical evaluation and/or testing by the appropriate quality assurance activity. A report of the evaluation of the sample, showing results with respect to all characteristics examined, shall be furnished promptly to the contracting officer.

(e) If the bid sample has been found to conform to all of the characteristics listed in the solicitation, but found deficient with respect to one or more of the unlisted characteristics, a preaward survey report shall be requested as provided in 509.105–1(c). A copy of the sample evaluation report shall be attached to the Standard Form 1404, Preaward Survey of Prospective Contractor—Technical, which shall include a request that special attention be given to the prospective contractor's ability (notwithstanding the deficiencies noted with respect to the characteristics not listed in the solicitation which were evaluated) to produce supplies fully conforming to applicable specifications. For example, can the noted deficiencies be corrected by fairly simple production or process control adjustments, or would expensive and time-consuming retooling be involved? The preaward survey report shall include a specific statement regarding the prospective contractor's ability or inability to correct each noted deficiency in objective characteristics as well as an overall appraisal of his capability.

(f) If the preaward survey report is not favorable, a determination of nonresponsibility shall be made based upon the facts and evaluation contained in the report together with any other evidence that may be obtained in a given case bearing on the bidder's inability to meet the standards of responsibility in FAR Subpart 9.1.

(g) If the preaward survey report is favorable, award may be made, if otherwise proper, to the low bidder whose samples conform to the characteristics listed in the solicitation. Concurrently with award, the contracting officer shall specifically, in writing, call to the attention of the contractor, the inadequacies of the sample with respect to unlisted characteristics and advise him of his responsibilities to furnish items conforming to all of the requirements of the specification. A copy of the letter shall be furnished to the appropriate Office of Engineering and Technical Management for use when making subsequent inspections.

(h) For further instructions regarding the treatment and evaluation of samples, see 514.202–4.

(i) If bid samples were required on a prior solicitation, written approval of the appropriate Office of Engineering and Technical Management or the appropriate commodity center specification activity is required prior to waiving the bid sample requirement.

514.203 Methods of soliciting bids.

514.203–1 Mailing or delivering to prospective bidders.

(a) A copy of each solicitation shall be provided to the requisitioning office.

(b) Active bidders (current contractors and bidders that responded to recent similar solicitations) shall be provided with bid sets for the same or similar items. Active bidders' names shall be checked against the bidders mailing list and, if they are not listed, they shall be added.

(c) Contracting activities shall prepare the required address labels or addressed envelopes for the active bidders and furnish them to the local printing and distribution activity.

(d) The distribution of solicitations shall included the quantities required by the Business Service Center in the region where the solicitation originates. Business Service Centers shall advise contracting offices of quantities required for public display, reference, and for filling requests for copies. The approval of the appropriate Contracting Director shall be obtained when it is necessary to vary the normal distribution of bid sets.

(e) At the contracting officer's discretion, the notice in 552.214–74 Solicitation Copies, shall be included in solicitations or on GSA Form 1602, Notice Concerning your Solicitation for Offers, as appropriate.

(f) Contracting officers shall ensure that all amendments to solicitations and related notices are furnished promptly to every addressee previously furnished a solicitation.

514.203–70 Telegraphic solicitation.

(a) Bids may be solicited by telegram when the contracting officer determines that there is an urgent need. However, all other applicable requirements of formal advertising must be fulfilled.

(b) Before soliciting by telegram, consider the following:

(1) The factors justifying exceptions to the standard minimum bidding times prescribed in 514.202–1; and

(2) The use of time of delivery clauses designed to ensure delivery or performance to meet the Government's requirements.

(c) The use of telegraphic solicitations does not relieve the contracting officer from the responsibility for ensuring full and free competition. Accordingly, the contracting officer shall solicit a sufficient number of prospective bidders to ensure adequate response.

(d) A written justification for using telegraphic solicitation shall be included in the procurement file.

514.204 Records of invitations for bids and records of bids.

Business Service Centers shall submit promptly to the appropriate contracting officer a supplemental list of firms (including addresses) to whom the BSC furnished solicitations. Contracting officers shall furnish these firms with applicable amendments or supply the Business Service Center with amendments for distribution.

514.205 Solicitation mailing lists.

514.205–1 Establishment of lists.

(a) Solicitation mailing lists shall be established in accordance with FAR 14.205. Contracting officers may use either the computerized central solicitation mailing list maintained by Region 8 for supplies and services or local lists maintained by the contracting activity.

(b) Inquiries from or for business firms requesting inclusion on solicitation mailing lists shall be referred to the GSA Business Service Center serving the geographic areas in which the firms are located. Business Service Centers will assist firms to be included on the proper GSA mailing lists and will provide prospective bidders with necessary application forms and related information.

514.205–2 Removal of names from computerized solicitation mailing lists (SML).

(a) To remove firms from the SML:

(1) Encircle in black on a copy of the applicable solicitation mailing list the firms to be removed; and

(2) Attach a cover letter listing the solicitation number to which the firm did not respond, the commodity, the issue and closing dates of the solicitation, and the class and mailing list code (MLC) from GSA Form 1382, List of Commodities and Services, and forward to 8BRC for action. The letter should read substantially as follows:

Please delete the encircled firms which did not respond to solicitation No. — for —, issued —, and opened —, class —, and MLC —.

(3) Unless the addressee requests removal, addresses such as U.S. Congressional Offices and offices in GSA's Central Office should not be removed from the computerized SML.

(b) Only contracting activities having national responsibility for the items or services shall remove firms from the SML. Other contracting activities shall route such lists and letters through the activity having national commodity or service responsibility for concurrence and for forwarding to the Centralized Mailing Lists Services Branch (8BRC) for action.

514.208 Amendment of invitation for bids.

The date set for bid opening shall be extended when amendments relating to wage determinations issued pursuant to the Service Contract Act or Davis-Bacon Act are issued less than 10 days before the scheduled bid opening date.

Subpart 514.3—Submission of Bids

514.301 Responsiveness of bids.

514.301-70 Telecopier bids.

(a) Telecopier bids, proposals, modifications or withdrawals are not permitted, accepted or honored.

(b) Include the clause in 552.214-71, Telecopier Submissions, Modifications, or Withdrawal of Bids, in all solicitations for supplies and services (including construction).

514.302 Bid submission.

When a telegraphic bid is received by telephone under the circumstances described in FAR 14.302, the identity of the telegraph office employee telephoning the message shall be obtained and recorded in the solicitation file along with a copy of the telegram that formed the basis for the telephone call.

514.303 Modification or withdrawal of bids.

(a) Bid modifications received prior to bid opening time shall be handled in the same manner as bids and shall be attached to the related bid envelope to ensure opening at the same time. When a telegraphic modification or withdrawal of a bid is received by telephone under the circumstances described in FAR 14.303, the identity of the telegraph office employee telephoning the message shall be obtained and recorded in the solicitation file.

(b) The receipt required by FAR 14.303(b) for withdrawal of a bid in person by a bidder or an authorized representative of the bidder before the time set for opening shall be worded as follows:

> I certify that I am a bona fide fully authorized agent for or representative of (Bidder's name and address) whose bid on IFB No. —— is scheduled for opening on ——. I hereby withdraw that bid from consideration and acknowledge receipt of the unopened bid.
> Name and telephone No. ————————
> Date ————————

(c) The provision in 552.214-72, Telegraphic Submissions, Modifications, or Withdrawal of Bids Received at the GSA Communications Center, shall be included in all solicitations for supply and service contracts.

514.304 Late bids, late modification of bids, or late withdrawal of bids.

514.304-1 General.

(a) Upon receipt of a late bid delivered by mail (or telegraph, when authorized), the bid custodian shall record it on the duplicate copy of the list of bidders and have it delivered immediately to the responsible contracting officer.

(b) The delivery of a bid after the bid opening time (by other than mail or telegram) shall not be accepted. Should a bid custodian become unavoidably in possession of such a bid, it shall be immediately time stamped and handled in the same manner as prescribed for late bids. In addition, the bid custodian shall note on the duplicate copy of the list of bidders when and how the bid was delivered.

514.370 Copies of bids required in submission.

Bids shall be submitted in an original and one copy. The original will be used by the contracting activity for the tabulation and evaluation of bids. The copy will be retained by the Business Service Center for public information until the bid abstract is available to replace it. When information such as the GSA Form 527, Contractor's Qualifications and Financial Information, or Standard Form 24, Bid Bonds, is submitted with a bid it shall not be retained by the Business Service Center for public information.

Subpart 514.4—Opening of Bids and Award of Contract

514.401 Receipt and safeguarding of bids.

Bids, and modifications in response to solicitations shall be received and safeguarded by the appropriate Business Service Center until the time specified for opening. Adequate space and facilities shall be provided for the receipt and safeguarding of bids and for the holding of public bid openings. This shall include a locking-type bid box located within sight of the bid custodian and in a place where bidders or their representatives can readily deposit bids.

(a) Bids received shall be handled as follows:

(1) At the initial point of receipt, each envelope (or other covering) received by mail and identified as containing a bid shall be immediately time-stamped or indicated thereon the place, date, and time of receipt by authorized personnel. Then the bid(s) shall be delivered by special handling to the bid custodian in the Business Service Center. Each Business Service Center Director shall designate bid custodians and alternates as may be required, to perform the functions incident to the receipt, custody, and recording of bids.

(2) Insufficient postage on bid envelopes shall not be a reason for failure to accept delivery of bids.

(3) Mailed bids and modifications delivered to the bid custodian prior to bid opening time shall be recorded on the list of bidders on the same day they are delivered and then placed in a suitable locked cabinet.

(4) Hand-carried bids delivered prior to bid opening time will be deposited in the locked bid box in the Business Service Center. The bid custodian shall have custody of a key or combination to this receptacle. In the event a hand-carried bid is not placed in the bid box by the bidder, but is handed to the bid custodian or other Business Service Center personnel, it shall be time stamped immediately and then handled in the same manner as provided for mailed bids. At least once daily (and immediately preceding the time for each scheduled bid opening), the bid custodian shall remove and time stamp the bids, record them and place them with any other bids previously received.

(5) Telegraphic bids and modifications shall be sealed in envelopes immediately upon receipt, appropriately identified, and handled in the same manner as bids submitted by mail.

(6) For each invitation, the bid custodian shall prepare a list, in duplicate, of the biddres whose bids are received before bid opening time. The list shall show the invitation number and the name and address of each bidders In addition, when a bid modification is received before bid opening time or when a bid previously recorded on this list is withdrawn, the list shall so indicate.

(b) At the scheduled bid opening time, the bid custodian shall deliver all bids received in response to the invitation, together with both copies of the list of bidders, to the authorized bid opening

official or designee, who shall acknowledge receipt of the bids by signing the duplicate copy of the list and returning it to the bid custodian. The original list shall become part of the contract file.

514.402 Opening of bids.

514.402-1 Unclassified bids.

(a) Public bid openings shall be held in the Business Service Center except when determined to be impracticable by the Business Service Center and the contracting officer or bid opening officer. The schedule for bid openings shall be developed jointly by the Business Service Center and the bid opening officer in order to avoid conflicts. The contracting officer shall be responsible for obtaining space for bid openings which are to be held outside the Business Service Center. As soon as it is determined to hold the bid opening elsewhere, the contracting officer shall inform the Business Service Center serving the geographic area in which the contracting office is located of the invitation number and the location where the public bid opening will be held.

(b) The assistant bid opening officer shall be a qualified employee of the contracting office. Upon authorization by the head of the contracting activity, and the Director of Small and Disadvantaged Business Utilization in Central office or the Director of the Business Service Center in the region, bids may be opened by selected Business Service Center personnal. Normally, this authorization will be requested only when the geographic distance separating the Business Service Center where bids are to be delivered and the contracting office makes it impracticable for the bid opening officer or designee to be present to open bids. (See FAR 14.402-1(b).)

(c) Bid openings shall be open to business representatives, members of the press, and the general public.

(d) To ensure that bids will be opened at the exact time specified, the bid opening official shall verify the accuracy of the timepiece to be used.

(e) For the information of those bidders present, approximately one-minute prior notice of bid opening will be announced audibly by the bid opening official.

(f)(1) The bid opening official shall take precaution to ensure that the exact time of opening has arrived and shall announce this fact audibly, citing the invitation or invitations scheduled for opening. The opening of bids shall then proceed in full view of the parties present.

(2) For construction contracts that provide for bid alternates, the amount of funds available for the award shall be announced prior to opening bids.

(g) In reading bids, the following information from each bid shall be announced when considered practicable and feasible: The name of the bidder, the unit price for each item bid upon, and other pertinent information, such as delivery and discount terms. A copy of each bid submitted in multiple copies shall remain in the bid opening room and be available for public examination until the bid abstract is completed and made available instead. Bids submitted in an original only shall be made available for examination in accordance with FAR 14.402-1(c).

(h) No person shall tamper with any bid after it has been formally opened. This includes making any alterations or notations with pencil or ink, or disassembling or withdrawing pages or adding pages not submitted with the bid.

(i) When invitations for bids provide for the summission of bid guarantees, the contracting officer or designated bid opening official, shall turn over any checks submitted to satisfy the bid guarantee requirement to the regional Finance Division. As soon as an award is made, the contracting officer shall direct the regional Finance Division to issue a check to the unsuccessful offeror in an amount equal to the amount of the bid guarantee originally submitted. A similar procedure shall be followed in the event the solicitation is canceled or all bids are rejected. Bid guarantees may be returned before award when a bidder requests the guarantee be returned and the bidder is not in contention for the award. Other forms of bid guarantees e.g., bid bonds, letters of credit, etc. shall be retained by the contracting officer and include in the contract file.

(j) A record of persons attending each bid opening shall be maintained. This record shall include at least the names of persons present, firms or organizations represented, date and time of opening, and the invitation numbers in which each person is interested. The reverse of the bid abstract form may be used for this purpose. The record shall be made a part of the invitation for bids file.

(k) If two or more bid openings are scheduled for the same date and hour and are to be conducted by the same bid opening official, normally the bid opening for which the greatest number of persons is present shall be conducted first.

(l) When multiple copies of bids are received, the bid opening official shall verify the entries on all copies. If there is a discrepancy between the copies of a bid, the contracting officer shall direct the bidder's attention to the suspected mistake and shall follow the procedures set forth in FAR 14.406 concerning mistakes in bids.

(m) Envelopes in which bids and bid modifications are received shall be retained in a temporary file until after all awards have been made. At that time, those which bear notations concerning abnormal receipt or opening for identification shall be made a part of the solicitation file and the remainder may be destroyed.

514.402-3 Postponement of bid openings.

(a) When the contracting officer postpones a bid opening, (see FAR 14.402-3), an amendment (see FAR 14.208) to the solicitation should be issued and distributed to all prospective bidders by mail or telegraph as early as possible. The new time and date set shall be as soon as possible. Prospective bidders shall be notified of the new time and date if circumstances permit.

(b) When an amendment is issued as described in paragraph (a) of this 514.402-3, bids and modifications received before the new time and date set for the opening of bids shall be considered for award. Bids and modifications received thereafter shall be handled according to the provisions of FAR 14.304 regarding late bids and modifications.

(c) Consent of surety to extension of the bid acceptance period need be obtained only if such extension goes beyond 120 days when Standard Form 24, Bid Bond, has been executed.

514.403 Recording of bids.

(a) The abstracting and tabulating of bids normally shall be completed within 24 hours after bid opening and a copy shall be delivered immediately to the appropriate Business Service Center where it shall be made available for public examination for a minimum period of 30 calendar days. Late bids determined eligible for consideration shall be included on the bid abstract form. However, if eligibility is established after delivery of the original tabulation, the bids shall be recorded separately, identified as an amendment to the original tabulation, and delivered to the Business Service Center.

(b) The status of the bidder (manufacturer or dealer) shall be annotated in the remarks column of the abstract.

514.404 Rejection of bids.

514.404–2 Rejection of individual bids (Supplies and services).

(a) When an award is proposed to other than the low offeror, the contracting officer shall explain the circumstances by using substantially the following format and justify rejection of the low offer either on GSA Form 1535, Recommendation for Award(s) or on a separate sheet:

Award to Other than Low Offeror:
(1) Item number(s) involved;
(2) Names of low offeror(s) and proposed awardee(s);
(3) Low and proposed prices:
(i) Unit,
(ii) Totals.
(4) Differences;
(i) In total prices,
(ii) In percent.
(5) *Explanation:* Example, "FAR 14.404–2(a), Failure to conform to the essential requirements of the invitation: The deviation is unacceptable." (Include a description of the specific requirement to which the bid fails to conform.)

(b) When a proposed rejection is based on failure to meet Qualified Products List (QPL) requirements, the explanation shall include information as to whether the items offered had been tested and approved for inclusion in the QPL as required by the solicitation; whether the item had been submitted for qualification testing; and/or the status of testing, if available.

(c) Explanations which involve cases of a sensitive or controversial nature shall be accompanied by all supporting documentation to justify awards to other than low offerors, such as copy of the offer to be rejected, statements from (or record of conversation with) the requisitioning activity, plant facilities and/or financial responsibility reports, relevant correspondence or reports, e.g. with the Small Business Administration on Certificates of Competency matters, copies of Congressional correspondence or other high level interest, etc.

514.404–5 All or none qualifications.

The clauses in 552.214–73 regarding all or none offers apply to solicitations for definite quantity and indefinite quantity type contracts.

514.405 Minor informalities or irregularities in bids.

(a) When bidders are instructed in the solicitation to return the entire solicitation and a page or pages are missing from the bid, the contracting officer shall determine whether it is a major defect or if it constitutes a minor informality or irregularity which may be waived under FAR 14.405. The essential test whether such bid may be considered responsive is whether the bidder's intention to be bound by all substantive portions of the solicitation in any resulting contract is evident from the terms of the bid as submitted. For example, when the solicitation portion of SF 33 specifically identifies the number of pages in the solicitation and the bidder has taken no exception to any portion of the solicitation, the signed offer usually should be considered as evidencing the bidder's intention to be bound by all of the substantive terms and conditions of the solicitation.

(b) If the missing pages are waived, as a minor informality or irregularity, the contractor shall be advised by letter accompanying the award document identifying the missing pages and incorporating them as part of the contract. The letter should caution the contractor that failure to submit all pages of a bid could cause rejection of a bid as nonresponsive in cases when a missing page contained substantive rather than inconsequential material.

514.406 Mistakes in bids.

514.406–3 Other mistakes disclosed before award.

(a)(1) The head of the contracting activity (HCA) is authorized as the central authority to make the administrative determinations permitted in FAR 14.406–3 (a) and (b).

(2) The appropriate Assistant General Counsel is the approving authority for proposed administrative determinations made by the HCA.

(b)(1) The contracting director (see 502.271) is authorized to make administrative determinations allowing bids to be withdrawn as permitted in FAR 14.406–3(c).

(2) For cases arising in the regions, the regional counsel is the approving authority for proposed determinations made by the contracting directors. For cases arising in the Central Office determinations shall be approved by the appropriate Assistant General Counsel.

(3) Questions arising in these cases shall be forwarded to the HCA for a decision.

(c) All doubtful cases shall be referred to the Comptroller General for an advance decision through the appropriate Assistant General Counsel. (See FAR 14.406–3(i).)

514.406–4 Mistakes after award.

(a) Contracting officers are authorized to make administrative determinations to rescind or reform contracts as permitted in FAR 14.406–4(b).

(b) Cases arising in the regions shall be reviewed by the HCA and Regional Counsel who will send them with appropriate recommendations to the appropriate Assistant General Counsel for approval.

(c) Cases arising in the Central Office shall be reviewed by the HCA and forwarded directly to the appropriate Assistant General Counsel for approval.

514.406–70 Submissions to the Comptroller General.

Where the General Counsel determines that a case supporting a mistake in bid is doubtful, a decision on the matter my be requested from the Comptroller General.

514.407 Award.

514.407–1 General.

(a) Bid acceptance should be accomplished in 30 days or less. However, more than 30 days may be required in certain cases, such as those which involve the evaluation of numerous bids for many items, time-consuming laboratory testing of bid samples, or on-site inspection of bidder's facilities.

(b) Preaward inquiries from bidders normally shall be directed to the Business Service Center in accordance with 514.408–1(a).

(1) If the inquiry concerns the status of an award and notice of award has not been issued, the response shall be limited to a statement that final award determinaition has not been made.

(2) A bidder who is pressing for award status may be advised that award will not be made to that bidder, if and when such a conclusion has been reached at the appropriate level required by the GSA Delegations of Authority Manual.

(3) The bidder may also be advised if the case has been referred to the Small Business Administration for consideration for Certificate of Competency action and the reasons why.

(4) No information shall be furnished concerning the status of a proposed award being processed through GSA approval channels. When pressed for information under these circumstances, bidders shall be advised that our policy and procedures do not permit the release of information about status of awards while they are in process.

(5) Any action or discussion which may create false impressions in the eyes of prospective contractors about any forthcoming award must be avoided.

514.407–2 Responsible bidder—Reasonableness of price.

(a) When only one bid is received in response to an invitation for bids, the bid may be considered and accepted if:
(1) The specifications used in the

invitation were not restrictive, (2) adequate competition was solicited, (3) the price is reasonable, and (4) the bid is otherwise consistent with the invitation for bids.

(b) The responsible contracting officer shall document the contract file to the effect that an award to the only bidder is in the best interest of the Government, and that the price is reasonable. The basis for price reasonableness shall be established if possible from data or information which is available to the contracting officer without contacting the bidder. (See FAR 15.805–2 for price analysis techniques and guidelines.)

514.407–3 Prompt payment discounts.

(a) Payments, for the purpose of earning a discount, will be deemed to have been made on the date which appears on the payment check, or the date of payment by wire transfer. (See clauses in 552.232–8.)

(b) The clause in 552.232–8(a), Discounts for Early (Prompt) Payment, shall be included in solicitations that may involve discounts for early payment in lieu of the clause in FAR 52.232–8.

514.407–6 Equal low bids.

In breaking a tie of equal low bids, factors qualifying a bidder for priority in award (see FAR 14.407–6) must have existed on the date of bid opening. Certifications (for example, Small Business or Labor Surplus Area) after the bid opening date cannot be applied to breaking an equal low bid tie.

514.407–7 Documentation of award.

A record of the method of purchase and basis for award shall be retained in the file and, in addition to the information required by FAR 14.407–7, shall include the number of firms solicited.

514.407–8 Protests against award.

All protests against award shall be handled in accordance with FAR 14.407–8 and this section.

(a) *Protests lodged with the agency.* Upon the receipt of a written protest, the contracting officer shall assemble the facts, review the protest with assigned counsel, and prepare a written reply to the protester setting forth the contracting officer's final decision. Replies to protests received after award shall be signed by the contracting director (see 502.271). When appropriate, concurrence is required from other officials (including members of the contract review committee) who concurred with the contract award involved in the protest.

(b) *Protests lodged with the General Accounting Office (GAO).* Replies to protests lodged with GAO are prepared by the Office of General Counsel. These replies are based on a statement of fact and position prepared by the contracting officer and approved by the contracting director.

(1) *Submission of statement of fact and position.* Within 10 working days after receipt of the written statement of protest from GAO, the appropriate organizational element shall submit, in triplicate, a properly signed and approved statement of fact and position (with required exhibits) to the Office of General Counsel. Because of the short time frame allowed by GAO (25 working days) for submission of the report, GAO usually informs the appropriate Assistant General Counsel by telephone of protests received or anticipated. This information is relayed immediately to the organizational element directly concerned. If the statement cannot be prepared within ten working days after receipt by the organizational element, the Head of the Contracting Activity shall be notified in writing (with copy to appropriate Assistant General Counsel) of the reasons for the delay and the projected submission date. After submission of the statement to the Office of General Counsel, the contracting officer shall advise counsel of all new developments which may have a bearing on the case. When further actions are required, the contracting officer shall obtain the advice of assigned counsel.

(2) *Preparation of statement of fact and position.* This statement shall contain the elements set forth in (b)(2)(i) through (ix) of this section, in addition to the requirements of FAR 14.407–8(a)(2). The contracting officer shall review the statement with assigned counsel prior to submission to the contracting director for approval.

(i) The identity of the GAO protest (if made against a solicitation or award) by B-number (GAO case file number), solicitation number, and contract number (if award has been made).

(ii) The full corporate name of the protesting organization and other firms involved when referenced for the first time in the position statement.

(iii) A statement whether the protest has been filed before or after award. If the protest has been filed after award, identify the awardee, the date of award, and the contract number.

(iv) A statement as required by FAR 14.407–8(b)(5), including a date when a determination is required for pending awards. See 514.407–8(b)(4) for action required if award must be made prior to resolution of protests.

(v) The date and time of bid opening (specify if the date of bid opening has been extended by subsequent amendments) and the total number of bidders.

(vi) An accurate, complete, and current statement of facts, in chronological order, of all relevant events and administrative actions taken. Include reasons for the actions taken and cite the authorities under which they were taken.

(vii) Any exhibits and/or documentary evidence, in triplicate, as set forth in FAR 14.407–8(a)(2) (i) through (vi). Include any other relevant documents believed helpful in determining the validity of the protest. (This evidence should be referenced and identified within the text of the position statement, alphabetically or numerically, e.g., Tab A, Exhibit 1, etc.).

(viii) A statement setting forth and answering point by point, if possible, all contentions, allegations, and issues raised by the protester.

(ix) Any comments or legal analysis (including legal precedents or authorities) received from assigned counsel.

(3) *Awards prior to resolution of protest.* If award must be made prior to final resolution of the protest pursuant to FAR 14.407–8(b)(4), a written finding and determination must be prepared by the contracting officer and approved by the head of the contracting activity. In protests involving regional procurements, the findings and determination shall be reviewed and concurred in by the regional counsel. A copy of such finding and determination shall be provided to the appropriate Assistant General Counsel so that he/she may inform GAO that an award will be made.

(c) *Protests after award.* A complete report of all the facts and all pertinent papers relating to protests which cannot be resolved at the regional level, protests to higher authority, and protests to the Comptroller General of the United States, shall be submitted to the Office of General Counsel after clearance through regular channels and concurrence by regional counsel.

514.407–71 Awards involving related cases referred to higher authority.

When a case is to be or has been referred to higher authority for review, any action which might prejudice the freedom of the higher authority to act on that case must be avoided. This includes other awards to the same bidder under the same solicitation.

514.407–72 Extension of time for bid acceptance.

(a)(1) Extensions of bid acceptance time shall not be requested when the conditions in (a) (2) and (3) of this paragraph exist. If the case in question has been referred to another organizational element for action, that organizational element shall be notified of any extension obtained and shall be requested to complete its action in time to permit award within the extended time.

(2) A bidder whose bid is determined unacceptable by the contracting officer and assigned legal counsel, shall not be requested or otherwise given an opportunity to extend the time for bid acceptance.

(3) When a special minimum bid acceptance time provision is included in the invitation for bids (see FAR 14.201–6(j) and 514.201–6 of this chapter), and a bidder, offers a lesser time bid for acceptance, the bid shall be rejected as nonresponsive.

(b) Requests for extention of bid acceptance time shall specify the additional acceptance time desired by the Government and shall be reasonable under the circumstances.

(c) If a bidder does not grant the additional bid acceptance time requested, special action shall be taken to accomplish acceptance of the bid within the time allowed by the bidder. Should it be advisable to permit the bid to expire, the contracting officer shall promptly, before the expiration of the bid, refer the case to the appropriate contracting director for decision.

(d) Appropriate legal counsel shall be consulted before an award is made when the acceptance time of an otherwise acceptable bid has expired.

514.407–73 Forms for recommending award(s) (Supplies and services).

(a) GSA Form 1535, Recommendation for Award(s), and GSA Form 1535–A, Recommendation for Award(s), Continuation Sheet, shall be used to document all proposed awards (except construction contracts) of more than $25,000 whether resulting from advertised or negotiated procurements. The use of the form for awards of $25,000 or less is at the discretion of the contracting activity. One or more awards may be set forth on each form. All information pertinent to the recommendation shall be furnished on the form. The checklist on the back of the form shall be completed.

(b) GSA Form 1447, Procurement Case Summary, shall be used to detail the analyses of procurements which require concurrence or approval in accordance with the GSA Delegations of Authority Manual (ADM P 5450.39B) or FSS Central Office Delegations of Authority (FSS P 5450.21B).

514.407–74 Preparation of documents for acceptance.

The acceptance of an offer received on SF 33, Solicitation, Offer, and Award, shall be as follows:

(a) *Definite-quantity contracts.* (1) *Single consignee.* When only one consignee is involved, notice of award of contract shall be documented as specified below:

(i) When Standard Form 33 is used, the award portion on both the original and duplicate copies of the accepted offer shall be completed. The original contract shall be retained by the Government and the duplicate copy furnished to the contractor. A purchase (delivery) order also must be issued to provide shipping instructions and necessary information copies to others concerned.

(ii) When a purchase order form is used, enter substantially the following: "Your offer on solicitation No. —— is accepted for items listed herein." Under this procedure, the original contract consists of the original bid signed by the contractor and the paying office copy of the purchase order, signed by the contracting officer. The contractor's copy of the contract consists of his retained copy of the bid and the original purchase order, signed by the contracting officer.

(2) *Multiple consignees.* Award on Standard Form 26, Award/Contract normally is advantageous for contracts involving more than one consignee. However, when numerous items on a single invitation for bids are awarded to one contractor, completion of the Award portion of Standard Form 33 may be more advantageous. Either method of documenting the award is authorized.

(b) *Indefinite quantity contracts.* Awards for indefinite quantity contracts may be documented on either Standard Form 26 or Standard Form 33. "Indefinite" shall be entered in the spaces provided for entering the quantity and dollar amount of such awards.

514.407–75 Notification of contract award.

Successful bidders shall be notified of award by furnishing to such bidders, within the time specified for bid acceptance, documents prepared in accordance with 514.407–74. Bids specifying a certain number of days for acceptance may be accepted any time before midnight of the last day.

514.408 Information to bidders.

514.408–1 Award of unclassified contracts.

(a) When considering in what form to provide notice to unsuccessful bidders (orally or in writing), contracting officers shall consider the following factors: (See FAR 14.408–1(a).)

(1) Size of the particular procurement;

(2) Number of items and the complexity of the invitation;

(3) Number of bids received;

(4) Necessity for bidders to make arrangements for securing necessary materials, financing, bonding, and other commitments;

(5) Whether procurement of the particular commodity would have any significant impact upon other bidders; and

(6) Availability of the information in Business Service Centers, the Department of Commerce Synopsis, and from any other sources available to anyone having an interest in such information.

(b) Normally, all inquiries whether oral or written, requesting information concerning the status of any bid or invitation for bids, including those not yet publicly opened, those already opened, and those for which abstracts have been prepared, shall be referred to the appropriate Business Service Center for reply.

514.40.8–70 Restriction on disclosure of inspection or test data.

(a) No inspection or test data generated in the process of bid evaluation shall be disclosed except as provided in this subsection. This includes information obtained from inspection or test reports whether prepared by the Government or an outside inspection or testing agency.

(b) Prior to award, no information regarding inspection or test data shall be disclosed to any bidder or individual except Government officials or employees required to have access to such information in connection with bid evaluation and determination of award.

(c) In providing notice of the rejection of a bid, the contracting officer shall inform the bidder concerning the results of tests on the products offered by that bidder.

(d) All other inspection or test data shall be furnished in accordance with the Freedom of Information Act. (See FAR Subpart 24.2.)

514.470 Advance notice of contract award.

Advance notices of award shall be in writing over the signature of the contracting officer except as otherwise

authorized. When an advance notice of award is issued, it shall be followed as soon as possible by the formal contract document.

514.470–1 Circumstances which warrant advance notice.

Advance notices of contract award may be issued by contracting officers under any of the circumstances listed below:

(a) A bid or offer is about to expire and it is necessary to issue an award notice promptly.

(b) Prompt action is necessary to afford the contractor an opportunity to secure necessary materials.

(c) Delivery or performance is urgent and cannot await release of formal contract documents.

(d) The contract involves work of an urgent nature and it is essential that the contractor rush all preliminaries prior to actual starting of work.

(e) Prompt action is necessary to secure advance predelivery samples on contracts.

(f) A prospective contractor requests advice, orally or in writing, as to whether he is to receive the award, and gives sufficient reasons, to the satisfaction of the contracting officer, why advance notice is desirable.

(g) Other compelling circumstances exist and advance notice is concurred in by the head of the contracting activity.

514.470–2 Telegraphic notices.

When justified by the circumstances described in 514.470–1, telegraphic notice may be used. The notice shall contain, in addition to the requirements set forth in 514.470–4 a statement that written confirmation will follow. Such confirmation shall be issued without delay.

514.470–3 Oral notices.

Oral notices shall not be used.

514.470–4 Content of notices.

Advance notices of award shall include all of the essential elements to identify the award, such as: identification of invitation, description of the procurement, and the contract number. No language shall be used which might in any way vary from the terms of the bid.

514.471 Multiple bidding.

(a) If more than one bid is received from a person or firm, or its affiliates in response to an invitation for bids, such bids shall be considered for award if responsive and otherwise acceptable.

(b) If a bidder submits bids on two or more products in response to the same item in an invitation and one of those bids is the lowest received which meets the requirements of the invitation, it may be accepted regardless of whether it is designated by the bidder as an "alternate."

PART 515—CONTRACTING BY NEGOTIATION

Subpart 515.1—General Requirement for Negotiation

Sec.
515.104 Authorization and approval.
515.105 Competition.
515.105–70 Justification and approval of the use of noncompetitive procedures.
515.105–71 Management controls designed to maximize the use of competitive procurement.
515.106 Contract clauses.
515.106–1 Examination of records by GSA clause.

Subpart 515.2—Negotiation Authorities

515.200–70 Citing the negotiation authority.
515.202 Public exigency.
515.203 Purchases under the small purchase limitation.
515.210 Impractical to secure competition by formal advertising.

Subpart 515.4—Solicitation and Receipt of Proposals and Quotations

515.402 General.
515.402–70 Telegraphic or telephonic solicitations.
515.403 Solicitation mailing lists.
515.405 Solicitations for information or planning purposes.
515.405–1 General.
515.406 Preparing requests for proposals (RFPs) and requests for quotations (RFQs).
515.406–1 Uniform contract format.
515.406–2 Part I—The Schedule.
515.406–5 Part IV—Representations and instructions.
515.407 Solicitation provisions.
515.411 Receipt of proposals and quotations.
515.411–70 Recording of offers.

Subpart 512.5—Unsolicited Proposals

515.500 Scope of subpart.
515.501 Definitions.
515.503 General.
515.504 Advance guidance.
515.505 Content of unsolicited proposals.
515.506 Agency procedures.
515.506–1 Receipt and initial review.
515.506–2 Evaluation.

Subpart 515.6—Source Selection

515.605 Evaluation factors.
515.605–70 Discounts for early payment.

Subpart 515.8—Price Negotiation

515.803 General.
515.803–70 Cost-reimbursement contracts (contruction contracts).
515.804 Cost or pricing data.
515.804–3 Exemptions from or waiver of submission of certified cost or pricing data.
515.804–70 Refusal to provide cost or pricing data.
515.805 Proposal analysis.
515.805–1 General.

Subpart 515.9—Profit

Sec.
515.902 Policy.
515.905 Profit analysis factors.
515.905–1 Common factors.
515.905–70 Non-profit organizations.

Subpart 515.10—Preaward and Postaward Notifications, Protests, and Mistakes

515.1001 Notifications to offerors.
515.1070 Release of information concerning unsuccessful offerors.

Authority: 40 U.S.C. 486(c).

Subpart 515.1—General Requirements for Negotiation

515.104 Authorization and approval.

Requirements for pre- and post-award review and approval of contracts are prescribed in the GSA Order, Contract Clearance (APD 2800.1B).

515.105 Competition.

515.105–70 Justification and approval of the use of noncompetitive procedures.

(a) Except as provided in paragraph (c) of this section, a written justification for use of noncompetitive procedures is required for each contract, including a lease of real property, in excess of the small purchase threshold. The written justification shall:

(1) Be signed by the contracting officer;

(2) Be approved by higher level authority in accordance with paragraph (b) of this section, prior to commencing negotiation;

(3) Identify the problem, mission deficiency, or need that the procurement is intended to satisfy;

(4) Provide the facts supporting the determination that the use of competitive procedures is not practical or feasible, including, in appropriate cases, a demonstration of how it is known that a particular contractor is the only source that can meet the Government's minimum requirements (e.g., responses to a CBD notice of intent to contract on a sole-source basis or to a sources-sought synopses); and

(5) Be retained as part of the contract file.

(b) Except as provided in paragraph (d) of this section, written justification shall be approved as follows:

Estimated value of procurement	Approving official
$300,000 or less	Contracting Director or Deputy
Over $300,000	Head of Contracting Activity or Deputy.

(c) A written justification is not required where:

(1) The agency is authorized by statute to contract with a specific source;

(2) The procurement is for the services of a public utility and only one such source is available;

(3) A written justification covering a class of contracts has been previously approved by the head of the contracting activity or his deputy and has been concurred in by the Assistant Administrator for Acquisition Policy, in which case, a copy of the class justification shall be included in the contract file.

(d) Approval of a written justification prior to commencing negotiation is not required where the need for the supplies or services is of such unusual and compelling urgency that the Government would be seriously injured if the requirements of paragraph (b) of this section were complied with; however, the justification shall be submitted for approval as soon as possible thereafter.

(e) Each contracting office shall maintain a separate file containing a copy of each written justification used to support the use of noncompetitive procedures.

(f) Pursuant to Pub. L 98–72, GSA may be required to report to Congress each instance where noncompetitive procedures have been used, but have not been approved pursuant to paragraph (b) of this section. Accordingly, any such actions should be reported to the Office of Acquisition Policy.

515.105–71 Management controls designed to maximize the use of competitive procurement.

The Office of Acquisition Policy, Office of Acquisition Management and Contract Clearance, shall:

(a) Conduct, as necessary, a review of the Federal Procurement Data System to identify contracting activities and/or programs having noncompetitive awards, and, in conjunction with the appropriate contracting activity, shall:

(1) Determine the reasons for and identify the circumstances resulting in noncompetitive procurements;

(2) Determine the potential for increasing competition;

(3) When appropriate, obtain an action plan from the contracting activity to increase competition and monitor progress.

(b) Review noncompetitive procurement as part of its procurement management assistance reviews of contracting activities. The adequacy of the documentation of noncompetitive procurement justifications is of particular importance and should be emphasized in all procurement reviews. As each justification for the use of noncompetitive procedures is reviewed, the reviewer should ascertain and evaluate:

(1) The reasons why the procurement cannot be completed;

(2) The adequacy of the grounds for excluding all other actual or potential offerors;

(3) Any action that can be taken to obtain competition in the future.

515.106 Contract clauses.

515.106–1 Examination of records by GSA clause.

(a) The following types of contracts in excess of $10,000 shall include the Examination of Records by GSA clause in 552.215–70:

(1) Cost-reimbursement type contracts;

(2) Contracts involving the use or disposition of Government-furnished property;

(3) When advance payments, progress payments based on costs, or guaranteed loans are to be made;

(4) Contracts for supplies or services containing a price warranty or price reduction clause;

(5) Contracts or leases involving income to the Government when the income is based on operations that are to any degree under the control of the contractor or lessee;

(6) Fixed-price contracts with economic price adjustment, with incentives, and price redetermination;

(7) Requirements and indefinite quantity (call-type) contracts;

(8) Time-and-material, labor-hour, and letter contracts; and

(9) Leases when the rental is subject to adjustment based on negotiated operating cost escalation.

(b) In some of the contracts listed in paragraph (a) of 515.106–1, it may be appropriate to define the specific area of audit such as: (1) The use or disposition of Government-furnished property, or (2) variable or other special features of the contract, e.g., price escalation and compliance with the price warranty or price reductions clauses. In these cases, the contract clause in 552.215–70 may be appropriately modified with the concurrence of the Office of General Counsel or Regional Counsel and the Assistant Inspector General Auditing, or the Regional Inspector General-Auditing, as appropriate.

(c) Insertion of the contract clause in 552.215–70 (modified or not) in contracts does not affect the requirements for use of the Examination of Records clause permitting review of contractor books and records by the Comptroller General or the clauses on audit and records pertaining to verifying cost or pricing data.

Subpart 515.2—Negotiation Authorities

515.200–70 Citing the negotiation authority.

Each negotiated contract shall cite in the appropriate block of the award document, the authority under which the contract is negotiated, i.e., the Federal Property and Administrative Services Act of 1949, as follows: "41 U.S.C. 252(c)(*)" (* insert paragraph number under which negotiation is permitted). (See FAR Subpart 15.2.) Cite any additional authority used; e.g. the Small Business Act. (See 15 U.S.C. 637(a).)

515.202 Public exigency.

(a) When contracts are awarded on behalf of other agencies, the public exigency negotiation authority at FAR 15.202 may be used only when the requisitioning agencies have furnished sufficient information for the execution of the required findings and determinations. Delivery dates which are not supported by further information are not adequate justifications for the use of the authority.

(b) Requirements concerning military purchase requests citing an issue priority designator assigned in accordance with DOD Uniform Material Movement and Issue Priority System (UMMIPS) are prescribed by DOD Directive 4410.6, and civilian agency purchase requests citing a priority designator 03 or 06, are prescribed by the FPMR 41 CFR 101–26.20.

515.203 Purchases under the small purchase limitation.

(a) The full purchase price shall be used in determining whether the aggregate amount of a transaction exceeds the small purchase limitation. Trade-in values may not be deducted.

(b) Section 302(c)(15) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 252(c)(15) shall be cited as the negotiation authority for small purchases which are reserved (set-aside) for small business under section 15(j) of the Small Business Act, as amended (15 U.S.C. 644(j)). When small purchases are not set-aside section 302(c)(3) of the Federal Property and Administrative Services Act of 1949 (41 U.S.C. 252(c)(3)) shall be cited unless FAR 15.206 applies.

515.210 Impractical to secure competition by formal advertising.

This authority shall not be used where negotiation is authorized under FAR 15.211, 15.212, 15.213, or 15.214.

Subpart 515.4—Solicitation and Receipt of Proposals and Quotations

515.402 General.

(a) An oral solicitation is not justified solely because it has been assigned a high issue priority designator (see 515.202(b)) or because of public exigency.

(b) In addition to the documentation requirements of FAR Subpart 15.3, should the issuance of the resulting contract be unduly delayed, the contract file shall be documented with the reasons for the delay and to justify award based on the oral solicitation.

(c) Oral solicitations other than those authorized for small purchases (see 513.106(c) and 513.106–70), shall only be used under the conditions prescribed in FAR 15.402(f), with prior approval at a level higher than the contracting officer.

515.402–70 Telegraphic or telephonic solicitations.

Telephonic solicitations may be used in urgency situations under FAR 15.202, and 515.202 and 515.402. Telegraphic and telephonic requests must make specific reference to all applicable terms and conditions. The reason for using telegraphic or telephonic requests shall be entered in the file. (See FAR 15.402(f).)

515.403 Solicitation mailing lists.

Source lists for negotiated procurements shall be established, maintained, and used in accordance with FAR 14.205 and 514.205 of this Chapter

515.405 Solicitations for information or planning purposes.

515.405–1 General.

Solicitations for information or planning purposes shall be approved by the contracting director, in accordance with FAR 15.405–1.

515.406 Preparing requests for proposals (RFP's) and requests for quotations (RFQ's).

515.406–1 Uniform contract format.

(a) Contracts for utility services and leases of real property are exempted from the requirement for use of the uniform contract format.

(b) All contracts, including leases of real property, shall include the following notice on the first page of the solicitation.

The information collection requirements contained in this solicitation/contract, that are not required by regulation, have been approved by the Office of Management and Budget pursuant to the Paperwork Reduction Act and assigned OMB Control No. 3090-0163.

515.406–2 Part I—The Schedule.

The contracting officer shall insert the provision at 552.215–75, Data Universal Numbering System (DUNS) in solicitations for supplies and services when the contract amount is expected to exceed the small purchase limitation.

515.406–5 Part IV—Representations and Instructions.

The factors for proposal evaluation and award (other than the lowest price) should be determined prior to solicitation. The solicitation shall identify the evaluation factors and when numerical values, percentages, or weights are not specified, shall list the factors in descending order of importance.

515.407 Solicitation provisions.

(a) The contracting officer shall insert the provision at 552.215–71, Telecopier Submissions, Modifications, or Withdrawal of Proposals, in solicitations for supplies and services (including construction) when the contract amount is expected to exceed the small purchase limitation. The provision may be included in small purchase solicitations when firm offers are solicited.

(b) The contracting officer shall insert the provision at 552.215–72, Telegraphic Submissions, Modifications, or Withdrawals of Proposals Received at the GSA Communication Center, in solicitations for supplies and services (including construction) when the contract amount is expected to exceed the small purchase limitation. The provision may be included in small purchase solicitations when firm offers are solicited.

(c) The contracting officer shall insert the provison at 552.215–73, Preparation of Offers-Construction, in solicitations for construction in lieu of the provision at FAR 52.215–13.

(d) The contracting officer shall insert the provision at 552.215–74, Contract Award-Negotiated-Construction, in solicitations for construction in lieu of the provision at FAR 52.215–16.

515.411 Receipt of proposals and quotations.

Classified proposals and quotations shall be handled under FAR 15.411 and the requirements of GSA Order, Freedom of Information Act procedures (ADM 1035.11).

515.411–70 Recording of offers.

Offers shall be abstracted under FAR 14.403 and 514.403.

Subpart 515.5—Unsolicited Proposals

515.500 Scope of subpart.

This subpart implements and supplements the policies and procedures prescribed in FAR Subpart 15.5 for submission, receipt, evaluation, and acceptance or rejection of unsolicited proposals.

515.501 Definitions.

Minimum requirements refers only to those features that are essential to meeting the Government's need.

515.503 General.

Unsolicited proposals may be considered for non-competitive procurement only when the contracting officer has conclusive evidence (as determined by a market search) that the proposer possesses unique capabilities and is the only firm capable of meeting the Government's minimum requirements and the contracting officer has considered the factors in FAR 15.507.

515.504 Advance guidance.

Potential offerors shall be encouraged to make preliminary contacts, as provided in FAR 15.504, with regional contracting offices and/or the Office of GSA Acquisition Policy and Regulations prior to submitting a detailed unsolicited proposal or proprietary data.

515.505 Content of unsolicited proposals.

Potential offerors shall be provided with the description of requirements for unsolicited proposals in FAR 15.505.

515.506 Agency procedures.

(a) The Office of GSA Acquisition Policy and Regulations (VP) is designated as the GSA contact point for unsolicited proposals. The address is:

General Services Administration (VP)
Washington, DC 20405

(b) Regional contracting activities shall be the local contact points for review and acknowledgement of unsolicited proposals.

515.506–1 Receipt and initial review.

(a) Unsolicited proposals shall be reviewed for the information in FAR 15.506–1, and acknowledged as soon after receipt as possible by the local point of contact as follows:

(1) When an unsolicited proposal is received first by the Region, Service, or Staff Office where the evaluation will be performed under FAR 15.506–2, that

organization shall inform the offeror by letter that the proposal has been received. The letter should indicate the name, business address, and telephone number of the individual who will evaluate the proposal.

(2) A copy of the letter to the offeror shall be sent to the Office of GSA Acquisition Policy and Regulations (VP).

(b) When an unsolicited proposal is received first by a Region, Service, or Staff Office that is not in a position to evaluate it, the organization shall forward it to VP, as soon as possible. VP will review the proposal for the information in FAR 15.506–1, and determine which organization will be responsible for evaluating the proposal.

(1) Then the proposal will be sent to the Region, Service or Staff Office that VP has determined will be responsible for the evaluation.

(2) The Region, Service, or Staff Office responsible for evaluating the proposal shall inform the offeror by letter that the proposal has been received. The letter should indicate the name, business address and the telephone number of the individual who will evaluate the proposal.

(3) If the evaluating office forwards the unsolicited proposal to another region, or office, the evaluating office shall notify VP of the location, name, and phone number of the assigned evaluator.

515.506–2 Evaluation.

The evaluation shall be completed under FAR 15.506–2, as soon as practicable (normally within 45 calendar days). The evaluator shall send the evaluation results plus recommended action to VP. If the proposal is rejected the evaluator shall the response to the offeror for the signature of the head of the organization responsible for the evaluation. A copy shall be sent to VP.

Subpart 515.6—Source Selection

515.605 Evaluation factors.

515.605–70 Discounts for early payment.

(a) The soliciting of discounts for early payment presupposes that under the payment terms of the contract, there is sufficient time for the Government to make payment before payment is actually due. Consequently, discounts for early payment should not be solicited in connection with contracts under which payments are required to be expedited in the first place, and there is little or no latitude for making "early" payment (i.e., at least 10 days before payment is otherwise due under the contract). Examples are rental or leasing contracts providing for payment in arrears within a few days after the end of each month.

(b) The policy in FAR 14.407–3 is applicable to competitive negotiated procurements. In this connection, the word "competitive" refers to situations where there is direct competition between offerors for identical supplies or services, such as articles purchased under Government specifications. The clause in 552.232–8(a) shall be included in competitive negotiated solicitations/contracts which may involve the offer of a discount for early payment.

(c) The policy in FAR 14.407–3 is not applicable to sole-source procurements, nor to the procurement of commercial items when the evaluation process involves a comparison of the offeror's price to the Government against the offeror's price (or, discount from a commercial pricelist) to other customers. In these situations, the reasons for the policy in FAR 14.407–3 do not exist, and consideration may be given to discounts for early payment to the extent indicated in the solicitation. Accordingly, the clause in 552.232–8(b) shall be included in all multiple-award type solicitations and resultant contracts.

Subpart 515.8—Price Negotiation

515.803 General.

515.803–70 Cost-reimbursement contracts (construction contracts).

The consideration and discussions during negotiations of construction contracts shall include, to the extent necessary to resolve uncertainties, such matters as:

(a) The location, size, and character of the work and the estimated cost;

(b) The general conditions for the cost-plus-a-fixed-fee contract and the procedures to be followed;

(c) The organization the contractor will use at the site and proposed salaries for those employees;

(d) The types and amount of contractor's own equipment available for the project;

(e) The amount and nature of work to be performed by the contractor's own forces and by subcontract;

(f) The time for completion, liquidated damages (if specified), insurance, and bonds;

(g) The fixed fee and the basis upon which its amount was predicated. (All of these factors, (a) through (f), affect the amont of the fee.)

515.804 Cost or pricing data.

515.804–3 Exemptions from or waiver of submission of certified cost or pricing data.

Approval of the appropriate contracting director shall be obtained in all cases when it is determined that the requirement for cost or pricing data may be waived. (See FAR 15.804–3.)

515.804–70 Refusal to provide cost or pricing data.

Whenever a contractor refuses to provide cost or pricing data, the matter shall be referred to the appropriate contracting director. (See FAR 15.804.)

515.805 Proposal analysis.

515.805–1 General.

Contracting officers may request field pricing support whenever assistance is required to evaluate price reasonableness. Within GSA "field pricing support" is provided by the Assistant Inspector General—Auditing, or the Regional Inspector General—Auditing, as appropriate.

Subpart 515.9—Profit

515.902 Policy.

(a) Structured approach for determining profit fee objectives.

(1) The contracting officer's analysis of these profit factors is based on information available to the Government before negotiations. Such information is furnished in proposals, audit data, performance reports, preaward surveys and the like. The structured approach also provides a basis for documentation of a profit objective, including an explanation of any significant departure from this objective in reaching a final agreement. The extent of documentation should be directly related to the dollar value and complexity of the proposed procurement.

(2) The negotiation process does not require agreement on individual estimated cost elements or profit elements. The profit objective is a part of an overall negotiation objective. Specific agreement on the exact weights or values of the individual factors is not required and should not be attempted.

(b) Exemptions from requirement to use the structured approach.

(1) Under exempted procurements, other methods for establishing profit objectives may be used. Generally, such methods will be supported in a manner similar to that used in the structured approach (profit factor breakdown and documentation of profit objective). However, factors within the structured approach considered inapplicable to the

procurement shall be excluded from the profit objectives. The following types of procurements are exempt from the structured approach:

(i) Management contracts for operation and/or maintenance of Government facilities;

(ii) Contracts primarily requiring delivery of material supplied by subcontractors;

(iii) Termination settlements;

(iv) Cost-plus-award-fee contracts;

(v) Contracts where only price analysis is required (FAR 15.805);

(vi) Contracts and contract modifications of $100,000 or less in value; and

(vii) Architect-engineer and construction contracts.

(2) Other exemptions may be made in the negotiation of contracts having unusual pricing situations where the structured approach is determined to be unsuitable. Such exemptions shall be justified in writing and approved by the head of the contracting activity.

515.905 Profit analysis factors.

(a) The following factors shall be considered in all situations in which profit is to be specifically negotiated. The weight ranges listed after each factor shall be used when the structured approach is used.

Profit factors	Weight ranges in percent
Contractor Effort:	
Material acquisition	1 to 4.
Conversion direct labor	4 to 12.
Conversion related indirect cost	3 to 8.
Other costs	1 to 3.
General management	4 to 8.
Other Factors:	
Contract cost risk	0 to 7.
Capital investment	−2 to +2.
Cost-control and other past accomplishments	−2 to +2.
Federal socio-economic programs	−.5 to +.5.
Special situations and independent development	−2 to +2.

(b) GSA Form 1766, Structured Approach Profit/Fee Objective, shall be used to facilitate the profit objective computation. The contracting officer shall measure the Contractor Effort by the assignment of a profit percentage within the designated weight ranges to each element of cost recognized. The amount calculated for facilities capital cost of money shall not be included in the cost base for the computation of the profit objective.

(c) *Facilities capital cost of money.* When facilities capital cost of money is included as an item of cost in the contractor's proposal a reduction in the profit objective shall be made in an amount equal to the amount of facilities capital cost of money allowed.

515.905-1 Common factors.

(a) The categories listed under Contractor Effort are for reference purposes only. Individual proposals may be in different formats; but since these categories are broad and basic they provide sufficient guidance to evaluate all items of cost.

(b) After computing a total dollar profit for Contractor Effort, the contracting officer shall calculate the specific profit dollars for contract cost risk, capital investment, cost-control and other past accomplishments, Federal social-economic programs and special situations. This is done by multiplying the total Government cost objective, exclusive of any cost of money for facilities capital, by the specific weights assigned to the elements within the Other Factors category.

(c) In determining the value of each factor, the contracting officer should be governed by the definition, description, and purpose of the factors together with considerations for evaluating them as prescribed in FAR 15.905-1 and the following:

(1) *General management.* Management problems surface in various degrees and the management expertise exercised to solve them should be considered as an element of profit. For example, a new program for an item that involves advanced state of the art techniques may casue more problems and require more managerial time and abilities of a higher order, than one that is a follow-on contract. If new contracts create more problems and require a higher profit weight, follow-ons should be adjusted downward as many of the problems should have been solved. An evaluation should be made of the underlying managerial effort involved on a case-by-case basis.

(2) *Other costs.* Include all other direct costs associated with contractor performance under this item (e.g., travel and relocation, direct support, and consultants). Analysis of these items of costs for the purpose of assigning profit weights shall include: (i) The significance of the costs, (ii) the nature of the costs, and (iii) how much they contribute to contract performance.

(3) *Contract cost risk.* Where proper contract type selection has been made, the reward for risk by contract type would usaully fall into the following percentage ranges:

	Percent
Cost-reimbursement type contracts	0–3
Fixed-price type contracts	3–7

(i) Within the above ranges, cost-plus-a-fixed-fee contract normally would not justify a reward for risk in excess of 0 percent, unless the contract contains cost risk features such as ceilings on overheads. In such cases, up to 1 percent may be justified. Cost-plus-incentive-fee contracts fill the remaining portion of the 0 to 3 percent range with weightings directly related to such factors as confidence in target cost, share ratio of fee(s), etc. The weight range for fixed-price contracts in wide enough to accommodate the many types of fixed-price arrangements. These include fixed-price incentive, firm fixed-price with economic price adjustment, fixed-price with prospective or retroactive price determination, and firm fixed-price contracts. Weighting should indicate the cost risk assumed, with only firm fixed-price contracts reaching the top end of the range.

(ii) The contractor's subcontracting program may have significant impact on the contractor's acceptance of risk under a contract form. It could cause risk to increase or decrease in terms of both cost and perfomance. This consideration should be a part of the contracting officer's overall eavaluation in selecting a factor to apply for cost risk. It may be determined, for instance that the prime contractor has effectively transferred real cost risk to a subcontractor and the contract cost risk evaluation may, as a result, be below the range which would otherwise apply for the contract type being proposed. The contract cost risk evaluation should not be lowered, however, merely on the basis that a substantial portion of the contract cost represents subcontracts without any substantial transfer of contractor's risk.

(iii) In making a contract cost risk evaluation in the definitization of letter contracts, unpriced change orders, and unpriced orders under basic ordering agreements; consideration should be given to the effect on total contract cost risk as a result of having partial performance before definitization. Under some circumstances the total amount of cost risk may have effectively reduced. Under other circumstances, the contractor's cost risk may have remained substantially unchanged. To be equitable, the determination of a profit weight for application to the total of all recognized costs, both those incurred and those yet to be expended, must be made with consideration to all attendant circumstances; not just to the portion of costs incurred or percentage of work completed prior to definitization.

(iv) Service contracts, such as janitorial, guard servcie, etc., shall have a weight range for cost risk of 0 to 4 percent. There may be instances where a firm fixed-price contract, which is not

priced on a labor-hour method, warrants additional consideration for contractor cost risk. In those circumstances, a weight of up to 4 percent is authorized. Conversely, a cost-plus-a-fixed-fee service contract normally should be priced using a zero cost risk factor.

(4) *Capital investment.* GSA contractors are normally encouraged to perform their contracts with the minimum of financial, facilities, or other assistance from the Government. It is the purpose of this factor to encourage the contractor to acquire and use its own resources to the maximum extent possible. The evaluation of this factor for profit weights should include an analysis of the following:

(i) *Facilities.* To evaluate how this factor contributes to the profit objective requies knowledge of the level of facilities use needed for contract performance, the source of financing of the required facilities, and the overall cost effectiveness of the facilities offered. Contractors who furnish their own facilities which significantly contribute to lower total contract costs should be provided with additional profit. Contractors who rely on the Government to provide or finance needed facilities should receive a corresponding reduction in profit. Situations between the above examples should be evaluated on their merits with either a positive or negative profit weight adjustment, as appropriate, being made. However, when a contractor who owns a large quantity of facilities is to perform a contract which does not benefit from these facilities, or where a contractor's use of its facilities has a minimum cost impact on the contract, profit need not be adjusted.

(ii) *Payments.* In analyzing this factor, consideration should be given to the frequency of payments by the Government to the contractor. The key to this weighting is to give proper consideration to the impact the contract will have on the contractor's cash flow. Generally, for payments more frequent than monthly, negative consideration should be given, with maximum reduction being given as the contractor's working capital approaches zero. Positive consideration should be given for payments less frequent than monthly with additional consideration given for payments less frequent than the contractor's or the industry's normal practice.

(5) *Cost control and other past accomplishments.* A contractor's past and present performance should be evaluated in such areas as quality of product or service, meeting performance schedules, efficiency in cost control (including need for and reasonableness of cost incurred), accuracy and reliability of previous cost estimates, degree of cooperation by the contractor (both business and technical), timely processing of changes and compliance with other contractual provisions, and management of subcontract programs. Where a contractor has consistently achieved excellent results in the foregoing areas as compared with other contractors in similar circumstances, such performance merits a proportionately higher profit weight is appropriate. A poor record in this regard should be reflected by a reduced or negative weight.

(6) *Federal socio-economic programs.* The contractor's policies and procedures which energetically support such Government programs and achieve successful results should be given positive consideration. Failure or unwillingness on the part of the contractor to support these programs should be assigned negative profit weight consideration.

(7) *Special situations and independent development.* (i) *Unusual pricing agreements.* Occasionally, unusual contract pricing arrangements are made with the contractor wherein they agree to participate in the sharing of contract costs. In such circumstances, a positiveprofit weight may be assigned for this factor commensurate with cost savings.

(ii) *Spin-off benefits.* A negative weight may be appropriate when the contractor is expected to obtain spin-off benefits as a direct result of the contract (e.g., products with commercial application).

515.905–70 Nonprofit organizations.

(a) The structured approach was designed for arriving at profit or fee objectives for other than nonprofit organizations. However, if appropriate adjustments are made to reflect differences between profit and nonprofit organizations, the structured approach can be used as a basis for arriving at fee objectives for nonprofit organizations. Therefore, the structured approach, as modified in paragraph (b) below, shall be used to establish fee objectives for non-profit organizations. The modifications should not be applied as deductions against historical fee levels, but rather, to the fee objectives for such a contract as calculated under the structured approach.

(b) For purposes of this subparagraph, nonprofit organizations are defined as those entities organized and operated exclusively for charitable, scientific, or educational purposes, no part of the net earnings of which inure to the benefit of any private shareholder or individual, and which are exempt from Federal income taxation under section 501 of the Internal Revenue Code.

(c) For contracts with nonprofit organizations where fees are involved, an adjustment of up to 3 percent will be subtracted from the total profit-fee objective. In developing this adjustment, it will be necessary to consider the following factors:

(1) Tax position benefits;

(2) Granting of financing through letters of credit;

(3) Facility requirements of the nonprofit organization; and

(4) Other factors which may work to the advantage or disadvantage of the contractor in its position as a nonprofit organization.

Subpart 515.10—Preaward and Postaward Notifications, Protests, and Mistakes

515.1001 Notifications to offerors.

(a) The provisions of FAR 15.1001 and 515.407 regarding the issuance of advance notices of award shall be followed for negotiated contracts.

515.1070 Release of information concerning unsuccessful offerors.

Information concerning unsuccessful offerors, including identity and pricing data, ordinarily will not be released before award. GSA Order, GSA Freedom of Information Act (FOI) procedure (see ADM 1035.11) should be consulted to determine what information may be disclosed after award. When small purchase procedures are used, the names and dollar amounts of unsuccessful offers may be released upon request without processing through the formal FOI procedures.

PART 516—TYPES OF CONTRACTS

Subpart 516.3—Cost-Reimbursement Contracts

516.307 Contract clause.

The contracting officer shall insert the clause at 552.216–70, Fixed Fee-Construction, in cost-plus-a-fixed-fee construction contracts when the contractor's fee is negotiated on the basis of performance of specified portions of the work by the contractor and subcontractor, respectively.

(40 U.S.C. 486(c))

PART 517—SPECIAL CONTRACTING METHODS [RESERVED]

SUBCHAPTER D—SOCIOECONOMIC PROGRAMS

PART 519—SMALL BUSINESS AND SMALL DISADVANTAGED BUSINESS CONCERNS

Subpart 519.5—Set-Asides for Small Business

519.501 General.
519.502–1 Requirements for setting aside an acquisition.
519.502–2 Total set-asides.
519.502–3 Partial set-asides.
519.503 Setting aside a class of acquisitions.
519.505 Rejecting set-aside recommendations.
519.506 Withdrawing or modifying set-asides.

Subpart 519.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

519.705–6 Postaward responsibilities of the contracting officer.

Authority: 40 U.S.C. 486(c).

Subpart 519.2—Policies

519.201 General policies.

The head of each contracting activity is responsible for results under the small business program.

519.202 Specific policies.

(a) Each contracting activity shall use its best efforts to identify procurements where a potential exists for increasing the small business share of contract awards. Whenever feasible, contracting officers shall seek the assistance of GSA's Business Service Center (BSC) personnel and Small Business Administration (SBA) procurement representatives in locating qualified small business sources.

(b) The head of each contracting activity shall develop and continuously maintain a training program as necessary to emphasize the importance of small business set-aside program.

(c) Each BSC will keep all other BSC's and the Office of Small and Disadvantaged Business Utilization (AU) informed on items of mutual interest under the small business program.

(d) Each BSC will:

(1) Take appropriate actions to publicize advance and current information about regional and national GSA business opportunities to the maximum extent feasible.

(2) Provide maximum advance and current information, assistance, and counseling of such nature, extent, and timeliness so as to enable small business concerns to take full advantage of the available business opportunities and to compete for contracts.

(3) Develop publications and public relations techniques designed to obtain maximum interest and participation of small business concerns. This activity will include, but not be limited to, the following:

(i) Arranging for and participating in meetings with business groups such as Chambers of Commerce, trade associations and similar organizations, State development corporations, Governors' and Mayors' advisory groups, local business and civic organizations, and small business councils.

(ii) Developing, preparing, and distributing informational material designed to stimulate interest on the part of small business concerns.

(iii) Developing interest and cooperation on the part of trade publications, the local press, and other media.

(e) Proposed regulations and procedures affecting the operation of the small business program shall be coordinated with the Office of Small Disadvantaged Business Utilization (AU) prior to issuance.

519.202 Data collection and reporting requirements.

(a) *Responsibilities* (1) The Office of Small and Disadvantaged Business Utilization (AU) is responsible for collecting section 8(a) award information from Regional Offices and preparing cumlative report.

(2) The regional contracting officer is responsible for submitting section 8(a) contract award information to the regional Business Service Center (BSC).

(3) The regional Business Service Center is responsible for submitting the section 8(a) contract award information to AU as an attachment to the GSA Form 3077, FY 19—Procurement Preference Program Goal Achievement, (see ADM 2800.17). This data is required on the the 20th calendar day following the end of each quarter.

(4) Central Office services and commodity center contracting officers are responsible for submitting the section 8(a) contract award information to AU.

(b) *Reporting procedures.*

(1) GSA Form 2677, Minority Contract Fact Sheet, shall be used to report the information required by this section to the appropriate BSC at the time of award.

(2) Regional Business Service Centers shall report all amendments of modifications to existing section 8(a) contracts on a separate GSA Form 2677.

Subpart 519.3—Determination of Status as a Small Business Concern

519.302 Protesting a small business representation.

(a) If a protest regarding small business size status is received after expiration of the 5-day period specified in FAR 19.302, or if the protest is received after contract award, the matter shall be presented to SBA (unless there is no validity to the protest as in the case where SBA has recently determined the size status of the firm in question) on the basis that the contracting officer questions the size status of the firm involved. The contracting officer's reason for raising the question should be stated and copies of the pertinent available documents should be furnished to SBA. If SBA determines that the concern in question is not a small business concern, the following action shall be taken.

(1) If award has not been made, the offer shall be rejected as nonresponsive when the procurement is totally set-aside for small business concerns. When the procurement is partially set-aside, the firm which has misrepresented its size status shall not be considered for preferential award under the set-aside portion.

(2) If award has been made, the contract should be terminated in accordance with the provisions of the clause at 55.219–70, Termination-Erroneous Representation Concerning Size Status, unless termination would not be in the best interest of the Government. Prior to final action under this paragraph, the case shall be referred to the cognizant contracting directors for approval. Such submissions shall include the status of performance of the contract, the urgency of need for the items covered, any evidence bearing on the issue of whether the erroneous certification was willful or inadvertent, any other information which would be helpful in determining whether the contract should be terminated and whether the matter should be referred to the Office of the Inspector General (J) for possible Department of Justice action.

Subpart 519.5—Set-Asides for Small Business

519.501 General

When the solicitation provides for a total or partial small business set-aside, or labor surplus area set-aside, it is essential that the applicable small business size standard be set forth clearly in the solicitation. (See FAR 19.502–2 and 19.502–3.) In addition, the clause at 552.219–70, Termination-Erroneous Representation Concerning Size Status, shall be included in all solicitations for supplies and services (excluding construction).

519.502–1 Requirements for setting aside an acquisition.

(a) *General.* Contracting activities, to the maximum extent feasible, shall make unilateral small business set-asides on all procurements qualifying therefor, as provided in FAR Subpart 19.5 and as required by paragraphs (c) through (j) below. Priority consideration shall be given to establishing class set-asides. Contracting activities shall periodically review individual set-asides to identify commodities and services suitable for class set-asides.

(b) *Small purchases.* (1) Procurements estimated to have a contract value of less than $10,000 and which are subject to small purchase procedures shall be reserved exclusively for small business concerns as required by Pub. L. 95–507. Offers shall be solicited from small business concerns only, unless the contracting officer makes a determination that there is no reasonable expectation that two or more small business concerns will submit acceptable offers at a reasonable price. The contract file shall be documented accordingly.

(2) While Pub. L. 95–507 does not require small purchases between $10,000 and $25,000 be reserved for small business, contracting activities may make a determination to set-aside such purchases on a class basis.

(c) *Class set-aside determination.* Execpt for construction contracts subject to provisions of this 519.502–1 (d) and (e), small business class set-asides will normally be made on a unilateral basis by the contracting officer and documented in accordance with 519.503(b). Class set-aside determinations shall be reviewed at least annually.

(d) *Construction contracts from $10,000 to $500,000.* In an understanding with the SBA, every proposed procurement for construction, including alteration, maintenance, and repairs estimated to be in excess of $10,000 and under $500,000 shall be considered individually as though the SBA had initiated a set-aside request and shall be set aside, except as otherwise provided in 519.502–1 (e) and (f).

(e) *Construction contracts from $500,000 to $1 million.* The Commissioner, Public Buildings Service (P), has unilaterally established a class set-aside for procurements of construction, including alteration, maintenance, and repairs estimated to cost between $500,000 and $1 million, except as otherwise provided in 519.502–1(f).

(f) *Exemption of certain construction and repair contracts.* All separate construction contracts under a construction-management-phased construction project and contracts for repair of mechanical systems, such as elevators, steam generators, air-conditioners, or distributing systems, are exempt from the requirements of 519.502–1(d) or (e). However, contracting officers shall review each such exempt procurement and initiate a small business set aside where it appears that there would be sufficient competition to ensure award at a reasonable price and set-aside is otherwise feasible.

(g) *Building service contracts in excess of $10,000.* Each contracting activity shall, to the maximum extent feasible, arrange for the making of small business set-asides on all building service contracts which qualify therefor as provided in FAR Subpart 19.5. In the initiation of small business set-asides, contracting activities should give priority consideration to the establishment of class set-asides. Contracting activities shall periodically review individual set-asides to identify services suitable for class set-asides.

(h) *Architect-Engineer contracts.* (1) All architect-engineer contracts for construction projects with an estimated construction contract amount not exceeding $2.5 million shall be set aside for small business.

(2) A synopsis message indicating that the architect-engineer contract is set aside for small business shall be prepared and forwarded as provided by FAR 5.207.

(i) *All other contracts.* All contracts other than those contracts subject to the provisions of 519.502–1 (c), (d), (e), (f), (g), and (h) are subject to set-aside in accordance with the provisions of FAR 19.501–2 and 519.502–1(a) of this chapter.

(j) *Determination not to set aside.* Where the contracting officer determines that a small business set-aside of a procurement is not feasible, the procedures defined in 519.505 shall be followed.

519.502–2 Total set-asides.

When a total small business-labor surplus area set-aside, a total small business set-aside or a total labor surplus area set-aside is made, contracting activities using Standard Form 33, Solicitation, Offer and Award, may include an appropriate statement to that effect on the reverse side of the form. Contracting activities using solicitation for offer forms other than SF–33 may use the cover sheet to include an appropriate notice statement of set-aside.

519.502–3 Partial set-asides.

(a) *Initiating partial set-asides.* Contracting officers shall continuously review the items for which they have procurement responsibility (both national and regional requirements) and make partial small business set-asides as provided herein. Particular attention shall be given to high volume items which are not totally set aside and which have a potential for being partially set aside. Partial set-asides for stock items may be made when the following Economic Order Quantity (EOQ) factors are present: (1) For annual contracts, an EOQ factor not exceeding 3 months; and (2) for 6-month contracts, an EOQ factor not exceeding 1 month.

(b) *Preparation of solicitation.* In addition to the requirements of FAR 19.502–3, the following are applicable when preparing solicitations involving requirements-type contracts and partial small business set-asides:

(1) The clause at 552.219–71, Allocation of Orders—Partially Set-Aside Item, shall be included in the solicitation.

(2) When a group of items is covered by partial set-aside awards, it is not necessary to order identical quantities of each item from each portion of the award so long as at least a 60/40 division of the total value of the orders issued is attained. Additional orders needed to bring the value division within 60/40 limits can be made for any item included in the partial set-aside awards regardless of previous quantities ordered on that item.

(c) *Evaluation of offers and contract award.* (1) Offers on the non-set-aside portion shall be evaluated under normal procedures while those on the set-aside portion shall be evaluated under FAR 19.502–3. Normally, only one award will be made for each item or subitem whether it be of the non-set-aside or of the set-aside portion.

(2) When the set-aside portion of an item is to be awarded to the same concern which was awarded the

corresponding non-set-aside portion of an item, such an award shall be documented by issuing a separate contract in the same manner as if two different concerns are involved.

(3) If offers are received which appear designed to take unfair advantage of other offerors by devices such as unrealistically low offers on mere token quantities, the matter shall be referred to the appropriate contracting director for resolution.

(d) *Procurement of unawarded set-aside portions.* If the entire set-aside portion cannot be awarded under the partial set-aside procedures, the unawarded portion shall be procured by advertising or negotiation, as appropriate, in accordance with FAR 19.502–3.

(e) *Partial coverage.* When only the non-set-aside portion of the procurement is awarded prior to the expiration of the current contract, contractual documents covering the transaction shall be distributed to the ordering activities to provide at least partial coverage of the requirements.

(f) *Contract coding.* To asure that set-asides are properly identified for reporting purposes, information regarding awards based on partial or total set-asides shall be included on Form 1535, Recommendation for Award(s), as appropriate. Further, if a class set-aside is involved, the face of the GSA Form 1535 shall be annotated as follows: "Class set-asides apply to items ———."

(g) *Ordering procedures.* The Inventory Manager is responsible for ensuring that the specified division of orders is made in those cases where two contractors are to supply one item to one destination.

519.503 Setting aside a class of acquisitions.

(a) *Clarification of class set-aside definition.* In further explanation of FAR 19.503, a class set-aside may consist of an item (or service), a group of related items under an Federal Supply Class (FSC), or a whole FSC class when restricted to small business on more than a one time basis, as distinct from a one-time, basis. Under this definition, a single item or a group of items restricted to small business on more than a one time basis, even though constituting only a small portion of an FSC class, is defined as a class set-aside.

(b) *Determining the set-aside status of an item.* The fact that an item (or service), group of items, or a FSC class is the subject of a class set-aside, and presumptively will be set aside on the next procurement, does not mean that it is automatically set aside without consideration of events which may have occurred since the last procurement. The contracting officer must determine if intervening events have changed the situation so that it is no longer in the best interest of the Government to make a particular set-aside (either individual or class set-aside). When the conclusion is reached that a set-aside should be dissolved, it must be accomplished in accordance with FAR 19.506 and considered only as a one-time dissolution if feasible.

(c) The determination to make a partial or total small business set-aside in connection with an individual procurement shall be noted in the contract file.

(d) Class set-aside determinations shall be documented substantially in the format set forth below and a copy shall be retained in the contract file covering the commodity or service involved.

Small Business Class Set-Aside Determination

In accordance with FAR 19.502–2, it is hereby determined that procurements by the (*name of contracting activity*) of the following commodities or services shall be set aside for small business concerns on a class basis. This determination shall be reviewed on (date), or, in any event, not later than 1 year after the above determination date. This determination does not apply to any individual procurement for which small purchase procedures are to be used and applies only to the contracting activity named above.

(List items or services)

The above format should be appropriately modified with respect to any class of procurements proposed to be partially set aside. It shall be signed by the contracting officer having procurement responsibility for the class of commodities or services involved and approved by the appropriate contracting director or his designee.

(e) Reviews of the proposed small business non-set-aside procurement shall be completed by reviewing offices within five workdays. If no response or objection is received within five workdays, the contracting officer may assume concurrence by the reviewing offices in the determination not to make a small business set-aside procurement.

(f) When the reviewing officials mentioned above can provide additional small business sources or if they have other information which might result in a set-aside procurement, the sources and/or information shall be furnished to the contracting officer within the prescribed time. In this connection, reviewing officials who furnish additional small business sources should be completely aware of the capability of these sources to produce the item to be procured. Additionally, the furnishing of these small business sources should be based on information (including firms' interest to bid) obtained through actual contact with them and not merely firms selected from general registers or listings. If time is of the essence, additional small business sources and other pertinent information may be given orally to the contracting officer. The contracting officer shall consider any suggestion received before making a final non-set-aside determination.

519.505 Rejecting set-aside recommendations.

(a) When the contracting officer determines that a procurement cannot be restricted for small business, the reasons for this determination shall be recorded on GSA Form 2689, Procurement Not Set-Aside, and submitted for review. When small purchases (under $10,000) are not set-aside for small business, the contracting officer need only document the file.

(b) Responsibility for these reviews shall be as follows:

(1) When deciding not to have a set-aside, the contracting officer shall notify the appropriate GSA Regional Director of Business Service Centers or, in Central Office procurements, the Office of Small and Disadvantaged Business Utilization (AU). These officials are responsible for any coordination with the Small Business Administration (SBA).

(2) If the SBA representative does not agree to a proposed non-set-aside action, the procedures set forth in FAR 19.505 shall be followed.

(c) If there is a disagreement between the GSA reviewing official and the contracting officer concerning the initiation of a small business set aside, the disagreement shall be referred to the head of the contracting activity, as defined in FAR Subpart 2.1.

(d) In the event the disagreement is not resolved, the following procedures shall be followed:

(1) In no circumstances will procurement actions be initiated until small business set-aside disagreements have been formally resolved by the appropriate officials in accordance with this regulation.

(2) In any procurement where a set-aside is not considered feasible, the reasons for not making a set-aside shall be summarized in the contract file. In addition, if the Central Office reviewing official or the Regional Director, Business Service Center has recommended a set-aside for that procurement action, he/she shall be

furnished a copy of the summary of the reasons for not making a set-aside. In other cases, the contract files containing the reasons for not making a set-aside shall be made available for review by the Central Office reviewing official or the Regional Director, Business Service Center or his designee, on an on-site basis.

(3) In any case where the Central Office reviewing official or the Regional Director, Business Service Center disagrees with a contracting activity's determination not to make a small business set-aside on a proposed procurement, or in any case where the Central Office reviewing officials or the Regional Director, Business Service Center develops information which indicates that a small business set-aside should be made on a scheduled procurement action, he will promptly so notify the contracting officer.

519.506 Withdrawing or modifying set-asides.

(a) The determination not to make a set-aside shall not be changed (except when there is an appeal by the Small Business Administration) once the solicitation is issued even if information subsequently available discloses a basis for setting aside an unrestricted procurement, unless the contracting officer determines in writing that to do so will not unduly delay the procurement process.

(b) A set-aside must be dissolved in accordance with FAR 19.506. Depending upon the procurement, a resolicitation may be required.

(c) In accordance with the provisions of FAR 19.506, the notice shall:

(1) Describe the procurement and the fact that it has been changed to an unrestricted procurement; and

(2) Establish a new date for submission of bids/offers, if necessary.

(d) The contracting officer may remove a set-aside under circumstances where:

(1) It becomes apparent that there will not be adequate competition with the small business community; or

(2) An amendment is issued which will increase materially the scope or extent of the procurement which would diminish participation by small business.

Subpart 519.7—Subcontracting With Small Business and Small Disadvantaged Business Concerns

519.705–6 Postaward responsibilities of the contracting officer.

(a) In addition to the requirement in FAR 19.705–6, Contracting officers shall notify the Director of the GSA Business Service Center, in the region where a contractor will perform a contract, of each contract award (negotiated or advertised) which is $500,000 or more ($1 million or more for construction), amendment, or modification that contains a subcontracting plan. The notice shall contain a copy of the subcontracting plan as well as the following information:

(1) Contractor's name.

(2) Address.

(3) Place of performance.

(4) Dollar amount of contract award.

(5) Period of contract performance.

(6) Description of contract items (supplies or services).

(7) Contracting officer's name and address.

(b) The regional Director, of the GSA Business Service Center, shall retain the notice and the contractor's subcontracting plan.

PART 522—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

Subpart 522.1—Basic Labor Policies

Sec.
522.101 Labor relations.
522.101–1 General
522.103 Overtime.
522.103–4 Approvals.

Subpart 522.3—Contract Work Hours and Safety Standards Act

522.302 Computation of overtime and liquidated damages.
522.303 Administration and enforcement.

Subpart 522.4—Labor Standards for Contracts Involving Construction

522.400 Scope of subpart.
522.401 Applicability.
522.401–1 Construction contracts.
522.401–2 Supply, service, maintenance or other contracts involving construction.
522.402 Statutory and regulatory requirements.
522.402–1 Davis-Bacon Act.
522.402–2 Copeland Act.
522.402–3 Contract Work Hours and Safety Standards Act.
522.402–4 Department of Labor regulations.
522.403 Contract clauses.
522.404 Wage determinations.
522.404–1 Types of wage determinations.
522.404–2 Procedure for requesting determinations.
522.404–3 Wage determinations in solicitations and contracts.
522.404–4 Modifications of wage determinations.
522.404–5 Wage determination appeals.
522.405 Administration and enforcement.
522.405–1 Policy.
522.405–2 Wages, fringe benefits, and overtime.
522.405–3 Additional classifications.
522.405–4 Apprentices and trainees.
522.405–5 Subcontracts.
522.405–6 Payrolls and statements.
522.405–7 Compliance checking.
522.405–8 Investigations.
522.405–9 Requests for restitution of underpayments.
522.405–10 Withholdings from contract payments.
522.405–11 Contract terminations.
522.405–12 Cooperation with the Department of Labor.
522.405–13 Overtime and liquidated damages under the Contract Work Hours and Safety Standards Act.
522.405–14 Enforcement reports.
522.405–15 Disposition of disputes arising out of construction contract labor standards reports.
522.405–16 Debarment.

Subpart 522.6—Walsh-Healy Public Contracts Act

522.608 Procedures.
522.608–2 Determination of eligibility.
522.608–3 Protest against eligibility.
522.608–4 Award pending final determination.
522.608–6 Postaward.

Subpart 522.8—Equal Employment Opportunity

522.803 Responsibilities.
522.804 Affirmative action programs.
522.804–1 Nonconstruction.
522.804–70 Reports and other required information.
522.804–71 Furnishing information to contractors.
522.805 Procedures.
522.807 Exemptions.

Subpart 522.10—Service Contract Act of 1965

522.1003 Applicability.
522.1006 Clauses for contracts over $2,500.
522.1007 Notice of intention to make a service contract.
522.1008 Wage determinations and collective bargaining agreements.
522.1011 Hearings.

Subpart 522.13—Special Disabled and Vietnam Era Veterans

522.1303 Waivers.
522.1306 Complaint procedures.

Subpart 522.14—Employment of the Handicapped

522.1403 Waivers.
522.1406 Complaint procedures.

Authority: 40 U.S.C. 486(c).

Subpart 522.1—Basic Labor Policies

522.101 Labor relations.

522.101–1 General.

The contracting officer shall include the clause at FAR 52.222–1, Notice to the Government of Labor Disputes, in solicitations and contracts in all acquisitions involving items on the DOD Master Urgency List and in any other contract of a class or kind which the head of the contracting activity concerned determines to be appropriate

for the use of such a clause (see FAR 22.101–1(e)).

522.103 Overtime.

522.103–4 Approvals.

The head of the program office or his/her designee is the agency official responsible for approval of overtime.

Subpart 522.3—Contract Work Hours and Safety Standards Act

522.302 Computation of overtime and liquidated damages.

The provisions of 522.405–13 apply to all contracts covered by the Contract Work Hours and Safety Standards Act, including construction contracts.

522.303 Administration and enforcement.

The procedures and reports required in 552.405 in connection with the Contract Work Hours and Safety Standards Act apply to all contracts covered by that Act, including construction contracts.

Subpart 522.4—Labor Standards for Contracts Involving Construction

522.400 Scope of subpart.

This subpart sets forth the labor standards applicable to construction contracts, including the policies and procedures and the statutory basis for these standards.

522.401 Applicability.

The requirements of this Subpart 522.4 apply to construction contracts estimated to exceed $2,000 and, under some circumstances, to other types of contracts involving construction. For purposes of implementing the labor standards, the terms as defined in 29 CFR 5.2 shall govern.

522.401–1 Construction contracts.

(a) A contract is for construction if it is solely or predominantly for construction as defined in 29 CFR 5.2(j).

(1) These requirements are applicable only if the construction work is, or reasonably can be foreseen to be, performed at a particular site so that wage rates can be determined for the locality.

(2) These requirements do not apply to contracts solely for dismantling, demolition, or removal of improvements, though certain of the statutes mentioned herein may apply to such contracts as prescribed in FAR Subpart 37.3.

(3) These requirements apply to manufacture or fabrication of materials and components on the site by a construction contractor or subcontractor under a contract otherwise subject to these requirements but do not apply to other manufacturing or furnishing of equipment, components, or other materials.

(4) These requirements do not apply to employees of railroads operating under collective bargaining agreements that are subject to the provisions of the Railway Labor Act.

(b) Under contracts for construction as described in 522.401–1(a), the requirements of this subpart apply only to work performed by mechanics and laborers at the site of the work as defined in 29 CFR 5.2.

(1) "Laborer" or "mechanic" are construed to include at least those workers whose duties are manual or physical in nature as distinguished from mental or managerial whether employed by a prime contractor or by a subcontractor of any tier. The term includes any workers who work with tools or equipment or perform the work of a trade, apprentices and trainees, and, in the case of contracts subject to the Contract Work Hours and Safety Standards Act, watchmen and guards. The term does not apply to employees whose duties are primarily administrative, executive, or clerical, rather than manual. Persons employed in a bona fide executive, administrative, or professional capacity as defined in 29 CFR Part 541 are not deemed to be laborers or mechanics. Working foremen who devote more than 20 percent of their time during a workweek to mechanic or laborer duties and do not meet the criteria of 29 CFR Part 541, are laborers and mechanics for the time so spent. Every person performing the duties of a laborer or mechanic is employed regardless of any contractual relationship alleged to exist between the contractor and such person.

(2) The "site of the work" is limited to the physical place or places where the construction called for in the contract will remain when work on it has been completed and to other adjacent or nearby property used by the contractor or subcontractor in such construction which can reasonably be said to be included in the "site" because of proximity. For example, if a small office building is being erected, the "site of the work" will normally include no more than the building itself and its grounds and other land or structures "down the block" or "across the street" which the contractor or subcontractor uses in the course of his performance on the particular contract. In the case of larger contracts such as for a large building, an airport, or a dam, the "site of the work" is necessarily more extensive and includes the whole area in which the contract construction activity will take place. Fabrication plants "mobile factories," batch plants, borrow pits, job headquarters, tool yards, etc., are part of the "site of the work" provided they are dedicated exclusively or nearly so to performance on the contract and are so located in proximity to the actual construction location that it would be reasonable to include them. Once the limits of "site of the work" have been determined, the Secretary's wage rate decision is applicable only to those mechanics and laborers employed by a contractor or subcontractor within such limits (that is, upon the "site of the work"), including drivers who temporarily leave the "site" to transport materials and equipment used in the course of contract operations. Not included in the "site of the work" are permanent home offices, branch plant establishments, fabrication plants, and tool yards of a contractor or subcontractor whose locations and continuance in operation are determined wholly without regard to a particular Federal or federally assisted contract or project. In addition, fabrication plants, batch plants, borrow pits, job headquarters, tool yards, etc., of a commercial supplier or materialman which are established by a supplier of materials for the project before opening of bids and not on the project site, are not included in the "site of the work". Such permanent, previously etablished facilities are not a part of the "site of the work", even where the operations for a period of time may be dedicated exclusively, or nearly so, to the performance of a contract.

(3) Other terms (i.e., contract building, work, public building, public work, and wages) shall have the meaning as defined in 29 CFR 5.2.

522.401–2 Supply, service, maintenance, or other contracts involving construction.

(a) The requirements of this Subpart 522.4 do not ordinarily apply to supply, service, maintenance, research and development, or other nonconstruction contracts. However, contracts predominantly for nonconstruction work may also involve construction work. Construction items under such contracts are not exempted from the requirements of this subpart simply because the work is to be performed under a contract which also requires, for example, the furnishing of supplies. On the other hand, where construction work is to be performed in support of other work such as manufacturing and furnishing of supplies, the circumstances may be such that the construction work may be so merged with nonconstruction activity or may be so fragmented in terms of the locations or time spans in which it is to be performed that it cannot be

segregated as a separate contractual requirement for construction, alteration, or repair of a public building or public work. Generally, the requirements apply to and the appropriate clauses in 552.222–70 thru 552.222–82, must be included in, a prime contract if:

(1) The contract contains specific requirements for substantial amounts of construction work, or it is ascertainable at the contract date that a substantial amount of construction work will be necessary for the performance of the contract. The word "substantial" relates to the type and quantity of construction work to be performed and not merely to the total value of construction work as compared to the total value of the contract; and

(2) Such construction work is physically or functionally separate from and, as a practical matter, is capable of being performed on a segregated basis from the other work required by the contract.

(b) The standard clauses will be applicable to the contract work only to the extent that such work is subject to the labor standards statutes involved. Under contracts requiring substantial amounts of segregable construction work, only such segregable construction will be covered.

(1) For example, the requirements do not apply to installation, maintenance, and alteration work incidental to furnishing supplies under a supply contract; however, if a substantial and segregable amount of construction, alteration, or repair work at the site is required, such as for installation of heavy generators and large refrigerator systems or for plant modification or rearrangement, the labor standards for construction contracts apply to the construction work at the site.

(2) Contracts for maintenance or service are not ordinarily subject to the requirements of this subpart. Maintenance includes the routine, recurring type of work necessary to keep a facility in such condition that it may be continuously used at an established capacity and efficiency for its intended purpose. However, if such maintenance or service contracts call for substantial and segregable items of construction, alteration, or repair, the labor standards provisions for construction contracts will be applicable to those items. All contracts in excess of $2,000 for painting of any public building or public work, whether performed in connection with the original construction or as regular maintenance, are subject to the labor standards provisions for construction contracts.

522.402 Statutory and regulatory requirements.

522.402–1 Davis-Bacon Act.

(a) The Davis-Bacon Act (Act of March 3, 1931, as amended (40 U.S.C. 276a–276a–7)) provides that certain contracts over $2,000 entered into by any executive agency for construction, alteration, or repair (including painting and decorating) of public buildings or public works within the United States shall contain a clause (see 552.222–70) to the effect that no laborer or mechanic employed directly upon the site of the work contemplated by the contract shall receive less than the prevailing wage rates determined by the Secretary of Labor.

(b) The wage rate determination applies only to those laborers and mechanics employed by a contractor or subscontractor within the limits of the site of the work. Wages include the basic hourly rate of pay, the rate of contribution irrevocably made by an employer pursuant to a fund, plan, or program, and the rate of costs to the employer which may be reasonably anticipated in providing certain bona fide fringe benefits.

(c) Laborers and mechanics employed at the site must be paid at least weekly and without deduction or subsequent rebate except as authorized by statute or regulation.

(d) Each worker must be assigned an authorized classification which accurately describes the duties performed in conformance with recognized practices in the construction industry and in the area. For example, if a laborer performs the work of a journeyman for any portion of the time employed on the contract, that person must be so classified and receive the wages of a journeyman for that part of the time engaged in work at journeyman level. Employees performing work in more than one capacity, such as three hours a day as a laborer and five hours a day as a carpenter must be classified accordingly and paid the applicable wage rate specified in the contract wage schedule for the specific work performed in each classification. If the contractor fails to show dual classification in such cases, payment shall be required at the higher rate for all hours worked.

(e) Violations of Davis-Bacon provisions may be grounds for termination of contract.

522.402–2 Copeland Act.

The Copeland ("Anti-kickback") Act (18 U.S.C. 874 and 40 U.S.C. 276c) makes it unlawful to induce, by force or otherwise, any person employed in the construction or repair of public buildings, public works, financed in whole or in part by the United States, to give up any part of the compensation to which the person is entitled under a contract of employment. The Copeland Act also requires compensated at not less than one and one-half times his basic rate of pay for each contractor and subcontractor to furnish weekly statements of compliance with respect to the wages paid each employee during the preceding week. Contracts subject to the Act shall contain a clause (see 552.222–74) requiring contractors and subcontractors to comply with the regulations issued by the Secretary of Labor under the Copeland Act.

522.402–3 Contract Work Hours and Safety Standards Act.

(a) The Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333), requires that certain contracts contain a clause (see 552.222–71), specifying that no laborer or mechanic doing any part of the work contemplated by the contract shall be required or permitted to work more than 8 hours in any one calendar day or 40 hours in any workweek unless such laborer or mechanic is all hours worked in excess of 8 hours in any one calendar day or 40 hours in any workweek. The worker will be paid according to the calculation that represents the greater number of overtime hours. (See also FAR Subpart 22.3).

(b) In addition to the requirements under 522.402–3(a), the Act provides that no employer shall require any laborer or mechanic to work in surroundings or under working conditions which are unsanitary, hazardous, or dangerous to health or safety, as determined under construction safety and health standards promulgated by the Secretary of Labor. For violations of the excess hours provisions of the Act, the contractor is liable for restitution of unpaid wages to the employee and for the payment of liquidated damages to the Government at a rate of $10 per calendar day for each employee who was required or permitted to work overtime hours in violation of the Act. Violation of the safety and health standards provisions of the Act may be cause for termination of the contract. Conditions under which a contractor may be relieved of the assessment of liquidated damages, see 522.405–13. Procedures to be followed in withholding funds to cover underpayments to employees are prescribed in 522.405–9 and 522.405–10.

522.402–4 Department of Labor regulations.

Under the statutes referred to in this 522.402 and Reorganization Plan No. 14 of 1950 (64 Stat. 1267, 5 U.S.C. Appendix), the Secretary of Labor has issued regulations in Title 29, Subtitle A, Code of Federal Regulations as follows:

(a) Part 1 provides procedures for the predetermination of Davis-Bacon wage rates;

(b) Part 3, describes the Copeland Act requirements;

(c) Part 5, provides for the administration and enforcement of the Davis-Bacon Act and the Contract Work Hours and Safety Standards Act;

(d) Part 6, provides rules of practice for administrative proceedings enforcing labor standards in construction and service contracts; and

(e) Part 7, describes the Department of Labor Wage Appeals Board procedures.

522.403 Contract clauses.

(a) Except as required by 522.403 (b) and (c), every construction contract in excess of $2,000 (or of such other amount as may be specifically indicated) for work within the United States shall include the following clauses:

Davis-Bacon Act (40 U.S.C. 276a–276a–7) clause at 552.222–70.

Contract Work Hours and Safety Standards Act Overtime Compensation (40 U.S.C. 327–333) clause at 552.222–71.

Apprentices and Trainees clause at 552.222–72.

Payrolls and Basic Records clause at 552.222–73.

Compliance with Copeland Act Requirements clause at 552.222–74.

Withholding clause at 552.222–75.

Subcontracts clause at 552.222–76.

Contract Termination; Debarment clause at 552.222–77.

Disputes Concerning Labor Standards clause at 552.222–78.

Compliance with Davis-Bacon and Related Act Requirements clause at 552.222–79.

Certification of Eligibility clause at 552.222–80.

Applicable Minimum Hourly Rates of Wages clause at 552.222–81.

(b) In construction contracts with State or political subdivisions, the clauses prescribed in 522.403(a) shall be inserted, but prefaced by the clause at 552.222–82.

(c) Every construction contract in excess of $2,000 for work outside the United States, but which is nevertheless subject to the Contract Work Hours and Safety Standards Act as set forth in FAR Subpart 22.3, shall include the Work Hours and Safety Standards Act Overtime Compensation clause at 552.222–71.

522.404 Wage determinations.

522.404–1 Types of wage determinations.

(a) A general wage determination is published in the **Federal Register** and is used by all Government agencies. It contains prevailing wage rates for the types of construction designated in the determination, and for use in contracts performed within a given geographical area. These general wage determinations contain no expiration date and remain current until modified, superseded, or canceled in the **Federal Register** by the Department of Labor. These determinations shall be used whenever possible. They are issued at the discretion of the Department of Labor upon agency request or on the initiative of the Department of Labor.

(b) A project wage determination, as the term is used herein and in 29 CFR Part 1, applies to both individual and installation determinations. A project wage determination is issued for use by the requesting Federal agency. It provides rates for work described in the determination that may be required by contract in a specific geographical area (usually an installation or county) during the life of the determination. This type of determination is used only when no general wage determination is in effect, and may be obtained when continuing construction activity is anticipated at an installation or within the particular geographical area. These wage determinations are generally effective for 180 calendar days.

522.404–2 Procedure for requesting determinations.

(a) *Requests for wage determinations.* A request for a general wage determination may be submitted to the Administrator, Wage and Hour Division, Department of Labor, if—

(1) The wage patterns for the particular type of construction are well settled in the area;

(2) No general wage determination published in the **Federal Register** is in effect for the particular type of construction in the area; and

(3) The agency anticipates a large volume of the particular type of construction in the area. The request shall include the information in paragraph (c) below.

(b) *Requests for installation type project wage determinations.* A contracting agency shall submit requests for installation wage determinations on Standard Form 308, Request for Determination and Response to Request, to the Department of Labor address at 522.404–2(c). The request shall include the information in 522.404–2(c) and the following:

(1) The incidence of use of the last previously issued installation determination, the total dollar amount of the contracts awarded thereunder, and an estimate of the use of any new determination during its 180-day life.

(2) A complete rationale for requiring an installation determination.

(3) The estimated cost of each project.

(4) The kinds of laborers and mechanics likely to be employed.

(c) *Requests for individual type project wage determinations.* Requests shall be submitted in accordance with agency procedures on a completed SF 308, to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Branch of Construction Contract Wage Determinations, Washington, DC 20210. The request shall indicate only those craft classifications that are needed in the performance of the work. Classifications may be added if they cannot be fitted into classifications on the form, or if they are generally recognized in the area or in the construction industry. Requests shall include—

(1) The location of the project or installation, giving the distance in miles and the direction from the nearest point of reference;

(2) A sufficiently detailed description of the work to indicate the type of construction involved (i.e., building, heavy, highway, residential, or other type); and

(3) Any available pertinent wage payment information, unless the wage patterns in the area are clearly established.

(d) *Time of submission of requests.* Agencies shall submit requests for wage determinations to the Department of Labor at least 30 calendar days before they are required for use in advertising for bids or for entering into negotiations of the contract for which the determinations are sought.

(e) *Limitations.* Individual and installation wage determinations are effective for 180 calendar days from the date of the determination and are applicable only to contract awards made within that period. Individual wage determinations may not be applied to contracts other than the one for which they are issued.

(f) *Review of wage determination decisions.* Immediately upon receipt, the contracting agency shall examine the wage determination and inform the Department of Labor of any changes necessary or appropriate to correct errors. Private parties requesting changes should be advised to submit

their requests to the Department of Labor.

522.404–3 Wage Determinations in solicitations and contracts.

(a) *Rate schedule to be included in solicitations.* (1) In an area covered by a general wage determination, or an installation determination containing more than one rate schedule (i.e., building, heavy, highway, or other type of construction), the contracting officer shall include in the solicitation the rate schedule applicable to the particular type of construction involved.

(2) If there is more than one type of construction involved, the complete determination may be included in the solicitation. However, the contracting officer shall identify the rate schedules believed to be applicable to the particular type of construction involved.

(3) If there is doubt as to the applicability of various rate schedules to the type or types of construction involved, guidance should first be sought from the Administrator, Wage and Hour Division.

(b) *Formally advertised contracts.* (1) If it appears before bid opening that a wage determination may expire before award, or a determination actually does expire before bid opening, the contracting officer shall request a new determination. The contracting officer shall postpone the bid opening date, if necessary, to allow a reasonable time to obtain the determination, modify the solicitation to reflect the new determination, and permit bidders to amend their bids. Even if the new determination, does not change the wage rates and would not warrant amended bids, the contracting officer shall modify the solicitation to include the number and date of the new determination.

(2) When bids have been opened in a formally advertised contract and the wage determination will expire before award, the head of the agency or designee may submit a written request for an extension of the expiration date to the Administrator, Wage and Hour Division, Department of Labor. This action shall be taken only upon a written finding that an extension is in the public interest to prevent injustice, undue hardship, or serious impairment of the conduct of Government business. The Administrator may extend the period of effectiveness of the determination. If an extension is not requested, or if an extension is requested and denied, the contracting officer shall obtain a new wage determination. If the new determination changes the wage rates, the contracting officer shall cancel the solicitation and readvertise using the new wage rates.

(c) *Negotiated contracts.* (1) If it appears that a wage determination will expire before award, or the determination actually does expire before award, the contracting officer shall request a new wage determination. If the new determination makes a change in the wage rates, the contracting officer shall furnish the wage rate information specified in the new determination to all prospective offerors—

(i) To whom a solicitation has been sent, if the closing date for receipt of proposals has not yet occurred; or

(ii) That have submitted proposals if the closing date is past.

(2) All prospective offerors to whom wage rate information has been furnished shall be given a reasonable opportunity to amend their proposals.

(3) The contracting officer need not delay opening and reviewing proposals or discussing them with the offerors while a new determination is being obtained. The contracting officer shall request offerors to extend the period for acceptance of any proposal if that period expires or may expire while the contracting officer is waiting for a new wage determination.

(d) *Receipt of new determination before expiration of original determination.* When a new wage determination has been requested and received before award, but an award is made before the expiration date of the original determination, the new determination must be treated as a superseding decision in accordance with 522.404–4. However, the new determination shall expire on the expiration date stated on the new determination and not on the expiration date of the determination that it replaces.

(e) *Withdrawal or discovery of incorrect wage determination.* If the wage determination included in the bidding document or solicitation is found to be an incorrect wage determination or is withdrawn by the Department of Labor, the Department of Labor shall notify the contracting agency. Any written notification by the Department of Labor received prior to contact award shall become effective immediately without regard to 522.404–4 of this regulation.

(f) *Contracts awarded without required wage rate.* If a contract is inadvertently awarded without the required wage determination or modification, and the required determination either was not issued or was inapplicable or has expired or been rescinded, the contracting officer with the concurrence of his legal advisor shall submit a request to the Department of Labor for an advisory opinion setting forth the wage rate as of the date of award. Upon receipt of the opinion, the contracting officer shall issue a contract modification replacing or adding the determination data, effective retroactively to the date of award with an equitable adjustment in the contract price. See 29 CFR 1.6(f).

(g) *Formal advertising without a wage determination.* When a solicitation is issued before the wage determination is obtained, notice shall be included in the solicitation that the schedule of minimum wage rates to be paid under the contract will be issued as an amendment. Under no circumstances may bids be opened until a reasonable time after the wage determination has been furnished to all bidders.

522.404–4 Modifications of wage determinations.

(a) The Secretary of Labor may modify a wage determination by issuing a "letter of inadvertence" to correct a clerical error in the determination, a "notice of modification" which specifies changes in the determination, or a "supersedeas decision," which is a reissuance of the entire determination with changes incorporated. All these modifications expire on the same day as the original determination. Since the need for inclusion of a modification (other than letter of inadvertence) in a solicitation is determined by the time of receipt by the contracting agency concerned, all modifications shall be time-date stamped immediately upon receipt by the agency. Letters of inadvertence are applicable retroactively to the date of award regardless of when they are issued or received by the contracting officer. The need for inclusion of a modification of a general wage determination in a solicitation is determined by the publication date in the **Federal Register**.

(b) A modification to an individual or installation determination received by the contracting officer concerned 10 calendar days or more before bid opening, or a modification to a general determination published in the **Federal Register** 10 calendar days or more before bid opening, shall be processed as follows:

(1) Formally advertised contracts.

(i) If the modification reaches the contracting officer before bid opening, the contracting officer shall issue an amendment to the solicitation and, if necessary, extend the date of bid opening.

(ii) If the modification reaches the contracting officer after bid opening, but before award, and the modification increases any included wage rates and the lowest responsible, responsive bidder agrees in writing to the increase without a change in the bid price, the contracting officer shall award the contract and incorporate the modification;

(2) *Negotiated contracts.* If the modification reaches the contracting officer before award, the contracting officer shall notify the prospective contractors and allow them sufficient time to adjust their offers accordingly.

(c) A modification that affects wage rates included in a solicitation and is received by the contracting agency (or in the case of a general determination, is printed in the **Federal Register**) less than 10 days before bid opening in the case of formally advertised contracts need be included in the solicitation only if the contracting officer finds that there is reasonable time to notify all potential offerors of the modifications. If the contracting officer finds that there is not reasonable time to notify potential offerors, those modifications may be disregarded. The contracting officer shall include in the contract file a written statement why a modification, if any, was not incorporated in the solicitation. A copy of the statement shall be furnished to the Department of Labor upon request.

(d) If the contract has not been awarded within 90 calendar days after bid opening, any modifications to the wage determinations published in the **Federal Register** prior to award shall be effective with respect to that contract except when an extension from the 90 day period has been obtained from DOL. If a situation arises where award cannot be made within 90 calendar days after bid opening, the agency Labor Relations Advisor or Legal Counsel should be contacted for guidance or assistance in obtaining an extension to the 90 day requirement.

Note.—If an extension is deemed necessary, the Contracting Officer shall not incorporate modifications to the general wage determination published subsequent to the bid opening without obtaining legal review and concurrence.

522.404–5 Wage determination appeals.

The Secretary of Labor has established a Wage Appeals Board. The Board, among other things, decides appeals concerning questions of law and fact arising from decisions regarding wage determinations issued under the Davis-Bacon Act and related minimum wage statutes. Each contracting agency may file a petition for review of, or for intervention in, any matter that appears appropriate for the Board's action, under the procedures in 29 CFR Part 7 and pertinent agency procedures.

522.405 Administration and enforcement.

522.405–1 Policy.

(a) *General.* Contracting agencies are responsible for assuring the full and impartial enforcement of the labor standards in the administration of construction contracts. To enforce this policy, contracting agencies shall maintain a continuing effective program that shall include—

(1) Ensuring that contractors and subcontractors are informed, prior to commencement of work, of the obligations under the labor standards clauses of the contract (see GSA Form 618–A, Form Letter for Informing Contractor of Labor Standard Provisions);

(2) Adequate payroll reviews, on-site inspections, and employee interviews to determine compliance by the contractor and subcontractors and prompt initiation of corrective action when required;

(3) Prompt investigation and disposition of complaints, (see GSA Form 3017, Labor Standards Interview); and

(4) Prompt submission of all reports required by this subpart.

(b) *Responsibility.* The contracting officer shall inform the contractor of the labor standards clauses of the contract and of the contractor's and any subcontractor's responsibilities under the contract. Unless it is clear that the contractor is fully aware of the requirements, the contracting officer shall issue an explanatory letter or arrange a conference with the contractor promptly after award of the contract. The contracting officer may use the GSA Form 618–A, for this purpose.

552.405–2 Wages, fringe benefits, and overtime.

(a) In computing wages paid to a laborer or mechanic, the contractor may include only the following items:

(1) Amounts paid in cash to the laborer or mechanic, or deducted from payments under the requirements of 29 CFR Part 3.

(2) Contributions, except those required by Federal, State, or local law, that the contractor makes irrevocably to a trustee or a third party under any bona fide fund, plan, or program to provide for medical or hospital care, pensions, compensation for injuries or illness resulting from occupational activity unemployment benefits, life insurance, disability and sickness insurance, accident insurance vacation and holiday pay, defraying costs of apprenticeship, or any other bona fide fringe benefit.

(3) Other contributions or anticipated costs for bona fide fringe benefits to the extent expressly approved by the Secretary of Labor.

(b)(1) The contractor may satisfy the obligation under the clause at 562.222–70, Davis-Bacon Act, by providing wages consisting of any combination of contributions or costs as specified in 522.405–2(a), if the total cost of such combination is not less than the total of the basic hourly rate and fringe benefits payments prescribed in the wage determination decision for the classification of laborer or mechanic concerned.

(2) Wages provided by the contractor and fringe benefits payments required by the wage determination may include items that are not stated as exact cash amounts. In these cases, the interested parties shall determine the cash equivalent of the cost of those items when necessary to determine whether the wages provided by the contractor satisfy the requirements of the wage determination. If the interested parties cannot agree on the cash equivalent, the contracting officer under paragraph (d) of the clause at 552.222–70, Davis-Bacon Act, shall submit the question for final determination to the Department of Labor. The information submitted shall include—

(i) A comparison of the payments, contributions, or costs in the wage determination decision with those made or proposed as equivalents by the contractor; and

(ii) The comments and recommendations of the contracting officer.

(c) In computing required overtime payments, the contractor shall use the basic rate of pay in the wage determination, or the rate actually paid by the contractor, if higher. The basic rate of pay includes employee contributions to fringe benefits, but excludes the contractor's contributions, costs, or payment of cash equivalents for fringe benefits. Overtime shall not be computed on a rate lower than the basic rate specified in the wage determination.

522.405–3 Additional classifications.

(a) If any laborer or mechanic is to be employed in a classification not listed in the wage determination applicable to the contract, the contractor shall submit to the contracting officer a request for authorization (GSA Form 2428), stating the proposed additional classification

and minimum wage rate inlcuding any fringe benefits payments.

(b) Upon receipt, the contracting officer shall review the request to determine whether it meets the following criteria:

(1) The classification is appropriate and the work to be performed under the classification requested cannot be performed by a classification contained in the applicable wage determination.

(2) The classification is utilized in the area by the construction industry.

(3) The proposed wage rate, including any bona fide fringe benefits, bears a reasonable relationship to the wage rates in the wage determination contained in the contract.

(c) If the conditions in 522.405–3(b) (1), (2), and (3) are met and no interested party objects to the proposed classification, the contracting officer shall approve the request subject to review by the Department of Labor. The contracting officer shall submit a copy to the Department of Labor who will approve, modify or disapprove every additional classification action within 30 days of receipt or will notify the contracting officer within the 30 day period that additional time is required.

(d) If the criteria are not met or the interested parties cannot agree on the request, the contracting officer shall submit the proposal including the views of all interested parties, other available pertinent information and the contracting officer's recommendation, to the Department of Labor for final determination. (29 CFR 5.5).

(e) Upon approval under paragraph (c) or (d) above, the contracting officer shall notify the contractor and instruct that the approved rate and classification be posted in accordance with 522.405–6(e) and the approved rate be paid to all workers in the affected classification from the first day on which work was performed in the classification.

522.405–4 Apprentices and trainees.

(a) A contractor, prior to using apprentices or trainees on the contract work, is required to have on file written evidence of registration of those employees in a program accepted by the Bureau of Apprenticeship and Training (BAT), U.S. Department of Labor, or a State apprenticeship and training agency approved and recognized by BAT. The contractor also is required to have on file written evidence of the ratios of apprentices to journeymen, and trainees to journeymen, with the wage rates for apprentices and trainees including fringe benefits payments, specified in the contractor's or subcontractor's registered programs. The contracting officer should examine these files to determine ratios and rates and compare them with those approved in the BAT program to determine the contractor's compliance with the clause at 552.222–72, Apprentices and Trainees

(b) When a contractor has classified employees as apprentices or trainees without complying with the requirements in paragraph (a) above, the contracting officer shall reject the classification and require the contractor to pay the affected employees at the rates applicable to the classification of the work actually performed.

(c) Enforcement, including the investigation of complaints of violations, to ensure compliance with the requirements of the clause at 552.222–72, Apprentices and Trainees, shall primarily be the responsibility of the contracting agency awarding the contract.

552.405–5 Subcontracts.

In order to ensure that the requirements of the clause at 552.222–76, Subcontracts, have been met, the contractor is required to submit a fully executed Standard Form 1413, Statement and Acknowledgment, amended to include all clauses listed in the Subcontract clause and the Subcontractor Eligibility clause at 552.209–70 upon award of each subcontract.

552.405–6 Payrolls and statements.

(a) *Submission.* Within 7 calendar days after the regular payment date of the payroll week covered, the contractor is required to submit or cause to be submitted, for the contractor and each subcontractor, copies of weekly payrolls applicable to the contract and weekly payroll statements of compliance. The contractor may use the Department of Labor Form WH–347, Payroll (For Contractors Optional Use), or a similar form that provides the same data and identical representations.

(b) *Withholding for nonsubmission.* If the contractor fails to promptly submit copies of its or its subcontractors' payrolls, the contracting officer shall, from any payment due to the contractor, withhold approval of an amount that the contracting officer considers necessary to protect the interests of the Government and the employees of the contractor or any subcontractor. (See 29 CFR 5.5.)

(c) *Examination.* (1) The contracting officer shall examine the payrolls and statements to ensure compliance with the contract and any statutory or regulatory requirements. Particular attention should be given to—

(i) The correctness of classifications and rates;

(ii) Fringe benefits payments;

(iii) Hours worked;

(iv) Deductions; and

(v) Disproportionate employment ratios of laborers, helpers, apprentices, or trainees, to journeymen.

(2) Fringe benefits payments, contributions made, or costs incurred on other than a weekly basis shall be considered as a part of weekly payments to the extent they are creditable to the particular weekly period involved and are otherwise acceptable.

(d) *Preservation.* The agency shall retain payrolls and statements for 3 years after completion of the contract and shall make them available when requested by the Department of Labor at any time during that period.

(e) *Posting wage determinations.* The contractor is required to keep a copy of the wage determination and any approved additional classifications posted at the site of the work in a prominent place where they can be easily seen by the workers. The contracting officer shall furnish to the contractor the Department of Labor Form WH–1321, Notice to Employees Working on Federal or Federally Financed Construction Projects, for posting with the wage rates. The name and address of the officer responsible for the administration of the contract shall be inserted in the poster to inform workers to whom they may submit complaints or raise questions concerning labor standards.

(f) *Statement when work is performed personally.* Prime contractors and subcontractors who personally perform work are required to submit, in lieu of weekly payrolls and statements of compliance with respect to payment of wages, a statement clearly showing (1) their contractual relationship, (2) the scope and dates of work performed, (3) that they received no wages, and (4) that no mechanics or laborers were employed in the prosecution of the work. GSA Form 618D, Statement to be Submitted When Work is Performed Personally, should be used to furnish this information.

552.405–7 Compliance checking.

(a) *Regular compliance checks.* The contracting officer administering the contract shall cause regular checks to be made to ensure compliance with the contract labor standards requirements. Compliance checking shall be made as frequently as necessary. Contracts of 6 months duration or less shall be investigated before final payment is made. Continuous and careful checking is essential to the success of the labor

standards enforcement program. Compliance checking includes the following activities:

(1) Employee interviews to determine correctness of classifications and rates of pay, including fringe benefits payments.

(2) On-site inspections to check type of work performed, number and classification of workers, and fulfillment of posting requirements.

(3) Payroll reviews to ensure that payrolls of prime contractors and subcontractors have been submitted on time and are complete and correct.

(4) Comparison of the above information with available data, including daily inspector's report and daily logs of construction, to ensure consistency.

(b) *Special compliance checks.* Situations that may require special compliance checks include—

(1) Inconsistencies, errors, or omissions detected during regular compliance checks; or

(2) Receipt of a complaint alleging violations. When the complaint is not specific enough, the complainant shall be so advised and invited to submit additional information. The disclosure of employee statements shall be protected and governed by the provision of the Freedom of Information Act (5 U.S.C. 552) and the Privacy Act of 1974 (5 U.S.C. 552(a)).

522.405–8 Investigations.

(a) *General.* Investigations shall be made when a special compliance check indicates either that a complaint has merit or that possible violations have occurred that are substantial in amount, willful, or not corrected. The investigation shall include all aspects of the contractors' compliance with labor standards requirements, and not be limited to a specific complaint, allegation, or possible violation disclosed during compliance checking. The investigation should be made by personnel familiar with labor laws and their application to contracts. When oral or written statements are taken from an employee during a regular or special investigation, they shall not be divulged to the individual's employer or to anyone other than authorized Government representatives working on the case, without the employee's written permission. In the absence of individual agency instructions, investigators are urged to use other guidelines provided by the investigation and enforcement instructions contained in memoranda issued by the Administrator, Wage and Hour Division, U.S. Department of Labor. Copies of those instructions may be obtained from the Administrator upon request.

(b) *Notification to the contractor.* (1) The contracting officer shall review the investigator's report and make preliminary findings regarding the contractor. Adverse findings that are not supported by other evidence shall not normally be based solely on employee statements that have not been authorized for disclosure by the employee. However, when investigation establishes a pattern of possible violations that are based on employees' statements that have not been authorized for disclosure, the pattern itself may constitute a suitable basis for a finding of noncompliance.

(2) Except in cases involving criminal violations under the Copeland (Antikickback) Act and the Contract Work Hours and Safety Standards Act, the contracting officer shall take the following actions upon completing the review:

(i) Provide written notice to the contractor concerning the preliminary findings, proposed corrective actions, and the contractor's right to request that the basis for the findings be made available and to submit written or oral rebuttal information within a reasonable period of time.

(ii) Request the contractor to make payment for restitution or liquidated damages determined by the contracting officer to be due, whether the violation is considered willful or nonwillful. If the request includes liquidated damages, it shall contain a written statement that the contractor may request relief from the assessment. Also see 552.405–13(b).

(3) If the contractor submits a rebuttal, the contracting officer shall reconsider the preliminary findings based on information brought out by the rebuttal and notify the contractor of the final findings. If no rebuttal is submitted within a reasonable time, the preliminary findings shall be considered to be final.

(4) Upon request from the contractor, the contracting officer shall make the basis for the findings available. However, under no circumstances will the contractor be permitted to examine the investigation report.

522.405–9 Requests for restitution of underpayments.

When a violation of the Davis-Bacon Act or the Contract Work Hours and Safety Standards Act appears to exist, the contracting officer shall request the contractor to make restitution to the employees and/or plans, funds, or programs for any type of benefits required by the applicable wage determinations.

522.405–10 Withholdings from contract payments.

(a) If the contractor or subcontractor fails or refuses to make restitution of all or any part of the wages due the employees, the contracting officer shall withhold from accrued payments due the contractor, an amount equal to the estimated wage underpayments, plus any estimated liquidated damages due under the Contract Work Hours and Safety Standards Act. In this regard the clause at 552.222–75, withholding, permits the contracting officer to withhold or cause to be withheld from the contractor under the current contract or any other Federal contract with the same prime contractor, or any other Federally-assisted contract subject to Davis-Bacon prevailing wage (or Contract Work Hours and Safety Standards Act, as appropriate) requirements, which is held by the prime contractor, so much of the accrued payments or advances as may be considered necessary for payment of unpaid wages. The General Accounting Office encourages timely action to withhold funds for underpayments.

(b) If wage underpayments continue, or the failure or refusal to make restitution appears continuing or willful, or if the contractor fails or refuses to comply with any other contract, statutory or regulatory requirements, the contracting officer may suspend all contract payments to the contractor until the violations have ceased.

(c) If restitution has not been made prior to final payment under the contract, the contracting officer shall submit to the General Accounting Office, through the appropriate disbursing office: (1) The contractor's payment voucher or vouchers, (2) a Standard Form 1093, Schedule of Withholdings Under the Davis-Bacon Act, and/or the Contract Work Hours and Safety Standards Act, and (3) a statement of the amounts to be withheld for underpayment of wages and liquidated damages under the Contract Work Hours and Safety Standards Act. These amounts shall be disposed of in accordance with agency procedures.

522.405–11 Contract terminations.

If a contract is terminated for violation of the labor standards clauses, the contracting agency shall submit a report to the Administrator, Wage and Hour Division, Department of Labor, and the Comptroller General. The report shall include—

(a) The number of the terminated contract;

(b) The name and address of the terminated contractor or subcontractor;

(c) The name and address of the contractor or subcontractor who is to complete the work;

(d) The amount and number of the latter's contract; and

(e) A description of the work.

522.405–12 Cooperation with the Department of Labor.

(a) The contracting agency shall cooperate with representatives of the Department of Labor in the inspection of records, interviews with workers, and all other aspects of investigations undertaken by the Department of Labor. When requested, the contracting agency shall furnish to the Secretary of Labor any available information on contractors, subcontractors, current and previous contracts, and the nature of the contract work.

(b) If a Department of Labor representative undertakes an investigation at a construction project, the contracting officer shall inquire into the scope of the investigation, and request to be notified immediately of any violations discovered under the Davis-Bacon Act, Contract Work Hours and Safety Standards Act, or Copeland Act. Notwithstanding the Department of Labor's responsibility to investigate, the contracting officer has primary responsibility for enforcement of the Davis-Bacon Act, and Copeland Act, and the withholding of contract funds for the proper payment of laborers and mechanics under these Acts. In this regard, the contracting officer, upon a written request from an authorized representative of the Department of Labor, shall withhold the amount of accrued contract funds which are considered necessary for the payment of unpaid wages.

522.405–13 Overtime and liquidated damages under the Contract Work Hours and Safety Standards Act.

(a) Under the Contract Work Hours and Safety Standards Act, the contractor will be liable to affected employees for underpaid wages and liable to the United States for liquidated damages in the sum of $10 per calendar day for each laborer and mechanic who was not paid overtime wages as required by the Act.

(b) The Administrator of GSA has delegated to the Heads of Central Office Services the authority necessary to act as the head of the agency for purposes of carrying out the requirements contained in 40 U.S.C. 330(c), Contract Work Hours and Safety Standards Act (CWHSS). (See Delegations of authority (ADM 5450.85) dated February 19, 1982.)

(c) When the contracting officer administratively determines (not a "final decision") that the assessed liquidated damages are due under section 104(a) of the Contract Work Hours and Safety Standards Act, the following procedures should be followed.

(1) The contracting officer shall advise the contractor of the assessment and/or withholding of liquidated damages as well as the contractor's appeals rights.

(2) The contractor may appeal to the head of the agency within 60 calendar days.

(3) The head of the agency has the authority to review the appeal and issue either:

(i) A final order affirming the determination, which the contractor may appeal to the Claims Court within 60 calendar days from issuance; or

(ii) A recommendation to the Secretary of Labor that liquidated damages be adjusted or waived if it is found that the sum assessed is incorrect or that the violations were inadvertent, notwithstanding the exercise of due care by the contractor.

(d) When the contracting officer finds that the assessed liquidated damages due under section 104(a) of the Contract Work Hours and Safety Standards Act are incorrect, or that the contractor or subcontractor inadvertently violated the provisions of the Act notwithstanding the exercise of due care, the contracting officer shall recommend to the head of the agency to—

(1) Make an adjustment in, or release the contractor or subcontractor from, the liability for the liquidated damage if the amount is $500 or less; or

(2) Make a recommendation to the Secretary of Labor, as provided in 29 CFR 5.8, for adjustment or release when the amount of damage is in excess of $500.

522.405–14 Enforcement reports.

(a) *Semiannual reports.* A semiannual report on compliance with an enforcement of the construction labor standards provisions of the Davis-Bacon Act and Contract Work Hours and Safety Standards Act is required from the contracting agency. The reporting periods are October 1 through March 31 and April 1 through September 30. The reports shall be prepared as prescribed in the Department of Labor circular memoranda and submitted to the Department of Labor within 30 days of the end of the reporting period.

(b) Reports of violations. (1) No report is required if (i) the underpayments total less than $1000 and are nonwillful, (ii) restitution has been effected, and (iii) future compliance has been assured. However, if an investigation is expressly requested by the Department of Labor, the contracting agency shall submit a factual summary report as required in 29 CFR 5.7(a)(1).

(2) For all other underpayments, the contracting agency shall furnish to the Department of Labor, as soon as practicable, a detailed enforcement report as required in 29 CFR 5.7(a)(2).

(3) If there is substantial evidence that violations are willful and in breach of the provisions of 18 U.S.C. 1001 or other criminal statute, the matter shall be forwarded to the Attorney General of the United States for prosecution and the Secretary of Labor shall be informed of the action.

522.405–15 Disposition of disputes arising out of construction contract labor standards enforcement.

(a) The areas of possible differences of opinion between contracting officers and contractors in construction contract labor standards enforcement include—

(1) Misclassification of workers;

(2) Hours of work;

(3) Wage rates and payment;

(4) Withholding practices; and

(5) The applicability of the labor standards provisions under varying circumstances.

(b) For the most part, these differences are settled administratively at the project level by the contracting agency. If necessary, such differences may be settled with assistance from the Department of Labor, without reference to the Disputes clause of the construction contract.

(c) Those disagreements involving the meaning of classifications, wage rates contained in the wage determination of the Secretary of Labor, or the applicability of contract labor provisions, which cannot be settled administratively by the contracting agency shall be referred with sufficient support data to explain both sides of the dispute to the Secretary of Labor for an opinion, in accordance with 29 CFR 5.11. No final decision on these matters shall be made by the contracting officer until the Department of Labor renders its opinion.

(d) The opinion obtained from the Department of Labor shall be made a part of the contract file and shall be applied—

(1) In the investigation of the case; and

(2) In the computation of wage underpayments.

(e) The contractor shall be furnished a copy of the opinion and advised that any appeal should be to the Wage Appeals Board of the Department of Labor as provided in 29 CFR Part 7.

522.405–16 Debarment.

The procedures for debarment in connection with the labor standards are prescribed in 29 CFR 5.12. All recommendations or referrals for debarment associated with the labor standards shall be sent to the debarring official, Assistant Administrator for Acquisition Policy, for consideration and submission to the Department of Labor. The recommendation and referrals should include the items listed in 509.406–3(a).

Subpart 522.6—Walsh-Healey Public Contracts Act

522.608 Procedures.

522.608–2 Determination of eligibility.

The contracting officer shall submit an ineligibility determination under FAR 22.608–2(f) to the Department of Labor through the contracting director.

522.608–3 Protest against eligibility.

The contracting officer shall submit any determination under FAR 22.608–3(b) to the Department of Labor or Small Business Administration through the contracting director.

522.608–4 Award pending final determination.

The certification required under FAR 22.608–4(a) must be approved by the head of the contracting activity.

522.608–6 Postaward.

Violations and complaints. Information concerning possible violations of the requirements of the Walsh-Healey Public Contracts Act can originate from complaints of injured parties, from officers or employees of the U.S. Government, or otherwise. Any such complaints coming to the attention of the contracting officer shall be considered, together with any other relevant information that is available, in coordination with the assigned legal counsel. Reports of violations shall be prepared and submitted to the Department of Labor, Employment Standards Administration, Wage and Hour Division.

Subpart 522.8—Equal Employment Opportunity

522.803 Responsibilities.

The contracting officer will submit any questions under FAR 22.803(d) to head of the contracting activity for resolution.

522.804 Affirmative action programs.

522.804–1 Nonconstruction.

In addition to the requirements of FAR 22.804, each contractor and subcontractor who serves as a depository of Government funds in any amount; or is a financial institution which is an issuing and paying agent for U.S. savings bonds and savings notes in any amount, shall develop a written affirmative action compliance program for each of its establishments within 120 days from the start of its first such Government contract or subcontract.

522.804–70 Reports and other required information.

Nonexempt contractors shall submit information reports in accordance with the Equal Opportunity clause on Standard Form 100, Equal Employment Opportunity Employer Information Report EEO–1, to the Joint Reporting Committee with an information copy to the contracting officer within 30 days after award of a contract unless a report has been submitted within the 12 months preceding the award date. Subsequent reports shall be submitted annually on or before March 31 (see 41 CFR 60–1.7). If additional information is required regarding the submission of the EEO–1 report, contact the Office of Federal Contract Compliance Programs (OFCCP) regional office.

522.804–71 Furnishing information to contractors.

Contracting officers, when mailing contract documents to contractors who are subject to the Equal Opportunity clause, shall include appropriate information explaining the contract requirements concerning submission of Employer Information Report forms, notices to labor unions or other organizations of workers, and use of required posters (see FAR 22.805).

522.805 Procedures.

Requests for preaward reviews under FAR 22.805(a)(5) shall be made by the contracting officer directly to the Office of Federal Contract Compliance Programs, Employment Standards Administration, U.S. Department of Labor for the region in which the contract is to be performed.

522.807 Exemptions.

Requests for exemption from use of the Equal Opportunity clause for specific contracts or categories of contracts shall be submitted with a complete written justification through the head of the contracting activity to the appropriate regional office of the OFCCP.

Subpart 522.10—Service Contract Act of 1965

522.1003 Applicability.

Requests for determinations regarding the applicability of the Service Contract Act and requests for exemptions from the Act pursuant to FAR 22.1003(e) shall be submitted to the Wage and Hour Administrator by the head of the contracting activity.

522.1006 Clauses for contracts over $2,500.

The contracting officer shall insert one of the clauses at 552.222–43, Fair Labor Standards Act and Service Contract Act—Price Adjustment (Option and Multiyear Contracts), in solicitations and contracts for building services when the contract is expected to be a fixed price service contract containing the clause at FAR 52.222–41, Service Contract Act of 1965, and is a multiyear contract or is a contract with options to renew. The clauses at 552.222–43 shall be used in building service contracts in lieu of the clauses at FAR 52.222–43 except when the contract is negotiated based on certified cost and pricing data.

522.1007 Notice of intention to make a service contract.

Requests to expedite wage determinations under FAR 22.1007(e) may be made by the contracting officer directly to the Wage and Hour Administrator.

522.1008 Wage determinations and collective bargaining agreements.

For the purposes of this subpart, the agency labor advisor will be legal counsel.

522.1011 Hearings.

Requests for hearings under FAR 22.1011, will be made by the contracting officer through the head of the contracting activity to the Administrator, Wage and Hour Division, Employment Standard Administration, U.S. Department of Labor, Washington, DC 20210. All such requests shall be coordinated with the appropriate legal counsel.

Subpart 522.13—Special Disabled and Vietnam Era Veterans

522.1303 Waivers.

Requests for the waiver provided for in FAR 22.1303 will be proposed by the contracting officer and submitted through the head of the contracting activity to the Administrator for concurrence. After concurrence the

waiver will be submitted to the Director of OFCCP for approval.

522.1306 Complaint procedures.

Within GSA complaints as to the administration of the Act will be forwarded by the contracting officer directly to the Veteran's Employment Service.

Subpart 522.14—Employment of the Handicapped

522.1403 Waivers.

Requests for the waiver provided for in FAR 22.1403 will be proposed by the contracting officer and submitted through the head of the contracting activity to the Administrator for concurrence. After concurrence the waiver will be submitted to the Director of OFCCP for approval.

522.1406 Complaint procedures.

Complaints as to the administration of the Act will be forwarded by the contracting officer directly to the Director, OFCCP.

PART 523—ENVIRONMENT, CONSERVATION, AND OCCUPATIONAL SAFETY

Subpart 523.3—Hazardous Materials Identification and Material Safety Data

523.303 Contract clause.
523.370 Solicitation provision.

Authority: 40 U.S.C. 486(c).

Subpart 523.3—Hazardous Materials Identification and Material Safety Data

523.303 Contract clause.

The contracting officer shall insert the clause at 552.223–70, Hazardous Substances, in solicitations and contracts for packaged items subject to the Federal Hazardous Substances Act and the Hazardous Materials Transportation Act.

523.370 Solicitation provision.

The contracting office shall insert the provision at 552.223–71, Hazardous Material Information, in solicitations including small purchases, which involve the shipment of hazardous materials on an f.o.b. origin basis.

PART 524—PROTECTION OF PRIVACY AND FREEDOM OF INFORMATION

Subpart 524.1—Protection of Individual Privacy

524.103 Procedures.

Subpart 524.2—Freedom of Information Act

524.202 Policy.

Authority: 40 U.S.C. 486(c).

Subpart 524.1—Protection of Individual Privacy

524.103 Procedures.

The GSA regulations applicable to FAR 24.103 are in 41 CFR 105–64 and the GSA Privacy Act Program (OAD P 1878.8). Refer to these regulations when contracting for the design, development, or operation of a system of records on individuals.

Subpart 524.2—Freedom of Information Act

524.202 Policy.

See 41 CFR 105–60 and the Freedom of Information Act (ADM 1035.11), procedures, for requirements related to making records available under the Freedom of Information Act covered in FAR 24.202.

PART 525—FOREIGN ACQUISITION

Subpart 525.1—Buy American Act—Supplies

525.105 Evaluating offers.
525.105–70 Evaluating offers—Hand and measuring tools for other than the Department of Defense.
525.105–71 Procurement of hand and measuring tools for the Department of Defense.
525.105–72 Procurement of stainless steel flatware for the Department of Defense.
525.108 Excepted articles, materials, and supplies.
525.108–70 Determination of nonavailability.

Subpart 525.3—Balance of Payments Program

525.302–70 Procurements for the Agency for International Development (AID).
525.304 Excess and near-excess foreign currencies.
525.370 Exceptions.
525.371 Restricted solicitation.

Subpart 525.4—Purchases Under the Trade Agreements Act of 1979

525.401 Definitions.
525.402 Policy.
525.402–70 Application of dollar threshold.
525.402–71 Delegation of limited waiver authority.
525.407 Solicitation provisions and contract clauses.

Authority: 40 U.S.C. 486(c).

Subpart 525.1—Buy American Act—Supplies

525.105 Evaluating offers.

(a) Proposed awards requiring the approval of the head of the agency, pursuant to FAR 25.105, shall be submitted to the head of the contracting activity or his/her designee together with a statement of facts containing the following information:

(1) Description of the item(s), including unit and quantity.

(2) Estimated cost.

(3) Statement as to whether duty is included in the estimated cost and, if not, the reasons for exclusion.

(4) Transportation costs for delivery to destination if the item is to be procured f.o.b. origin.

(5) Country of origin.

(6) Name and address of proposed contractor(s), if available.

(7) Brief statement as to necessity for procurement.

(8) Reasons why an award to a small business concern or labor surplus area concern would not be unreasonable as to cost or inconsistent with the public interest, when an award for more than $250,000 to a domestic concern would be made if the 12 percent factor is applied, but would not be made if the 6 percent factor is applied.

(9) Reasons for recommending rejection of an acceptable low foreign bid to protect essential national security interests, or rejection of any bid or proposal for other reasons of national interest, when the Trade Agreements Act of 1979 is not applicable.

(b) With the exception of circumstances described in (a)(8), before rejection of offered prices under paragraph (a) of this section, for reasons of the national interest not described or referred to in Executive Order 10582, as amended, the head of the contracting activity or his/her designee shall obtain advice from the Director, Federal Emergency Management Agency, and apprise the Executive Office of the President, Office of Management and Budget, of the facts in the matter.

525.105–70 Evaluating offers—Hand and measuring tools for other than the Department of Defense.

(a) *Definition.* "Hand and measuring tools" are Groups 51 and 52, in Cataloging Handbook H2–1, Federal Supply Classification, Part I, Groups and Classes, published by the Defense Logistics Agency, Defense Logistics Services Center, Battle Creek, Michigan.

(b) *Solicitation provision.* The contracting officer shall insert the clause in 552.225–70, Buy America Act, Hand and Measuring Tools, in solicitations and contracts for the acquisition of hand and measuring tools for other than the Department of Defense requirements..

(c) *GSA Appropriation Act restrictions.* Joint Resolution, H.J. 413, makes GSA appropriations subject to H.R. 4139 as passed by the House of Representatives on October 27, 1983. Section 506 of H.R. 4139 continues the Congressional policy contained in previous GSA Appropriations Acts that requires GSA purchases of hand and

measuring tools be from domestic sources or be made in accordance with procedures prescribed by 32 CFR 6–104.4(b) of the Armed Services Procurement Regulation (now the Defense Acquisition Regulation) as such regulation existed on June 15, 1970, and further provides that a factor of 75 percent in lieu of 50 percent shall be used for evaluating foreign source end products in 32 CFR 6–104.4(b)

(d) *Offer evaluation procedures.* Offers and proposals for hand and measuring tools shall be evaluated in accordance with the following procedures which are adaptations of DAR 32 CFR 6–104.4(b)

(1) Offers shall be evaluated to give preference to domestic bids. Offers offering end products manufactured in Canada shall be evaluated on the same basis as bids offering domestic end products after applicable duty is included for evaluation purposes, whether or not a duty free entry certificate is issued.

(2) Each foreign offer shall be adjusted for purposes of evaluation by either (i) excluding the duty from the foreign offer and adding 75 percent of the offer (exclusive of duty) to the remainder, or (ii) by adding to the foreign offer (inclusive of duty) a factor of 6 percent of that offer, whichever results in the greater evaluated price.

(3) A 12 percent factor shall be used instead of the 6 percent factor, if (i) the firm submitting the low acceptable domestic offer is a small business or a labor surplus area concern, or both, and (ii) any contract award to a domestic concern if the 12 percent factor is applied, but would not be made if the 6 percent or 75 percent factor is applied, the matter shall be submitted to the head of the contracting activity for a decision as to whether the award to the small business or labor surplus area concern would involve unreasonable cost or inconsistency with the public interest.

(4) If the foregoing results in a tie between a foreign offer as evaluated and a domestic offer, award shall be made on the domestic offer. When more than one line item is offered in response to a solicitation, the appropriate factor shall be applied on an item-by-item basis, except that the factor may be applied to a specific group of items if the solicitation specifically designates that award may be made on a specific group of items.

525.105–71 Procurement of hand and measuring tools for the Department of Defense.

(a) *DOD Appropriations Act restrictions.* Congressional policy, as expressed in the current DOD Appropriations Act, prohibits DOD from acquiring foreign hand and measuring tools.

(b) *Solicitation provision.* The contracting officer shall insert the clause at 552.225–71, Notice of Procurement Restriction—Hand or Measuring Tools, in solicitations and contracts for the acquisition of hand or measuring tools for the Department of Defense.

525.105–72 Procurement of stainless steel flatware for the Department of Defense.

(a) *DOD Appropriations Act restrictions.* Congressional policy, as expressed in the current DOD Appropriations Act, prohibits DOD from acquiring foreign stainless steel flatware.

(b) Since the following stock items are issued almost exclusively to DOD, only domestic source end products of these stainless steel flatware items shall be procured. Also, nonstock items of stainless steel flatware purchased for DOD shall be domestic source end products.

7340–00–080–6057	7340–00–241–8171
7340–00–205–3340	7340–00–559–8357
7340–00–205–3341	7340–00–688–1055
7340–00–241–8169	7340–00–721–6316
7340–00–241–8170	7340–00–721–6971

(c) *Solicitation provision.* The contracting officer shall insert the clause in 552.225–72, Offers Must Be For Domestic Source End Products, in solicitations and contracts for the acquisition of stainless steel flatware for the Department of Defense.

525.108 Excepted articles, materials, and supplies.

525.108–70 Determination of nonavailability.

(a) Requests for determinations concerning nonavailability of domestic supplies (see FAR 25.108) shall be submitted to the head of the contracting activity or his/her designee with an appropriate statement of facts and a proposed determination. The statement of facts shall include the following information:

(1) Description of the item(s), including unit and quantity;

(2) Estimated cost, including duty, if any (show the amount of duty separately);

(3) Transportation costs for delivery to destination, if item is to be procured f.o.b. origin;

(4) Country of origin;

(5) Name and address of prospective contractor(s), if available;

(6) Brief statement as to the necessity for the procurement; and

(7) Statement of effort made to procure a similar item of domestic origin or statement that there is no domestic item which can be used as a reasonable substitute.

(b) Findings and determination of nonavailability shall normally be prepared in the format shown below:

General Services Administration

Reference No.——

Findings and Determination of Nonavailability Under the Buy American Act Regarding Purchase of (insert description)

Pursuant to the provisions of the Buy American Act (41 U.S.C. 10a–d) and Executive Order 10582, December 17, 1954 (3 CFR Supp.), and by virtue of delegated authority the following findings of fact and determination are hereby made:

1. Finding (set forth a statement of facts).

2. Determination. In view of the foregoing, it is hereby determined that for the purposes of the Buy American Act (insert item description) is not mined, produced, or manufactured at the present time in the United States in sufficient and reasonably available commercial quantities and of a satisfactory quality.

Date ——————————

Signed ——————— ——————————

(End of Findings and Determination).

(c) When it has been determined that the Buy American Act is not applicable to the purchase of the end product, or to the components from which it is manufactured, the original of the determination shall be made a part of the contract file. In addition, a statement substantially as set forth at 552.225–73 shall be inserted in the applicable solicitation and contract.

Subpart 525.3—Balance of Payments Program

525.302–70 Procurements for the Agency for International Developemnt (AID).

When a contracting activity enters into contracts as the contracting agent for the Agency for International Development (AID), including contracts under the Commercial Import Program (CIP), such contracts (except those involving administrative purchases) are not governed by the policies and procedures in FAR Subpart 25.3 and Subpart 525.3 of this chapter, but shall be governed by AID policies and procedures.

525.304 Excess and near-excess foreign currencies.

When a contracting activity procures articles or services for use outside the United States for another agency it will be assumed (unless a specific notation is made on the purchase request) that use of excess or near excess foreign currencies has been considered by the requisitioning agency and that such currencies are not available.

525.370 Exceptions.

When the contracting officer has knowledge that the domestic cost of an end product or service exceeds the foreign cost by more than 50 percent of the foreign cost pursuant to the procedures in FAR 25.303, the matter shall be submitted to the head of the contracting activity or his/her designee for a determination to procure the domestic product or service. This procedure shall be followed for all Balance of Payments Program procurements over $10,000.

525.371 Restricted solicitation.

(a) Estimates of comparative delivered prices of end products or services of domestic origin versus foreign origin normally will not be made by the contracting activities. Such cost estimates will have been made by the requisitioning offices prior to the submission of purchase requests. Specific written evidence from the requisitioning office concerning such estimates is not required. Accordingly, procurements made directly for other agencies of items to be used outside the United States shall be made under the Balance of Payments Program, except for AID (including Commercial Import Program) items.

(b) Prior to procuring any item for GSA use outside the United States. cost estimates shall be made before restricting to U.S. end products or services.

Subpart 525.4—Purchases Under the Trade Agreements Act of 1979

525.401 Definitions.

"Product," means a stock number or other method of identification such as National Stock Number (NSN), a non-NSN, part number or Special Item Number (SIN) that identifies a line item in a solicitation. Where two or more line items in a solicitation have identical stock numbers or other identification, such line items shall be deemed to constitute a single "product" for purposes of determining the applicability of the Trade Agreements Act.

525.402 Policy.

525.402-70 Application of dollar threshold.

(a) Where two or more line items in a solicitation have identical stock numbers or other identification, constituting a single product, the dollar threshold specified by the U.S. Trade Representative is applicable to the total of all line items for the single product.

(b) When General Services Administration multiple award schedule contracts are involved, the dollar threshold specified by the U.S. Trade Representative, is applicable to the total estimated dollar value of all orders placed under contracts for eligible products under a Special Item Number during the contract period, not the dollar value of individual products on a purchase/delivery order placed against the schedule contract. Therefore, when schedules are published, they must indicate the Special Item Numbers subject to the Buy American Act, the Balance of Payments evaluation procedures, and the requirements of the Trade Agreements Act.

525.402-71 Delegation of limited waiver authority.

(a) Section 302 (a)(1) of the Act restricts the purchase of eligible products to those originating in the United States or a designated country absent a waiver by the U.S. Trade Representative. The U.S. Trade Representative has authorized the Administrator of General Services to waive, under specified circumstances and on a case-by-case basis, the purchasing prohibition provided in Section 302(a)(1) of the Trade Agreements Act of 1979 (the Act).

(b) The Administrator of General Services has authorized the heads of contracting activities, as defined by 501.206, to grant such waivers in cases where:

(1) In response to a solicitation, there are no responsive bids or acceptable offers received from responsible offerors of products from the U.S. or countries designated by section 302(b)(2) of the Act, or

(2) Offerors of products from the U.S. or such designated countries do not offer a sufficient quantity of the product being sought to meet the Government's requirements as specified in the solicitation.

(c) When the head of the contracting activity grants such a waiver, a copy of the waiver will be furnished to the Assistant Administrator for Acquisition Policy for subsequent transmittal to the U.S. Trade Representative.

525.407 Solicitation provisions and contract clauses.

The contracting officer shall insert the provision at 552.225-74, Eligible Products from Non-Designated Countries—Waiver, in all solicitations subject to the Trade Agreements Act. This clause shall be used in concert with the required clauses cited in FAR 25.407.

SUBCHAPTER E—GENERAL CONTRACTING REQUIREMENTS

PART 527—PATENTS, DATA, AND COPYRIGHTS [RESERVED]

PART 528—BONDS AND INSURANCE

Subpart 528.1—Bonds

Sec.

528.101 Bid guarantee.
528.101-1 Policy on use.
528.101-3 Contract clause.
528.101-70 Failure to provide bid guarantee.
528.102 Performance and payment bonds for construction contracts.
528.102-1 General.
528.102-3 Solicitation requirements.
528.103 Performance and payment bonds for other than construction contracts.
528.103-2 Performance bonds.
528.103-3 Payment bonds.
528.106 Administration.
528.106-70 Execution and administration of bonds.

Subpart 528.2—Sureties

528.200 Scope of subpart.
528.202 Acceptable sureties.
528.202-1 Corporate sureties.
528.202-2 Individual sureties.
528.202-70 Acceptability of bonds and sureties.
528.202-71 Assets pledged to support bonds.
528.203 Options in lieu of sureties.
528.270 Exclusion of individual sureties.

Subpart 528.3—Insurance

528.301 Policy.
528.310 Contract clause for work on a Government installation.

Authority: 40 U.S.C. 486(c).

Subpart 528.1—Bonds

528.101 Bid guarantee.

528.101-1 Policy on use.

(a) *Construction contracts.*

(1) Bid guarantees shall not be required for contracts awarded under section 8(a) of the Small Business Act as amended (15 U.S.C. 637(a)). Refer to FAR 19.809(b)(5) for guidance on bonding requirements applicable to contracts to be awarded under the section 8(a) program.

(2) Bid guarantees shall be required for construction contracts (except section 8(a) contracts) that do not exceed $25,000 when it is determined that a performance bond is essential to protect the Government as provided in 528.102-1.

(b) *Building service contracts.* Bid guarantees shall be required for building service contracts in excess of $25,000 when it is determined that a performance bond is essential to protect the interests of the Government as provided in FAR 28.103-2.

(c) *All other contracts.* Refer to FAR 28.101 for additional guidance on the use of bid guarantees.

528.101-3 Contract clause.

(a) The contracting officer shall insert a clause substantially the same as the clause at 552.228-70, Bid Guarantee and Bonds, in solicitations and contracts when a construction contract or a contract for dismantling, demolition, or removal of improvements is contemplated and bid guarantee requirement is included.

(b) The contracting officer shall insert a clause substantially the same as the clause at 552.228-71, Bid Guarantee, in solicitations and contracts when a building service or other service contract is contemplated and a bid guarantee requirement is to be included.

528.101-70 Failure to provide bid guarantee.

Where a request for proposals requires support by a bid guarantee and an offeror does not comply, the proposal shall not be rejected because nonresponsiveness is not a criterion for negotiated procurements. During negotiations, deficiencies in a proposal in the competitive range, such as the failure to submit a bid guarantee, may be remedied by the offeror in a revised proposal. (See FAR Subpart 15.6.)

528.102 Performance and payment bonds for construction contracts.

528.102-1 General.

(a) The performance and payment bond requirements in FAR 28.102-1 are applicable to contracts awarded under section 8(a)(2) of the Small Business Act unless the bonding requirement has been waived by SBA under section 8(a)(2) of the Small Business Act as amended (15 U.S.C. 637(a)(2); see section 3 of Pub. L. 98-47 of July 13, 1983).

(b) Performance and/or payment bonds may be required on a case-by-case basis for construction contracts that do not exceed $25,000 if a written determination is made by the contracting officer, that such a requirement is in the best interest of the Government. Such determinations must be approved at a level above the contracting officer.

(c) Furnishing performance and payment bonds shall be required in the solicitation, as prescribed in 528.102-3.

528.102-3 Solicitation requirements.

The contracting officer shall insert a clause substantially the same as the clause at 552.228-70, Bid Guarantee and Bonds, in solicitations and contracts when a performance and payment is included.

528.103 Performance and payment bonds for other than construction contracts.

528.103-2 Performance bonds.

(a) Performance bonds may be required on a case-by-case basis for building service contracts in excess of $25,000, if a written determination is made by the contracting officer, that it is essential to the best interest of the Government. Such determinations must be approved at a level above the contracting officer.

(b) Performance bonds shall not be required for building service contracts awarded under section 8(a) of the Small Business Act as amended (15 U.S.C. 637(a)), or contracts awarded to workshops for the blind or other severely handicapped under the Wagner O'Day Act, as amended (41 U.S.C. 46-48c).

(c) The penal amount of the performance bond generally shall be 10 to 50 percent of the contract price for the term of the contract at the time of the award. The contracting officer shall consider the circumstances and determine the amount of the performance bond on a case-by-case basis.

(d) The contracting officer shall insert a clause substantially the same as the clause at 552.228-72, Performance Bond, in solicitations and contracts when a performance bond requirement is included.

528.103-3 Payment bonds.

(a) Payment bonds may be required for other than construction contracts when the head of the contracting activity determines, in accordance with FAR 28.103-3, that such a requirement is in the best interest of the Government.

(b) The penal amount of the payment bond generally shall be 10 to 50 percent of the contract price for the term of the contract at the time of award. The contracting officer shall consider the circumstances and determine the amount of the payment bond on a case-by-case basis.

(c) The contracting officer shall insert a clause substantially the same as the clause at 552.228-73, Performance and Payment Bonds, in solicitations and contracts when a performance and payment bond requirement is included.

528.106 Administration.

528.106-70 Execution and administration of bonds.

(a) Bid guarantees, other than corporate or individual sureties, shall be returned to unsuccessful offerors as soon as practicable after the opening of bids.

(b) A bid guarantee, other than corporate or individual sureties, submitted by a successful offeror shall be retained until the offeror has executed all contractual documents as may be required and has submitted as acceptable performance bond or performance and payment bonds, if required.

(c) When a performance or payment bond or acceptable alternate is not furnished within the period specified by the terms of the contract, the contract may be terminated for default. (See FAR Subpart 49.4.)

(d) A surety is legally liable in the event the contractor fails to fulfill contractual obligations. To avoid the possibility of releasing a surety from liability for a contractor's default, it is necessary to furnish the surety with a copy of any notice sent to the contractor in addition to the default letter. When the Government terminates a contract for default, it is entitled to recover the excess costs involved in having the work completed. The surety must be advised of the default; they may elect to fulfill their obligations by obtaining another contractor to perform the balance of the contract work or they may reimburse the Government for any excess costs the Government incurs.

(e) A performance or payment guarantee, other than corporate or individual sureties, shall be returned to the contractor upon completing the obligations for which the guarantee was submitted.

Subpart 528.2—Sureties

528.200 Scope of subpart.

This subpart supplements FAR Subpart 28.2, Sureties, and sets forth additional guidance on the requirements applicable to bonds furnished.

528.202 Acceptable sureties.

528.202-1 Corporate sureties.

(a) The current edition of Treasury Department Circular 570 shall be prominently displayed in bid opening rooms, in GSA Business Service Centers, and in all places where bid forms and information are regularly available. Copies should be made available to officials having a need to know.

(b) Corporate surety bonds must be manually signed by the Attorney-in-Fact or officer of the surety company. The corporate seal of the surety company should be affixed. Failure of the surety to affix the seal may be waived as a minor informality. (See B-184120, July 2, 1975, 75-2 CPD 9.) Copies of the powers

of attorney from the surety company authorizing the Attorney-in-Fact to excute bonds may be requested by the contracting officer.

(c) Where an invitation for bid requires a bid be supported by a bid guarantee and an unacceptable corporate surety is submitted in fulfillment of the requirement, the bid shall be rejected as nonresponsive. A bidder shall not be permitted to substitute an acceptable surety after bid opening. (See B–198687, May 23, 1980, 80–1 CPD 360.)

(d) A contractor submitting a performance or payment bond executed by an unacceptable corporate surety in satisfaction of a performance or payment bond requirement may be permitted to substitute an acceptable surety for a surety previously determined to be unacceptable.

528.202–2 Individual sureties.

(a) In addition to the requirements of FAR 28.202–2, the following criteria shall be considered when making determinations regarding the acceptability of individual sureties:

(1) If Standard Form 28, Affidavit of Individual Surety (SF 28) is not executed by each individual surety and submitted with the offer, the contracting officer must request a SF 28. The SF 28 shall be reviewed to ascertain the net worth of the proposed individual surety. (See Block 7, line g. of SF 28.) However, the contracting officer should consider all relevant information furnished by the surety on SF 28 and make an independent determination of the surety's net worth based upon the contracting officer's best judgment.

(2) The number and amount of other bonds for which the surety is committed and the status of the contracts with which the bonds were furnished must be considered. For example: The contracting officer may deduct the total amount of other bonds which the surety executed (Block 10 of SF 28) from the net worth figure entered in Block 7, line g, to arrive at a realistic net worth. Alternatively, the contracting officer may deduct nothing or only a portion of the amount entered in Block 10 based upon the degree of completion of the contracts on which the bonds were provided.

(b) If the contracting officer is unable to make a determination of net worth from the SF 28, the individual surety shall be required to furnish additional information. Generally, supplementary information shall not be required unless the SF 28 is incomplete or improperly filled out or unless the contracting officer has reason to believe the surety's statement on the SF 28 does not reflect the true net worth.

(c) If the contracting officer determines that either surety's net worth is not equal to the penal amount of the bond, the bid of the firm utilizing the sureties shall be rejected as non-responsible. A finding of bidder nonresponsibility pursuant to FAR 9.105–2, based on unacceptability of an individual surety need not be referred to the Small Business Administration for a competency review. (See 61 Comp. Gen. 456 (1982).)

(d) Under certain circumstances, such as when there is a record indicating a continuing pattern among certain individual sureties not to disclose outstanding bond obligations, the offeror's sureties may be rejected as unacceptable. (See 61 Comp. Gen. 592 (1982).)

(e) In a formally advertised procurement (including restricted advertising) an offeror submitting a bid guarantee executed by an unacceptable surety may not subsitute an acceptable individual surety after bid opening. This holds even though the surety's acceptability is a matter of bidder responsibility. (See 61 Comp. Gen. 456 (1982).) When a negotiated procurement is involved, such a deficiency may be remedied by the offeror in a revised proposal.

(f) Any individual surety executing a bond furnished GSA cannot have been excluded from acting as an individual surety by the Assistant Administrator for Acquisition Policy. (See 528.270.) Any bid submitted in response to an invitation for bid which is accompanied by a bid guarantee backed by an individual surety who has been excluded shall be rejected as nonresponsive. When a negotiated procurement is involved, such a deficiency may be remedied by the offeror in a revised proposal.

(g) A contractor submitting an unacceptable individual surety in satisfaction of a performance or payment bond requirement may be permitted to substitute an acceptable surety for a surety previously determined to be unacceptable.

528.202–70 Acceptability of bonds and sureties.

(a) Every bond furnished in connection with a procurement must be supported by corporate or individual sureties or by other acceptable security such as postal money orders, certified check, cashier's check, irrevocable letter of credit or, in accordance with Treasury Department regulations, certain bonds or notes of the United States. Upon receipt of a required bond, the contracting officer shall ascertain the acceptability of the surety.

(b) When determining the acceptability of a bond, if there is a question of validity, the contracting officer shall seek the advice of legal counsel. The contracting officer shall check the current Treasury Department circular 570 to determine acceptability.

(c) When a contracting officer has verified the acceptability of the surety on a bond, he shall so certify by placing the words "Acceptability of Bond Verified," with his signature immediately thereunder, on the bond or on a properly identified attachment. The bond shall be retained with the original of the contract. The contracting officer shall notify the contractor that the bond(s) has been accepted.

(d) Any contracting officer who becomes aware of circumstances which may serve as the basis for exclusion of an individual from acting as an individual surety on bonds submitted by offerors on GSA procurements shall refer those circumstances to the Assistant Administrator for Acquisition Policy through appropriate channels for consideration of exclusion action. (See 528.270.) However, circumstances that involve possible criminal or fraudulent activities shall first be reported to the Assistant Inspector General for Investigations in the Central Office or to the appropriate regional Inspector General for Investigations; the Office of Inspector General may conduct an investigation and when appropriate report such apparent or suspected violations to the Assistant Administrator. Referrals for consideration of exclusion action as a minimum should include:

(1) The basis for exclusion (see 528.270(b));

(2) A statement of facts;

(3) Copies of supporting documentary evidence;

(4) The individual's name and current or last known home and/or business addresses including zip codes;

(5) A statement of GSA's history with such individuals, if any; and

(6) A statement concerning any known active or potential criminal investigations or court proceedings.

528.202–71 Assets pledged to support bonds.

(a) When bid guarantees, performance and/or payment bonds are required, the solicitation clauses at 552.228–70, 552.228–71, 552.228–72, and 552.228–73 may be expanded at the contracting officer's discretion to include the clause at 552.228–74, Pledges of Assets, requiring offerors to obtain pledges of

assets from individual sureties identified in their offers, e.g., a recordable Covenant Not To Encumber or Convey Real Estate and/or commercial or government securities placed in escrow accounts in accordance with 528.203.

(b) The following format or any document substantially the same, may be attached when a surety pledges real estate on Standard Form 28, Affidavit of Individual Surety.

Covenant Not To Encumber or Convey Real Estate

I/we covenant and agree that so long as I/we shall be obligated as an individual surety on solicitation/contract No. GS——— in the amount of $——— to the United States of America whether such obligation be incurred before or after the date hereof, and until this instrument is formally released. I/we shall not make, or cause to be made, any deed of trust, mortgage, conveyance or any other instrument or agreement having the effect of a lien upon or conveyance of the real estate now owned by me/us described as follows:

(Address)

In witness whereof, I/we have hereunto affixed my/our hand(s) and seal(s) this — day of ———.

Witness:

I, ———————, a Notary Public in and for the (State), do hereby certify that ———————, party to a certain Covenant and Agreement bearing date the — day of ——— 19—, and hereunto annexed, personally appeared before me the said ——————— being personally well known to me as the person(s) who executed the said Covenant and Agreement, and acknowledged the same to be his/her act and deed.

Given under my hand and seal this — day of ——— 19—.

_____

Notary Public, State

(c) When an offeror chooses to provide an individual surety who pledges real estate as described in 528.202–71(a), the contracting officer shall arrange for the recording of the covenant in a format as prescribed above in 528.202–71(b).

528.203 Options in lieu of sureties.

Security deposited in lieu of corporate or individual sureties on bonds shall be placed in the custody of a bonded collection officer immediately after they are received except that United States bonds or notes received in the District of Columbia shall be deposited with the Treasurer of the United States as provided in FAR 28.230–1. The contracting officer shall arrange for the return of such security, or its equivalent, to the contractor when he has fulfilled all of the obligations secured by the bond in connection with which the security was deposited.

528.270 Exclusion of individual sureties.

(a) The Assistant Administrator for Acquisition Policy may exclude an individual from acting as an individual surety on bonds submitted by offerors on GSA procurements. This exclusion shall be for the purpose of protecting the Government.

(b) An individual may be excluded for any of the following causes:

(1) Failure to fulfill his/her obligation under a bond.

(2) Willful failure to disclose other bond obligations.

(3) Misrepresentation of available assets.

(4) Any other cause affecting responsibility as a surety of such serious and compelling nature as may be determined by the Assistant Administrator to warrant exclusion.

(c) Exclusion of an individual shall continue until revoked by the Assistant Administrator. An exclusion shall only be revoked upon the submission of an application, supported by documentary evidence of changed circumstances or of the elimination of the causes for which the exclusion was imposed.

(d) Prior to excluding an individual, the Assistant Administrator shall furnish the individual with a written notice stating the exclusion is being considered, setting forth the reasons for the proposed exclusion, and indicating that the individual may submit, within 30 calendar days, information in writing to explain why the exclusion should not be imposed.

(e) If the individual fails to respond to the notice of proposed exclusion within 30 calendar days of receipt of the notice, the exclusion shall be imposed. If a response is provided, the Assistant Administrator shall consider the information and issue a final decision on the matter.

(f) The Assistant Administrator shall establish and maintain a system for distributing information regarding excluded individual sureties to GSA contracting activities.

Subpart 528.3—Insurance

528.301 General.

(a) The policy stated in FAR 28.301 is based on the theory that the quantity of the Government's transactions, together with the magnitude of its resources, makes it more advantageous to the Government to carry its own risks than to have them assumed by private insurers. Exceptions to this principle exist when Government property is not under the direct control and custody of the Government, or when other special circumstances are present as indicated in FAR 28.301 and 28.306. However, when a contractor is responsible for Government property, there is no objection to requiring or permitting the contractor to carry insurance against loss of, or damage to the property, provided the Government's interests in any payments under the policy are protected and the contractor does not pass on the cost of the insurance to the Government, except as provided in FAR 28.301, i.e., when it is required by law or when it is in the best interest of the Government, and the Government's interest in any payments under the policy is protected. The need for this coverage and the extent of protection required shall be based on the circumstances in each case.

(b) Insurance requirements shall be adequate, just, and reasonable, and will be predicated on potential loss or damage (not necessarily on the value of the contract). When it is determined that insurance coverage should be required, the solicitation and resultant contract shall contain the appropriate provision prescribed in FAR 28.309, 28.310, or 28.311. Determination as to type of insurance, amount, and any related insurance requirements shall be made jointly by the contracting officer and the appropriate credit and finance office after clearance by legal counsel. All premiums or costs incurred to comply with an insurance requirement shall be paid by the contractor.

(c) Insurance policies, or endorsements thereto, shall be submitted to the contracting officer for examination, approval, and servicing.

528.310 Contract clause for work on a Government installation.

(a) The contracting officer shall insert the clause at 552.228–75, Workmen's Compensation Laws, in solicitations and contracts when the contract amount is expected to exceed the small purchase limitation and the contract will require work to be performed on Government property.

(b) The contracting officer shall insert the clause at 552.228–76, Insurance, in solicitations and contracts when the clause prescribed in FAR 52.228–5 is included and the contract amount is expected to exceed the small purchase limitation.

PART 529—TAXES

Subpart 529.4—Contract Clauses

Sec.

529.401 Domestic contracts.
529.401–70 Small purchases.

Sec.
529.401–71 Multiple award schedule contracts.
529.401–72 Contracts usable by the D.C. Government.

Authority: 40 U.S.C. 486(c).

Subpart 529.4—Contract Clauses

529.401 Domestic contracts.

529.401–70 Small purchases.

The contracting officer shall insert the clause at 552.229–70, Federal, State, and local taxes in all small purchase contracts.

529.401–71 Multiple award schedule contracts.

The contracting officer shall insert the clause 552.229–71, State and Local Taxes, in all multiple award schedule solicitations and resultant contracts (including new item introductory schedules).

529.401–72 Contracts usable by the D.C. Government.

The contracting officer shall insert the clause at 552.229–72, Federal Excise Tax—D.C. Government, in all contracts which may involve the purchase of supplies by the District of Columbia Government.

PART 530—COST ACCOUNTING STANDARDS

Subpart 530.3—CAS Contract Requirements

530.304 Waiver.

(a) Within GSA the Assistant Administrator for Acquisition Policy will be the review authority for seeking waivers to the Cost Accounting Standards (CAS) clauses in FAR 30.304(b).

(b) The approving authority for non-defense contracts in FAR 30.304(c) will be the Assistant Administrator for Acquisition Policy.

(40 U.S.C. 486(c))

PART 531—CONTRACT COST PRINCIPLES AND PROCEDURES

Subpart 531.1—Applicability

531.101 Objectives.

The Administrator has designated the Assistant Administrator for Acquisition Policy as the approval authority for deviations concerning cost principles, deviations will be considered on a case-by-case basis.

(40 U.S.C. 486(c))

PART 532—CONTRACT FINANCING

Subpart 532.1—General

Sec.
532.111 Contract clauses.

Subpart 532.4—Advance Payments

532.402 General.
532.407 Interest.
532.409 Contracting officer action.

Subpart 532.5—Progress Payments Based on Costs

532.501–2 Unusual progress payments.
532.501–70 Use of benchmarks with progress payments based on costs.
532.502–2 Contract Finance Office clearance.
532.502–3 Solicitation provisions.
532.502–4 Contract clauses.
532.502–70 Definitions.
532.502–5 Administration of Progress Payments.
532.503–6 Suspension or reduction of payments.
532.503–70 Progress payment liquidation.
532.503–71 Eligibility for progress payments.

Subpart 532.6—Contract Debts

532.601 Definitions.
532.606 Debt determination and collection.
532.606–70 Referral of delinquent debts.

Subpart 532.7—Contract Funding

532.700 Scope.
532.705 Contract clauses.
532.705–1 Clauses for contracting in advance of funds.

Subpart 532.8—Assignment of Claims

532.802 Conditions.
532.802–70 Requirements and indefinite quantity contracts.
532.805 Procedures.
532.805–70 Procedures upon receipt of notice of assignment and instrument of assignment.
532.805–71 Requirements and indefinite quantity contracts for use by more than one agency.
532.805–72 Definite quantity contracts and requirements or indefinite quantity contracts for use only by GSA.
532.806 Contract clauses.

Subpart 532.70—Payments on Construction Contracts Including Progress Payments Based on Percent of Completion

532.7000 Scope of subpart.
532.7001 Definitions.
532.7002 Policy.
532.7003 Contract clause.
532.7004 Payment monitoring and expediting.
532.7005 Certification of payment to subcontractors and suppliers.
532.7006 Processing of customary progess payments.
532.7007 Partial payments.
532.7008 Final payment.
532.7009 Consent of surety.

Authority: 40 U.S.C. 486(c).

Subpart 532.1—General

532.111 Contract clauses.

(a) The contracting officer shall insert one of the clauses at 552.232–8, Discounts for Prompt Payments, in solicitations and contracts for supplies or services in lieu of the clause at FAR 52.232–8.

(b) The contracting officer shall insert one of the clauses at 552.232–70, Payment Due Date, in solicitations and contracts. The contracting officer shall select the Alternate that is applicable to the type of supplies or services being procured.

(c) The contracting officer shall insert one of the clauses at 552.232–71, Interest on Overdue Payments, in solicitations and contracts. The contracting officer shall select the Alternate that is applicable to the type of supplies or services being procured.

(d) The contracting officer shall insert the clause at 552.232–72, Invoice Requirements, in solicitations and contracts for supplies or services which require the submission of invoices.

(e) The contracting officer shall insert the clause at 552.232–73, Method of Payment, in all solicitations and contracts for supplies and services, including construction, and in leases of real property.

Subpart 532.4—Advance Payments

532.402 General.

The findings and determinations required under FAR 32.402(e) shall be prepared by the contracting officer in cooperation with legal counsel and the Credit and Finance Branch, Region 2. The approval of the findings and determinations, along with the authorization for advance payments FAR 32.410, shall be made by the head of the contracting activity.

532.407 Interest.

The contract finance office will inform the contracting officer of the interest rate to be charged on the unliquidated balance of advance payments.

532.409 Contracting officer action.

The contracting officer shall submit for review and approval all the decisions required by FAR 32.4 to the head of the contracting activity.

Subpart 532.5—Progress Payments Based on Costs

532.501–2 Unusual progress payments.

The head of the contracting activity shall approve or disapprove requests for "unusual" progress payments on a case-by-case basis.

532.501–70 Use of benchmarks with progress payments based on costs.

In unusual circumstances it may be desirable for progress payments based on costs to provide for the achievement of specified benchmarks prior to the receipt of progress payments, when payments prior to the achievement of such benchmarks are not in the best interest of the Government. For example, such a benchmark might be the submission and acceptance of a preproduction or pilot model.

(a) The making of progress payments based on cost under any individual contract or class of contracts may be conditioned, in unusual circumstances, upon the achievement of specified benchmarks during the performance of the contract when the head of the contracting activity determines in writing based on all relevant facts, that the use of benchmarks is in the best interest of the Government. When such a determination has been made, an appropriate provision establishing one or more such benchmarks shall be included in the solicitation and each resulting contract.

(b) Benchmarks may not be used in such a manner that their effect is to convert progress payments based on costs into progress payments based on a percentage or stage of completion.

532.502–2 Contract Finance Office clearance.

(a) *Assistance in development of financial provisions.* Appropriate financial provisions shall be developed and used in accordance with FAR Part 32 and this Part 532. The contract finance office shall, upon request, provide technical advice and assistance in the development of all financial aspects of solicitations and resultant contracts. In adddition, advice may be requested by the contracting activity as to the adequacy of proposed contracts containing standard financial provisions.

(b) *Clearances.* Solicitations and contracts involving nonstandard financial provisions shall be forwarded to the contract finance office for review during the procurement process. The review shall be made prior to issuance of the solicitation. In cases of proposed additions, deletions, or other modification regarding standard financial provisions, applicable deviation procedures shall be followed.

(c) *Action by finance office.* When a matter is referred to the contract finance office for review or clearance, that office shall immediately notify the contracting officer as to the sufficiency of the financial provisions. If inadequate or improper financial provisions are proposed, the deficiencies will be explained together with the recommended remedial action which must be taken.

(d) *Contract financing office clearance.* The contract finance office clearance required by FAR 32.502–2 shall be the responsibility of the Director of Finance or the regional finance division director.

532.502–3 Solicitation provisions.

When the notice set forth in FAR 532.502–3 (a) or (b) is included in a solicitation, the notice shall include the solicitation provision set forth in 552.232–74, Progress Payments, as an additional part thereof.

532.502–4 Contract clauses.

The contracting officer shall select the appropriate progress payment clause to be used in a particular contract after coordinating the matter with appropriate legal counsel.

532.502–70 Definitions.

As used in this subpart the following terms shall have the meanings set forth below:

(a) "Financial provisions" means provisions for payments (generally), partial payments, progress payments, advance payments, insurance provisions, or other financial terms and conditions contained in, or proposed to be included in a solicitation or a resultant contract.

(b) "Standard financial provisions" means financial provisions which have been formally prescribed by the FAR or GSAR.

(c) "Nonstandard financial provisions" means financial provisions (or proposed additions, deletions, or other modifications with respect to standard financial provisions) which have not been formally prescribed or authorized as stated in the definition of Standard Financial Provisions.

(d) "Contract finance office" means the Director of Finance or the Regional Director, Finance Division for regional contracts.

532.503–5 Administration of progress payments.

The contract finance office shall establish adequate administrative and fiscal procedures to ensure the accomplishment of the fiscal aspects of FAR 32.503–5. The contract finance office shall promptly report to the contracting officer the date and amount of each progress payment to a contractor and shall provide the contracting officer with written recommendations whenever findings are made which warrant action by the Government.

532.503–6 Suspension or reduction of payments.

Action recommended by the contracting officer under FAR 32.503–6 shall be submitted to the head of the contracting activity for approval after coordination with the appropriate legal counsel. Upon approval the contracting officer shall direct the contract finance office responsible for processing payments to suspend or reduce payments.

532.503–70 Progress payment liquidation.

Recovery at rates lower than those specified in paragraph (b) of the clause in FAR 52.232–16, may be made only with the approval of the head of the contracting activity after coordination with the contract finance office. Upon approval the contracting officer shall direct the contract finance office responsible for processing payment of the lower rate.

532.503–71 Eligibility of progress payments.

(a) Contracting officers shall determine the eligibility of contractors or prospective contractors to receive progress payments. The contracting officer shall request advice and assistance from the Credit and Finance Branch, Finance Division (Region 2), when making a determination regarding progress payments. The determination shall be approved by the head of the contracting activity. The contractor or prospective contractor, and the contract finance office shall be notified of the eligibility. Contract files shall include appropriate documentation to support the determination.

(b) To be eligible to receive a progress payment, a contractor or prospective contractor must:

(1) Have submitted a written request;

(2) Have been found responsible under the provision of FAR Subparts 9.1 and 32.5; and

(3) have an accounting system and controls adequate for the proper administration of the progress payments, as described in FAR 32.503–3.

Subpart 532.6—Contract Debts

532.601 Definitions.

(a) "Responsible official" as used in this subpart means the contracting officer. However, the contract finance office is responsible for the administration of debt collection under the Accounting Operations—Accounts Receivable and Credit and Finance

Operations, and Related Activities Handbook (PFM P 4253.1).

(b) "Debt" means an amount of money or property which has been determined by a responsible official to be owed to the United States from any person, or entity except that the terms do not apply to amounts owed by another Federal agency.

(c) "Delinquent debt" means an amount that has not been paid or otherwise collected by the date specified (usually 30 days) in the contracting officer's initial written demand for payment (i.e., final decision letter).

532.606 Debt determination and collection.

532.606-70 Referral of delinquent debts.

(a) When the contracting officer determines that a debt in excess of $100 is delinquent, the contracting officer shall forward notification of the delinquent debt to the applicable regional finance office for collection and possible forwarding to a credit reporting agency.

(b) If the contractor appeals the contracting officer's demand for payment pursuant to the Disputes clause of its contract, the contracting officer shall advise the Finance Office to suspend collection efforts pending resolution of the dispute.

Subpart 532.7—Contract Funding

532.700 Scope.

GSA fiscal regulations are contained in the Budget Administration Handbook (PFM P 4220.1), Accounting Classification Handbook (PFM P 4240.1B), and Accounting Operations—Voucher Examination, Payment Handbook (PFM P 4252.1).

532.705 Contract clauses.

532.705-1 Clauses for contracting in advance of funds.

The contracting officer shall insert the clauses at 552.232-18, Availability of Funds, in solicitations and contracts which include option provisions, will be chargeable to funds of more than one fiscal year, and the contract action will be initiated before funds are available.

Subpart 532.8—Assignment of Claims

532.802 Conditions.

532.802-70 Requirements and indefinite quantity contracts.

When more than one agency is making payments under a requirements or indefinite quantity contract, it is necessary to restrict assignments of claims to individual orders placed thereunder in order to prevent confusion and delay in making payment. Thus, assignments shall be limited to each particular purchase order amounting to $1,000 or more. (See FAR 32.806(a)(1).) This limitation is non applicable in connection with requirements and indefinite quantity contracts under the sole administrative control of GSA.

532.805 Procedures.

532.805-70 Procedures upon receipt of notice of assignment and instrument of assignment.

When complying with the procedures set forth in FAR 32.805 regarding the acknowledgement of an assignment or reassignment of claims in proper form, the contracting officer shall at the same time notify the contractor (assignor) that all future invoices or other requests for payment under the contract shall specify the name and address of the assignee and include a notation that payments due thereunder have been duly assigned.

532.805-71 Requirements and indefinite quantity contracts for use by more than one agency.

Upon receipt of a notice of assignment together with a true copy of the instrument of assignment by the GSA office that issued the purchase order under the contract, the appropriate ordering officer shall:
